UNITED STATES DEPARTMENT OF THE INTERIOR

WASHINGTON, D. C. 20240

Secretary of the Interior Cecil D. Andrus

Office of Hearings and Appeals -- Ruth R. Banks, Director

Office of the Solicitor --------- (Vacancy), Solicitor

INDEX-DIGEST

January 1975--December 1979

This index-digest covers all published and important unpublished decisions and opinions of the Department of the Interior for the period from January 1, 1975, through December 31, 1979, rendered in the Office of Hearings and Appeals, Ballston Towers, Building No. 3, 4015 Wilson Boulevard, Arlington, VA 22203, and in the Office of the Solicitor, Interior Building, 18th and C Streets, N.W., Washington, D. C. 20240.

Copies of this volume may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Editor's Note: The headnotes in this volume have been sorted by a computer. Editorial changes have been made to allow for grouping of the headnotes where they were similar and/or identical to headnotes from two or more decisions.

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402

Freeman Coal Mining Co., 3 IBMA 434, 81 I.D. 723, 1974-1975 OSHD par. 19,177 (1974); overruled in part, Zeigler Coal Co., 7 IBMA 280, 84 I.D. 127 (1977).

Fults, Bill, 61 I.D. 437 (1905); overruled, 69 I.D. 181 (1962).

Glassford, A. W., *et al.*, 56 I.D. 88 (1937); overruled to extent inconsistent, Connell, Emily K., A-29176, 70 I.D. 159 (1963).

Gray, Eleanor A., *et al.*, A-28710 (May 18, 1962); vacated as to Claim No. 4, A-28710 (Supp.) (May 7, 1964).

Hagood, L. N., *et al.*, 65 I.D. 405 (1958); is overruled, 77 I.D. 166 (1970).

Holbeck, Halvor F., A-30376 (Dec. 2, 1965); overruled, 79 I.D. 416 (1972).

Keating Gold Mining Co., Montana Power Co., Transferee, 52 L.D. 671 (1929); overruled in part, Arizona Public Service Co., 5 IBLA 137, 79 I.D. 67 (1972).

Kern County Land Co. (On Reconsideration), IA-0168748, IA-0170927, and IA-0170928, approved by Under Secretary Carver, Oct. 25, 1965; will not be followed to the extent that it is inconsistent with this opinion.

Land Classification State of California, A-31022 (Aug. 14, 1968) and (Jan. 23, 1969); overruled to extent inconsistent, A-31022 (Oct. 14, 1969), *as amended* (Oct. 27, 1969).

Layne and Bowler Export Corp., IBCA-245 (Jan. 18, 1961); 68 I.D. 33, overruled, insofar as it conflicts with Schweigert, Inc. *v.* United States, Ct. Cl. No. 26-66 (Dec. 15, 1967), and Galland-Henning Manufacturing Co., IBCA-534-12-65 (Mar. 29, 1968).

Liability of Indian Tribes for State Taxes Imposed on Royalty Received from Oil and Gas Leases, 58 I.D. 535 (1943); superseded to extent it is inconsistent, Solicitor's Opinion -- Tax Status of the Production of Oil and Gas from Leases of the Ft. Peck Tribal Lands Under the 1938 Mineral Leasing Act, M-36896, 84 I.D. 905 (1977).

Liss, Merwin E., Cumberland & Allegheny Gas Co., 67 I.D. 385 (1960); is overruled, 80 I.D. 395 (1973).

Luse, Jeanette L., *et al.*, 61 I.D. 103 (1953); distinguished, Richfield Oil Corp., 71 I.D. 243 (1964).

Manzonie, John and Adellie, I.G.D. 615; distinguished A-29334 (July 26, 1963).

Mead, Robert A., 61 I.D. 111 (1955); overruled, Jones-O'Brien, Inc., 85 I.D. 89 (1978).

Merritt-Chapman & Scott Corp., IBCA-257 (June 22, 1961); distinguished, IBCA-274 (Sept. 15, 1961).

Mikesell, Henry D., A-24112 (Mar. 11, 1946); *rehearing denied* (June 20, 1946); overruled to extent inconsistent, 70 I.D. 149 (1963).

Miller, Duncan, A-29760 (Sept. 18, 1963); overruled, 6 IBLA 216, 79 I.D. 416 (1972).

Miller, Duncan, A-30742 (Dec. 2, 1966); overruled, 6 IBLA 216, 79 I.D. 416 (1972).

Miller, Duncan, A-30722 (Apr. 14, 1967); overruled, 6 IBLA 216, 79 I.D. 416 (1972).

Miller, Duncan, 6 IBLA 283 (1972); overruled to the extent inconsistent, Jones-O'Brien, Inc., 85 I.D. 89 (1978).

Morgan, Henry S., *et al.*, 65 I.D. 369 (1958); overruled to extent inconsistent, 71 I.D. 22 (1964).

Mountain Fuel Supply Co., A-31053 (Dec. 19, 1969); overruled, 6 IBLA 216, 79 I.D. 416 (1972).

Munsey, Glen, Earnest Scott and Arnold Scott *v.*, Smitty Baker Coal Co., Inc., 1 IBMA 144, 162 (Aug. 8, 1972); 79 I.D. 501, 509, distinguished, Sewell Coal Co., 2 IBMA 80, 80 I.D. 251 (1973).

Myll, Clifton O., 71 I.D. 458 (1964); as supplemented, 71 I.D. 486 (1964), vacated, 72 I.D. 536 (1965).

National Livestock Co. and Zack Cox, I.G.D. 55 (1938); is overruled, United States *v.* Maher, Charles, *et al.*, 5 IBLA 209, 79 I.D. 109 (1972).

Naughton, Harold J., 3 IBLA 237, 78 I.D. 300 (1971); is distinguished by Burke, Kristeen J., Joe N. Melovedoff, Victor Melovedoff, 20 IBLA 162 (May 5, 1975).

Oil and Gas Privilege and License Tax, Fort Peck Reservation, Under Laws of Montana, M-36318 (Oct. 13, 1955), is *superseded* to the extent that it is *inconsistent* with, Solicitor's Opinion -- Tax Status of the Production of Oil and Gas from Leases of the Ft. Peck Tribal Lands Under the 1938 Mineral Leasing Act, M-36896, 84 I.D. 905 (1977).

Opinion of Associate Solicitor (Lands), M-34999 (Oct. 22, 1947); distinguished, Lands Eligible to be Placed Under Recordable Contracts, M-36613, 68 I.D. 433 (1961).

Opinion of Associate Solicitor for Indian Affairs -- Jurisdiction of Lands Withdrawn for the Benefit of Certain Groups of Mission Indians, Calif.--Patent of Land Under the Act of Mar. 1, 1907, M-36756 (Oct. 8, 1968); is vacated as to those parts in conflict with the decision of the Assistant Secretary of the Interior dated (Nov. 4, 1971). Authority to Issue Trust Patents for the Benefit of Certain Groups of Mission Indians of Calif., Pursuant to the Act of Mar. 1, 1907, for Parcels of Land Within the "Mission Reserve," M-36756 (Supp.) (Nov. 18, 1971).

Opinion of Chief Counsel -- Reclamation--Water Right--Proviso to Sec. 3, Act of Aug. 9, 1912, 43 L.D. 339 (1914); explained, Proposed Repayment Contracts--Kings and Kern River Projects, M-36634, 68 I.D. 372 (1961).

Opinion of Deputy Assistant Secretary (Dec. 2, 1966), affirming Oct. 27, 1966, is *superseded* to the extent that it is *inconsistent* with Solicitor's Opinion -- Tax Status of the Production of Oil and Gas from Leases of the Ft. Peck Tribal Lands Under the 1938 Mineral Leasing Act, M-36896, 84 I.D. 905 (1977).

Opinion of Secretary -- Union Oil Co. Bid on Tract No. 228, Brazos Area, Texas Offshore Sale, M-36733, 75 I.D. 147 (1968); vacated, M-36733 (Supp.), 76 I.D. 69 (1969).

Opinion of Solicitor -- Powers of Indian Tribes, 55 I.D. 14 (1934); overruled so far as inconsistent, Authority of the Bureau of Indian Affairs to Transfer to an Indian Tribe the Direction of Federal Employees Pursuant to the Provisions of R.S. § 2072, 25 U.S.C. § 48, M-36803, 77 I.D. 49 (1970).

Opinion of Solicitor -- M-28198, Jan. 8, 1936, finding, *inter alia*, that Indian title to certain lands within the Fort Yuma Reservation has been extinguished, is well founded and is affirmed by Solicitor's Opinion -- M-36886, 84 I.D. 1 (1977) -- Title to Certain Lands Within the Boundaries of the Ft. Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1885 -- but overruled by Solicitor's Opinion -- M-36908, 86 I.D. 3 (1979) -- Title to Certain Lands Within the Boundaries of the Fort Yuma (Now Called Quechan) Indian Reservation.

Opinion of Solicitor -- State of New Mexico, 55 I.D. 466 (1936), overruled to extent it applies to 1926 Executive Order to artificially developed water sources on public lands, by Solicitor's Opinion, M-36914, 86 I.D. 553 (1979), Federal Water Rights of the National Park Service, Fish & Wildlife Service, Bureau of Reclamation and the Bureau of Land Management.

Table of Overruled and Modified Cases

Opinion of Solicitor -- Indian Rights in Columbia River Reservoir, M-34326, 59 I.D. 147 (1945); overruled in part, Opinion on the Boundaries of and Status of Title to Certain Lands Within the Colville and Spokane Indian Reservations, M-36887, 84 I.D. 72 (1977).

Opinion of Solicitor -- Authority of the Department to Engage in Soil Conservation Activities, M-36047, 60 I.D. 436 (1950); will not be followed to the extent that it conflicts with these views, Soil and Moisture Conservation Program, M-36677, 72 I.D. 92 (1965).

Opinion of Solicitor -- Oil and Gas Leases on Land in the Strawberry Valley Reclamation Project, M-36051 (Dec. 7, 1950); modified, Solicitor's Opinion -- Strawberry Valley Project, Utah, M-36863, 79 I.D. 513 (1972).

Opinion of Solicitor -- Permissible Scope of an Indian Tribal Ordinance Authorizing Transaction in Intoxicating Beverages Within Area of Indian Country Subject to Jurisdiction of Such Tribe, M-36241 (Sept. 22, 1954); overruled as far as inconsistent with, Criminal Jurisdiction on the Seminole Reservations in Florida, M-36907, 85 I.D. 433 (1978).

Opinion of Solicitor -- Can a Partnership Composed Partly of Minors be a Recognized Applicant for Oil and Gas Leases, M-36463, 64 I.D. 351 (1957); overruled, Issuance of Mineral Leases to Partnerships, M-36706, 74 I.D. 165 (1967).

Opinion of Solicitor -- Construction of Recording Requirement of Sec. 4, Act of Aug. 11, 1955 (69 Stat. 681; 30 U.S.C. § 623), M-36429, 64 I.D. 393 (1957); no longer followed, Burnaugh, B. E., A-28340 (Supp.), 67 I.D. 366 (1960).

Opinion of Solicitor -- Status of Ozette Reservation, Washington, M-36456, 64 I.D. 435 (1957); will not be followed to the extent that it conflicts with these views. Status of the Ozette Indian Reservation, Washington, M-36456 (Supp.), 76 I.D. 14 (1969).

Opinion of Solicitor -- Applicability of 43 CFR 192.42(d)(2) to Beds of Non-Navigable Waters Adjacent to Public Lands, M-36512 (July 29, 1958); overruled to extent inconsistent, Connell, Emily K., A-29176, 70 I.D. 159 (1963).

Opinion of Solicitor -- Automatic Termination of Unitized Leases for Failure to Pay Rentals, M-36531 (Oct. 27, 1958) and M-36531 (Supp.) (July 20, 1959); overruled, M-36629, 69 I.D. 110 (1962).

Opinion of Deputy Solicitor -- M-36562 (Aug. 21, 1959) Authority of the Secretary of the Interior to Withdraw for a Wildlife Refuge, A Portion of the Tidal & Submerged Lands Within Three Geographical Miles of the Coast Line of Alaska; overruled by Solicitor's Opinion, M-36911, 86 I.D. 151 (1979) entitled: Effect of Public Land Order 82 on the Ownership of Coastal Submerged Lands in Northern Alaska.

Opinion of Solicitor -- Lands Eligible to be Placed Under Recordable Contracts, M-36613, 68 I.D. 433 (1961); distinguished and limited, Westlands Water District Contract, Central Valley Project, Calif.--Excess Land Limitations, M-36666, 72 I.D. 245 (1965).

Opinion of Solicitor -- Ownership of Minerals Beneath Certain Patented Lands in San Carlos Mineral Strip, M-36767 (Nov. 1, 1967); supplementing, Authority of the Secretary of the Interior to Restore Lands in San Carlos Mineral Strip to Tribal Ownership, M-36599, 69 I.D. 195 (1962).

Opinion of Solicitor -- M-36779 (Nov. 17, 1969), Appeals of Freeport Sulphur Co. & Texas Gulf Sulphur Co. and M-36841 (Nov. 9, 1971), Appeal of Amoco Production Co. are distinguished with respect to applicability of exemptions (4) & (9) of FOIA to present value estimated and overruled with respect to applicability of exemption (5) of FOIA to presale estimates; M-36918, 86 I.D. 661 (1979).

Opinion of the Solicitor -- Title to Certain Lands within the Boundaries of the Ft. Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886, 84 I.D. 1 (1977); overruled, Solicitor's Opinion, Title to Certain Lands Within the Boundaries of the Fort Yuma (Now Called Quechan) Indian Reservation, M-36908, 86 I.D. 3 (1979).

Oregon Alder-Maple Co., 1 IBLA 241 (Jan. 26, 1971); distinguished by Nordic Veneers, Inc., 3 IBLA 86 (Aug. 2, 1971).

Page, Ralph, 8 IBLA 435 (Dec. 22, 1972); explained, Rosetti, Sam, 15 IBLA 288, 81 I.D. 251 (1974).

Phebus, Clayton, 48 L.D. 128 (1921); overruled so far as in conflict, 50 L.D. 281 (1924); overruled to extent inconsistent, Connell, Emily K., A-29176, 70 I.D. 159 (1963).

Phillips, Cecil H., A-30851 (Nov. 16, 1967); overruled, Miller, Duncan, 6 IBLA 216, 79 I.D. 416 (1972).

Phillips, Vance W., 14 IBLA 79 (Dec. 11, 1973); is modified by Phillips, Vance W. and Aelisa A. Burnham, 19 IBLA 211 (Mar. 21, 1975).

Ranger Fuel Corp., 2 IBMA 163, 80 I.D. 708 (1973); set aside by Memorandum Opinion and Order Upon Reconsideration in Ranger Fuel Corp., 2 IBMA 186, 80 I.D. 604 (1973).

Rayburn, Ethel Cowgill, A-28866 (Sept. 6, 1962); is modified by Cowgill, T. T., et al., 19 IBLA 274 (Apr. 7, 1975).

Reliable Coal Corp., 1 IBMA 50, 78 I.D. 199 (1971); distinguished, Zeigler Coal Corp., 1 IBMA 71, 78 I.D. 362 (1971).

Relocation of Flathead Irrigation Project's Kerr Substation and Switchyard, M-36735 (Jan. 31, 1968); is reversed and withdrawn, M-36735 (Supp.), 83 I.D. 346 (1976).

Resources Exploration & Mining, Inc., 42 IBLA 63 (1979); modified, 43 IBLA 89 (1979).

Ross, John R., et al., A-27259 (Mar. 12, 1956); set aside in part, Ellis, Robert C. and Mary V., A-29185 (Sept. 9, 1964).

Schweite, Helena M., 14 IBLA 305 (Feb. 1, 1974); is distinguished by Burke, Kristeen J., Joe N. Melovedoff and Victor Melovedoff, 20 IBLA 162 (May 5, 1975).

Table of Overruled and Modified Cases

Shillander, H. E., A-30279 (Jan. 26, 1965); overruled, 6 IBLA 216, 79 I.D. 416 (1972).

Simpson, Robert E., A-4167 (June 22, 1970); overruled to extent inconsistent, United States *v.* Union Carbide Corp., 31 IBLA 72, 84 I.D. 309 (1977).

Smith, M. P., 51 L.D. 251 (1925); overruled, Solicitor's Opinion -- Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clause, M-36888, 84 I.D. 54 (1977).

CUMULATIVE INDEX TO SUITS FOR JUDICIAL REVIEW OF DEPARTMENTAL DECISIONS

BOTH PUBLISHED AND UNPUBLISHED

The table below is in alphabetical order according to the name of the first party identified in a decision or opinion of the Department. Beginning with January of 1955, all judicial review of departmental decisions and opinions sought by any party are included. The name of the action is listed as it appears on the court docket in each court. Where the decision of the court has been published, the citation is given; if not, the docket number and date of final action taken by the court is set out. If the court issued an opinion in a nonreported case, the fact is indicated; otherwise no opinion was written. Unless otherwise indicated, all suits were commenced in the United States District Court for the District of Columbia and, if appealed, were appealed to the United States Court of Appeals for the District of Columbia Circuit. Finally, if judicial review resulted in a further departmental decision, the departmental decision is cited.

Bill Adams, Horace Chapman, Earl Chapman, IBLA 79-236, Order dated Mar. 10, 1979, dismissing appeal for lack of jurisdiction

Bill Adams, Horace Chapman & Earl Chapman v. Cecil D. Andrus, Secretary of the Interior, Civil No. C-79-0220, D. Utah. Suit pending.

ACCOUNTS
(*See also* Funds--if included in this Index.)

GENERALLY

Land withdrawn for reclamation purposes in Imperial County, Calif., within the California Desert Conservation Area and administered by BLM under a memorandum of understanding with the Bureau of Reclamation should be regarded as "entitlement lands" in the computation of payments to be made to the county under the Act of Oct. 20, 1976, 31 U.S.C. § 1602 (1976).

County of Imperial, 40 IBLA 257 (Apr. 16, 1979)

FEES AND COMMISSIONS

"Rural Electrification Administration projects." A right-of-way holder is not excused from payment of rental under 43 CFR 2802.1-7(c), by virtue of holding an REA loan, where such holder is neither a cooperative or nonprofit organization.

Continental Telephone of the West, 35 IBLA 279 (June 2, 1978)
85 I.D. 186

PAYMENTS

Where a noncompetitive oil and gas lease is issued to the successful applicant in a drawing of simultaneously filed offers and the lessee's personal check in payment of the first year's rental is returned by the drawee bank because of uncollected funds, a decision canceling the lease will be affirmed; and the fact that the bank, after consultation with its depositor indicated that it would honor the check upon resubmission will not serve to avoid the lease cancellation where no bank error is shown.

Dale A. Spiegel, 19 IBLA 235 (Mar. 26, 1975)

Reasonable transportation costs of production from oil and gas leases from the field to the first available market are allocable to the Federal or Indian royalty interest.

Kerr-McGee Corp., 22 IBLA 124 (Sept. 26, 1975)

Appellant's submission with simultaneous oil and gas lease offer of a personal check to cover filing fees satisfied 43 CFR 3112.2-1(a)(1) despite drawee bank's subsequent refusal to honor that check, since the refusal is shown by evidence to be error on part of bank alone.

Hugh Burnett, 28 IBLA 303 (Jan. 10, 1977)

The authorized officer may not deem an oil and gas rental payment to have been timely filed, pursuant to 43 CFR 1821.2-2(g) if it is received at the State Office when it is not open to the public, even though the payment is presented on the last day in which payment can be made. Such payment is deemed to have been made on the day and hour the office is next open to business, as provided in 43 CFR 1821.2-2(d).

It is proper to deny a petition for reinstatement of an oil and gas lease terminated for failure to pay rental on time as required by sec. 31 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 188(b) (1970), where 20 minutes before the State Office closes to the public on the last day on which rental can be paid, petitioner instructs by telephone an agent who lives in the vicinity of the State Office to make the payment and the agent who alleges she was delayed by traffic and security measures makes payment after the office is closed to the public. In such circumstances the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Bob Burch, 32 IBLA 93 (Sept. 12, 1977)

Where cattle are admitted to an allotment at the beginning of the usual grazing season but prior to the issuance of a license for that season, and payment is later made by a check which recites that it is "payment in full for 1975 grazing fee," the Bureau of Land Management may properly deposit the check, allotting part of the proceeds for the grazing license for the rest of the season, and deposit the remainder of the proceeds in a suspense account pending resolution of the trespass. Such action indicates that the check was not accepted in settlement of the trespass damages, and cashing the check does not constitute an accord and satisfaction of the trespass damages.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977)
84 I.D. 475

The provision in 43 CFR 3825.1(b) that failure to pay annual rental on or before the anniversary date of a mining claim located in the Papago Indian Reservation "shall be deemed sufficient grounds for invalidating the claim" is directory, not mandatory. Where the mining claimant does not pay rental for 2 years on two claims and is 1-1/2 years late on other claims, and where he has not paid the rental prior to receiving decisions from the Bureau of Land Management holding the claims invalid, the mining claims must be held invalid.

Louis D. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

The timeliness of filing Federal tax returns and payments and of making rental payments for Federal oil and gas leases are governed by different statutes and regulations and are not the same. Receipt in the proper Bureau of Land Management office determines the timeliness of rental payment, whereas the Internal Revenue Service uses a postmark date. The postmark date is relevant in considering a Federal oil and gas lease rental only to determine if the lessee exercised reasonable diligence so as to warrant reinstatement of a lease terminated for failure to pay the rental timely.

David R. Smith and Darla L. Smith, 33 IBLA 63 (Dec. 5, 1977)

Rental payment which arrives at a BLM State Office after normal business hours, as set out in 43 CFR 1821-1(a) and (d), is properly recorded by BLM as received at 10 a.m. the next business day, *per* 43 CFR 1821.2-2(d).

Robert L. Wheeler, 33 IBLA 371 (Jan. 23, 1978)

Payment of the annual rental on an oil and gas lease is not made until a proper form of remittance is received by the appropriate office of the Bureau of Land Management.

Lloyd M. and Adelheid A. Patterson, 34 IBLA 68 (Feb. 22, 1978)

A check tendered prior to the due date of an oil and gas lease annual rental payment, which is properly dishonored by the drawee bank, does not constitute timely payment. But where return of the check results from a confirmed bank error, subsequent collection and payment of the check relates back to the time of the original tender, and payment is timely.

Annual rental payments on oil and gas leases are sent to depositories designated by the Secretary of the Treasury if their location permits the deposit to be hand carried; otherwise, the deposits are mailed to the Denver Branch of the Kansas City Federal Reserve Bank. Washington, D.C., offices of the Bureau of Land Management may send deposits to the Cash Division of the Treasury Department. All checks drawn on foreign banks or foreign branches of United States banks must be sent for deposit to the Cash Division of the Treasury Department.

An oil and gas lease rental payment check returned to the Bureau of Land Management because a Federal Reserve Bank will not accept for collection checks drawn on foreign banks, but which could be collected through the Cash Division of the Treasury Department and would be honored by the drawee bank, is not "uncollectible."

Pipeline Petroleum Corp., 34 IBLA 73 (Feb. 22, 1978)
85 I.D. 70

"Payment." Placing a check for annual rental for oil and gas leases in the mails does not constitute "payment" of annual rental. Rather, the lessee must cause the rental to be received by the office administering his leases, and, until such time as it is received, no "payment" of annual rental has occurred. Accordingly, where a check is mailed prior to the due date but does not arrive until more than 20 days after this due date, no "payment" was made prior to that time, so that the lease automatically terminated by operation of law, and the Department is without authority to consider a petition for reinstatement of the lease.

"Tender." Placing a check for annual rental for oil and gas leases in the mails does not constitute a tender of payment of annual rental, within the meaning of 43 CFR 3108.2-1(c). Rather, a lessee makes a tender of payment only when he submits payment to the BLM office administering his leases, and when BLM has the opportunity either to receive or decline it. Accordingly, placing rental in the mails does not constitute a tender of payment which would allow the Department to consider the merits of a petition for reinstatement of an oil and gas lease terminated for failure to make timely payment of annual rental.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but are only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on

increased charges due on an annual basis for the years prior to payment of such amount.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

The holder of a mining claim located within the Papago Indian Reservation under sec. 3 of the Act of June 18, 1934, 48 Stat. 984 (repealed, Act of May 27, 1955, 69 Stat. 67), is required to make the annual rental payment for the claim in advance (on or before the anniversary date of location of the claim). A decision invalidating a claim will be upheld where proceedings to void the claim are not initiated until several months after the rental due date, there is no evidence the rent was paid for the year, and appellant admits the failure to pay was an oversight.

John A. Cooley, 36 IBLA 245 (Aug. 14, 1978)

A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law and not by the action of any official if the annual rental is not paid on or before the due date. Submission of a rental check without identifying the lease number precluded the Bureau of Land Management from accepting the check as payment for the lease, and a lease is properly held to terminate in the absence of a timely identified payment of the rental.

S. Delos Champaign, 37 IBLA 377 (Nov. 6, 1978)

"Payment." A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law for failure to pay the annual rental on or before the due date. A check for rental does not constitute payment until it is received at the proper office.

Gretchen Capital, Ltd., 37 IBLA 392 (Nov. 8, 1978)

"Reasonable diligence." Where an oil and gas rental check bearing the due date of the lease is submitted a few days in advance thereof, but the check is returned by the Bureau of Land Management and thereupon a new check is promptly submitted, even if it could be considered that the lease had terminated, it would be eligible for reinstatement under 30 U.S.C. § 188(c) (1976) because there has been reasonable diligence on the part of lessee.

Lillie Belle Higgins, 38 IBLA 254 (Dec. 8, 1978)

Where checks submitted in payment of annual rental on oil and gas leases are returned by the drawee bank as uncollectible because they are postdated, and there has been no bank error, no tender or payment of annual rental has been made. In the absence of any other payment prior to the anniversary date, the leases terminate automatically by operation of law.

An oil and gas lessee who submits payment of annual rentals with checks postdated by 15 days is not reasonably diligent in attempting to make payment thereof. So doing with the expectation that negotiation of the checks will not be delayed past the anniversary date unreasonably anticipates either that BLM will withhold processing the checks until they become valid or that the drawee bank will honor them despite the postdating.

Benjamin T. Franklin, 38 IBLA 291 (Dec. 14, 1978)

ACCOUNTS--Continued

PAYMENTS--Continued

Where an offer is drawn No. 1 for a tract consisting of 39.97 acres, BLM requests payment specifically of $40 advance rental, and the offeror remits $39.97 within the 15-day period spelled out in 43 CFR 3112.4-1, the submittal of $39.97 does not constitute satisfactory payment within the ambit of that regulation.

Milton Knoll, 38 IBLA 319 (Dec. 19, 1978)

BLM does not waive its right to declare a lease expired by cashing an advance annual rental check and placing funds in an unearned account.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

It is proper for the Bureau of Land Management to refuse to accept a filing fee check accompanying drawing entry cards for simultaneous oil and gas lease offers where the check bears the figure amount of $110, the correct amount due, and the typewritten amount of "One hundred eleven and no/100."

Bertram F. Rudolph, Jr., 39 IBLA 167 (Jan. 30, 1979)

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but may be only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on increased charges for the period commencing with the date from which increased charges are established.

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

Where a lease under the Recreation and Public Purposes Act, as amended, 43 U.S.C. § 869 (1976), erroneously states the 1-year rental as being the rental for 5 years, and the lessee knew or had reason to know of the error, the error is a unilateral mistake, and the lease may be properly corrected to show the true rental, or the lease may be rescinded if appellant does not desire to be bound by the reformed agreement.

St. Scholastica Academy, 40 IBLA 175 (Apr. 3, 1979)

Land withdrawn for reclamation purposes in Imperial County, Calif., within the California Desert Conservation Area and administered by BLM under a memorandum of understanding with the Bureau of Reclamation should be regarded as "entitlement lands" in the computation of payments to be made to the county under the Act of Oct. 20, 1976, 31 U.S.C. § 1602 (1976).

County of Imperial, 40 IBLA 257 (Apr. 16, 1979)

ACCOUNTS--Continued

PAYMENTS--Continued

Where an offer is drawn No. 1 in a simultaneous oil and gas lease drawing and the offeror is notified by BLM that the rental due is $1,955, the offer will be disqualified under 43 CFR 3112.4-1 when the offeror submits a check for $1,954 within the time required, but fails to submit the $1 deficiency within the allowed time.

C. Panos, 42 IBLA 326 (Aug. 30, 1979)

Timely tender of a check which, when presented, is dishonored properly by the bank on which it is drawn does not constitute timely payment.

Caroline L. Hunt, 43 IBLA 314 (Oct. 22, 1979)

A check is a valid form of remittance for payment of an oil and gas lease filing fee and advance rental. However, it is subject to collection and final payment without cost to the Government. Where a check is returned from a bank as uncollectible, generally, the check cannot be considered as a proper tender of payment.

A check returned from a bank may be considered a tender of payment where the return of the check is shown to have resulted from a confirmed bank error, and the subsequent collection and payment of the check relates back to the time it was originally tendered to BLM. If an oil and gas lease has been canceled and applications rejected because checks have been returned from a bank and the appellant shows bank error, the case is remanded for further consideration.

Jose V. Lim, 44 IBLA 96 (Nov. 20, 1979)

REFUNDS

Where a noncompetitive oil and gas lease is canceled for failure of the lessee to make full payment of the first year's rental, the Department may return the rental pursuant to the repayment statute, 43 U.S.C. § 1374 (1970), in appropriate circumstances where the lessee has derived no benefit from the possession of the lease and there are no other factors militating against repayment.

Albert J. Piper, 27 IBLA 61 (Sept. 27, 1976)

Where a noncompetitive oil and gas lease is canceled for having been erroneously issued because the lands involved were part of an incorporated city (43 CFR 3101.1-1(a)(3) the Department may return the rentals pursuant to the repayment statute, 43 U.S.C. § 1374 (1970), in appropriate circumstances where the lessees have derived no benefit from the possession of the lease and there are no other factors militating against repayment.

Bruce Anderson, 30 IBLA 118 (May 2, 1977)

A simultaneous oil and gas lease drawing entry card containing an incorrect parcel number is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Henry A. Alker, 34 IBLA 136 (Mar. 8, 1978)

ACCOUNTS--Continued

REFUNDS--Continued

Failure to execute a lease results in forfeiture of the bid deposit by the high bidder in a competitive oil and gas lease sale.

Bernard P. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

A simultaneous oil and gas lease drawing entry card omitting the State and zip code from the offeror's address is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Robert C. Meredith, 44 IBLA 213 (Dec. 11, 1979)

ACCRETION

Where one who protests the performance and acceptance of a survey of land, identified by the cadastral engineer making the survey as public domain land, offers probative evidence that changes arose because of avulsion rather than accretion and so the land is not in fact federally owned, a hearing will be ordered to receive and consider such evidence and to ascertain the facts.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

Submerged and filled tidelands passed to the State of Alaska on the date of its admission to the Union, Jan. 3, 1959. Ownership of tidelands subsequently created by avulsive action remains in those persons or entities, including the Federal Government, who held title to the land prior to the avulsive action.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

Unsurveyed fast lands, formed by accretion to public land or to lands patented with an oil and gas reservation, riparian to a navigable river and lying within the meander lines of that navigable river, as recorded on the official plat, may be leased provided that a proper offer is received and the other relevant conditions precedent to leasing are met.

Federal law determines the legal characterization of accretions, avulsions, and relictions to land riparian to navigable bodies of water, where title to the land or reserved interests in the land remains in the United States.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

ACQUIRED LANDS

An offer for an oil and gas lease under the Mineral Leasing Act for Acquired Lands may properly be rejected where there is uncertainty regarding the title to the oil and gas deposits.

Shell Oil Co., 20 IBLA 292 (May 27, 1975)

ACQUIRED LANDS--Continued

Patented lands which are subsequently acquired by the United States are not, by mere force of reacquisition, open to disposal under the public land laws. In the absence of specific statutory direction to the contrary, the acquired land is not subject to location under the mining laws.

J. C. Babcock, J. G. Shipp, 25 IBLA 316 (June 30, 1976)

Patented lands which are subsequently acquired by the United States for the National Park Service are not, by mere force of acquisition, open to disposal under the public land laws. In the absence of specific statutory direction to the contrary, the acquired land is not subject to location under the mining laws. 30 U.S.C. § 22 (1970).

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged coastal lands, as set forth in 43 CFR 3101.2-1(g).

Impel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

Lands which were acquired for development of their uranium deposits are not subject to oil and gas leasing under the Mineral Leasing Act for Acquired Lands.

Esdras K. Hartley, 44 IBLA 66 (Nov. 20, 1979)

ACT OF APRIL 24, 1820

The Secretary of the Interior does not have authority under the Right-of-Way Oil and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 et seq. (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the mineral estate was included within the grant to the patentee.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

ACT OF JUNE 30, 1834

Appellant's contention that under sec. 22 of the Act of June 30, 1834, 4 Stat. 729, 733 (25 U.S.C. § 194 (1976)), the burden of proof cannot be assigned to the tribe is without merit. The issue framed by appellant does not align "Indians" against "whites." The primary relief sought by the tribe is the cancellation of trust patents which can only be held by Indians.

Administrative Appeal of Oglala Sioux Tribe v. Commissioner of Indian Affairs and Richard Tall (PRU-10542), 7 IBIA 188 (Sept. 5, 1979) 86 I.D. 425

ACT OF FEBRUARY 8, 1887

Sec. 4 of the General Allotment Act of Feb. 8, 1887, authorizes the Secretary of the Interior to issue allotments to Indians where the Indians have made settlement upon public lands "not otherwise appropriated * * *." Pending final action on the matter, public lands are not open to Indian allotment settlement and disposition following the filing and noting of an application by the Bureau of Land Management for a proposed withdrawal; regulation 43 CFR 2091.2-5(a) provides that the noting of an application for withdrawal on the official plats maintained in the proper land office shall temporarily segregate the subject land from settlement under the public land laws to the extent that the withdrawal applied for, if effected, would prevent such forms of disposal. Following issuance of a public land order withdrawing the subject land, Indian allotment applications previously held in a suspense status are properly rejected.

Thurman Banks et al., 22 IBLA 205 (Oct. 15, 1975)

ACT OF MARCH 3, 1887

Sec. 321(b) of the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), authorizes, rather than mandates, the issuance of patents to innocent purchasers for value of lands which did not pass to a railroad under a statutory grant because of their mineral character, the rights of any such innocent purchaser being dependent upon the conditions and limitations of the Act of Mar. 3, 1887, 43 U.S.C. § 898 (1970).

Southern Pacific Transportation Co., Donald K. Lee, Charles Siller v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

ACT OF MARCH 2, 1889

Assuming, in the light most favorable to appellant, that the allotments at issue were subject to the final *proviso* of sec. 9 of the Act of Mar. 2, 1889, 25 Stat. 888, 891, we find no language in this or other sections of the Act evidencing an intention on the part of Congress that allotments--to be valid--required approval by the Oglala Sioux Tribe.

Administrative Appeal of Oglala Sioux Tribe v. Commissioner of Indian Affairs and Richard Tall (PRU-10542), 7 IBIA 188 (Sept. 5, 1979) 86 I.D. 425

ACT OF MARCH 3, 1891

Sec. 7 of the Act of Mar. 3, 1891, provides that no person or association of persons shall hold by assignment or otherwise, prior to the issue of patent, more than 320 acres of arid or desert lands; the terms "hold," "assignment" and "otherwise" are words of broad significance and will be defined in such manner to effectuate the purposes of the Act, to wit, to prevent anyone from holding more than 320 acres of desert lands to the exclusion of bona fide settlers or the entrymen of record.

Any person or association of persons who controls, possesses and receives substantial benefits from desert lands will be regarded as "holding" such lands within the meaning of the Act of Mar. 3, 1891.

United States v. Golden Grigg et al., 19 IBLA 379 (Apr. 7, 1975) 82 I.D. 123

ACT OF MARCH 3, 1891--Continued

An entryman may not take advantage of sec. 7 of the Act of Mar. 3, 1891, entitling an entryman to a patent after 2 years from date of issuance of a receiver's receipt when there is no pending contest or protest against the validity of the entry, where he has not shown that preconditions of the Act have been met, *i.e.*, making the final payments required.

United States v. Jack Zemmy Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

ACT OF AUGUST 15, 1894

The Agreement of Dec. 4, 1893, between the Yuma (now Quechan) Indians and the United States, ratified in sec. 17 of the Act of Aug. 15, 1894, was an absolute, present cession of any and all interests of the Indians to the nonirrigable lands in the Fort Yuma Indian Reservation created by Executive Order of Jan. 9, 1884.

Assuming that the Act of Aug. 15, 1894, was a conditional rather than an absolute cession by the Yuma (now Quechan) Indians of their rights to the nonirrigable lands in the Fort Yuma Indian Reservation, all material conditions on the part of the United States were met, and the cession has occurred.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884. M-36886 (Jan. 18, 1977) 84 I.D. 1

The Agreement of Dec. 4, 1893, between the Yuma (now Quechan) Indians and the United States, ratified in the Act of Aug. 15, 1894 (28 Stat. 286, 332) provided for a conditional cession of the nonirrigable land of the Fort Yuma Reservation. The conditions which included allotment and sale of surplus irrigable land and the opening of nonirrigable lands to settlement and entry, did not occur during the decade following the agreement and ratifying statute.

Title to Certain Lands Within the Boundaries of the Fort Yuma (now called Quechan) Indian Reservation. M-36908 (Jan. 2, 1979) 86 I.D. 3

ACT OF AUGUST 18, 1894

An application filed by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act of 1894 must be rejected where the lands are withdrawn for stock-driveway purposes, and cannot be suspended pending consideration of a petition for reclassification of the lands as suitable for selection under the Carey Act.

A grant of lands to a State under the Carey Act of 1894 is not a grant *in praesenti*, vesting title to any particular lands as of the time of passage of the Act or by relation back upon fulfillment of the conditions imposed by the Act, but the allowance or rejection of an application by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act is a matter wholly within the discretion of the Department; and where the lands sought to be selected by the State are embraced within a stock-driveway withdrawal made by the Secretary of the Interior under authority of law, they are not, so long as such withdrawal remains in force, subject to any claim of the State under the Carey Act.

Idaho Department of Water Resources. 21 IBLA 210 (July 31, 1975)

In the absence of pertinent statutory directives or regulatory criteria mandating such action, it is improper for the Bureau of Land Management to reject applications filed by a State under the Act of Mar. 15, 1910, for temporary withdrawals of lands for proposed development under the Carey Act, on the basis of the Bureau's determination that the Carey Act does not permit acceptance of a temporary withdrawal application: (1) for the establishment of residence and settlement on noncontiguous tracts of land; (2) if the acreage applied for, when added to desert land entry acreage previously patented to the State's Carey Act project proposer, exceeds the maximum 320 acres permitted to be acquired by one person under 43 U.S.C. § 212 (1970); and (3) when the preliminary plan of development submitted by the State fails to provide adequate assurance of water transmission to the proposed project. Under these circumstances, the Bureau should suspend action on the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 24 IBLA 314 (Apr. 20, 1976)

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

Applications filed for tenporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

The Bureau of Land Management should suspend consideration of the applications under the Carey Act pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

ACT OF JUNE 4, 1897

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

ACT OF JANUARY 31, 1901

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

ACT OF FEBRUARY 15, 1901

A Bureau of Land Management decision rejecting an application under the Act of Feb. 15, 1901, for a domestic water pipeline right-of-way will be sustained where it it was made in due regard for the public interest.

Hazel E. Kincaid, 25 IBLA 257 (June 23, 1976)

Pursuant to the Act of Feb. 15, 1901, repealed by sec. 706(a) of the Act of Oct. 21, 1976 (90 Stat. 2743, 2793), the Department had discretionary authority to permit the use of a right-of-way across public lands to supply water for domestic purposes; however, a right-of-way application for such use was properly rejected where approval of the grant would be contrary to the public interest.

Broken H. Ranch Co., 33 IBLA 386 (Jan. 26, 1978)

ACT OF FEBRUARY 15, 1901--Continued

The Act of Feb. 15, 1901, 43 U.S.C. § 959 (1970), was repealed by sec. 706 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2793, and any use or occupancy of public land granted subsequent to the effective date of FLPMA, Oct. 21, 1976, must be issued under authority of that Act. In authorizing the Secretary to grant rights-of-way, FLPMA provides that the Secretary shall require the applicant to submit certain information relating to the right-of-way, and a State Office notice enumerating such requirements is consistent with FLPMA.

William J. Colman, 40 IBLA 180 (Apr. 3, 1979)

ACT OF APRIL 21, 1904

Sec. 25 of the Act of Apr. 21, 1904, which authorized the application of the Reclamation Act of 1902 to the Yuma Indian Reservation, did not repeal by implication sec. 17 of the Act of Aug. 15, 1894, which provided for the cession, reclamation and allotment of the Reservation, and is in no way inconsistent with the 1894 Act.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

Sec. 25 of the Act of Apr. 21, 1904 (33 Stat. 189, 224), which authorized the application of the 1902 Reclamation Act to the Fort Yuma and Colorado River Reservations, and which provided for the allotment and sale of surplus irrigable lands on those reservations, was unrelated to and was not intended to effect the conditional cession provided for in the 1893 agreement and the 1894 ratifying statute.

Title to Certain Lands Within the Boundaries of the Fort Yuma (now called Quechan) Indian Reservation, M-36908 (Jan. 2, 1979) 86 I.D. 3

ACT OF APRIL 23, 1904

Sec. 8 of the Act of Apr. 23, 1904, 33 Stat. 302, providing for survey and allotment of lands within the Flathead Indian Reservation, excepts from mineral entry those lands classified as "timber land" by a Presidential Commission, and the Department of the Interior has no authority to overturn such classification and declare the "timber lands" more valuable as "mineral lands."

Montana Copper King Mining Co. et al., 20 IBLA 30 (Apr. 16, 1975)

ACT OF MARCH 15, 1910

An application filed by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act of 1894 must be rejected where the lands are withdrawn for stock-driveway purposes, and cannot be suspended pending consideration of a petition for reclassification of the lands as suitable for selection under the Carey Act.

A grant of lands to a State under the Carey Act of 1894 is not a grant *in praesenti*, vesting title to any particular lands as of the time of passage of the Act or by relation back upon fulfillment of the conditions imposed by the Act, but the allowance or rejection of an application by a State under the Act of Mar. 15, 1910, for a temporary withdrawal of lands to aid in the selection of the lands for proposed development under the Carey Act is a matter wholly within the discretion of the Department; and where the lands sought to be selected by the State are embraced within a stock-driveway withdrawal made by the Secretary of the Interior under authority of law, they are not, so long as such withdrawal remains in force, subject to any claim of the State under the Carey Act.

Idaho Department of Water Resources, 21 IBLA 210 (July 31, 1975)

In the absence of pertinent statutory directives or regulatory criteria mandating such action, it is improper for the Bureau of Land Management to reject applications filed by a State under the Act of Mar. 15, 1910, for temporary withdrawals of lands for proposed development under the Carey Act, on the basis of the Bureau's determination that the Carey Act does not permit acceptance of a temporary withdrawal application: (1) for the establishment of residence and settlement on noncontiguous tracts of land; (2) if the acreage applied for, when added to desert land entry acreage previously patented to the State's Carey Act project proposer, exceeds the maximum 320 acres permitted to be acquired by one person under 43 U.S.C. § 212 (1970); and (3) when the preliminary plan of development submitted by the State fails to provide adequate assurance of water transmission to the proposed project. Under these circumstances, the Bureau should suspend action on the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 24 IBLA 314 (Apr. 20, 1976)

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation, stock-driveway, agricultural research or military purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 25 IBLA 27 (May 5, 1976)

ACT OF MARCH 15, 1910--Continued

Applications filed by the State of Idaho under the Act of Mar. 15, 1910, for temporary withdrawals of land for proposed development under the Carey Act of 1894, must be rejected where the lands have been previously withdrawn for reclamation purposes.

In the absence of pertinent statutory directives or regulatory criteria for the processing of temporary withdrawal applications for unreserved lands filed by a State under the Act of Mar. 15, 1910, for proposed development under the Carey Act, the Bureau of Land Management should suspend consideration of the applications pending Departmental action to revise and recodify previously deleted regulations which provide guidance for the administration of the Carey Act and the Act of Mar. 15, 1910.

Idaho Department of Water Resources, 27 IBLA 303 (Oct. 26, 1976)

Applications filed for temporary withdrawals of land for proposed development under the Carey Act of 1894 must be rejected where the lands have been previously withdrawn for other purposes.

Idaho Department of Water Resources, 32 IBLA 89 (Sept. 2, 1977)

ACT OF JUNE 25, 1910

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, *as amended*, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

ACT OF JULY 22, 1912

A decision holding that a tract of land has reverted to the United States must be affirmed where the land was patented to a municipality under authority of a special statute which expressly provided that the town shall not have the right to sell or convey any part thereof and that if the land shall not be used as public park it shall revert to the United States, and where the record shows that the municipality conveyed two small parcels to the State and has never used the remainder for park purposes in the intervening 60 years since the patent issued.

City of Okanogan, Washington, State of Washington, 41 IBLA 98 (June 4, 1979)

ACT OF DECEMBER 29, 1916

A bond filed by a mining claim owner, covering lands patented under the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. §§ 291-301 (1970), need only be set in an amount to cover damages to crops, improvements, and the value of the land for grazing purposes within the limits of the mining claim. The *ad damnum* of the bond does not have to be sufficient to cover damages caused by a disruption of the surface owner's entire grazing operation.

Where surface owners object to the amount of a bond, submitted to the Bureau of Land Management under sec. 9 of the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. § 299 (1970), as being inadequate in amount, request a hearing thereon, but fail to tender any evidence which would impel the conclusion that a hearing is likely to be productive and meaningful, the request for a hearing is properly denied.

The owner of a patented stock-raising homestead, in which the minerals have been reserved to the United States under the Act of Dec. 29, 1916, *as amended*, has a sufficient adverse interest under 43 CFR 4.450-1, to initiate a contest against a mining claimant, alleging lack of discovery of valuable minerals.

The issue of whether a mining claim has been perfected by discovery of available mineral has no place in a proceeding to determine whether the amount of a stock-raising homestead bond is sufficient.

Elmer Silvera et al., 42 IBLA 11 (July 25, 1979)

ACT OF JUNE 10, 1920

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Land reserved for a reservoir site by executive order under authority of the Pickett Act of June 25, 1910, to conserve water for irrigation purposes, remained open to the location of mining claims for metalliferous minerals, and the provisions of the Federal Power Act of June 10, 1920, would not operate to bar the location of such claims unless and until a powersite classification was subsequently imposed.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

ACT OF FEBRUARY 25, 1925

"An Act granting public lands to the town of Silverton, Colorado, for public park purposes" (43 Stat. 980, Feb. 25, 1925).

The above Act and the patent issued in accordance therewith require that the lands granted be used for public park purposes only, and the town's attempt to lease a portion of the lands for the construction of camper sites does not violate the Act and patent since the use of a limited part of the patented land for camper sites is consistent with recreational and public park purposes.

Town of Silverton, 35 IBLA 183 (May 23, 1978)
85 I.D. 140

ACT OF JUNE 14, 1926

Where a patent has been issued under the Recreation and Public Purposes Act of June 14, 1926, *as amended*, 43 U.S.C. § 869 *et seq*. (1970), pursuant to a plan of development, and that plan is modified with the consent of the Bureau of Land Management, the failure to comply with the original plan is excused.

H. B. Baldwin, 37 IBLA 215 (Oct. 12, 1978)

ACT OF JANUARY 25, 1927

Where, after Statehood, a designated school section is surveyed and returned as mineral land (coal) known to be mineral in character prior to the date when the rights of the State would have attached, and where prior to the Act of Jan. 25, 1927 (44 Stat. 1026), the land is withdrawn for national forest purposes, title to the section did not pass to the State.

Malcolm H. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

ACT OF MARCH 4, 1927

Under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq*. (1970), issuance of a grazing lease appropriates the lands and segregates them from public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from lease.

Edward F. Naughton, 23 IBLA 134 (Dec. 23, 1975)

A grazing lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq*. (1970), appropriates the lands and segregates them from the public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from the lease.

Herman Anderson, Jr., Nicholas Pestrikoff, Anthony Drabek, 41 IBLA 296 (June 29, 1979)

ACT OF MAY 21, 1930

An oil and gas lease offer for lands in a reservoir right-of-way is properly rejected pursuant to the Act of May 21, 1930, 30 U.S.C. §§ 301-306 (1970), and 43 CFR 3100.0-3(d)(1) which limit the right to lease deposits of oil and gas in and under rights-of-way to the owner of the right-of-way or his assignees.

Republic Oil & Mining Co. and Margaret V. Coombs, 35 IBLA 212 (May 26, 1978)

Oil and gas under a reservoir right-of-way may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq*. (1970), but may only be leased to the holder of the right-of-way, his assignee, or to adjacent owners or their lessees in accordance with the Act of May 21, 1930, 30 U.S.C. § 301 (1970); therefore, offers filed under the Mineral Leasing Act for such lands are properly rejected.

Alice Mays, 36 IBLA 313 (Aug. 23, 1978)

ACT OF APRIL 23, 1932

The rejection of an application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), to open lands in a reclamation withdrawal to mineral location will be affirmed when the applicant fails to submit facts to show the basis for his knowledge or belief that the lands contain valuable mineral deposits. Merely to state the lands contain such deposits is not sufficient.

Joe Ashburn, 27 IBLA 227 (Oct. 12, 1976)

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears warranted by the appellant's showings and willingness to propose terms and conditions to protect the Government's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

ACT OF JUNE 18, 1934

The provision in 43 CFR 3825.1(b) that failure to pay annual rental on or before the anniversary date of a mining claim located in the Papago Indian Reservation "shall be deemed sufficient grounds for invalidating the claim" is directory, not mandatory. Where the mining claimant does not pay rental for 2 years on two claims and is 1-1/2 years late on other claims, and where he has not paid the rental prior to receiving decisions from the Bureau of Land Management holding the claims invalid, the mining claims must be held invalid.

When a mining claim located in the Papago Indian Reservation is declared invalid for failure to pay annual rental timely, and that fact is not disputed, a hearing is not required as there are no issues of fact involved but only of law.

Louis D. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

The holder of a mining claim located within the Papago Indian Reservation under sec. 3 of the Act of June 18, 1934, 48 Stat. 984 (repealed, Act of May 27, 1955, 69 Stat. 67), is required to make the annual rental payment for the claim in advance (on or before the anniversary date of location of the claim). A decision invalidating a claim will be upheld where proceedings to void the claim are not initiated until several months after the rental due date, there is no evidence the rent was paid for the year, and appellant admits the failure to pay was an oversight.

John A. Cooley, 36 IBLA 245 (Aug. 14, 1978)

The collection of a yearly rental pursuant to the provisions of 43 CFR 3825.1(b) for a mining claim situated within the Papago Indian Reservation in no way presages the existence of a valid mining claim based on the discovery of a valuable mineral deposit.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

ACT OF SEPTEMBER 18, 1940

Where the purchaser from the railroad of unpatented land believed at the time of his purchase that the land was mineral, and there was physical evidence of its mineral character, or if conditions were such that the purchaser should have known then that the land was excepted from the grant to the railroad, he was not a purchaser in good faith within the "innocent purchaser" proviso of sec. 321(b) of the Transportation Act of 1940.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

ACT OF AUGUST 13, 1949

Lands which have been designated by the Act of Aug. 13, 1949, as public domain are not leasable under the Mineral Leasing Act for Acquired Lands or Reorganization Plan No. 3 of 1946, even though they may have been acquired lands prior to the Act of Aug. 13, 1949. A prospecting permit for uranium on such lands will be denied.

John R. Meadows, 30 IBLA 14 (Apr. 4, 1977)

ACT OF AUGUST 12, 1953

Lands which were subject to an oil and gas lease offer on Sept. 20, 1951, were not open to mineral location, and mining claims located on such lands on this date are properly declared null and void in the absence of compliance with the redemption provisions of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act, requiring filing of an amended notice of location prior to Dec. 10, 1953, in the place and manner in which the original notice was of record.

A mining claimant's failure to comply with the redemption provision of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act is not excused because BLM failed to notify her of the availability of this provision.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

ACT OF AUGUST 15, 1953

Public Law 280, 67 Stat. 588-90, did not grant to States general civil regulatory powers over Indian reservations. Nor could this be accomplished by Departmental regulation, Secretarial Order or other directive.

Administrative Appeal of the Morongo Band of Mission Indians v. Area Director, Sacramento Area Office,
7 IBIA 299 (Dec. 13, 1979) 86 I.D. 680

ACT OF AUGUST 11, 1955

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

ACT OF JULY 7, 1958

The filing of a State selection application under sec. 6(b) of the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, 340, 48 U.S.C. notes prec. § 21 (1970), does not create a right that prevents a Native Village from selecting those lands under the provisions of the Alaska Native Claims Settlement Act of Dec. 18, 1971, 85 Stat. 688, 43 U.S.C. §§ 1601-1624 (Supp. III 1973).

State of Alaska, 19 IBLA 316 (Apr. 7, 1975)

ACT OF JULY 6, 1960

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 238 (June 28, 1976)

ACT OF OCTOBER 8, 1964

Where the holder of mineral leases in the Lake Mead National Recreation Area fails to mine and produce minerals within the time prescribed by the lease for reasons not beyond the control of the lessee, the leases are not in good standing and therefore are not subject to renewal.

It is a proper exercise of discretion to refuse to renew mineral leases in the Lake Mead National Recreation Area where the lessee failed to commence mining and produce minerals as required by regulation and by the terms of the lease for reasons which were attributable to the lessee.

Apache Oro Co., 22 IBLA 331 (Nov. 11, 1975)

The National Park Service is not an "executive department, independent establishment or instrumentality" within the meaning of 43 CFR 3501.2-6. The Department is therefore not bound by the granting or withholding of consent by the Service for a mineral lease on National Park Service lands.

Minerals which are subject to location under the general mining law on public land outside the Lake Mead Recreation Area are subject to the leasing provisions of the Act of Oct. 8, 1964, within the Recreation Area. But, minerals which are disposable by sale under the 1947 Materials Act when situated outside the Recreation Area are also subject to such disposal within it.

A decision to reject an application for a mineral lease within the Lake Mead Recreation Area will be sustained in the absence of a showing that the authorized officer acted unreasonably in rejecting the lease for reasons relating to environmental protection.

Bilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

Where the State Office, following a recommendation of the National Park Service rejects an application for an oil and gas lease in the Lake Mead National Recreation Area on the basis of a general environmental review of the consequences of oil and gas leasing in the Recreation Area, but which does not specifically show that the lands involved are of a particular value in the Recreation Area as a whole and that leasing subject to stipulations will not suffice to protect the recreation and other values of the land, the case will be remanded for

ACT OF OCTOBER 8, 1964--Continued

a particular application of the environmental review to that land.

Robert R. Wahl, Howard Yee, 28 IBLA 305 (Jan. 13, 1977)

Where, at the end of its term, a mineral lease affecting lands within the Lake Mead Recreation Area is not in good standing, an application for renewal thereof for an additional 5 years is properly denied. Where the lessee fails to develop the lease property diligently during the term of the lease and does not fall within an exception to this requirement, the lease is not in good standing and may not be extended.

Audrine G. Knight, 36 IBLA 53 (June 30, 1978)

Where the State Office, following recommendations of the National Park Service, rejects applications for oil and gas leases under the "excepted areas" provisions of 43 CFR 3111.1-3(e)(4), and where it appears that large portions of the applied-for lands do not fall within such areas, the case will be remanded with instructions to reconsider whether the leasing of lands not in excepted areas would be appropriate.

D. L. Percell, 37 IBLA 272 (Oct. 20, 1978)

D. L. Percell, 40 IBLA 126 (Mar. 28, 1979)

ACT OF OCTOBER 22, 1965

Title I of the Highway Beautification Act, 79 Stat. 1028, which applies to all "public lands or reservations of the United States," does not apply to Indian reservations.

California's Outdoor Advertising Act, implementing the Highway Beautification Act, 79 Stat. 1028, may not be applied to non-Indian lessees on the Morongo Indian Reservation.

The Department's policy established in 1965 of requiring lessees of Indian lands in California to comply with State standards regulating land use and development can be achieved without subjecting developing tribal governments to the full enforcement powers of the State, viz., through adding appropriate State standards to the provisions of any lease.

Administrative Appeal of the Morongo Band of Mission Indians v. Area Director, Sacramento Area Office, 7 IBIA 299 (Dec. 13, 1979) 86 I.D. 680

ACT OF OCTOBER 15, 1966

The grant of a right-of-way to cross Federal land for a proposed pipeline which is neither Federally authorized nor funded is an "undertaking" within the meaning of the National Historic Preservation Act, *as amended*, 80 Stat. 915, 16 U.S.C. § 470 *et seq*. (1976). However, construction of segments of the pipeline which do not cross Federal land, and which are neither Federally licensed nor funded, is not an "undertaking" under that Act, and the provisions of that Act do not apply to such segments.

Western Slope Gas Co., 40 IBLA 280 (Apr. 18, 1979)

ACT OF SEPTEMBER 26, 1968

An application to purchase public land filed pursuant to the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), is properly rejected when the Geological Survey reports that such lands are underlain with coal, and that exercise of surface rights would unreasonably interfere with operations under the Mineral Leasing Act of 1920. In addition, the public interest dictates rejection of the application because conveyance of the surface rights could allow the surface owner, pursuant to the Surface Mining Control and Reclamation Act of 1977, to prevent strip mining of the underlying coal by withholding his consent to mine.

A determination by the United States Geological Survey that certain lands in an application for sale under the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), are underlain with coal, and that sale of the surface rights would interfere with the operation of the Mineral Leasing Act of 1920, will not be disturbed in the absence of a clear showing by the applicant that the determination was improperly made.

Mace Cox, 38 IBLA 340 (Dec. 20, 1978)

Where an applicant under the Unintentional Trespass Act, 43 U.S.C. § 1431 (1976), had mistakenly described the land being sought, the application may not be amended after Sept. 25, 1971, to conform the land description to the land actually in trespass.

DeRalph S. Bunting, 41 IBLA 13 (May 22, 1979)

ACT OF DECEMBER 24, 1970

Sec. 4 of Geothermal Steam Act of 1970 authorizes competitive bidding as sole basis for issuance of geothermal leases for lands determined to be within a KGRA.

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 393 (Feb. 7, 1975) 82 I.D. 60

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136 (Mar. 6, 1975)

ACT OF DECEMBER 24, 1970--Continued

Sec. 4 of the Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands within a known geothermal resource area under regulations formulated by the Secretary of the Interior. Where the Department has promulgated regulations pursuant to this section which provides the Secretary's authorized officer with the reserved right to reject any and all bids submitted for a competitive geothermal lease sale, and that reserved right is publicized in the sale notice, the Government is not obligated to accept any bid which might be considered inadequate.

Getty Oil Co., 27 IBLA 269 (Oct. 26, 1976)

Secretary of Interior has authority under Geothermal Steam Act, 30 U.S.C. §§ 1002-03 (1976), and implementing regulations, 43 CFR 3220.6(c), to reject bids submitted at competitive geothermal lease sales when such bids are deemed to be inadequate in dollar amount.

On appeal from a determination of United States Geological Survey under 30 U.S.C. §§ 1002-03 (1976), rejecting offeror's competitive geothermal lease bid as too low, offeror has the burden of showing that the rejection is arbitrary and capricious and that Survey has no rational basis for rejection of the bid.

While the Department has discretion as to whether to grant a hearing to an offeror whose high bid is rejected for a competitive geothermal lease, a hearing is not in the public interest where offeror has not explained a procedure in which particular facts could be effectively utilized in an alternative formula for computing minimum bids.

Union Oil Co., 38 IBLA 3 3 (Dec. 29, 1978)

ACT OF DECEMBER 31, 1970

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

ACT OF DECEMBER 15, 1971

A district manager's decision denying a grazing permit for 10 domestic horses, based on the fact that such a denial was required for proper range management and for protection of wild horses under the Wild Free-Roaming Horses and Burros Act, 85 Stat. 649-651, will be overruled where evidence presented at a hearing shows that granting the permit will not interfere with BLM's management of the wild horses under the Act.

Chester Baker, 26 IBLA 257 (Aug. 18, 1976)

Where claimants have filed claims to horses on the public lands under sec. 5 of the Wild Free-Roaming Horses and Burros Act, 16 U.S.C. § 1335 (Supp. IV 1974), and pursuant to the regulations in 43 CFR Subpart 4713, and failed to recover them within a reasonable period of time as provided in gathering authorizations issued by the Bureau of Land Management, the Department has no authority to nullify their claims of ownership; the regulations allow more than one authorization to be obtained; claimants in proper circumstances may obtain further authorizations; and upon compliance with legal requirements may gather and claim their horses and burros.

George B. Shaffner et al., 26 IBLA 320 (Aug. 30, 1976)

One who has laid claim, pursuant to the Wild Free-Roaming Horses and Burros Act, to horses on the public lands and who does not remove them within a reasonable period, is subject to having the renewal of his grazing lease denied.

Truman and Velma Cross, 29 IBLA 4 (Feb. 7, 1977)

ACT OF OCTOBER 20, 1976

Land withdrawn for reclamation purposes in Imperial County, Calif., within the California Desert Conservation Area and administered by BLM under a memorandum of understanding with the Bureau of Reclamation should be regarded as "entitlement lands" in the computation of payments to be made to the county under the Act of Oct. 20, 1976, 31 U.S.C. § 1602 (1976).

County of Imperial, 40 IBLA 257 (Apr. 16, 1979)

ACT OF OCTOBER 21, 1976

H.R. Rep. No. 94-1163, 94th Cong., 2d Sess. 1 (1976), shows that the purpose of the Act of Oct. 21, 1976 (the Federal Land Policy and Management Act), which repealed the homestead laws, except as to certain lands in Alaska, was to repeal obsolete statutes relating to public lands that were incongruent with today's national goals.

Arthur R. Wallace, 30 IBLA 239 (May 31, 1977)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as applications under the Federal Land Policy and Management Act of 1976, but, to the extent practical, existing regulations will govern the administration of the public lands until new regulations are issued.

Continental Telephone of California, 34 IBLA 374 (May 1, 1978)

ADDITIONAL HOMESTEADS

The land in an additional homestead entry application under the Act of Apr. 28, 1904, *as amended*, 43 U.S.C. § 213 (1970), must be contiguous to the applicant's original homestead. Neither that Act nor regulations issued thereunder require that tracts of land in such an additional entry application be contiguous to each other. The requirement of 43 CFR 2567.1(c) that land in a homestead entry application in Alaska must be in a contiguous body is maintained by the fact that the land in the additional entry must be contiguous to the original homestead.

John C. Briggs, 22 IBLA 8 (Sept. 4, 1975) 82 I.D. 432

ADMINISTRATIVE AUTHORITY

(See also Delegation of Authority, Federal Employees and Officers, Secretary of the Interior--if included in this Index.)

GENERALLY

The Bureau of Land Management, in the exercise of its discretionary power to issue special land use permits, may establish special fee assessments for off-road vehicle (ORV) events.

Walt's Racing Ass'n, 18 IBLA 359 (Jan. 30, 1975)

The failure by an oil and gas lease assignee to timely file the requisite bond as required by an intial State Office decision cannot be relied upon by the assignor as a basis for protesting a subsequent decision which reconsiders and grants a request for assignment approval, for it is the Department alone which may assert such default as a basis for denying a subsequent assignment approval request.

Joseph Alstad, 19 IBLA 104 (Mar. 4, 1975)

The issuance of a public airport lease on national resource lands lies within the discretion of the Secretary of the Interior. The Department may require an applicant for a public airport lease to accept special stipulations in order to protect the environmental quality of the land, so long as the stipulations are not inconsistent with other reasonable requirements of the Bureau of Land Management or Federal Aviation Administration.

A. W. Brothers., 19 IBLA 144 (Mar. 7, 1975)

The Bureau of Land Management may assert, in its discretion, failure to timely file assignment instruments as a basis for denying approval to an assignment where intervening assignees or other adverse interests are involved.

James V. O'Kane, F. Kenneth Millhollen, 19 IBLA 171 (Mar. 18, 1975)

The issuance of a special land-use permit is discretionary, and the Bureau of Land Management may reject a special land-use permit application when the proposed use would adversely affect the public interest, and may offer, in the alternative, a permit providing for use consonant with proper management of national resource lands.

Jerry Tecklin, Leonard Brackett, 20 IBLA 308 (May 30, 1975)

The issuance of a public airport lease on the public domain lies within the discretion of the Secretary of the Interior. A decision rejecting an airport lease application in the exercise of that discretion will be affirmed when, even though the Board differs in its opinion of the importance of some of the factors recited as grounds for the rejection, the record shows the decision to be a reasoned analysis of the factors involved, and no sufficient basis to disturb the decision is shown.

Boulder City Aero Club, Inc., 21 IBLA 383 (Aug. 18, 1975)

ADMINISTRATIVE AUTHORITY--Continued

GENERALLY--Continued

Reliance upon erroneous or incomplete information provided by Bureau of Land Management employees cannot create any rights not authorized by law.

John F. Brown, 22 IBLA 133 (Sept. 26, 1975)

Margaret Hughey Hugus, 22 IBLA 146 (Sept. 30, 1975)

W. E. C. Croley, 32 IBLA 5 (Aug. 24, 1977)

Verner F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

The Recreation and Public Purposes Act, and the regulations thereunder, do not authorize additional payment for the issuance of a supplemental patent (which voids an earlier patent's reversionary provision) as an alternative to forfeiture for noncompliance with the Act's provision that land patented under the Act only be used for an established or definitely proposed public project within a reasonable time following issuance of patent. The Department can alienate interests in public lands only within the limits authorized by law; therefore, issuance of a supplemental patent which eliminates the Act's mandatory reversionary provision is impermissible.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

Simultaneous oil and gas lease drawing entry cards which are not executed correctly will be rejected. Where an ambiguity is created by an applicant on a drawing entry card, it is not the responsibility of BLM to speculate about applicant's intention and necessarily to resolve the ambiguity in his favor.

Joseph A. Winkler, 24 IBLA 380 (Apr. 29, 1976)

A stipulation requiring an oil and gas lessee to provide a certified statement by an archaeologist concerning the existence of archaeological values on lands to be disturbed by the lessee does not constitute an unlawful delegation of authority because the purpose of the statement is to notify an authorized officer of the Department who retains the authority to determine whether the archaeological data are significant and whether such data are being or may be irrevocably lost or destroyed.

Cecil A. Walker, Alan C. F. Dille', 26 IBLA 71 (July 9, 1976)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Bess et al., 27 IBLA 4 (Sept. 17, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to areas withdrawn for wildlife conservation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes. 27 IBLA 46 (Sept. 23, 1976)

The Secretary of the Interior has the authority to determine the validity of mining claims upon adequate notice and opportunity for hearing.

United States v. Mine Development Corp. et al.,
27 IBLA 238 (Oct. 18, 1976)

A decision by the Bureau of Land Management rejecting a logging road right-of-way application as not in the public interest will be affirmed in the absence of sufficient reasons to the contrary.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976)
83 I.D. 518

A grazing permittee under sec. 3 of the Taylor Grazing Act does not have an absolute right to a permit renewal even though denial thereof will impair the value of his grazing unit which is pledged as security for a bona fide loan. The Department may refuse to renew such a permit when the public interest requires that the subject land be preserved from unnecessary injury, exchanged, disposed of, or reclassified for alternate public use. Similarly, if the Department may deny renewal outright under the above circumstances, the Department may renew such a permit for a lesser term than previously allowed pending completion of a Management Framework Plan and an Allotment Management Plan which are oriented not only to livestock grazing, but also to multiple use management which includes such concerns as land and water conservation, environmental protection, and other resource management objectives which can be achieved by reclassification of national resource lands and manipulation of grazing activity.

Nat Ranch, Inc., 27 IBLA 340 (Nov. 4, 1976)
83 I.D. 542

The Department of the Interior does not have the authority to modify a statute ratifying an agreement with an Indian tribe on the grounds of fraud or coercion in the execution of the agreement.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

Reliance upon erroneous advice by Bureau of Land Management employees cannot estop the United States or confer upon an applicant any rights not authorized by law. 43 CFR 1810.3(c). Where it is not established that the asserted advice was erroneous, estoppel does not operate.

United States v. Ronald R. Tippetts, 29 IBLA 348
(Mar. 31, 1977)

The Bureau of Land Management, in exercise of its authority to regulate the acquisition of rights in the public lands, may contest any unpatented mining claim located on public land under its jurisdiction to determine, among other things, if the claimant has discovered on his mining claim a valuable mineral deposit as required by 30 U.S.C. § 22 (1970).

United States v. Gwendolyn McClurg et al., 31 IBLA 8
(June 15, 1977)

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Pursuant to the Property Clause of the U.S. Const. art. IV, § 3, cl. 2, Congress has enacted the Taylor Grazing Act, 43 U.S.C. § 315 *et seq.* (1970), and other statutory authority which empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and to determine whether or not an individual has committed a trespass.

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174
(Sept. 15, 1977) 84 I.D. 475

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States, including lands within the National Forest System, after adequate notice and opportunity for hearing. A mining claim contest initiated under the authority of the Secretary of the Interior may be prosecuted by counsel employed by the Department of Agriculture acting on behalf of the Forest Service where such action is in accordance with a Memorandum of Understanding between the agencies.

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

Reliance upon erroneous and incomplete information provided by Federal employees cannot create any rights not authorized by law.

Mark W. Brose and John L. Dutra, 33 IBLA 32 (Nov. 25, 1977)

It is a proper exercise of discretion under the Federal Land Policy and Management Act of 1976 for the Bureau of Land Management to refuse to process and to reject applications for public sale pending on the date of the Act, even though it will continue to process bids and preference right applications for a sale held prior to the Act.

United Park City Mines Co., 33 IBLA 358 (Jan. 16, 1978)

Reliance upon erroneous advice by Bureau of Land Management employees cannot confer upon an oil and gas lease applicant any rights not authorized by law.

Charles M. Brady, 33 IBLA 375 (Jan. 25, 1978)

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, *as amended*, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

A consent decree obtained by the Securities and Exchange Commission establishes no precedent for cases involving different parties. Allegations of Federal securities law violations in connection with Federal oil and gas leasing should be directed to the Securities and Exchange Commission, the agency with jurisdiction over such matters. The jurisdiction of the Board of Land Appeals does not extend to matters exclusively under the jurisdiction of the SEC, but goes to matters involving compliance with oil and gas leasing statutes and regulations.

Marion Bacil, 35 IBLA 366 (June 23, 1978)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

United States v. John Gavssich, 36 IBLA 111 (July 10, 1978)

A consent decree obtained by the Securities and Exchange Commission (SEC) establishes no precedent for cases involving other parties. The Board of Land Appeals lacks jurisdiction over matters delegated to the SEC. Allegations of Federal Securities Law violations should be directed to the SEC rather than to the Board of Land Appeals.

William Miller, 36 IBLA 309 (Aug. 28, 1978)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the Forest Service and prosecuted by counsel employed by the Department of Agriculture, with Forest Service employees as witnesses, where such action is in accordance with a Memorandum of Understanding between the agencies.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system, premised upon regulatory interpretation, is binding on all employees of the Bureau of Land Management, until such time as it is properly changed.

Milton D. Feinberg, Benson J. Lamp, 37 IBLA 39 (Sept. 18, 1978) 85 I.D. 380

Milton D. Feinberg, Benson J. Lamp (On Reconsideration), 40 IBLA 222 (Apr. 11, 1979) 86 I.D. 234

Erroneous or incomplete advice by Bureau of Land Management employees cannot operate to vitiate an Act of Congress, particularly where the governing statute and regulations on the issue are free from ambiguity.

Public Service Co. of Oklahoma, 38 IBLA 193 (Dec. 6, 1978)

Department of the Interior, as an agency of executive branch of Government, is not proper forum to decide whether or not statute enacted by Congress is constitutional.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

Reliance upon erroneous notations to a BLM serial register page or incomplete information provided by BLM employees cannot create any rights not authorized by law.

Alver C. Duncan, 39 IBLA 144 (Jan. 29, 1979)

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

Subsequent to the passage of the Federal Land Policy and Management Act of 1976 (FLPMA), the Department lacked the authority to accept donations of land under the Act of July 14, 1960, which had been expressly repealed by FLPMA. Inasmuch as the actions of the Secretary under the Act of July 14, 1960, were not ministerial, the doctrine of relation cannot be used to validate, on a *nunc pro tunc* basis, an acceptance of a donation under the authority of the Act of July 14, 1960, occurring after the repeal of that Act by Congress.

Junior L. Dennis, 40 IBLA 12 (Mar. 9, 1979)

ADMINISTRATIVE AUTHORITY--Continued

GENERALLY--Continued

Reliance upon erroneous information given by BLM employees cannot confer upon an oil and gas lease applicant any rights not authorized by law.

Elizabeth Pagedas (On Reconsideration), 40 IBLA 21 (Mar. 9, 1979)

Reliance on incomplete information supplied by Bureau of Land Management employees cannot estop the United States or excuse compliance with a regulation.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Where an Agency lays down its own procedures and regulations, those procedures and regulations cannot be ignored, even by the Agency itself.

Estate of Emory Dennis Juneau, 7 IBIA 164 (June 29, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

The Taylor Grazing Act, 43 U.S.C. §§ 315a-315r (1970), and other statutory authority empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and whether or not an individual has committed a trespass.

Bureau of Land Management v. Harris Brothers, 42 IBLA 48 (July 31, 1979)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not as to mining claims the recordation provisions of the Federal Land Policy and Management Act of 1976 are constitutional.

Charlie Carnal, Walter Peck, and Edward Borzansky, 43 IBLA 10 (Sept. 11, 1979)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the U.S. Forest Service and prosecuted by counsel employed by the U.S. Department of Agriculture, with U.S. Forest Service employees as witnesses.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

ENFORCEMENT OF CRIMINAL VIOLATIONS

The Board of Land Appeals, in its adjudication of appeals to determine rights of parties to receive or preserve interests in Federal lands, has a concomitant obligation to preserve the integrity of the process, and where it appears to the Board that the administrative record of a case contains strong evidence of multiple violations of 18 U.S.C. § 1001 (1976), the Board will refer the matter with its recommendation that an investigation be initiated to determine whether criminal charges should be brought.

Lee S. Bielski, 39 IBLA 211 (Feb. 8, 1979) 86 I.D. 80

ESTOPPEL

Generally, the Government is not estopped from demanding oil and gas lease royalty payments it is owed, even if its employees may have made prior mistakes in accepting or computing the royalty.

Gulf Oil Corp., et al., 21 IBLA 1 (June 16, 1975)

Reliance upon erroneous or incomplete information provided by Bureau of Land Management employees cannot create any rights not authorized by law.

John F. Brown, 22 IBLA 133 (Sept. 26, 1975)

Margaret Hughey Boggs, 22 IBLA 146 (Sept. 30, 1975)

Verner F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

The Department of the Interior is not estopped from denying the legality of a payment in lieu of forfeiture provision inserted in a Recreation and Public Purposes Act patent when such denial works no serious injustice against the patentee and implementation of the provision would harm the public interest by divesting the Government of all jurisdiction over the patented land, thus, precluding enforcement of the Recreation and Public Purposes Act requirement that lands patented under the Act be devoted to a definitely proposed project for the benefit of the public.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

A Native allotment applicant is charged with notice of the official land records of the Bureau of Land Management. No estoppel will result from a delay in the rejection of a Native allotment where the basis of the decision is that the land was segregated by a State selection application prior to commencement of occupancy, the delay was not unreasonable, the State selection was a matter of public record, and no misrepresentations were made to the applicant.

Roselyn Isaac, 23 IBLA 124 (Dec. 23, 1975)

The doctrine of collateral estoppel will not bar the administrative contest of the validity of five mining claims which, together with another claim, were the subject of previous condemnation actions for the taking of a temporary exclusive easement over the claims, where the issue of the validity of the individual claims was not actually litigated and it was wholly unnecessary for the court to adjudicate that issue in rendering its judgment.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it was not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance

ADMINISTRATIVE AUTHORITY--Continued

ESTOPPEL--Continued

thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

Where an applicant for grazing privileges does not show the type of misconduct which would be a basis for estoppel against the Government, the provisions of 43 CFR 4115.2-1(e)(9)(i) and (e)(13)(i) cannot be waived on the basis of such misconduct.

A. D. Findlay (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

Reliance upon erroneous advice by Bureau of Land Management employees cannot estop the United States or confer upon an applicant any rights not authorized by law. 43 CFR 1810.3(c). Where it is not established that the asserted advice was erroneous, estoppel does not operate.

United States v. Ronald D. Tippetts, 29 IBLA 348 (Mar. 31, 1977)

The fact that a mining claimant has held a claim for many years and performed work on the claim does not, by itself, create any rights against the Government which will estop the Government from determining the validity of the claim. It is incumbent upon the locator of a mining claim to exercise considerable care in ascertaining the status of the land embraced in the claim and the limitations of his rights as the holder of an unpatented mining claim. Failure of a Government employee to advise appellant that the land embraced in the mining claim was closed to mining location cannot give life to an invalid claim.

Arthur W. Boone, 32 IBLA 305 (Sept. 30, 1977)

Reliance upon erroneous and incomplete information provided by Federal employees cannot create any rights not authorized by law.

Mark V. Boone and John L. Dutra, 33 IBLA 32 (Nov. 25, 1977)

ADMINISTRATIVE AUTHORITY--Continued

ESTOPPEL--Continued

The failure of a noncompetitive oil and gas lease offeror to complete the date on the simultaneous oil and gas drawing entry card is not excused, and the Department is not estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease in acceptance of an offer which was deficient for the same reason.

Tina A. Hogan, 33 IBLA 213 (Dec. 21, 1977)

The failure of a mining claimant to file the notice of recordation required by sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), cannot be excused on the basis of equitable estoppel where no discussion covering the 90-day requirement was had between the Department and appellant's representatives.

Northwest Citizens for Wilderness Mining Co., Inc., 33 IBLA 317 (Jan. 16, 1978)

The Government is not estopped from collecting royalty payments which are owed, even if it has accepted improper payments in the past.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

Reliance upon erroneous advice or incomplete information provided by BLM employees cannot relieve the owner of a mining claim of an obligation imposed on him by statute or relieve him of the consequences imposed by a statute for his failure to comply with its requirements.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

Clair E. Caldwell et al., 42 IBLA 139 (Aug. 16, 1979)

Where a mining claimant alleges that forest rangers allowed him to build and occupy a cabin on the claim without informing him that it was illegal to do so, it is not appropriate to estop the Government from declaring the claim null and void, for several reasons: mere acquiescence in an action is not "affirmative misconduct" by a Government employee, as it was not false representation or concealment of material facts done with the intent that the claimant rely thereon; the impression created by the inaction of the forest rangers was not erroneous and, so, claimant was not misled, as he could rightfully move the cabin to the site and occupy it as long as so doing was incident to mineral development of a valid mining claim; and because the claimant should have known that he could not live on the premises indefinitely despite his failure to develop the claim, and that he would have to move the cabin or lose it, if the claim was declared null and void.

The Government is not barred from declaring a mining claim null and void by the doctrine of laches.

United States v. Joseph Larsen and Ferris Larsen, 36 IBLA 130 (July 25, 1978)

Even though the Bureau of Land Management from Jan. 26, 1972, to Aug. 19, 1977, considered preference right coal lease applications in a pending status, it is not estopped to reject such applications as having been filed late because it has not been demonstrated that appellant relied on the Bureau's representations to appellant's detriment.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

ADMINISTRATIVE AUTHORITY--Continued

ESTOPPEL--Continued

Where national forest land is open to mineral location, the failure of a district forest ranger to object to the location or development of mining claims for a number of years, or to request that a contest of the validity of the claims be initiated, does not estop the United States from bringing a contest, nor is the contest barred by laches.

United States v. Verdugo & Miller, Inc., 37 IBLA 277 (Oct. 20, 1978)

Reliance upon erroneous or incomplete information provided by Government employees cannot create any rights not authorized by law. 43 CFR 1810.3(c).

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

Reliance upon erroneous notations to a BLM serial register page or incomplete information provided by BLM employees cannot create any rights not authorized by law.

Alvet C. Duncan, 39 IBLA 144 (Jan. 29, 1979)

Equitable estoppel against the Government will not lie where there has been no affirmative misconduct by an authorized agent or officer resulting in a misrepresentation of fact upon which a party was led to rely to his ultimate detriment.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

Reliance on incomplete information supplied by Bureau of Land Management employees cannot estop the United States or excuse compliance with a regulation.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Inaction or unauthorized acts by an employee of the Bureau of Indian Affairs cannot serve as the basis for conferring rights not authorized by law. Moreover, neither the Secretary of the Interior nor the Department is bound or estopped by such inaction or unauthorized acts.

Estate of Emory Dennis Juneau, 7 IBIA 164 (June 29, 1979)

A delay in adjudication of an application by the Department cannot create rights contrary to law.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Estoppel of the Government is an extraordinary remedy, especially as it relates to public lands, and is to be applied with the greatest care and circumspection.

The elements of an estoppel are the following: (1) The party to be estopped must know the facts; (2) he must intend that his conduct shall be acted on or must so act that the party asserting the estoppel has a right to believe it is so intended; (3) the latter must be ignorant of the true facts; and (4) he must rely on the former's conduct to his injury.

Estoppel is not available against the Government when the Government agent making representations acts beyond the scope of his authority. Furthermore, reliance upon information or the opinion of any officer or employee

ADMINISTRATIVE AUTHORITY--Continued

ESTOPPEL--Continued

of BLM cannot operate to vest any right not authorized by law.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

LACHES

Where unpatented mining claims were located some 50 years before the claimant filed application for patent, during which time they went unchallenged by the Government, the United States is not barred from contesting the validity of the claims by invocation of the equitable defense of laches.

Frattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

Where national forest land is open to mineral location, the failure of a district forest ranger to object to the location or development of mining claims for a number of years, or to request that a contest of the validity of the claims be initiated, does not estop the United States from bringing a contest, nor is the contest barred by laches.

United States v. Verdugo & Miller, Inc., 37 IBLA 277 (Oct. 20, 1978)

The authority of the United States to enforce a public right or protect a public interest is not vitiated or lost by acquiescences of its officers or agents, or by their laches, neglect of duty, failure to act, or delays in the performance of their duties.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

A delay in adjudication of an application by the Department cannot create rights contrary to law.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

ADMINISTRATIVE PRACTICE

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George H. Crapo, Richard L. Crapo, 19 IBLA 208 Mar. 21, 1975)

ADMINISTRATIVE PRACTICE--Continued

Where the record does not clearly show whether either or both of two grazing lease applicants are preference-right applicants and does not reflect consideration of all of the factors mandated by 43 CFR 4121.2-1(d)(2) for evaluating conflicting grazing lease applications, a decision awarding the lease to one of the parties will be set aside and the case remanded for further consideration.

Elmer M. Johnson, 20 IBLA 111 (Apr. 25, 1975)

When a coal lease applicant asserts, on appeal, facts which may show it to be entitled to favorable consideration of its lease application under the short-term need criteria promulgated by the Department, the decision rejecting the lease application will be set aside and the case remanded for further consideration.

Idaho Power Co., 20 IBLA 125 (Apr. 28, 1975)

A regulatory change in the definition of the phrase "primary term" of an oil and gas lease is not an order or consent of the Secretary of the Interior to suspend operations under an oil and gas lease.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

A regulation pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows settlement rights to be initiated while a permit issued under that Act is in existence. The policy manifest in that regulation may be followed, in the exercise of the Secretary's discretion, to permit consideration of a Native allotment applicant's occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of Mar. 4, 1927, and the regulation was promulgated after intiation of the occupancy.

Kristeen J. Burke, Joe B. Belovedoff, Victor Belovedoff, 20 IBLA 162 (May 5, 1975)

A Bureau of Land Management State Office may reconsider one of its decisions prior to the filing of an appeal in the case, but the filing of an appeal terminates that authority.

A person who drafts and submits an agreement to this Department must bear the burden of any ambiguity in the document if the Department's interpretation is reasonable.

An original letter is not needed to withdraw a lease offer. The requirements are that the withdrawal is properly filed and the person making the withdrawal is properly identified.

A person signing an assumed name is responsible just as if he signed his own name.

John J. Sexton (On Reconsideration), 20 IBLA 187 (May 7, 1975)

A request for equitable adjudication relief to permit purchase of a headquarters site claim is premature in the absence of an application to purchase the claim.

The equitable adjudication authority is not appropriate and may not be applied to permit the filing of a headquarters site notice of location after the land has been withdrawn.

Ross P. Lamoureux, 20 IBLA 243 (May 16, 1975)

ADMINISTRATIVE PRACTICE--Continued

An applicant for land under the Small Tract Act cannot acquire any right in the land by virtue of administrative delay in reappraising the land prior to issuance of patent. The mere filing of a small tract application does not create in the applicant any right or interest in the land.

George E. Jackson, 20 IBLA 253 (May 16, 1975)

Where the Bureau of Land Management changes an administrative practice to thereafter refuse to accept unofficial copies of the simultaneous oil and gas lease entry card, by an order dated Mar. 26, 1975, the new practice will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Feb. 1975 simultaneous filing period.

V. J. Malloy, 20 IBLA 327 (June 6, 1975)

Equitable adjudication authority is not appropriate and may not be applied to permit filing of a homesite notice of location after the land has been withdrawn.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

Where a desert land applicant appeals from a decision of the Bureau of Land Management holding his application incomplete and, therefore, without priority of filing as against subsequent applications, which were allegedly perfected before the earlier application was corrected and refiled, the case will be remanded for final action on the respective applications so as to avoid premature, piecemeal adjudication.

Michael A. Heaney, 21 IBLA 339 (Aug. 18, 1975)

Nelda B. McAndrew, 24 IBLA 205 (Mar. 22, 1976)

Until a final authoritative judicial determination is made of the title to geothermal resources in lands patented with a reservation of all minerals to the United States, a geothermal lease application which omits such patented lands from a section will not be considered in compliance with 43 CFR 3210.2-1(c) requiring all available lands in a section to be described in the lease application. However, the application may be suspended as to that section, rather than rejected, until the title question is resolved.

Energy Partners, Edward D. Towne, 21 IBLA 352 (Aug. 25, 1975)

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with certain title information in the county recorder's offices as a precondition to lease issuance if the Bureau has insufficient title information.

A Bureau of Land Management Office has no jurisdiction to take further action on an oil and gas lease application where there has been an appeal to the Board of Land Appeals on that application.

Jean Oakason, 22 IBLA 13 (Sept. 10, 1975)

The Secretarial guideline of Oct. 18, 1973, that a Native allotment application should be rejected when the applicant fails to show 5 years of use and occupancy prior to a withdrawal of the land: (a) is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970); and (b) is a proper exercise of the discretion vested in the Secretary by the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to

270-3 (1970), the application of which does not violate any right of the allotment applicant.

Herman Joseph (On Reconsideration), 22 IBLA 266 (Oct. 30, 1975)

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with reasonable title information in the county recorder's offices as a precondition to lease issuance.

Jean Oakason, 22 IBLA 311 (Nov. 10, 1975)

Where the record of a Native allotment application at the time of adjudication shows that rejection would be proper, appellant will not be allowed on appeal to submit data which might warrant a different result, absent a clear and convincing showing explaining why the information was not afforded to the Bureau of Land Management when appellant was called upon for such data.

David E. Stevens, 23 IBLA 221 (Jan. 8, 1976)

Where a Native allotment application is properly rejected and on appeal the applicant first submits assertions which, if proved, might qualify her, but fails to make a showing explaining why the data was not timely filed, the rejection of the application will stand.

Marion Stevens, 23 IBLA 280 (Jan. 12, 1976)

Although a respondent in a grazing license trespass hearing brought by the Bureau of Land Management has the right to be represented and aided by legal counsel, the Department has no duty or responsibility under the Constitution or the Administrative Procedure Act to provide such counsel for him.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Even if it be established that a controlling regulation had been violated in previous cases, such violation does not afford a valid predicate for further violations of the regulation.

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

Where the Bureau of Land Management ordered on Mar. 26, 1975, that unofficial copies of the simultaneous oil and gas lease entry card were invalid and to be rejected, that order will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Jan. 1975 simultaneous filing period.

Eve Reese, 25 IBLA 284 (June 22, 1976)

When the holder of a grazing lease is found to have violated regulations and the terms of his lease because his cattle have trespassed on Federal land, his lease may be canceled when lesser sanctions have proved to be of no effect or when the nature of the violation demands such severity. However, a decision canceling a lease will be set aside where the district manager relied upon alleged trespasses of which the lessees had no notice and which occurred after a show cause notice

had issued, and the case will be remanded for further proceedings.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976)
83 I.D. 269

The right to a hearing on disputed issues of fact involving mining claims includes the right to adequate notice of the grounds upon which a claim's invalidity is asserted.

A Government contest complaint which asserts the invalidity of a claim because of insufficient quantity and quality of the located mineral within the limits of the claim does not put into issue the existence of excess reserves within the limits of a claim.

Where the alleged ground of invalidity of a claim was not charged in the complaint, and was not a matter of contention at the hearing, invalidation of the claim on such ground is improper, despite some evidence to support it, absent an opportunity for the contestee to present evidence on such issue where it appears that there is other pertinent evidence that may be submitted on that issue.

Where on appeal from a decision sustaining the Government's challenge of a patent application it is determined that the alleged ground of invalidity was one not raised in the complaint or at the hearing, the decision rejecting the patent application will be set aside and the Government will be afforded an opportunity to amend its complaint to embrace the charge. Where the Government does amend its complaint the mineral claimant will be granted the right to an evidentiary hearing on such issue.

United States v. Robert B. McElvaine, 26 IBLA 20 (July 7, 1976)

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

The denial of a private landowner's request that the Bureau of Land Management share in the expenses of constructing a fence between Federal and private land will be upheld where the landowner has failed to show a valid legal or factual reason for granting the request.

John L. Time and Ruth D. Blomgren, 30 IBLA 317 (June 6, 1977)

A special recreation use permit for commercial boat operations may be denied renewal for nonuse over a 2-year period of any allocated passenger days under a properly noticed "use or lose" policy. However, where the permit program is relatively recent and administrative techniques are not fully reliable, and where the appellant documents on appeal some use of its allocation during the 2-year period, the permit should not be denied renewal under the "use or lose" policy.

Canyoneers, Inc., 30 IBLA 354 (June 9, 1977)

ADMINISTRATIVE PRACTICE--Continued

Where a decision of the Board of Land Appeals is based upon an interpretation of Departmental policy, and that policy is subsequently revised and clarified so as to impel a different result in the case without prejudice to the right of any third party, on reconsideration by the Board that portion of its original decision will be modified and the revised policy will be implemented.

Werner Bergman (On Reconsideration), 31 IBLA 21 (June 20, 1977)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party and the statements of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within the time required by 43 CFR 3102.7, the offer must be rejected.

Michael J. Madigan, Robert E. Haines, 31 IBLA 58 (June 23, 1977)

Verner F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

Where a protest has been made against the validity of a drawing entry card (DEC) in the simultaneous oil and gas lease filing procedure, it is improper to issue a lease in response to the protested DEC before the protest is finally dismissed. The Board of Land Appeals, rather than a BLM State Office, has the authority to make final administrative determinations for the Department in matters relating to protests against oil and gas lease offers.

D. E. Pack, 31 IBLA 283 (July 22, 1977)

Where an area manager's decision divides the sec. 15 grazing use of a tract of public land between two applicants on the assumption that both are qualified preference right claimants, and it is determined on appeal that one claimant is not qualified, the decision will be set aside and the case remanded to the Bureau of Land Management for determination of the rights of the other applicant.

Mark K. Trask, 32 IBLA 395 (Nov. 9, 1977)

A requirement to submit a "certified copy" of a private agreement is satisfied by the submission of a copy of the agreement with a statement that it is a copy of that agreement.

Ricky L. Gifford, 34 IBLA 160 (Mar. 10, 1978)

Where the Director, BLM, in a general instruction to all Bureau offices, has specified which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers, and directs that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

Margaret A. Ruggiero et al., 34 IBLA 171 (Mar. 14, 1978)

W. C. Yahmel, 34 IBLA 377 (May 1, 1978)

ADMINISTRATIVE PRACTICE--Continued

Remedies for an alleged breach of a private lease agreement involving preference lands for a sec. 15 grazing lease must be sought in the appropriate courts and not before the Department of the Interior, which has no jurisdiction over such matters.

Evelyn Klemen, 35 IBLA 23 (May 5, 1978)

Where the official records of the Bureau of Land Management show a reservoir right-of-way affecting certain land, the oil and gas therein may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq.* (1970). This result follows even though the reservoir right-of-way may have been issued improperly or should have been terminated.

Republic Oil & Mining Co. and Margaret V. Coombs, 35 IBLA 212 (May 26, 1978)

A past incorrect application of the law in adjudication of oil and gas lease offers is no authorization for failure to follow regulations in the case of an offer currently under adjudication.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

Where the Director of the Bureau of Land Management issues a general instruction to all BLM offices specifying which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers and directing that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

Raymond A. Berry et al., 35 IBLA 386 (June 27, 1978)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

United States v. John Gavanich, 36 IBLA 111 (July 14, 1978)

The holder of a mining claim located within the Papago Indian Reservation under sec. 3 of the Act of June 18, 1934, 48 Stat. 984 (repealed, Act of May 27, 1955, 69 Stat. 67), is required to make the annual rental payment for the claim in advance (on or before the anniversary date of location of the claim). A decision invalidating a claim will be upheld where proceedings to void the claim are not initiated until several months after the rental due date, there is no evidence the rent was paid for the year, and appellant admits the failure to pay was an oversight.

John A. Cooley, 36 IBLA 245 (Aug. 14, 1978)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system, premised upon regulatory interpretation, is binding on all employees of the Bureau of

Land Management, until such time as it is properly changed.

Milton D. Feinberg, Benson J. Lamp, 37 IBLA 39 (Sept. 18, 1978) 85 I.D. 380

Milton D. Feinberg, Benson J. Lamp (On Reconsideration), 40 IBLA 222 (Apr. 11, 1979) 86 I.D. 234

In an administrative hearing to determine the validity of a mining claim, the requirements of due process are satisfied when notice and opportunity for an impartial hearing are provided in accordance with the Administrative Procedure Act. 5 U.S.C. § 551 et seq. (1976).

The procedures followed by the Department of the Interior in the initiation, prosecution, and deciding of mining contest cases are in full compliance with the Administrative Procedure Act.

The mere fact that the witnesses, the administrative law judge, and members of the Board of Land Appeals are employees of the Department of the Interior does not establish unfairness in the contest proceeding.

A Forest Service mineral examiner who is a witness in a Government contest of a mining claim is not disqualified nor is his testimony discredited merely because he is an employee of that agency.

In order to sustain a charge that an administrative law judge should be disqualified or his decision set aside for bias, a substantial showing of personal bias must be made.

The Secretary of the Interior has plenary authority over the public lands, including mineral lands, and has been entrusted with the function of making the initial determination of the validity of claims against such lands.

United States v. Paul P. Fisher and Buel B. Fisher, 37 IBLA 80 (Sept. 22, 1978)

Where there exist factual questions about the location of section and subdivisional corners in a dependent resurvey, the Board of Land Appeals may order a hearing pursuant to 43 CFR 4.415 to resolve these questions.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

A final Departmental appellate decision construing a regulation will be given immediate effect, and will not be applied with prospective effect only, unless the decision alters materially the interpretation given the regulation by earlier Departmental decisions or official published opinions, and unless the equitable benefit of the decision is not outweighed by ill effects of allowing a benefit in derogation of the regulation.

D. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 9, 1978) 85 I.D. 408

Gertrude H. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

Public notice and hearing is not required by the Code of Federal Regulations prior to closure of areas of the public lands to outdoor recreation use pursuant to 43 CFR 6010.4, implementing the multiple use management provisions of the Federal Land Policy and Management Act of 1976, 43 U.S.C. §§ 1732 and 1733 (1976).

While an appeal of one decision of the BLM is pending before the Board, the BLM is without authority to exercise jurisdiction in the matter which is the subject of the appeal. Where the BLM exercises jurisdiction and the subsequent decision presents the same issue as the first, and the parties are given an adequate opportunity at the hearing and on appeal to present evidence and argue as to this issue, the Board will proceed to consider both decisions on their merits.

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

The interpretation of an existing regulation by this Board to determine its applicability to the facts at hand does not constitute rulemaking by the Board.

R. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

Where a protestant against the issuance of an oil and gas lease supports his allegations that the lease offer is not qualified with sufficient evidence to warrant further inquiry or investigation by BLM, the protest should not be summarily dismissed for failure of the protestant to make positive proof of his allegations. Instead, the protest should be adjudicated on its merits after all available information has been developed.

Lee S. Bielski, 39 IBLA 211 (Feb. 6, 1979) 86 I.D. 80

Where the Director, Bureau of Land Management, has specified which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers, and directs that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

Helen E. Serencha, 39 IBLA 318 (Feb. 23, 1979)

Subsequent to the passage of the Federal Land Policy and Management Act of 1976 (FLPMA), the Department lacked the authority to accept donations of land under the Act of July 14, 1960, which had been expressly repealed by FLPMA. Inasmuch as the actions of the Secretary under the Act of July 14, 1960, were not ministerial, the doctrine of relation cannot be used to validate, on a nunc pro tunc basis, an acceptance of a donation under the authority of the Act of July 14, 1960, occurring after the repeal of that Act by Congress.

Junior L. Dennis, 40 IBLA 12 (Mar. 9, 1979)

It is proper to set aside a decision which raises questions concerning the facts asserted by BLM in rejecting an oil and gas lease offer, and to remand the case to BLM for further review and consideration of appellant's allegations.

Robert W. David, 40 IBLA 236 (Apr. 16, 1979)

Where a protestant against the issuance of leases, for oil and gas presents evidence demonstrating the existence of a written partnership between joint offers, and the offerors have not complied with the regulations requiring certain showings of partnerships, the offers cannot be honored.

American Quasar Petroleum Co., 42 IBLA 243 (Aug. 22, 1979)

ADMINISTRATIVE PRACTICE--Continued

Upon assuming jurisdiction of an appeal, the Board of Land Appeals has full authority to consider the entire record in making a decision, and its review is not limited to the theories of law upon which the parties have proceeded.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

Where a protest, with accompanying supporting evidence, alleges that the oil and gas lease offer drawn first in a simultaneous filing-drawing procedure violated the regulations because a party in interest was not disclosed and there was a multiple filing, the Bureau of Land Management should first afford the drawee an opportunity to respond to the protest before rejecting the offer based on facts alleged in the protest. The error, however, is rendered harmless where on appeal the offeror has full opportunity to make factual submissions and respond to the allegations.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

The filing of a timely protest suspends the authority of the State Office to act upon the matter until the protest has been ruled upon. Further, action is to be additionally suspended after a ruling on the protest for the period of time in which a person adversely affected may file a notice of appeal therefrom.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

ADMINISTRATIVE PROCEDURE

(*See also* Appeals, Contests and Protests, Hearings, Rules of Practice--if included in this Index.)

GENERALLY

The denial of a petition for classification and the rejection of an application under the Recreation and Public Purposes Act for a lease of lands which have been withdrawn and which are also subject to a State selection application which, under the terms of the withdrawal order, may be allowed, does not violate the tenets of due process because the disposition of the petition-application is at the discretion of the Secretary, and the petitioner-applicant has no vested right protected by constitutional guarantees or by the Administrative Procedure Act.

Mountaineering Club of Alaska, Inc., 19 IBLA 198 (Mar. 19, 1975)

The doctrine of res judicata will not bar an administrative proceeding to determine the validity of three unpatented mining claims where, in a previous condemnation action for the War Department's taking of a temporary exclusive easement covering the claims, the judgment of the federal district court was limited solely to the compensation to be paid by the United States, and there was no litigation of the issue of the validity of the claims and no prior adjudication of that issue in the Department of the Interior.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimants concerning the validity of the claims with the intention that the claimants should act in reliance thereon, with the

ADMINISTRATIVE PROCEDURE--Continued

GENERALLY--Continued

result that the claimants were thereby induced to do so, to their ultimate damage.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of three mining claims which were the subject of a previous condemnation action for the taking by the Government of a temporary exclusive easement over the claims, where the issue of the validity of the claims was not actually litigated and it was wholly unnecessary for the Court to adjudicate that issue in rendering its judgment.

The Department of the Interior has jurisdiction, in proper proceedings, to determine the validity of mining claims on Federal lands.

United States v. A. B. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

The rejection of an application for the purchase of land under the Recreation and Public Purposes Act does not violate the tenets of due process since the disposition of the application is at the discretion of the Department, and the applicant has acquired no vested right protected by the United States Constitution.

Board of County Commissioners, Ouray County, Colorado, 22 IBLA 182 (Oct. 7, 1975)

Although a respondent in a grazing license trespass hearing brought by the Bureau of Land Management has the right to be represented and aided by legal counsel, the Department has no duty or responsibility under the Constitution or the Administrative Procedure Act to provide such counsel for him.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

When deciding whether issuance of a phosphate prospecting permit is appropriate, the Bureau of Land Management is entitled to rely on the reasoned opinion of Geological Survey as its technical expert. A mineral determination made by Geological Survey will not be disturbed in the absence of a clear and definite showing of error. However, when Survey later changes its own determination, the case will be remanded for further consideration.

Philip Shaiman, 25 IBLA 177 (June 14, 1976)

A noncompetitive oil and gas lease applicant's failure to submit the statement of interest of the other parties in interest to the offer is not excused, nor is the Department estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease to the applicant on an offer which was deficient for the same reason.

Leon M. Flanagan et al., 25 IBLA 269 (June 24, 1976)

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq*. Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to

ADMINISTRATIVE PROCEDURE--Continued

GENERALLY--Continued

schedule a hearing at which the applicant may produce evidence to establish entitlement to his allotment.

Donald Peters, 26 IBLA 235 (Aug. 17, 1976)
83 I.D. 308

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

United States v. Andy Syndtad, 42 IBLA 313 (Aug. 29, 1979)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

Service of a document upon a person's attorney of record constitutes effective service upon such person.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where the State of Alaska has applied to select certain land and has been given tentative approval of that selection, and thereafter a conflicting Native allotment application is filed which is supported only by meager evidence of use and occupancy, it is error to allow the allotment application and to cancel the State's tentative approval and reject the selection application without notice and an opportunity for a hearing in which the State may participate.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

An applicant for a private land exchange cannot benefit from the doctrine of equitable estoppel where no agent of the Government who was authorized to consummate the exchange falsely and materially misrepresented to or concealed material facts from appellant concerning the Government's position with respect to the proposed exchange.

Siesta Investments, Inc., 28 IBLA 118 (Nov. 15, 1976)

ADMINISTRATIVE PROCEDURE--Continued

GENERALLY--Continued

The U.S. Geological Survey is the technical expert of the Department of the Interior in matters concerning geologic evaluations. The Bureau of Land Management is entitled to rely on mineral determinations of Survey, such as qualification of a test well as a discovery well defined by a unit agreement, in the absence of a clear and definite showing of error.

Corrine Grace, 30 IBLA 296 (June 1, 1977)

Where, pursuant to 43 U.S.C. § 315g (1970), a State has acquired land subject to a reservation of minerals to the United States, and the State thereafter leases the surface of the land to a corporation for purposes which are plainly incompatible with mining, the surface lessee has standing to initiate a private contest to determine the validity of unpatented mining claims located on the land. It is not essential to the cause of action that there be an actual physical interference by one party with the other party's use of the land if their respective interests are clearly and potentially conflicting.

Continental Oil Co. v. Aztec Exploration and Development Co., 32 IBLA 1 (Aug. 24, 1977)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a proceeding to determine the validity of an unpatented mining claim the claimants must prevail, if at all, upon the strength of their own case, rather than upon any weakness in that of the Government.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

A land use permit which, by its own terms, is subject to termination after failure of the permittee to comply with its provisions, may be revoked by BLM where the permittee has been requested to discontinue an unauthorized use and thereafter fails to correct the breach.

Charles W. Shell et al., D-78-3 (Nov. 15, 1977)

The timeliness of filing Federal tax returns and payments and of making rental payments for Federal oil and gas leases are governed by different statutes and regulations and are not the same. Receipt in the proper Bureau of Land Management office determines the timeliness of rental payment, whereas the Internal Revenue Service uses a postmark date. The postmark date is relevant in considering a Federal oil and gas lease rental only to determine if the lessee exercised reasonable diligence so as to warrant reinstatement of a lease terminated for failure to pay the rental timely.

David R. Smith and Darla L. Smith, 33 IBLA 63 (Dec. 5, 1977)

Under 43 CFR 4.410, any party to a case who is adversely affected by a decision of the Bureau of Land Management has a right of appeal to the Board of Land Appeals, even where the decision concerns legislation which has been repealed.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

Under 43 CFR 4.401(a), a notice of appeal to the Board of Land Appeals may be considered even if not filed within the 30-day appeal period, where it is filed within 10 days of the deadline date and is transmitted within the appeal period.

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

Where the Bureau of Land Management brings a contest complaint against unpatented mining claims, naming as contestee only the estate of the deceased claimant, proper service of process upon the court appointed administrator, executor, or personal representative of the deceased claimant is necessary in order to affect the interests of all the heirs of the deceased.

Heirs of a deceased mining claimant who personally respond without protest or objection to a Government contest complaint which names as contestee only the estate of their intestate decedent will be bound by the result of such contest insofar as it purports to affect their interest in that estate, even though service on the estate itself was faulty.

United States v. Estate of W. B. Wood, 34 IBLA 44 (Feb. 16, 1978)

The Federal Rules of Civil Procedure are not binding on administrative agencies.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

In order to sustain a charge that land embraced within a mining claim is not held in good faith for mining purposes the evidence relating to mineral claimant's lack of good faith must be clear.

United States v. Clayton A. Dillman and Jean P. Dillman, 36 IBLA 358 (Aug. 31, 1978)

Where unpatented mining claims were located some 50 years before the claimant filed application for patent, during which time they went unchallenged by the Government, the United States is not barred from contesting the validity of the claims by invocation of the equitable defense of laches.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

A Bureau of Land Management decision rejecting a selection application by the State of Utah under its Miner's Hospital Grant because the land is deemed mineral in character due to a classification as valuable for oil, gas, and coal will be set aside because it failed to consider relevant statutes and regulations permitting selections of land valuable for minerals leasable under the Mineral Leasing Acts with a reservation of the minerals to the United States.

A State selection application for lands valuable for leasable minerals may be rejected where it is determined that the disposal of the surface rights will unreasonably interfere with current or contemplated operations under the Mineral Leasing Acts and there is a proper basis in the record for such a determination which is unrefuted by the applicant. However, if there is no substantiation in the record for the determination and a State asserts error, the case will be remanded to the Bureau of Land Management to reconsider the determination, with the Geological Survey, and substantiate the basis of any future determination.

State of Utah, Department of Natural Resources, 38 IBLA 85 (Nov. 15, 1978)

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(3) do not violate due process.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

An appeal from a decision denying a protest against the issuance of a patent must be dismissed if the patent has been issued, because the Department has no jurisdiction to act further in the matter.

Because issuance of a patent removes the land from Departmental jurisdiction, it is not proper to issue that patent simultaneously with dismissal of a protest against the patent application because such action deprives the protester of his right to review and precludes compliance with 43 U.S.C.A. § 1701(a)(5) (West Supp. 1978) which mandates objective administrative review of initial decisions.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

A notice of appeal must be filed within 30 days after appellant is served with the decision from which he is appealing. When a party does not appeal, the doctrine of administrative finality, the administrative equivalent of res judicata, generally bars consideration of the same issue in a later appeal.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas B. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

ADMINISTRATIVE PROCEDURE--Continued

GENERALLY--Continued

Regulation 43 CFR 4.450-1 gives a person with an adverse interest in land a right to contest an adverse claim. The Department of the Interior has consistently recognized States as included within the term "person" within the meaning of the regulation, allowing them to initiate private contests.

Where the State of Alaska has shown an interest in land in its existing airport, it may bring a private contest to challenge Native allotment applications for land in conflict with the airport.

State of Alaska, 40 IBLA 79 (Mar. 22, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

Where the Geological Survey, in making its decision, has reviewed the same information submitted on appeal to the Board of Land Appeals to show that there was a well capable of producing oil or gas in paying quantities on the date the lease expired, and there are no disputed facts, but only a dispute on the proper application of the law to those facts and legal interpretations, a hearing is not warranted in the case.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

The applicable regulation, 43 CFR 4.414 (1977), allows the Board some discretion in deciding whether to disregard the answer of an appellee who fails to file an answer within 30 days after service on him of the notice of appeal or statement of reasons and whose delay in filing is not waived under the provisions of 43 CFR 4.401(a) (1977).

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Where an applicant for an Alaska Native allotment was a minor at the time she alleges the initial use and occupancy of the land, but not so young as to preclude any possibility that she was then capable of doing so as an independent citizen in her own right to the potential exclusion of others, prior to rejection of her application on the basis of her youth BLM should provide notice and an opportunity for hearing.

Nellie Boswell Beecroft, 41 IBLA 70 (May 31, 1979)

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Continued--

ADMINISTRATIVE PROCEDURE--Continued

GENERALLY--Continued

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

Where the Bureau of Land Management (BLM) determines that an Alaska Native allotment application should be rejected in part because the Native did not use all of the land applied for, the BLM shall initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frank Rulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

Broad discretion is committed to an agency in interpreting regulations. A party challenging an interpretation and the administrative application thereof must demonstrate that the interpretation is unreasonable and that the agency's application lacks a rational foundation.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

"Person." Regulation 43 CFR 4.450-1 specifically gives persons with an adverse interest in land a right to contest the adverse claim. It does not depend on the applicability of the due process clause of the Constitution to either claimant. A State is a "person" within the meaning of this private contest regulation.

State of Alaska, 42 IBLA 1 (July 25, 1979)

Where BLM fails to show that there was service of a decision rejecting an Alaska Native allotment and the applicant learns of his rejection 4-1/2 years after rejection, the applicant may file a timely appeal within 30 days of notice of the decision.

Mailing to the Bureau of Indian Affairs a carbon copy of a decision rejecting an application for an Alaska Native allotment is not service upon the applicant so as to comply with 43 CFR 4.401.

Gust J. Reft, Sr., 42 IBLA 86 (Aug. 13, 1979)

Generally the Geological Survey may reconsider and modify or revoke its own decision in the absence of an appeal to the Board of Land Appeals. However, the filing of an appeal to the Board removes the matter from the jurisdiction of Survey pending disposition of the appeal.

Where Geological Survey and one of two parties to a compulsory unitization of two outer continental shelf oil and gas leases request a remand of a Survey decision for further consideration, and certain issues raised on appeal would appropriately be better first considered by Survey, the case will be remanded to Survey. In the circumstances, a request to stay implementation of Survey's prior decision may be granted by the Board unless and until Survey acts upon the request when it reconsiders the case.

Sun Oil Co., 42 IBLA 254 (Aug. 23, 1979)

Generally where BLM determines that an Alaska Native allotment application should be rejected because the use of the land by a minor child was not sufficiently established as an independent citizen in his own right, at least potentially exclusive of others, BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq*., and the guidelines set forth in *Donald Peters*, 26 IBLA 235, 83 I.D. 308 (1976).

Sarah A. Pence et al., 43 IBLA 266 (Oct. 15, 1979)

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukapigak, 44 IBLA 313 (Dec. 31, 1979)

ADJUDICATION

As only nonmineral lands may be appropriated under the law pertaining to headquarters sites, where the Geological Survey reports that a tract of entered land is nonmineral in character and the Bureau of Land Management therefore formally advises the claimant that the tract is subject to settlement or occupancy and officially acknowledges his claim, and the claimant thereafter complies fully with the law and applies for patent, a subsequent determination that the land is mineral in character will not vitiate the claim unless it is established that the original finding of nonmineral character was error, and that facts in existence at the time equitable title passed required a determination that the land was then mineral. Due process permits such action to be taken only after proper notice and opportunity for hearing.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

In order for an assertion of competitive interest to create a bar to the allowance of an application to modify an existing coal lease by the addition of contiguous land, the competitive interest asserted must be identifiable, substantial and genuine, and not merely speculative or casual.

Malcolm N. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

A Federal district court jury verdict in a suit to cancel desert land patents, that the entrymen and their purchaser under an illegal executory contract did not commit fraud against the United States, does not collaterally estop this Department from adjudicating a contest grounded on the illegal executory contract against the purchaser's own entry, because the legal standard applicable in the subsequent contest is different than that in the fraud action--a desert land entry can be subject to cancellation for acts that do not constitute fraud.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976)   83 I.D. 280

A delay in the adjudication of an application by officers or employees of the Department cannot create rights in Federal property contrary to law.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John C. Ketscher, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

Where a decision calls upon an applicant to supply certain documents and make certain showings in support of its mineral patent application or face rejection of the application, and on appeal it is established that all of the documents and evidence called for had already been furnished by the applicant and incorporated in the case record, where they were apparently overlooked by those who examined the application, the decision will be reversed.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977)
84 I.D. 990

Where the entryman makes admissions and submits evidence which establish conclusively that his failure to "prove up" his desert land entry during its initial term and two extensions was not the result of unavoidable delay, and that the failure was not without fault on his part, no further administrative proceedings are required prior to rejecting his application for a third extension.

Thomas D. Hickey, 34 IBLA 86 (Feb. 22, 1978)

Although a right-of-way granted under the Act of Jan. 21, 1895, was previously subject to cancellation by the authorized officer for non-use pursuant to 43 CFR 2802.2-3, the Federal Land Policy and Management Act of 1976 provides that suspension or termination of a right-of-way requires an appropriate administrative proceeding pursuant to 5 U.S.C. § 554 (1970), except where the right-of-way provides by its terms that it will terminate in such event.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

Where the Bureau of Land Management erroneously described a portion of the land listed in a notice to show cause why a grazing lease should not be canceled in part, the lessee is not denied due process where the land could not be confused with other lands in the grazing lease, where BLM corrected and explained its mistake in the subsequent decision, where no prejudice from the mistake is alleged or evident, and where the lessee has had every opportunity to present her arguments on the issues involved in the BLM actions.

If a grazing lease, canceled in part for loss of control of preference lands, expires by its terms prior to decision on the appeal of the cancellation and if the grazing lease is renewed solely because the appellate decision has not been rendered, with no consideration of the lessee's or conflicting preference rights, the Board of Land Appeals will consider the appeal of the cancellation as applicable to the renewed lease.

Evelyn Elsman, 35 IBLA 23 (May 5, 1978)

Where the evidence in an administrative appeal raises countervailing legal presumptions of equal probative worth, a factfinding hearing may be ordered pursuant to 43 CFR 4.415.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

ADMINISTRATIVE PROCEDURE--Continued

ADJUDICATION--Continued

Where a mineral patent application is supported by information sufficient to permit a mineral examination of the claims, but not sufficient for the adjudicator to approve the application for patent, he may properly call on the applicant for supplemental evidence to support the application. However, if the claimant fails to submit it, the adjudicator may not penalize such failure by summary rejection of the application for reasons relating to disputed issues of fact without notice and an opportunity for hearing.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Where contestees deny the allegations in the complaint only as to 4 claims but not as to 15 other claims addressed in the complaint, the complaint will be taken as admitted as to the 15 claims not addressed in the answer to the complaint.

United States v. Jerry Prock et al., 39 IBLA 148 (Jan. 29, 1979)

The interpretation of an existing regulation by this Board to determine its applicability to the facts at hand does not constitute rulemaking by the Board.

H. R. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

In order to sustain a charge that an administrative law judge should be disqualified or his decision set aside because of bias, a substantial showing of personal bias must be made. An assumption that he might be predisposed in favor of the Government is not sufficient.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

State of Alaska selection applications should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

State of Alaska applications for prior-filed airport conveyances of land needed for an existing airport should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska, 42 IBLA 1 (July 25, 1979)

Where, on appeal, a mining claimant alleges that he timely mailed the affidavits of assessment work to the proper BLM office but there is no evidence to indicate they were ever received, the claimant must bear the consequences of the loss and his inability to prove his allegation that they may have been received by the Bureau and subsequently lost.

Amanda Mining & Manufacturing Ass'n., 42 IBLA 144 (Aug. 16, 1979)

Continued--

ADMINISTRATIVE PROCEDURE--Continued

ADJUDICATION--Continued

Roger Kuhn, 43 IBLA 182 (Sept. 28, 1979)

Where an application to acquire Federal land is rejected by BLM for the reason that the applicant's own declaration of material facts stated in his application demonstrate conclusively that he is not entitled to the land as a matter of law, an effort on appeal to revise, amend, or deny the facts will not be considered absent a persuasive explanation of error in the application.

The substantial use and occupancy required by the Native Allotment Act must be achieved by the Native as an independent citizen acting for himself, and not as a dependent child visiting and using the land in the company of his parents. Where the allotment applicant admits that this was his only presence on the land prior to its segregation from the operation of public land laws, the allotment application is properly rejected.

Where, even if all of the allegations of material fact made by an applicant for a Native allotment are accepted as true, allowance of the application is barred as a matter of law, the rule of *Pence* v. *Kleppe*, 529 F.2d 135 (9th Cir. 1976), is not applicable, and the application is properly rejected without a hearing.

Andrew Petla, 43 IBLA 186 (Oct. 5, 1979)

Where a protest, with accompanying supporting evidence, alleges that the oil and gas lease offer drawn first in a simultaneous filing-drawing procedure violated the regulations because a party in interest was not disclosed and there was a multiple filing, the Bureau of Land Management should first afford the drawee an opportunity to respond to the protest before rejecting the offer based on facts alleged in the protest. The error, however, is rendered harmless where on appeal the offeror has full opportunity to make factual submissions and respond to the allegations.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

Where determination of issues of fact turn upon weight to be given to conflicting testimony, findings of fact concerning testimony are required to be made by the initial trier of fact.

Estate of Joseph Caddo a.k.a. James Joseph Caddo and Jim Butler, 7 IBIA 286 (Nov. 28, 1979)

Where a mineral patent application is supported by a mineral examination of the claim which finds a valid discovery and recommends issuance of a patent for a portion of the claim, the BLM may not summarily reject the application on the face of the record for reasons related to disputed issues of fact without notice and an opportunity for hearing.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

ADMINISTRATIVE LAW JUDGES

While a mining contest is within the jurisdiction of an administrative law judge, he may reopen the hearing for the production of further evidence before he makes his decision.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

ADMINISTRATIVE PROCEDURE--Continued

ADMINISTRATIVE LAW JUDGES--Continued

An administrative law judge has a duty to conduct a hearing in such a manner that all available relevant facts in a mining contest will be adduced. He should take special care to do so where a party is without counsel and there is confusion concerning the status of purported tendered evidence.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

Upon appeal from a decision of an administrative law judge, the Board of Land Appeals may make all findings of fact and conclusions of law based upon the record just as though it were making the decision in the first instance.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977)
84 I.D. 475

A mining claim will be declared null and void where the Board's de novo review of the evidence submitted at a hearing, held in accordance with the provisions of the Administrative Procedure Act and presided over by an administrative law judge qualified under the Act, establishes that the claimant has not satisfied the requirements of discovery, and there was no error in the conduct of the proceeding.

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

It requires a substantial showing of bias to disqualify a hearing officer in administrative proceedings or to justify a charge that the hearing was unfair.

United States v. Richard H. Kingdon and Edith F. Kingdon, 36 IBLA 11 (June 27, 1978)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

United States v. John Gavanich, 36 IBLA 111 (July 14, 1978)

Administrative law judge properly dismissed without a hearing a private homestead entry contest in which complaint failed to allege corroborated facts which, if proved, would provide sufficient basis for cancellation of entry.

Ernest C. Lamb v. Richard R. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

ADMINISTRATIVE PROCEDURE--Continued

ADMINISTRATIVE LAW JUDGES--Continued

The administrative law judge properly exercised his authority to control the hearings where he controlled the manner of examination but did not limit the scope of testimony of witness, and where he permitted adequate time for submission of proposed findings by the parties prior to issuance of the final order.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

An administrative law judge in rendering a decision need not make a separate ruling on each finding of fact and conclusion of law. It is sufficient if the decision summarizes the controlling principles of law and the testimony of witnesses relative thereto and explains why appellants' evidence was insufficient to meet the legal test for a discovery of valuable mineral.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

When a party to an Indian probate proceeding appears without an attorney, the administrative law judge has a duty not to be a mere umpire, but to see that all relevant facts are developed.

Where a party to an Indian probate proceeding was not represented by counsel and was obviously unprepared for proper presentation of testimony and ignorant of significance of the facts, the administrative law judge had the duty to see that all relevant facts and circumstances, both favorable and unfavorable to the parties, were brought out.

Estate of Joe (Jose) Elvino Juancho, 7 IBIA 294 (Dec. 4, 1979)

ADMINISTRATIVE PROCEDURE ACT

The ultimate findings and decision of the administrative law judge adopted by the Commissioner of Indian Affairs will not be set aside upon administrative review where they are supported by substantial evidence.

Administrative Appeal of Mary Ann Torsseh Combs (Flathead Allottee No. 1648) v. Commissioner of Indian Affairs, 4 IBIA 27 (Apr. 28, 1975) 82 I.D. 164

A mining claim is a claim to property which may not be declared invalid except in accordance with due process of law. Due process consists of proper notice and opportunity for an agency hearing in accordance with the Administrative Procedure Act, and it suffices if the claimant is properly notified and afforded the opportunity to be heard. But there is no requirement that a hearing be held where the contestee fails to avail himself of the opportunity for a hearing within the time provided.

United States v. James R. and Sammy R. Ragsdale, 20 IBLA 348 (June 11, 1975)

The ultimate findings, conclusions and order of the administrative law judge will not be set aside upon administrative review where they are supported by substantial evidence.

Estate of Evans Ingatuah, 4 IBIA 103 (July 29, 1975)
82 I.D. 352

Where the answer to a mining contest complaint denying the charges is timely filed by one contestee, but is untimely filed by all other contestees, the charges as to those contestees filing untimely answers will be taken as admitted and their interests in the mining claims will be declared null and void. The contestee who filed a timely answer is entitled to a hearing as to the validity of the claims.

United States v. Albert S. Hunter et al., 22 IBLA 28 (Sept. 10, 1975)

The Secretarial instruction of Oct. 18, 1973, which mandates a showing by a Native allotment applicant of 5 years of occupancy prior to a withdrawal of the land, was not required to be published as rulemaking since 5 U.S.C. § 553(a)(2) (1970) exempts from its ambit matters pertaining to public property.

Heirs of Dorothy Gordon, 22 IBLA 213 (Oct. 15, 1975)

The Secretarial guideline of Oct. 18, 1973, that a Native allotment application should be rejected when the applicant fails to show 5 years of use and occupancy prior to a withdrawal of the land: (a) is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970); and (b) is a proper exercise of the discretion vested in the Secretary by the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), the application of which does not violate any right of the allotment applicant.

Herman Joseph (On Reconsideration), 22 IBLA 266 (Oct. 30, 1975)

A cattle trespass decision rendered by an administrative law judge may be set aside and remanded where the decision does not include a statement of findings and conclusions, and the reasons or basis therefor, on all material issues of fact, law or discretion as required for initial decisions under 5 U.S.C. § 557 (1970) and 43 CFR 4.475.

United States v. John J. Casey, 22 IBLA 358 (Nov. 14, 1975) 82 I.D. 546

Where the answer to a mining contest complaint denying the charges is not timely filed, the charges will be deemed admitted and the contest will be decided without a hearing. 43 CFR 4.450-7(a).

United States v. Edison T. Schaefer, 29 IBLA 84 (Feb. 23, 1977)

Where an administrative law judge's decision contains a ruling, in a single sentence, on all of the proposed findings and conclusions submitted by a party to a hearing and the ruling on each finding and conclusion is clear, there is no requirement that the judge rule separately as to each of the proposed findings and conclusions.

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

Under the circumstances of this case, appellant's paternity is not an issue cognizable by the Department in probating her mother's will. In accordance with sec. 8(b) of the Administrative Procedure Act findings should be limited to issues necessary to the disposition of a case.

A full and true disclosure of the facts was denied when only the presiding judge was permitted to ask questions of a crucial witness. This procedure violated sec. 7(c) of the Administrative Procedure Act.

Estate of Rena Marie Edge, 7 IBIA 53 (Apr. 25, 1978)

The Department of the Interior is lawfully empowered to initiate a contest pursuant to the Administrative Procedure Act to determine the validity of unpatented mining claims. This procedure makes no provision for 1) trial by jury, 2) advice to the contestant concerning his constitutional rights, 3) compensation to the contestant for the value of the claim if it is found to be invalid, or 4) appointment by the Department of qualified counsel to represent the contestant; and this procedure does not violate constitutional guarantees of due process, the General Mining Law, or the Administrative Procedure Act. Presentation of the contestant's case by counsel employed by the Forest Service in appropriate cases is permissible, and Federal employees may testify as witnesses, and may conduct examinations and secure mineral samples on unpatented mining claims without a search warrant.

United States v. John Gayanich, 36 IBLA 111 (July 14, 1978)

Where a qualifying discovery of mineral has been made by a permittee during the term of a permit, a coal preference right lease application need not be rejected because it was filed after the permit expired.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

In an administrative hearing to determine the validity of a mining claim, the requirements of due process are satisfied when notice and opportunity for an impartial hearing are provided in accordance with the Administrative Procedure Act. 5 U.S.C. § 551 *et seq.* (1976).

The procedures followed by the Department of the Interior in the initiation, prosecution, and deciding of mining contest cases are in full compliance with the Administrative Procedure Act.

United States v. Paul P. Fisher and Buel E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

ADMINISTRATIVE PROCEDURE--Continued

ADMINISTRATIVE PROCEDURE ACT--Continued

A delay in taking action on an application for extension of a coal prospecting permit while the Secretary formulates a new leasing policy does not violate the Administrative Procedure Act, 5 U.S.C. § 555(b) (1976), nor does it constitute an abuse of discretion which would create any rights not authorized by law. No hearing is required when the facts of a case are not in dispute and the only issues are questions of law.

Sec. 9(b) of the Administrative Procedure Act, *as amended*, 5 U.S.C. § 558(c) (1976), does not apply to coal prospecting permit extension applications because the prospecting is not an "activity of a continuing nature" within the meaning of the statute. As the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 30 U.S.C. § 201 (1976), removed the Secretary of the Interior's discretion to grant extensions, applications for preference right leases filed after expiration of the initial 2-year permit term, and during pendency of extension applications, cannot be issued.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Mining claims purportedly located on land not available for such location confer no property right upon the locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 *et seq.* (1976).

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

Whether the issuance of PLO No. 5448, prohibiting oil and gas leasing in Alaska, without prior proposed rulemaking is violative of the Administrative Procedure Act or of the Alaska Native Claims Settlement Act need not be decided; by such issuance the Secretary has enunciated a policy of rejecting mineral lease applications well within his discretionary authority.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

The Board of Indian Appeals has authority to reverse findings of fact by an administrative law judge even when not clearly in error. But an administrative law judge will not be reversed when his decision turns upon findings concerning credibility, which in turn are based upon the demeanor of witnesses, and such findings are supported by substantial evidence.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

ADMINISTRATIVE REVIEW

The ultimate findings and decision of the administrative law judge adopted by the Commissioner of Indian Affairs will not be set aside upon administrative review where they are supported by substantial evidence.

Administrative Appeal of Mary Ann Topsseh Combs (Flathead Allottee No. 1648) v. Commissioner of Indian Affairs, 4 IBIA 27 (Apr. 28, 1975) 82 I.D. 184

ADMINISTRATIVE PROCEDURE--Continued

ADMINISTRATIVE REVIEW--Continued

The ultimate findings, conclusions and order of the administrative law judge will not be set aside upon administrative review where they are supported by substantial evidence.

Estate of Evans Ipgatuah, 4 IBIA 103 (July 29, 1975)
82 I.D. 352

A decision by BLM to refrain from leasing certain lands for geothermal resources will be upheld when the record shows the decision to be a reasoned analysis of the factors involved based upon considerations of public interest, and no sufficient reason to disturb the decision is shown.

Southern Union Production Co., 27 IBLA 54 (Sept. 23, 1976)

California Geothermal, Inc., 37 IBLA 172 (Oct. 10, 1978)

Bureau of Land Management Instruction Memorandum No. 77-37 outlined a general policy for the assessment of additional rental on oil and gas lease offers pending when the rental rate was increased by regulation, but left to the discretion of the State Offices the particular implementing procedures. Procedures used by a State Office which may be different from other State Offices, but which do not prejudice the offerors' right to receive oil and gas leases if leases are issued on the lands applied for, are not arbitrary and capricious as to require reversal of the decisions assessing additional rental.

E. R. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

Where the Bureau of Land Management issued a decision notifying a successful lease offeror of the increased advanced rental rate from $.50 to $1 per acre as per the regulation change in 43 CFR 3103.3-2, effective Feb. 1, 1977, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board and upon our affirmation, appellant now will be given 15 days to comply with the original requirements before his offer is rejected.

Paul Landis, 32 IBLA 374 (Oct. 31, 1977)

Where the Bureau of Land Management issued a decision notifying a successful drawee in the simultaneous oil and gas filing program of the increased advance rental rate from 50 cents to $1 per acre pursuant to a regulation change effective Feb. 1, 1977, 43 CFR 3103.3-2, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board. Payment of the required increased rental during the appeal period is deemed timely and a lease may issue.

George Gabriel, 33 IBLA 44 (Nov. 25, 1977)

The Boards of Appeal of the Department of the Interior have no authority to declare invalid a regulation of this Department.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer was not proper and must be rejected, the applicant may not thereafter appeal the matter to this Board merely because the Bureau of Land Management, in implementing the Board's decision, mistakenly advised him that he had the right to such an appeal. The matter is res judicata, and the subsequent appeal must be dismissed.

Where the Board of Land Appeals, by a previous decision, has held that a particular oil and gas lease offer must be rejected, and the rejected applicant files suit for judicial review of that decision in the United States District Court, and also files a contemporaneous appeal to the Board from a BLM decision implementing the Board's decision, the Board will defer to the Court's jurisdiction and make no decision on the merits of the appeal, which is subject to summary dismissal by the Board.

Donald W. Cover (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that certain coal prospecting permits have terminated and that no preference right to a coal lease is attached to any of them, an unapproved assignee of the permits may not thereafter appeal the matter to this Board following Bureau of Land Management notification to the permittees of this Board's decision. The matter is res judicata and such subsequent appeal must be dismissed, absent compelling legal or equitable considerations.

Peabody Coal Co., 36 IBLA 242 (Aug. 14, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer may properly be rejected for the reason that title to the lands involved was uncertain, and a new lease offer for the same lands is again rejected for the same reason, the matter is res judicata, and the subsequent appeal is properly dismissed.

N. L. Industries, Inc., 37 IBLA 335 (Oct. 26, 1978)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

The right to administrative relief is a privilege afforded by law to persons who consider themselves interested or aggrieved. The burden is upon the interested person to act affirmatively to protect perceived interests. Such a person is not entitled to wait until all other interested persons act, to speculate on the outcome, and then, if the decision is adverse, to seek to reopen the matter on his or her own behalf, when that person has been afforded notice of all the proceedings.

Western Slope Gas Co. (On Reconsideration), 43 IBLA 259 (Oct. 15, 1979)

Upon assuming jurisdiction of an appeal, the Board of Land Appeals has full authority to consider the entire record in making a decision, and its review is not limited to the theories of law upon which the parties have proceeded.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

BURDEN OF PROOF

When the Government contests a mining claim it bears only the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made; the Government's mineral examiner is not obliged to explore beyond the current workings of a mining claimant in attempting to verify a discovery.

United States v. Herbert Clark, 18 IBLA 368 (Jan. 30, 1975)

A determination by a district manager of the grazing capacity of lands offered for a sec. 15 grazing lease will not be overturned in the absence of a clear showing of error. The burden of proof is upon the party challenging such determination to show that the decision is erroneous or that he has not been dealt with fairly.

John T. Murtha, 19 IBLA 97 (Mar. 4, 1975)

Kaser Brothers, 24 IBLA 265 (Mar. 29, 1976)

In a mining contest a mining claimant is the true proponent under the Administrative Procedure Act, 5 U.S.C. § 556(d) (1970), of a rule or order that he has complied with the mining laws, and he has the ultimate burden of proof--the risk of nonpersuasion--to show by a preponderance of the evidence that there is a valuable mineral deposit on the claim, when the Government has made a prima facie case of lack of such a discovery.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

When the Government contests a mining claim on a charge of no discovery, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established.

United States v. Charles J. MacIver et al., 20 IBLA 352 (June 11, 1975)

United States v. Carl Pellmey, 25 IBLA 50 (May 14, 1976)

United States v. Russ Knecht, 39 IBLA 8 (Jan. 8, 1979)

When the Government contests a mining claim on a charge of no discovery, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform discovery work for claimants or to explore beyond a claimant's workings.

United States v. C. V. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

United States v. Wesley C. Miles, Sr., 36 IBLA 213 (Aug. 3, 1978)

When the Government contests a mining claim and establishes a prima facie case that contestee has not made a discovery of a locatable mineral deposit, the burden devolves on contestee to establish by a preponderance of the evidence that the claim has been validated by the discovery of a locatable mineral deposit.

A bog iron ore deposit does not meet the prudent man/marketability test where the evidence shows that contestee could only develop the iron deposit for sale for metallurgical uses after further exploration to establish a higher grade or greater tonnage of ore, or upon future favorable developments in the iron ore market.

United States v. Theresa P. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform

discovery work for claimants or to explore beyond a claimant's workings.

United States v. Ruth Arcand et al., 23 IBLA 226 (Jan. 9, 1976)

United States v. Edward T. McHenry et al., 43 IBLA 122 (Sept. 26, 1979)

An applicant under the Color of Title Act, 43 U.S.C. § 1068 (1970), has the burden to establish to the Secretary of the Interior's satisfaction that the statutory conditions for purchase under the Act have been met.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976) 83 I.D. 23

When the Government contests a mining claim, it has assumed the burden of presenting a prima facie case that the claim is invalid; when it has done so, the burden then devolves on the mining claimant to prove by a preponderance of the evidence that the claim is valid.

United States v. Robert W. Deal, 23 IBLA 378 (Feb. 4, 1976)

Applications for phosphate prospecting permits are properly rejected by the Bureau of Land Management upon the basis of a determination by the Geological Survey that the lands applied for contain workable deposits of phosphate thus making the lands subject to the leasing provisions rather than the prospecting provisions of the Mineral Leasing Act. A review of the technical data relied upon by the Geological Survey in making its determination is not required where no evidence is submitted on appeal demonstrating error in that determination.

William F. Martin, 24 IBLA 271 (Mar. 30, 1976)

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made.

United States v. John M. Tappan, Jr., et al., 25 IBLA 1 (May 5, 1976)

When the United States contests a mining claim it has by practice assumed only the burden of going forward with sufficient evidence to establish a prima facie case on the charges in the contest complaint; the burden then shifts to the contestee to refute, by a preponderance of the evidence, the Government's case.

The United States has established a prima facie case of the invalidity of a mining claim when a qualified Government mining examiner testifies that he has examined the claim and found the mineral values insufficient to support the discovery of a valuable mineral deposit.

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

United States v. Emma Elizabeth Conner, and Walter T. Nolte, as the Heirs of D. W. Speer, a Last Known Director of the Arlington Gold Mining Co. (Contestee), 31 IBLA 173 (July 5, 1977)

When the Government contests a mining claim, by practice it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Likewise, a millsite claimant has the burden of establishing the validity of his claim by a preponderance of the evidence.

A prima facie case of lack of discovery within a mining claim is established when a Government mineral examiner testified that he has examined the claim and found mineralization insufficient to support a finding of discovery.

United States v. Alois A. Dietemann and Doris E. L. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

In a Government contest of the validity of a mining claim it is the claimants who are the true proponents of a rule or order, namely, that they have complied with the mining laws and have qualified to receive fee title to the land.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

One challenging the accuracy of an appraisal of water based on fair market value must show by substantial evidence the nature of the alleged error; where the appraisal has been conducted in accordance with generally accepted appraisal principles, allegations of error unsupported by evidence will be given little weight.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

When the Government has presented a prima facie case of lack of discovery of a valuable mineral deposit on a mining claim, the mining claimant then has the burden of establishing by a preponderance of the evidence that the discovery test has been met. Consequently, the ultimate burden of proving discovery is always upon the mining claimant.

United States v. George J. Hunt and A. H. Goodwin, 29 IBLA 86 (Feb. 23, 1977)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

A lode mining claim for barite is properly declared null and void in the absence of a showing of a discovery on the claim of a deposit of barite which would warrant a prudent man in further expending his labor and means in the reasonable expectation of developing a valuable mine. Evidence of mineralization which may justify further exploration is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

Once the Government has established in a mining claim contest a prima facie case that the claims are not valid for lack of discovery, the burden shifts to the contestee to prove the discovery of a valuable mineral deposit by a preponderance of the evidence.

United States v. Howard S. McKenzie, 29 IBLA 270 (Mar. 28, 1977)

In a Government contest challenging the validity of mining claims located for a clay-type material, an adequate prima facie case is established where there are expert witness opinions that the deposit is only a common clay or shale and it cannot meet refractory standards. The contestees then must go forward with evidence to rebut the Government's case with a preponderance of the evidence.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977)
84 I.D. 137

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

United States v. Richard R. Wells, 30 IBLA 333 (June 7, 1977)

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

Andrew J. Van Derpoel et al., 33 IBLA 248 (Jan. 5, 1978)

United States v. Clark J. Guild et al., 34 IBLA 387 (May 3, 1978)

United States v. Don Lee Seto and Pauline Seto, 35 IBLA 4 (May 3, 1978)

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

United States v. Catherine E. Gay, 36 IBLA 148 (July 31, 1978)

United States v. John A. Cooley, 43 IBLA 276 (Oct. 15, 1979)

Although the Government has assumed the burden of proof in mining claim contests of presenting a prima facie case of lack of discovery, once it has done so, the burden shifts to the claimant to prove by a preponderance of the evidence the discovery of a valuable mineral deposit. A prima facie case is established when

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

a Government mineral examiner testifies that she examined the claim and could find no evidence showing the discovery of a valuable mineral deposit.

United States v. Gwendolyn McClurg et al., 31 IBLA 8 (June 15, 1977)

Where the Government contests a mining claim, it has assumed only the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Where a Government mineral examiner testifies that he extensively examined the claims and workings thereon, and had assayed numerous samples taken from the claims but found no evidence of a valuable mineral deposit that would support a discovery, a prima facie case of lack of a mineral discovery has been made.

United States v. A. O. Bartell, 31 IBLA 47 (June 23, 1977)

Where the Government contests mining claims on a charge of lack of discovery of a valuable mineral deposit prior to the date when such minerals were no longer subject to such location, the Government must initially present sufficient evidence to establish a prima facie case. The burden then shifts to the claimant to show by a preponderance of credible evidence that a discovery has been made on each claim.

Where the expert witnesses called by the Government testify that prior to July 23, 1955, there was no profitable market for common variety minerals from the subject claims and that it would have been economic folly to undertake the development a mine thereon, a prima facie case of invalidity has been made. Thereafter, upon the failure of the claimant to prove the contrary by a preponderance of credible evidence, a determination that the claims are invalid is obligatory.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

In mining claim contests, the United States has assumed the burden of establishing a prima facie case that no discovery has been made on the mining claims by the contestee; the burden of proof then shifts to the contestee to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of each mining claim. Evidence which may justify further exploration is insufficient either to establish a discovery or to overcome a prima facie case of lack of discovery.

A prima facie case of lack of discovery of a valuable mineral deposit is established when a mineral examiner testifies for the United States that he examined each claim and could find no evidence showing the discovery of a valuable mineral deposit.

When a mineral examiner testifies for the United States that a discovery has not been made on a mining claim, his opinion must be based on a proper factual foundation. However, he is not required to perform discovery work, to explore or sample beyond a claimant's workings, or to excavate or rehabilitate any purportedly mineralized area which is concealed by overburden or is otherwise difficult of access. Under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim.

United States v. Robert A. Rukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established.

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

Where a Government mineral examiner testifies that he has examined a mining claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Where the claimant presents evidence of returns which are so meager that they will not attract the labor and means of a person of ordinary prudence, he has failed to prove by a preponderance of the evidence that his claim is valid, and it is properly declared null and void.

United States v. Joseph Larsen and Ferris Larsen, 36 IBLA 130 (July 25, 1978)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of validity has been established. Government mineral examiners are not required to perform discovery work for claimants or to explore beyond a claimant's workings.

United States v. Florence J. Mattox, 36 IBLA 171 (July 31, 1978)

United States v. Emmett C. Harder, 42 IBLA 206 (Aug. 22, 1979)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

In a mining claim contest, no weight will be given to claimant's allegation that the Government's mineral examiner failed to sample the discovery point or the best mineral showings, where the claimant was invited to indicate his discovery to the examiner and failed to do so, and where he also failed to introduce convincing evidence of his own that a discovery had been made.

United States v. Larry Joseph Tims, 36 IBLA 316 (Aug. 23, 1978)

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

In mining claim contest, Government must only go forward with evidence to establish prima facie case of no discovery of valuable mineral deposits, and burden then shifts to mining claimant to prove by preponderance of evidence that his claim is valid.

Government has established prima facie case when its mineral examiner testifies that he has examined mining claims in issue and found mineral values insufficient to support finding of discovery of valuable deposits.

United States v. Michael P. Marion, 37 IBLA 68 (Sept. 18, 1978)

In challenging the Government resurvey, appellant has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of proving a discovery onto the mining claimant, when an expert witness testifies that he has examined the claim and has found the mineral values insufficient to support a finding of discovery.

United States v. John S. Porter, 37 IBLA 313 (Oct. 25, 1978)

When the Government contests a mining claim on a charge of no discovery it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. The burden then shifts to the claimants to show by a preponderance of the evidence that a discovery has been made.

United States v. Loren E. Burns et al., 38 IBLA 97 (Nov. 20, 1978)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

Once the Government has established a prima facie case that no discovery of a valuable mineral deposit has been made within a mining claim, the burden of proof shifts to the contestee to establish by a preponderance of the evidence the existence of a discovery.

United States v. Jack C. Harris, Jill L. Harris, 38 IBLA 137 (Nov. 29, 1978)

Applicant has burden of establishing entitlement to headquarters site claim, and must demonstrate that he has complied with statute and regulations.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States v. Henry Jay Bush, 40 IBLA 106 (Mar. 27, 1979)

Where arguably conflicting uses of the public lands are at issue and the matter has been committed to the discretion of the BLM, the Board will uphold the decision of the BLM resolving the conflict unless appellant has shown that the BLM did not adequately consider all of the factors involved, including whether less stringent alternatives would accomplish the intended purpose, or that there is sufficient reason to change the result.

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

The burden of proving a valid color of title claim is on the claimant. Where it cannot be said from the evidence presented that the grantors and grantees in the claimant's chain of title acquired a parcel of land with the bona fide belief that the parcel included all the land claimed, the color of title application must be denied.

Pablo M. Taylor (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

In a contest proceeding the Government has the burden of establishing a prima facie case of noncompliance with the requirements for trade and manufacturing, and headquarters sites. The burden then shifts to the applicant to show by a preponderance of the evidence that he has used, occupied, and improved the sites for trade, manufacture, or other productive industry.

United States v. Jack Zessy Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of going forward, when an expert witness testified that he has examined the claim and has found the mineral value insufficient to support a finding of discovery.

United States v. Tempest Mining Co., 40 IBLA 297 (Apr. 27, 1979)

Broad discretion is committed to an agency in interpreting regulations. A party challenging an interpretation and the administrative application thereof must demonstrate that the interpretation is unreasonable and that the agency's application lacks a rational foundation.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made. Government mineral examiners are not required to perform discovery work for a claimant or to explore beyond a claimant's workings.

The entire evidentiary record in a mining contest is considered and if evidence presented by a contestee is damaging to the contestee's case it may be used against the contestee regardless of any deficiencies in the Government's presentation. Therefore, regardless of whether the Government established a prima facie case of lack of discovery, if the entire record establishes that a discovery was not made on a claim it is properly declared null and void.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

The burden of establishing a valid color of title claim is on the claimant.

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

In review proceedings of notices of violation and cessation orders, the burden of going forward to establish a prima facie case rests with OSM and the ultimate burden of persuasion rests with the applicant for review.

Dean Trucking Co., Inc., 1 IBSMA 229 (Sept. 11, 1979)
86 I.D. 437

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

United States v. Ted G. Ax, 43 IBLA 146 (Sept. 28, 1979)

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

In a contest proceeding the Government has the burden of establishing a prima facie case of noncompliance with the requirements for trade and manufacturing sites. The burden then shifts to the applicant to show by a preponderance of the evidence that he used, occupied, and improved the site for trade, manufacture, or other productive industry.

United States v. Graham Keith Ward, 43 IBLA 333 (Oct. 29, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made.

United States v. John D. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

A Government mineral examiner in evaluating a mining claim is not required to perform discovery work, to explore or sample beyond a claimant's workings and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner. While it is true that under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim, in the case at bar we need not decide whether a prima facie case was made by contestant since the totality of the evidence establishes invalidity of the claims.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

The Board properly adopts a decision of an administrative law judge holding mining claims null and void for lack of discovery of certain minerals, *i.e.*, gold, silver, iron, titanium, feldspar, mica, silica refractory clay, stoneware clay, refractory sand and glass, where nondiscovery is established by the totality of the evidence.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

ADMINISTRATIVE PROCEDURE--Continued

BURDEN OF PROOF--Continued

When the Government contests a mining claim, located on land withdrawn from mineral entry, the burden of presenting a prima facie case is satisfied by the testimony of a well qualified mineral examiner that he has examined the exposed workings on a claim without finding sufficient mineral values to support a conclusion there was a discovery of a valuable mineral deposit either at the time of the withdrawal or at the time of his inspections.

United States v. Cecilia Puccinelli, 44 IBLA 266 (Dec. 19, 1979)

When the Government contests a mining claim on a charge of no discovery of a valuable mineral deposit it assumes the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Knox-Arizona Corp., 44 IBLA 297 (Dec. 31, 1979)

DECISIONS

A cattle trespass decision rendered by an administrative law judge may be set aside and remanded where the decision does not include a statement of findings and conclusions, and the reasons or basis therefor, on all material issues of fact, law or discretion as required for initial decisions under 5 U.S.C. § 557 (1970) and 43 CFR 4.475.

Where a grazing district cattle trespass complaint refers to previous trespasses by the base property owner, he is served with the complaint, and the record indicates he intervened at the hearing thereon but the decision issued makes no mention thereof, the decision appealed from may be set aside and remanded for clarification.

United States v. John J. Casey, 22 IBLA 358 (Nov. 14, 1975)
82 I.D. 546

When the Bureau of Land Management rejects geothermal lease offers on the mistaken basis that the lands embraced within the offers are situated within a particular critical natural area excluded from leasing, but in fact the lease offers are for lands not within that critical natural area but may be in another, the cases must be remanded for further consideration because the decisions fail to disclose a proper basis for rejection of the lease offers.

Kirk Greene, 24 IBLA 113 (Mar. 1, 1976)

When the Bureau of Land Management rejects geothermal lease offers on the basis that the lands embraced within the offers are situated within a critical natural area excluded from leasing, but the record indicates the basis for rejection may be that the lands applied for are associated with historic trails where leasing activity has been approved subject to protective stipulations, the decisions will be set aside and the cases remanded for further clarification and consideration by the Bureau to determine whether the lands should be leased subject to protective stipulations.

Christian F. Murer, 24 IBLA 383 (Apr. 29, 1976)

ADMINISTRATIVE PROCEDURE--Continued

DECISIONS--Continued

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Bureau of Land Management v. Russ Babcock, 32 IBLA 174 (Sept. 15, 1977)
84 I.D. 475

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John D. Keischer, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

A mining claim will be declared null and void where the Board's de novo review of the evidence submitted at a hearing, held in accordance with the provisions of the Administrative Procedure Act and presided over by an administrative law judge qualified under the Act, establishes that the claimant has not satisfied the requirements of discovery, and there was no error in the conduct of the proceeding.

United States v. Ernest F. Eiven and Richard J. I. Anderson, 32 IBLA 361 (Oct. 25, 1977)

Where a decision calls upon an applicant to supply certain documents and make certain showings in support of its mineral patent application or face rejection of the application, and on appeal it is established that all of the documents and evidence called for had already been furnished by the applicant and incorporated in the case record, where they were apparently overlooked by those who examined the application, the decision will be reversed.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977)
84 I.D. 990

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

An administrative law judge in rendering a decision need not make a separate ruling on each finding of fact and conclusion of law. It is sufficient if the decision summarizes the controlling principles of law and the testimony of witnesses relative thereto and explains why appellants' evidence was insufficient to meet the legal test for a discovery of valuable mineral.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

HEARING EXAMINERS

In order to sustain a charge that an administrative law judge should be disqualified or his decision set aside for bias, a substantial showing of personal bias must be made.

United States v. Paul P. Fisher and Buel E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

In order to sustain a charge that an administrative law judge should be disqualified or his decision set aside because of bias, a substantial showing of personal bias must be made. An assumption that he might be predisposed in favor of the Government is not sufficient.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

HEARINGS

When one whose application for patent for a mining claim has been rejected requests a hearing to present evidence on the controlling issues of fact involved in the rejection of the application, such request must be granted.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 379 (Jan. 30, 1975)

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other essential issues to determine whether the application may be allowed.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

Where determination of issues of fact are appropriate and necessary for the exercise of Secretarial discretion, the Hearings Division of the Office of Hearings and Appeals will schedule and hold a hearing at the Secretary's direction to serve as a basis for findings of fact.

Administrative Appeal of Hannah Finnesand, A Native Alaska Indian v. Commissioner of Indian Affairs, 3 IBIA 263 (Feb. 25, 1975)

Where at a hearing held pursuant to sec. 2 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

HEARINGS--Continued

A motion for remand of a mining claim contest for further hearing on the grounds of prejudicial surprise, based upon Government counsel's failure to supplement interrogatory answers listing witnesses and exhibits as ordered in lieu of prehearing conference, will be denied where contestee's counsel ignored repeated offers of continuance made at various stages of the hearing.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

A request for a hearing in connection with an appeal will not be granted where undisputed facts are of record, and the determination rests on legal conclusions based on such facts.

Concho Petroleum Co. and J. C. Karcher, 22 IBLA 139 (Sept. 26, 1975)

A headquarters site claim located prior to a withdrawal may be declared invalid by the Bureau of Land Management without awaiting the filing of a patent application where there has been insufficient compliance with the law to appropriate the land before the withdrawal. However, the Bureau should follow appropriate procedures. These should include giving notice to the claimant to show cause why the claim should not be invalidated where the notice of location does not show adequate compliance with the law sufficient to preclude the withdrawal, and initiating a contest and affording an opportunity for a hearing where there are disputed facts on the compliance with the law.

Richard I. Pope, 22 IBLA 374 (Nov. 17, 1975)

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal, the claim may not be declared null and void ab initio without opportunity for hearing.

Nathern Lewis Stacy, 23 IBLA 166 (Dec. 24, 1975)

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and alleges that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the Bureau of Land Management to hold that the location notice was unacceptable for recordation, and the claim may only be canceled following notice to the claimant and an opportunity to demonstrate the establishment of a valid existing homesite claim prior to the withdrawal.

Steven E. Reese, 24 IBLA 23 (Feb. 11, 1976)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

A further hearing may be ordered in a mining contest where the record is unsatisfactorily confusing and conflicting on the issue of quantity of minerals to satisfy the discovery test, a request for the rehearing has been made with an offer of proof which tends to show a new hearing might result in a different finding, and there has been no objection to the request.

United States v. George R. Edeline et al., 24 IBLA 34 (Feb. 17, 1976)

A sodium prospecting permittee who applies for a preference right sodium lease, alleging with supportive data that he has discovered a valuable deposit of sodium and that the land is chiefly valuable for sodium, as required by sec. 24 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 262 (1970), is entitled to a hearing conducted in accordance with sec. 5 of the Administrative Procedure Act, 5 U.S.C. § 554 (1970), before his lease application may be finally rejected for failure to prove such a discovery.

Marine Minerals Corp., 25 IBLA 153 (June 10, 1976)

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing pursuant to the Administrative Procedure Act are required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

David Loring Gamble, Darrel Douglas, 26 IBLA 249 (Aug. 18, 1976)

The regulations do not provide for hearings as a matter of right on trespass violations involving a sec. 15 grazing lessee. For the Board of Land Appeals to exercise its discretion under 43 CFR 4.415 and order a hearing, the appellant must allege facts which, if proved, would entitle him to the relief sought.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976)
83 I.D. 269

Under 43 CFR 2802.1-7(e), which provides that charges for use and occupancy of a communication site on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Following a hearing under 43 CFR 2802.1-7, a decision increasing the charges for use and occupancy of a communication site is in error to the extent that the decision is based upon unspecified evidence not in the record and not made known to the user, and the decision must be set aside.

In a case where a substantial increase is proposed in charges for a communication site under 43 CFR 2802.1-7(e), the required hearing should be conducted in accordance with the accepted concepts of due process.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

A second hearing will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, and where he actually was represented at the hearing and where nothing has been submitted which suggests that another hearing would produce a different result.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

Under 43 CFR 2802.1-7(e), which provides that charges for a right-of-way on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Paradise Oil, Water and Land Development, Inc., 26 IBLA 374 (Sept. 8, 1976)

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

United States v. Mine Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

It is within the discretion of the Board of Land Appeals to grant a request for a hearing on a question of fact. In order to warrant such a hearing, an appellant must at least allege facts which, if proved, would entitle him to the relief sought.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976)
83 I.D. 518

In a proceeding before the Department to determine the validity of a mining claim, notice and an opportunity for an evidentiary hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

W. A. Todd, A. D. Johnson, 28 IBLA 180 (Dec. 1, 1976)

David Rudinski et al., 31 IBLA 139 (June 30, 1977)

Where the record does not disclose sufficient facts upon which to make determinations whether a Bureau of Land Management officer who signed an oil and gas lease possessed the authority to do so, when the date of ascertainment of a known geologic structure actually occurred, and whether the United States Geological Survey had sufficient information to make a known geologic structure determination, a hearing may be ordered so that a complete record may be developed.

William T. Alexander (On Remand), 28 IBLA 277 (Dec. 22, 1976)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. A mining claim may be declared null and void where there was a charge in the complaint of insufficient minerals to constitute a valid discovery.

United States v. William C. Smith, a/k/a Bill Smith, 29 IBLA 7 (Feb. 8, 1977)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. However, under the rules an answer may be accepted if it is received within 10 days after the due date and it is determined that the answer was probably transmitted before the end of the period in which it was required to be filed.

United States v. Jesse Smith, 29 IBLA 10 (Feb. 8, 1977)

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

United States v. Richard E. Wells, 30 IBLA 333 (June 7, 1977)

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

Andrew J. Van Derpoel et al., 33 IBLA 248 (Jan. 5, 1978)

United States v. Clark J. Guild et al., 34 IBLA 387 (May 3, 1978)

United States v. Don Lee Seto and Pauline Seto, 35 IBLA 4 (May 3, 1978)

United States v. John A. Cooley, 43 IBLA 276 (Oct. 15, 1979)

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Charles B. Nielsen, Pauline Nielsen, 30 IBLA 235 (May 26, 1977)

James Messano, 35 IBLA 383 (June 23, 1978)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

David A. Burns, 30 IBLA 359 (June 10, 1977)

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

Government witnesses in a contest proceeding who are qualified by education and experience are competent to testify as experts with reference to the prudent man rule.

United States v. A. C. Bartell, 31 IBLA 47 (June 23, 1977)

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal, the claim may not be declared null and void ab initio without notice and an opportunity for hearing.

Cajon Minerals, Inc., 31 IBLA 188 (July 5, 1977)

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

Where an administrative law judge's decision contains a ruling, in a single sentence, on all of the proposed findings and conclusions submitted by a party to a hearing and the ruling on each finding and conclusion is clear, there is no requirement that the judge rule separately as to each of the proposed findings and conclusions.

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

ADMINISTRATIVE PROCEDURE--Continued

HEARINGS--Continued

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

When a mining claim located in the Papago Indian Reservation is declared invalid for failure to pay annual rental timely, and that fact is not disputed, a hearing is not required as there are no issues of fact involved but only of law.

Louis B. Illsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

A request for a hearing will be denied in the absence of an assertion of fact which, if proved true, would entitle appellant to the relief sought.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

When the United States contests a mining claim for lack of discovery of a valuable mineral deposit, a crucial date for the existence or nonexistence of the discovery is the date of the hearing. Where a mining claimant has shown no justification for her failure to offer evidence of a discovery at the hearing nor shown any likelihood that further evidence could be presented to change the result, a request on appeal for additional time to explore the claim for additional evidence of minerals will be denied, and an administrative law judge's decision declaring the claim null and void will be affirmed.

United States v. Thelma C. Crismon, 34 IBLA 381 (May 2, 1978)

ADMINISTRATIVE PROCEDURE--Continued

HEARINGS--Continued

Where land has long been devoted to a particular public purpose such as inclusion in a forest reserve, laches may bar an application filed pursuant to the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970) and 43 U.S.C. § 898 (1970), in which case a hearing need not be ordered to determine whether a railroad's purchaser was an innocent purchaser for value.

Southern Pacific Transportation Co., Donald E. Lee, Charles Siller v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

It requires a substantial showing of bias to disqualify a hearing officer in administrative proceedings or to justify a charge that the hearing was unfair.

United States v. Richard H. Kingdon and Edith F. Kingdon, 36 IBLA 11 (June 27, 1978)

The Government has established a prima facie case of nondiscovery when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Catherine B. Gay, 36 IBLA 146 (July 31, 1978)

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

In an administrative hearing to determine the validity of a mining claim, the requirements of due process are satisfied when notice and opportunity for an impartial hearing are provided in accordance with the Administrative Procedure Act. 5 U.S.C. § 551 *et seq.* (1976).

The mere fact that the witnesses, the administrative law judge, and members of the Board of Land Appeals are employees of the Department of the Interior does not establish unfairness in the contest proceeding.

A Forest Service mineral examiner who is a witness in a Government contest of a mining claim is not disqualified nor is his testimony discredited merely because he is an employee of that agency.

In order to sustain a charge that an administrative law judge should be disqualified or his decision set aside for bias, a substantial showing of personal bias must be made.

The Secretary of the Interior has plenary authority over the public lands, including mineral lands, and has been entrusted with the function of making the initial determination of the validity of claims against such lands.

United States v. Paul P. Fisher and Buel B. Fisher, 37 IBLA 80 (Sept. 22, 1978)

Where there exist factual questions about the location of section and subdivisional corners in a dependent resurvey, the Board of Land Appeals may order a hearing pursuant to 43 CFR 4.415 to resolve these questions.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

A delay in taking action on an application for extension of a coal prospecting permit while the Secretary formulates a new leasing policy does not violate the Administrative Procedure Act, 5 U.S.C. § 555(b) (1976), nor does it constitute an abuse of discretion which would create any rights not authorized by law. No hearing is required when the facts of a case are not in dispute and the only issues are questions of law.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of proving a discovery onto the mining claimant, when an expert witness testifies that he has examined the claim and has found the mineral values insufficient to support a finding of discovery.

United States v. John S. Porter, 37 IBLA 313 (Oct. 25, 1978)

A request for a hearing will be denied when the facts are not in dispute and the determination rests on questions of law.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants.

United States v. Loren E. Burns et al., 38 IBLA 97 (Nov. 20, 1978)

Where the alleged trespasser makes no allegations of a specific and substantial nature regarding whether or not a trespass has in fact occurred, the procedure authorized by 43 CFR 9239.3-2(c)(4) limiting a hearing "to the determination of the amount of damages, value of the forage consumed, and any other amounts considered to be due the United States as a result of said trespass" does not result in a denial of due process.

A hearing on the issue of whether or not a trespass was willful or not clearly willful is authorized by 43 CFR 9239.3-2(c)(4) because a finding on this issue affects the rate at which the value of the forage consumed shall be computed pursuant to 43 CFR 9239.3-2(c)(2).

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(3) do not violate due process.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of going forward, when an expert witness testified that he has examined the claim and has found the mineral value insufficient to support a finding of discovery.

United States v. Tempest Mining Co., 40 IBLA 297 (Apr. 27, 1979)

Alaska Natives who allege substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to the Act of May 17, 1906, *as amended*, 43 U.S.C. §§ 270-1 to 270-3 (1970), and the regulations at 43 CFR Subpart 2561 are entitled to notice and an opportunity for a hearing prior to rejection of their application. Such notice shall specify the reasons for the proposed rejection. Claimant shall have an opportunity to present evidence and testimony of favorable witnesses at a hearing before the trier of fact prior to a decision.

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

When an Alaska Native allotment applicant alleges that there has been substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to 43 U.S.C. §§ 270-1 to 270-3 (1970) and 43 CFR Subpart 2561, and the Bureau of Land Management determines the application should be rejected because the land was not so used and occupied, the Native is entitled under contest procedures, 43 CFR 4.451, to notice and an opportunity for a hearing prior to rejection of his application.

Mary Bobby, 41 IBLA 44 (May 29, 1979)

Rika Murphy, Gene H. Seagge, 42 IBLA 51 (July 31, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before the trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject an application for an allotment.

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Fredrick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Continued--

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

Where legal conclusions are reached in an appellate decision upon undisputed facts, and there has been no proffer of further facts which could compel different legal conclusions, no useful purpose would be served for a hearing, and a request therefor is properly denied.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Peter Paspuk, 43 IBLA 69 (Sept. 19, 1979)

Ricky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

A request for a hearing on a Native allotment application will be denied where there are no facts in dispute and the sole question is a legal issue.

Lindberg Alexander, 41 IBLA 382 (July 23, 1979)

Two mining claims, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void at initio without a hearing. Such a result obtains despite reference to a location notice prior to the withdrawal where appellants do not make a showing of sufficient specific facts upon which to predicate a hearing, including which of the claims the previous location relates to, the boundaries thereof, whether the previous location was for a locatable mineral under a withdrawal order then in force, and the name of the previous locator.

The Heirs of H. K. Harris, 42 IBLA 44 (July 31, 1979)

The substantial use and occupancy required under the Native Allotment Act must be achieved by the Native himself as an independent citizen (or family head) and such use must be at least potentially exclusive of others. Although a minor may initiate such use and occupancy, use and occupancy by a dependent accompanied by his parents does not qualify.

Where a Native allotment application has been rejected, based on the guidelines of Oct. 18, 1973, on the basis that the applicant had not demonstrated 5 years use and occupancy of the land prior to the withdrawal affecting the land, and that requirement is abolished by Secretarial Order No. 3040, of May 25, 1979, the decision will be set aside and the case remanded for action.

Bella Nora, 42 IBLA 59 (Aug. 2, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made. Government mineral examiners are not required to perform discovery work for a claimant or to explore beyond a claimant's workings.

The entire evidentiary record in a mining contest is considered and if evidence presented by a contestee is damaging to the contestee's case it may be used against the contestee regardless of any deficiencies in the Government's presentation. Therefore, regardless of whether the Government established a prima facie case of lack of discovery, if the entire record establishes that a discovery was not made on a claim it is properly declared null and void.

It was proper to deny mining claimants' request to redrill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Lavon Chappell et al.,
42 IBLA 74 (Aug. 13, 1979)

The Board of Land Appeals has the discretion to grant a request for a hearing on issues of fact but, in order to warrant such a hearing, an appellant must at least allege facts which, if proved, would entitle him to the relief sought.

Dardelle M. Smith, Sherman C. Smith, 42 IBLA 136
(Aug. 16, 1979)

Where legal conclusions may be reached upon undisputed facts and there has been no proffer of further facts which could compel different legal conclusions, a request for a hearing is properly denied.

Sam Hanlon, Sr., 42 IBLA 161 (Aug. 17, 1979)

Where issues of material fact are in dispute, due process requires that, before a decision is reached to reject an application for an allotment, the applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted.

A hearing will be afforded to a Native allotment applicant to show his/her entitlement to a Native allotment in view of court decisions requiring hearings on Native allotment applications. Where the applicant requests a hearing and alleges there are factual disputes concerning abandonment and nonuse of the claim, although the showings on the application show nonuse of the land for a lengthy period of time sufficient ordinarily to constitute a prima facie case for rejection of the application, a hearing is nevertheless mandated.

Mildred Sparks, 42 IBLA 155 (Aug. 19, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Dolezal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease W 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

ADMINISTRATIVE PROCEDURE--Continued

HEARINGS--Continued

Where an applicant for a Native allotment alleges for the first time on appeal his use and occupancy of lands prior to their withdrawal, a decision rejecting the Native's application shall be vacated and the case remanded to BLM for its consideration of appellant's new evidence.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

A second hearing of a Government mining contest will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where he was actually present at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result. A petition to reopen a hearing of a Government mining contest will be denied when the contestee offers no valid justification for the neglect to offer evidence which was or could have been available at the original hearing. A further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery.

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

A request for a hearing on a Native allotment application will be denied where no factual dispute exists and all issues are legal ones.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made.

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John B. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

It is the responsibility of a mining claimant to present evidence supporting his allegation of bias on the part of Government mineral examiners testifying as to the validity of his claim in a contest proceeding, and a showing of Department affiliation does not discredit a witness.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

Due process does not require notice and a prior hearing in every case that an individual is deprived of property so long as the individual is given notice and an opportunity to be heard before the deprivation becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact. Where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

The administrative law judge properly exercised his authority to control the hearings where he controlled the manner of examination but did not limit the scope of testimony of witness, and where he permitted adequate time for submission of proposed findings by the parties prior to issuance of the final order.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject the application for allotment.

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukapigak, 44 IBLA 313 (Dec. 31, 1979)

INITIAL DECISION

The ultimate findings and decision of the administrative law judge adopted by the Commissioner of Indian Affairs will not be set aside upon administrative review where they are supported by substantial evidence.

Administrative Appeal of Mary Ann Tecumseh Combs (Flathead Allottee No. 1648) v. Commissioner of Indian Affairs, 4 IBIA 27 (Apr. 28, 1975) 82 I.D. 184

The ultimate findings, conclusions and order of the administrative law judge will not be set aside upon administrative review where they are supported by substantial evidence.

Estate of Evans Ingatuah, 4 IBIA 103 (July 29, 1975) 82 I.D. 352

Where the Bureau of Land Management erroneously described a portion of the land listed in a notice to show cause why a grazing lease should not be canceled in part, the lessee is not denied due process where the land could not be confused with other lands in the grazing lease, where BLM corrected and explained its mistake in the subsequent decision, where no prejudice from the mistake is alleged or evident, and where the

ADMINISTRATIVE PROCEDURE--Continued

INITIAL DECISION--Continued

lessee has had every opportunity to present her arguments on the issues involved in the BLM actions.

Evelyn Elsman, 35 IBLA 23 (May 5, 1978)

The Secretary of the Interior has plenary authority over the public lands, including mineral lands, and has been entrusted with the function of making the initial determination of the validity of claims against such lands.

United States v. Paul P. Fisher and Buel P. Fisher, 37 IBLA 60 (Sept. 22, 1978)

Where determination of issues of fact turn upon weight to be given to conflicting testimony, findings of fact concerning testimony are required to be made by the initial trier of fact.

Estate of Joseph Caddo a.k.a. James Joseph Caddo and Jim Butler, 7 IBIA 286 (Nov. 28, 1979)

JUDICIAL REVIEW

Where the Board of Land Appeals, by a previous decision, has held that a particular oil and gas lease offer must be rejected, and the rejected applicant files suit for judicial review of that decision in the United States District Court, and also files a contemporaneous appeal to the Board from a BLM decision implementing the Board's decision, the Board will defer to the Court's jurisdiction and make no decision on the merits of the appeal, which is subject to summary dismissal by the Board.

Donald W. Coyer (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

A party adversely affected by a final order or decision of an officer of the Conservation Division of the Geological Survey has a right to appeal to the Director, Geological Survey, unless the decision was approved by the Secretary or Director prior to promulgation.

A party adversely affected by a final decision of the Director, Geological Survey, had a right of appeal to the Board of Land Appeals in the Office of Hearings and Appeals, Office of the Secretary.

Phoenix Resources Co., 39 IBLA 153 (Jan. 29, 1979)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

LICENSING

Where a qualifying discovery of mineral has been made by a permittee during the term of a permit, a coal preference right lease application need not be rejected because it was filed after the permit expired.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

ADMINISTRATIVE PROCEDURE--Continued

LICENSING--Continued

Sec. 9(b) of the Administrative Procedure Act, *as amended*, 5 U.S.C. § 558(c) (1976), does not apply to coal prospecting permit extension applications because the prospecting is not an "activity of a continuing nature" within the meaning of the statute. As the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 30 U.S.C. § 201 (1976), removed the Secretary of the Interior's discretion to grant extensions, applications for preference right leases filed after expiration of the initial 2-year permit term, and during pendency of extension applications, cannot be issued.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

RULE MAKING

Where notice of proposed rulemaking to change certain filing fees and to impose other charges has been published in the *Federal Register*, but no final rules have been published, the old schedule of fees will remain in effect until such time as the new rules are finally adopted, published, and made effective.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

The promulgation or revocation of a regulation is within the special authority of the Secretary of the Interior and a limited number of delegates. A regulation when promulgated is binding upon departmental officials.

The requirement in the Administrative Procedure Act, 5 U.S.C. § 553(d) (1970), that the required publication of a substantive rule be made not less than 30 days before its effective date is satisfied by publication of proposed rulemaking with a 30-day comment period, followed thereafter by final rulemaking. Minor changes in a final rule from the proposed rule do not require new proposed rulemaking.

Assuming, *arguendo*, the applicability of the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970), to an amendment of 43 CFR 3102.3-2 increasing the rental rate of noncompetitive oil and gas leases, the provisions of the Act were satisfied where the proposed increase was published as proposed rulemaking on Mar. 18, 1976, to be effective July 1, 1976, and final rulemaking was published Jan. 5, 1977, changing the effective date of the rental increase to Feb. 1, 1977.

E. B. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

The promulgation or revocation of a regulation is within the special authority of the Secretary of the Interior and a limited number of delegates. A regulation, when promulgated, is binding upon all Departmental officials.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

Where a mining claim is located after the enactment of the Federal Land Policy and Management Act of 1976 (Oct. 21, 1976), but before the date of promulgation of regulations implementing the statutory requirements of the Act relative to the recordation of mining claims, a regulation having retroactive effects may nonetheless be sustained in spite of such retroactivity if it is reasonable.

Elbert O. Jepsen, 39 IBLA 62 (Jan. 17, 1979)

ADMINISTRATIVE PROCEDURE--Continued

RULE MAKING--Continued

The interpretation of an existing regulation by this Board to determine its applicability to the facts at hand does not constitute rulemaking by the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

Neither a Recreation and Public Purposes Act classification nor a withdrawal is a rule or regulation within the ambit of the Secretarial policy of Apr. 27, 1971, which provides for utilization of the public participation procedures of 5 U.S.C. § 553 (1976).

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

An interpretative rule is a clarification or explanation of an *existing* regulation, rather than a substantive modification thereof or the adoption of a new regulation.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

STANDING

Holders of grazing permits under sec. 3 of the Taylor Grazing Act whose permits give them grazing rights for public lands which are subsequently traversed by a power line right-of-way grant have standing to appeal the decision granting the right-of-way.

David Smith Ranches et al. (Appellants), Colorado Ute Electric Ass'n, Inc. (Intervenor), 33 IBLA 7 (Nov. 15, 1977)

Intervention, by right, as a full party in a contest proceeding is only recognized where the individual seeking intervention has the necessary interest to maintain a private contest independently under 43 CFR 4.450-1.

The extent of the participation in a contest hearing to be afforded "interested individuals" who do not have a sufficient interest to maintain a private contest is committed to the sound discretion of the administrative law judge. Among the factors which are properly considered are: the desires of the original parties; the likelihood that the party seeking intervention will provide information which would not be forthcoming without its participation; and the cost which must be borne by both the contestant and the contestee by the nature and scope of the intervention granted.

United States v. United States Pumice Co., 37 IBLA 153 (Oct. 5, 1978)

Where the State is a party to decisions by the Bureau of Land Management and the State's selection applications were rejected by those decisions, under 43 CFR 4.410, the State has standing to appeal those decisions to the Board of Land Appeals.

Under the "functional" standard to determine administrative standing set forth in *Koniag, Inc.* v. *Andrus*, 580 F.2d 601 (D.C. Cir. 1978), *cert*. *denied*, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The State of Alaska has a sufficient interest in land by virtue of its applications for an airport conveyance or by its selection application to have standing to initiate private contests against conflicting Native allotment applications.

State of Alaska, 42 IBLA 1 (July 25, 1979)

SUBSTANTIAL EVIDENCE

The ultimate findings and decision of the administrative law judge adopted by the Commissioner of Indian Affairs will not be set aside upon administrative review where they are supported by substantial evidence.

Administrative Appeal of Mary Ann Topsseh Combs (Flathead Allottee No. 1648) v. Commissioner of Indian Affairs, 4 IBIA 27 (Apr. 28, 1975) 82 I.D. 184

The ultimate findings, conclusions and order of the administrative law judge will not be set aside upon administrative review where they are supported by substantial evidence.

Estate of Evans Ingaruah, 4 IBIA 103 (July 29, 1975)
82 I.D. 352

Where, in an effort to negotiate a compromise settlement of an alleged grazing trespass, a rancher concedes that the trespass occurred to the extent of a specific number of animal unit months of forage, but the proposed settlement is not consummated and the case goes to a hearing on its merits, evidence of the purported admissions made by the party during such negotiations must be excluded as not competent to show either the fact or the extent of the trespass alleged.

Cesar and Robert Siard, 26 IBLA 29 (July 6, 1976)

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

ADMINISTRATIVE PROCEDURE--Continued

SUBSTANTIAL EVIDENCE--Continued

A party seeking a partial refund of the purchase price under the risk of loss provision of a contract for the cash sale of vegetative resources pursuant to the Materials Act of July 31, 1947, must present substantial evidence of the quantity of resources lost which otherwise would have been harvested.

Alma D. LeBaron, Jr., 32 IBLA 299 (Sept. 29, 1977)

In a hearing held pursuant to the Administrative Procedure Act, evidence sufficient to support a decision must be reliable, probative, and substantial. 5 U.S.C. § 556(d) (1976).

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

AGENCY

In the absence of joint lessees establishing the existence of a prior agreement that a particular lessee was responsible for payment of the oil and gas lease rental, the failure of the joint lessees to pay the rental timely is a joint failure and the joint lessees must each satisfy the reinstatement requirements of 30 U.S.C. § 188(c) (1970). In the absence of reasonable diligence, the lease cannot be reinstated unless each joint lessee can show that he has a justifiable excuse for failing to pay the rental timely.

Frederick C. Farrington, George H. Hoffman, 36 IBLA 70 (June 30, 1978)

Where a contract between an oil and gas lease offeror and a leasing service created an agency relationship, in the absence of circumstances giving the agent an authority coupled with an interest, the agent's authority ordinarily terminated upon the death of the principal. If the leasing service had an interest, a lease could not issue to the estate of the deceased if no statement was filed delineating the nature and extent of that interest as required by 43 CFR 3102.7.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978) 85 I.D. 403

AIRPORTS

The issuance of a public airport lease on national resource lands lies within the discretion of the Secretary of the Interior. The Department may require an applicant for a public airport lease to accept special stipulations in order to protect the environmental quality of the land, so long as the stipulations are not inconsistent with other reasonable requirements of the Bureau of Land Management or Federal Aviation Administration.

A. W. Brothers, 19 IBLA 144 (Mar. 7, 1975)

AIRPORTS--Continued

The issuance of a public airport lease on the public domain lies within the discretion of the Secretary of the Interior. A decision rejecting an airport lease application in the exercise of that discretion will be affirmed when, even though the Board differs in its opinion of the importance of some of the factors recited as grounds for the rejection, the record shows the decision to be a reasoned analysis of the factors involved, and no sufficient basis to disturb the decision is shown.

Boulder City Aero Club, Inc., 21 IBLA 343 (Aug. 18, 1975)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

ALASKA

GENERALLY

Settlement on a homestead claim in Alaska 2 days prior to a withdrawal of the land does not except the land from the withdrawal where the claimant failed to file his notice of location within 90 days after settlement as required by the Act of Apr. 29, 1950, 64 Stat. 94, 43 U.S.C. §§ 270, 270-5, 270-6 (1970), and his notice is properly held to be unacceptable for recordation.

Gary Lee Slay, 18 IBLA 345 (Jan. 14, 1975)

A decision of the Bureau of Land Management rejecting a Native Allotment application because the land is within an oil shale withdrawal will be set aside and remanded for further consideration where the Secretary of the Interior has directed the Geological Survey to review its mineral classifications in Alaska and the applicant requests an opportunity to present evidence to dispute the classification.

Raymond Paneak, 19 IBLA 68 (Feb. 25, 1975)

Lands withdrawn under sec. 11 of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610 (Supp. III 1973), are withdrawn from all forms of appropriation under the public land laws, including, without limitation, the Recreation and Public Purposes Act, *as amended*, 43 U.S.C. §§ 869 to 869-3 (1970), and an application under the latter Act for such withdrawn lands is properly rejected.

Alaska Department of Fish and Game, 20 IBLA 50 (Apr. 23, 1975)

A claimant's occupancy of a headquarters site prior to a withdrawal does not establish a "valid existing right" excepted by the withdrawal where credit for his occupancy prior to the withdrawal cannot be given under the Act of Apr. 29, 1950, because the claimant initiated his occupancy more than 90 days prior to the filing of his notice and did not file a notice of location or purchase application prior to the withdrawal.

ALASKA--Continued

GENERALLY--Continued

A request for equitable adjudication relief to permit purchase of a headquarters site claim is premature in the absence of an application to purchase the claim.

The equitable adjudication authority is not appropriate and may not be applied to permit the filing of a headquarters site notice of location after the land has been withdrawn.

Rene P. Lamoureux, 20 IBLA 243 (May 16, 1975)

A claimant's occupancy of a homesite prior to a withdrawal does not establish a "valid existing right," excepted by the withdrawal, under the Act of Apr. 29, 1950, where claimant did not file his notice of location within 90 days after occupancy, nor did he file a notice of location or purchase application prior to the withdrawal.

Equitable adjudication authority is not appropriate and may not be applied to permit filing of a homesite notice of location after the land has been withdrawn.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

Where the claimant of a headquarters site filed his notice of location, occupied the land, and began making improvements thereon prior to the segregation of the land by a withdrawal made subject to valid existing rights, it is error for the Bureau of Land Management to refuse to record the claimant's notice of location, or to cancel the claim without notice and an opportunity for hearing.

Donald J. Thomas, 22 IBLA 210 (Oct. 15, 1975)

Location of a homesite claim without substantial use or occupancy of the land in compliance with the law creates no property interest in the land. Where the claimant under sec. 10 of the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687(a) (1970), has merely marked the boundaries of the claim prior to a withdrawal of the land, such activity does not constitute occupation or possession of the land and the claim will be defeated by that withdrawal.

A notice of location for a homesite which alleges only acts of occupancy and improvement insufficient to create any interest in the land is properly denied recordation.

Edward P. Dooley, 22 IBLA 330 (Nov. 14, 1975)

The filing of an amended Alaska State Selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Flatt, Allen C. Flatt, 23 IBLA 59 (Dec. 11, 1975)

Any right which may be gained under a notice of location for a trade and manufacturing site or a homesite, as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1976), is personal to the party filing the notice.

A trade and manufacturing site notice of location not supported by actual settlement and occupancy authorized by 43 U.S.C. § 687a (1976) does not change the status of the public lands.

John H. Seatland et al., 24 IBLA 240 (Mar. 25, 1976)

James Sims, 42 IBLA 231 (Aug. 22, 1979)

Without adequate proof of a tender of a notice of location or application to purchase a headquarters site which was wrongfully denied by Bureau of Land Management personnel prior to a withdrawal of the land, the mere occupancy of land prior to the withdrawal did not create a "valid existing right" excepted from the effect of the withdrawal, and an application to purchase a headquarters site filed after the withdrawal is properly rejected.

Equitable adjudication of an application to purchase a headquarters site claim filed at least 8 years after the land has been withdrawn must be denied as substantial compliance with the law has not been made where neither occupancy of the site prior to the withdrawal nor after the withdrawal could validly be considered under the law.

Rene P. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

Where the State of Alaska has shown an interest in land in its existing airport, it may bring a private contest to challenge Native allotment applications for land in conflict with the airport.

State of Alaska, 40 IBLA 79 (Mar. 22, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

ALASKA NATIVE CLAIMS SETTLEMENT ACT

Procedures adopted to implement the Public Land Survey System as provided in Title 43, Chapters 1 and 1E, and regulations promulgated thereunder are made applicable to land withdrawals by sec. 13 of ANCSA.

Establishing of "standard parallel" or "correction" lines in compliance with authorized procedure to implement Public Land Survey System is not inconsistent with provisions of sec. 11(a)(1) withdrawal.

Appeal of Eklutna, Inc., 1 ANCAB 165 (Sept. 28, 1976)
83 I.D. 500

Where a decision rejects an application for an Alaska grazing lease because of an asserted Secretarial policy against granting such applications for land withdrawn pursuant to sec. 17(d)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1616(d)(2) (Supp. V 1975), but the record on appeal is incomplete with respect to

ALASKA--Continued

ALASKA NATIVE CLAIMS SETTLEMENT ACT--Continued

the existence of such policy, the record should be remanded for further documentation.

Kenneth E. Bunch, 37 IBLA 346 (Oct. 27, 1978)

Whether the issuance of PLO No. 5448, prohibiting oil and gas leasing in Alaska, without prior proposed rulemaking is violative of the Administrative Procedure Act or of the Alaska Native Claims Settlement Act need not be decided; by such issuance the Secretary has enunciated a policy of rejecting mineral lease applications well within his discretionary authority.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

Under the "functional" standard to determine administrative standing set forth in *Koniag, Inc.* v. *Andrus*, 580 F.2d 601 (D.C. Cir. 1978), *cert. denied*, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The granting of a right-of-way under FLPMA and the superseded Acts of Feb. 15, 1901, and Mar. 4, 1911, is within the Secretary's discretion and neither the filing of the application nor the existence of improvements earns appellant a right to the right-of-way. No rights vest in the applicant until the grant is approved by the Secretary. An application for a right-of-way is properly rejected where the land is in an interim conveyance to a Native Corporation.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

GRAZING

A grazing lease issued in 1933 for reindeer under the Act of Mar. 4, 1927, became subject to the Reindeer Act of Sept. 1, 1937 [illegible] rules and regulations thereunder. Interpretations of the effect of grazing rights granted under the 1937 Act upon a Native allotment applicant's claim of occupancy may be applied to such a lease, if they are not to the detriment of the lessee.

A regulation pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows settlement rights to be initiated while a permit issued under that Act is in existence. The policy manifest in that regulation may be followed, in the exercise of the Secretary's discretion, to permit consideration of a Native allotment applicant's occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of Mar. 4, 1927, and the regulation was promulgated after initiation of the occupancy.

Kristeen J. Burke, Joe N. Melovedoff, Victor Melovedoff, 20 IBLA 162 (May 5, 1975)

ALASKA--Continued

GRAZING--Continued

The policy manifest in regulations pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows, in the exercise of the Secretary's discretion, consideration of a Native allotment applicant's use and occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of Mar. 4, 1927.

Carl E. Balstin et al., 21 IBLA 152 (July 16, 1975)

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 while the grazing lease was still extant, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Herman Haakanson, 23 IBLA 54 (Dec. 4, 1975)

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 *et seq.* (1970), until the lease is canceled of record.

The filing of an Alaska State selection for land in an Alaska grazing lease constitutes a petition for determination under 43 CFR 4131.3-1, and upon favorable determination and cancellation of the lease, the State's rights, including segregation of the land in its favor, relate back to the filing of the selection.

Native use and occupancy of land within an Alaska grazing lease does not preclude the State from selecting the land as "vacant and unappropriated" land within the meaning of the Alaska Statehood Act, 72 Stat. 339, 48 U.S.C. notes prec. § 21 (1970). The initiation of use and occupancy subsequent to the segregation of the land in favor of the State gives an applicant no rights to an allotment.

Sandra H. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

Under the Alaska Native Allotment Act, no rights are acquired by an applicant who asserted commencement of settlement on land when it was included in a grazing lease issued under the Alaska Grazing Act of 1927, because the land was segregated from adverse appropriation.

Christine Von Scheele, 23 IBLA 346 (Jan. 21, 1976)

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 *et seq.* (1970), until the lease is canceled of record *pro tanto*.

Myrtle H. Jensen Shanigan, 29 IBLA 255 (Mar. 25, 1977)

ALASKA--Continued

GRAZING--Continued

Where a decision rejects an application for an Alaska grazing lease because of an asserted Secretarial policy against granting such applications for land withdrawn pursuant to sec. 17(d)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1616(d)(2) (Supp. V 1975), but the record on appeal is incomplete with respect to the existence of such policy, the record should be remanded for further documentation.

Neither an application for an Alaska grazing lease nor an application for assignment of a grazing lease confer upon the applicant a right to a lease, the granting thereof being discretionary and subject to any changes in Secretarial policy.

The Board of Land Appeals will not exercise its de novo review authority to deny applications for Alaska grazing leases on the basis of trespass where (1) trespass was not cited as a reason for denial of the applications in the decision under appeal, (2) the record does not provide a clear basis for determining the applicant's responsibility for the trespass, and (3) there is no record of compliance with the procedures specified in 43 CFR 9239.0-9(b).

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

Native occupancy and use commenced at a time when land is withdrawn from settlement, location, sale, or entry provides no basis for a Native allotment. Withdrawal of the land in 1940 by Exec. Order No. 8344, inclusion of the land in a grazing lease and homesite, and the subsequent selection of the land by the State of Alaska in 1966 have effectively kept the land closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1940 to Dec. 18, 1971, when the Act was repealed by the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, *as amended*, 43 U.S.C. §§ 316, 316a-316o (1976).

Milton R. Pagano, 41 IBLA 214 (June 27, 1979)

Native use and occupancy commenced at a time when land is otherwise appropriated and segregated from such use and occupancy provides no basis for a claim under the Act of May 17, 1906. Inclusion of the subject lands in 1932 in a grazing lease, withdrawal of the lands in 1940, selection of the lands in 1967 by the State of Alaska, and subsequent withdrawals in 1973 pursuant to the Alaska Native Claims Settlement Act have effectively kept the lands closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1932 to Dec. 18, 1971, when the Act was repealed by sec. 18 of the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, *as amended*, 43 U.S.C. §§ 316, 316a-316o (1976).

Manuel E. Drabek, 41 IBLA 219 (June 27, 1979)

ALASKA--Continued

GRAZING--Continued

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Norman Orbeck, Billy Boskofsky, Jr. (As Heir of Nicholas Boskofsky), 41 IBLA 338 (July 11, 1979)

HEADQUARTERS SITES

If an applicant for a headquarters site does not allege facts that, if taken as true, show that she uses the site in connection with a trade, manufacture, or other productive industry, the Bureau of Land Management may cancel her claim without a hearing.

An applicant for a headquarters site does not establish that she is engaged in a trade, manufacture, or other productive industry by showing an abandoned business which had only meager gross receipts.

In order to meet the headquarters site law requirements, all the requirements of use, being in a business venture, etc., must be accomplished by the time the statutory life of the claim expires.

LaVeta C. Schoenhorster, 19 IBLA 90 (Mar. 3, 1975)

If an applicant for a headquarters site does not make the showings required by the regulations and establish his entitlement to purchase under the Act of Mar. 3, 1927, 44 Stat. 1364, 43 U.S.C. § 687a (1970), his application may be rejected and his claim canceled without a hearing.

William T. Criner, 19 IBLA 149 (Mar. 13, 1975)

A claimant's occupancy of a headquarters site prior to a withdrawal does not establish a "valid existing right" excepted by the withdrawal where credit for his occupancy prior to the withdrawal cannot be given under the Act of Apr. 29, 1950, because the claimant initiated his occupancy more than 90 days prior to the filing of his notice and did not file a notice of location or purchase application prior to the withdrawal.

A request for equitable adjudication relief to permit purchase of a headquarters site claim is premature in the absence of an application to purchase the claim.

The equitable adjudication authority is not appropriate and may not be applied to permit the filing of a headquarters site notice of location after the land has been withdrawn.

Rene F. Lamoureux, 20 IBLA 243 (May 16, 1975)

As only nonmineral lands may be appropriate under the law pertaining to headquarters sites, where the Geological Survey reports that a tract of entered land is nonmineral in character and the Bureau of Land Management therefore formally advises the claimant that the tract is subject to settlement or occupancy and officially acknowledges his claim, and the claimant thereafter complies fully with the law and applies for patent, a subsequent determination that the land is mineral in character will not vitiate the claim unless it is established that the original finding of nonmineral character was error, and that facts in existence at the time equitable title passed required a determination that the land was then mineral. Due process permits such action to be taken only after proper notice and opportunity for hearing.

A selection of land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

Equitable adjudication authority is not appropriate and may not be applied to permit filing of a homesite notice of location after the land has been withdrawn.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

There can be no "valid existing right" in a claimant of a headquarters site on land withdrawn by PLO No. 4582 unless a notice of location or application to purchase had been filed in accordance with the Act of Apr. 29, 1950. The filing of an application for a survey of omitted land did not by itself create any preference rights to the land.

Notices of location for headquarters sites must be accepted for filing by the authorized Bureau of Land Management office if the land has been subject to location during the preceding 90 days. The fact that land had been omitted from the original survey is not a valid reason for the Bureau of Land Management to refuse to record a properly filed notice of location for a headquarters site.

An application to purchase a headquarters site is subject to rejection if it is filed after the 5-year period from the filing of a notice of location of the claim, or, if no notice had been filed, it was filed more than 90 days after the land has been withdrawn.

Equitable adjudication is not appropriate where a headquarters site applicant has not substantially complied with the law.

Ray W. Ferguson, 22 IBLA 160 (Sept. 30, 1975)

Where the claimant of a headquarters site filed his notice of location, occupied the land, and began making improvements thereon prior to the segregation of the land by a withdrawal made subject to valid existing rights, it is error for the Bureau of Land Management to refuse to record the claimant's notice of location, or to cancel the claim without notice and an opportunity for hearing.

Donald J. Thomas, 22 IBLA 210 (Oct. 15, 1975)

An applicant for a headquarters site patent is required to prove that he, or his employer, is engaged in a trade, manufacture, or other "productive industry," for which applicant uses the site as a headquarters personally (or by an employee, if the applicant is in business); the conduct of an enterprise from the site by a third party renting the site and the improvements of the applicant does not qualify.

John H. Huber, Frances L. Huber, 22 IBLA 216 (Oct. 15, 1975)

A headquarters site claim is invalid when occupancy of the site was initiated more than 90 days prior to the filing of a notice of location and an intervening State selection application has segregated the land.

William G. Fairbanks, 22 IBLA 255 (Oct. 23, 1975)

The mere filing of a notice of location for a headquarters site under 43 U.S.C. § 687a (1970) does not establish rights to land. If a claimant cannot also demonstrate the necessary use and occupancy of the site prior to the effective date of a withdrawal and establish a right of purchase, he does not have a "valid existing right" excepted from the withdrawal, and the withdrawal attaches to the land in the site.

Stephen P. Sorensen, 22 IBLA 258 (Oct. 24, 1975)

The filing of a notice of location for a headquarters site does not prevent a withdrawal from attaching to the land prior to the time the locator of the headquarters site performs the requisite acts with respect to use and occupancy necessary to establish the right to purchase.

A headquarters site claim located prior to a withdrawal may be declared invalid by the Bureau of Land Management without awaiting the filing of a patent application where there has been insufficient compliance with the law to appropriate the land before the withdrawal. However, the Bureau should follow appropriate procedures. These should include giving notice to the claimant to show cause why the claim should not be invalidated where the notice of location does not show adequate compliance with the law sufficient to preclude the withdrawal, and initiating a contest and affording an opportunity for a hearing where there are disputed facts on the compliance with the law.

Richard T. Epps, 22 IBLA 374 (Nov. 17, 1975)

A notice of location filed under the Alaska settlement law, 43 U.S.C. § 687a (1970), regular on its face, for land which is open to such settlement and location, is acceptable for recordation. If a withdrawal follows the filing of a notice of location, the proper inquiry is into the validity of the claim, *i.e.*, whether the locator has by acts of settlement and improvement established a valid existing right protected from the effect of the withdrawal.

When an appellant from a decision canceling a headquarters site claim does not assert facts which, taken as true, would constitute the initiation of a claim protected from the effect of a withdrawal, the appellant is not entitled to notice and a hearing on the factual issues pertaining to the establishment of a valid existing right.

An asserted headquarters site claim is not protected from the effect of a withdrawal by assertion of improvements: which are not directed toward the establishment of a *headquarters* on the site; which are made under a prior location on the same land; and for which it appears credit cannot be given because the notice of location was not filed within 90 days of the initiation of such improvements (43 U.S.C. § 687a-1 (1970)).

Mary C. Polen, 24 IBLA 100 (Mar. 1, 1976)

ALASKA--Continued

HEADQUARTERS SITES--Continued

A settlement claim initiated after a State selection application is filed and the land segregated from appropriation creates no rights in the settler.

Any right gained under a notice of location for a trade and manufacturing site or a homesite as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), is personal to the party filing the notice.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

A selection of available land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location. A subsequently filed notice of location for a headquarters site has no effect.

Wilfred S. Wood (On Reconsideration), 25 IBLA 37 (May 6, 1976)

One who files an application to purchase a headquarters site claim has the burden of showing compliance with 43 U.S.C. § 687a (1970), and the applicable regulations in order to establish entitlement to the land.

A headquarters site application is properly rejected where the appellant fails to produce any probative evidence that the land claimed as a headquarters site was used in connection with a productive industry within the meaning of the headquarters site law.

Gustav O. Wiegner, 26 IBLA 123 (July 30, 1976)

An applicant to purchase either a trade and manufacturing site or a headquarters site has the burden of proving that he has complied with the requirements of the law, 43 U.S.C. § 687a (1970). Rejection of such an application is proper where the evidence shows that the tract was used (1) for trapping by the applicant to repay a neighbor for assistance in improving the site, and (2) as a wilderness camp area, and that no substantial revenue was derived from the trapping, and nominal revenues were derived from camping tourists in the park during the life of the claim.

Where an applicant to purchase a trade and manufacturing site or a headquarters site states he was frustrated in completing his improvements and showing sufficient use of the land as required by the law because of more difficult or complex problems than anticipated, but has not shown that this operation could reasonably be expected to be successful, such problems will not afford any basis for equitable adjudication of his application to purchase.

United States v. Ronald E. Tippetts, 29 IBLA 348 (Mar. 31, 1977)

A headquarters site applicant has the burden of establishing entitlement to the land by showing compliance with the law. 43 U.S.C. § 687a (1970). Where such an applicant asserts that he operates a trapping business from the site, yet fails to produce sufficient evidence to show that he was engaged in trade, manufacture or other productive industry from which he reasonably hoped to derive a profit, the application to purchase must be rejected.

United States v. Charles Thomas Beaird, 31 IBLA 203 (July 6, 1977)

ALASKA--Continued

HEADQUARTERS SITES--Continued

The filing of a notice of location for a headquarters site or a homesite does not create any rights in the land, and the filing of a notice will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right in the claim. Marking of boundaries of the claim does not constitute use and development.

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John D. Ketscher, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

Applicant has burden of establishing entitlement to headquarters site claim, and must demonstrate that he has complied with statute and regulations.

In contest hearing on headquarters site claim, evidence must be submitted from which it can be concluded that applicant was engaged in actual business operation from which he reasonably hoped to derive a profit.

Where evidence showed that in 5 years during which applicant was allowed to prove up headquarters site, applicant went out trapping only "four or five times" in 1970 and again in 1971, did not realize more than $20 from sale of pelts but did retain a lynx pelt and two beaver pelts for himself, administrative law judge properly rejected application to purchase headquarters site under 43 U.S.C. § 687a (1970).

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 18, 1978)

Without adequate proof of a tender of a notice of location or application to purchase a headquarters site which was wrongfully denied by Bureau of Land Management personnel prior to a withdrawal of the land, the mere occupancy of land prior to the withdrawal did not create a "valid existing right" excepted from the effect of the withdrawal, and an application to purchase a headquarters site filed after the withdrawal is properly rejected.

Equitable adjudication of an application to purchase a headquarters site claim filed at least 8 years after the land has been withdrawn must be denied as substantial compliance with the law has not been made where neither occupancy of the site prior to the withdrawal nor after the withdrawal could validly be considered under the law.

That part of a decision rejecting a headquarters site purchase application which requires the applicant to remove his improvements from the site within 90 days may be set aside and the case remanded to the Alaska State Office to determine whether a temporary use permit can be granted authorizing continued use of the improvements.

Rene E. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

ALASKA--Continued

HEADQUARTERS SITES--Continued

An entryman may not take advantage of sec. 7 of the Act of Mar. 3, 1891, entitling an entryman to a patent after 2 years from date of issuance of a receiver's receipt when there is no pending contest or protest against the validity of the entry, where he has not shown that preconditions of the Act have been met, *i.e.*, making the final payments required.

In a contest proceeding the Government has the burden of establishing a prima facie case of noncompliance with the requirements for trade and manufacturing, and headquarters sites. The burden then shifts to the applicant to show by a preponderance of the evidence that he has used, occupied, and improved the sites for trade, manufacture, or other productive industry.

A claimant of a trade and manufacturing site must show that at the time of filing his application to purchase he was engaged in trade, manufacture, or other productive industry in connection with the sites. While it is not necessary for the claimant to show that all functions of the business were carried on at the site, he must show a bona fide commercial enterprise from which he reasonably hoped to derive a profit; mere preparation for a prospective business is not sufficient under the regulations. A claimant for a headquarters site must also be engaged in such a business or be an employee of such a business.

United States v. Jack Zemry Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

Applicant has burden of establishing entitlement to headquarters site claim, and must demonstrate that he has complied with statute and regulations.

In contest hearing on headquarters site claim, a contestee, to prevail, must submit evidence from which it can be concluded that he was engaged in an actual business operation from which he reasonably hoped to derive a profit, or is an employee of a qualified business.

Where evidence showed that in 5 years during which applicant was allowed to prove up headquarters site applicant realized $152 from trapping, and where other claimed uses were construction of runways and base camp for hunting and fishing parties, but there was no clear information as to extent of operations or returns derived from these uses, administrative law judge properly rejected application to purchase headquarters site under 43 U.S.C. § 687a (1970).

United States v. Henry Jay Bush, 40 IBLA 106 (Mar. 27, 1979)

Any right which may be gained under a notice of location for a trade and manufacturing site or a homesite, as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1976), is personal to the party filing the notice.

James Sims, 42 IBLA 231 (Aug. 22, 1979)

HOMESITES

Under the Homesite Act of May 26, 1934, 48 Stat. 809, 43 U.S.C. § 687a (1970), an applicant must occupy land in a habitable house not less than 5 months each year for 3 years. Even if a 2-year credit is allowed for military service there must be 5 months of occupancy for 1 year. Totaling lesser periods of occupancy over a number of entry years is not sufficient to meet the requirement.

An applicant's statement that he resided on a homesite claim only on weekends for a substantial portion of a 5-month period does not constitute the 5-month's occupancy required for a homesite under the Act of May 26, 1934, and an application which shows on its face that the requirements have not been met is properly rejected.

Prince A. Ryan, Jr., 18 IBLA 286 (Jan. 2, 1975)

Where request for reconsideration of Bureau of Land Management 1968 homesite decision is taken in 1974, appellant stating he was never served with decision, but where receipt in record shows service in 1968, reconsideration should be denied.

Hollis E. Justis, 21 IBLA 63 (June 25, 1975)

A claimant's occupancy of a homesite prior to a withdrawal does not establish a "valid existing right," excepted by the withdrawal, under the Act of Apr. 29, 1950, where claimant did not file his notice of location within 90 days after occupancy, nor did he file a notice of location or purchase application prior to the withdrawal.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

Location of a homesite claim without substantial use or occupancy of the land in compliance with the law creates no property interest in the land. Where the claimant under sec. 10 of the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687a (1970), has merely marked the boundaries of the claim prior to a withdrawal of the land, such activity does not constitute occupation or possession of the land and the claim will be defeated by that withdrawal.

A notice of location for a homesite which alleges only acts of occupancy and improvement insufficient to create any interest in the land is properly denied recordation.

Edward P. Dooley, 22 IBLA 338 (Nov. 14, 1975)

The filing of a notice of location for a homesite will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator of the homesite fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right excepted from a withdrawal.

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and alleges that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the Bureau of Land Management to hold that the location notice was unacceptable for recordation, and the claim may only be canceled following notice to the claimant and an opportunity to demonstrate the establishment of a valid existing homesite claim prior to the withdrawal.

Steven P. Remme, 24 IBLA 23 (Feb. 11, 1976)

A settlement claim initiated after a State selection application is filed and the land segregated from appropriation creates no rights in the settler.

Any right gained under a notice of location for a trade and manufacturing site or a homesite as required by the

ALASKA--Continued

HOMESITES--Continued

Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), is personal to the party filing the notice.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

The amendment of a notice of location of a homesite in Alaska may be allowed where the application is filed within the life of the 5-year period granted, and where the amendment embraces lands which the applicant has actually occupied and possessed.

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and he alleges, and the field reports so indicate, that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the State Office to hold that the withdrawal terminated the claimant's rights.

Sandra L. Lough, Damon H. Blackburn, 25 IBLA 96 (June 3, 1976)

It is improper for a District Office to find a notice of location for a homesite unacceptable for recordation when the location notice is regular on its face and the land was open to location at the time the notice was filed.

The filing of a notice of location for a homesite does not create any rights in the land, and the filing of a notice will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right in the claim. Marking of boundaries of the claim does not constitute use and development.

George T. Beck, 31 IBLA 363 (July 28, 1977)

The filing of a notice of location for a headquarters site or a homesite does not create any rights in the land, and the filing of a notice will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right in the claim. Marking of boundaries of the claim does not constitute use and development.

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John D. Ketscher, Alfred I. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

Native occupancy and use commenced at a time when land is withdrawn from settlement, location, sale, or entry provides no basis for a Native allotment. Withdrawal of the land in 1940 by Exec. Order No. 8344, inclusion of the land in a grazing lease and homesite, and the subsequent selection of the land by the State of Alaska in 1966 have effectively kept the land closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1940 to Dec. 18, 1971, when the Act was repealed by the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, *as amended*, 43 U.S.C. §§ 316, 316a-316o (1976).

Milton D. Pagano, 41 IBLA 214 (June 27, 1979)

Any right which may be gained under a notice of location for a trade and manufacturing site or a homesite, as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1976), is personal to the party filing the notice.

James Sims, 42 IBLA 231 (Aug. 22, 1979)

HOMESTEADS

Settlement on a homestead claim in Alaska 2 days prior to a withdrawal of the land does not except the land from the withdrawal where the claimant failed to file his notice of location within 90 days after settlement as required by the Act of Apr. 29, 1950, 64 Stat. 94, 43 U.S.C. §§ 270, 270-5, 270-6 (1970), and his notice is properly held to be unacceptable for recordation.

Gary Lee Slay, 18 IBLA 345 (Jan. 14, 1975)

A notice of location for homestead settlement on lands applied for as a state selection under the Alaska Statehood Act is unacceptable for recordation.

Conrad S. Huckins et al., 18 IBLA 357 (Jan. 22, 1975)

Stanley Ray Hunt, 19 IBLA 259 (Mar. 31, 1975)

An application for a second homestead entry under the Act of Sept. 5, 1914, is properly rejected in the absence of sufficient showing that the applicant lost, forfeited, or abandoned the original entry through no fault of his own or because of matters beyond his control.

Arthur Lloyd Zellweger, 19 IBLA 118 (Mar. 5, 1975)

The breaking, planting, or seeding and tillage for a crop which constitute cultivation of the soil of a homestead entry must include such acts and be done in such manner as to be reasonably calculated to produce profitable results.

Where it appears that land has been hand seeded and rolled with a log in a similar manner as used on other homestead entries in the area, and where it is not established that such seeding and rolling is not an unreasonable practice for the type of land and weather conditions involved, the entryman's acts may be found to have been calculated to produce profitable results, notwithstanding his efforts failed to produce a useful crop.

A charge that the entryman failed to cultivate the required acreage in the second entry year is not sustained where the contestant's evidence consists mainly of a general statement by a few persons concluding that the entryman's mode of cultivation was inadequate. In the face of testimony to the contrary by contestee's witnesses which leaves the evidence in equipoise, contestant has not met his burden of convincingly establishing the fact of the entryman's failure to cultivate in the second entry year.

Thomas B. Kimball v. William Henry Selby, 20 IBLA 23 (Apr. 16, 1975)

Where a homestead claimant submits a final proof which shows on its face that he has not cultivated the full area required, and the record reflects that he has not qualified for military credit or reduction in the cultivation requirements, action rejecting final proof and canceling the claim may be suspended to permit the entryman to apply to purchase not more than 5 acres under the Homesite Act of May 26, 1934, failing which the proof will be finally rejected and the claim canceled.

James R. Murphey, 20 IBLA 129 (May 5, 1975)

The land in an additional homestead entry application under the Act of Apr. 28, 1904, as amended, 43 U.S.C. § 213 (1970), must be contiguous to the applicant's original homestead. Neither that Act nor regulations issued thereunder require that tracts of land in such an additional entry application be contiguous to each other. The requirement of 43 CFR 2567.1(c) that land in a homestead entry application in Alaska must be in a contiguous body is maintained by the fact that the land in the additional entry must be contiguous to the original homestead.

John C. Briggs, 22 IBLA 8 (Sept. 4, 1975) 82 I.D. 432

A homestead notice of location filed for lands open to location is acceptable for recordation. Where a homestead settler has marked the corners of his claim by posts prior to a withdrawal subject to valid existing rights, the claim survives the withdrawal if the location notice requirements have been satisfied.

Robert A. Bice, Jr., 22 IBLA 291 (Nov. 3, 1975)

A private contest brought against an Alaskan homestead entry charging that the entryman failed to meet the minimum cultivation requirements for the second entry year must be dismissed when it is disclosed that such information was of record in the Bureau of Land Management office at the time the complaint was filed.

Olan W. Christie v. Larry E. O'Glesbee, 23 IBLA 155 (Dec. 23, 1975)

In proper circumstances, the issuance of an order to show cause why final proof should not be rejected and entry canceled, is within the discretionary authority of the Bureau of Land Management in adjudicating a homestead application.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, as amended, 43 U.S.C. § 1165 (1970) an order to show cause why final proof should not be rejected and entry canceled, which order requires the showing of a material fact, is considered a contest or protest.

The showing of "kind of crop planted" and "quantity of crop harvested" are reasonable requirements for final proof submitted for an Alaska homestead.

"Final entry." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098,

as amended, 43 U.S.C. § 1165 (1970) refers to the submission, to the proper officials, of the amended final proof and required fees.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, as amended, 43 U.S.C. § 1165 (1970) which requires issuance of a patent 2 years after receipt upon final proof for a homestead entry, a contest against an entry should not be dismissed where the complaint was filed within 2 years following the submission of additional affidavits amending the entryman's deficient final proof, despite the fact that the receipt in connection with the deficient proof had been issued more than 2 years before filing of the complaint and the receipt had never been canceled or a new receipt issued.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

The filing by a qualified applicant of a homestead application to enter unappropriated surveyed lands in Alaska segregates the land covered by the application from appropriation. Such an application will be considered to have created a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Pursuant to 43 CFR 2567.5(a)(1), a homestead entryman in Alaska must establish residence upon the land within 6 months of the date of allowance of the entry or within a maximum period of 12 months, if a 6-month extension of time was requested and granted. These periods do not commence at the time of the filing of the application.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

The filing by a qualified applicant of an application for an allowed homestead entry of land which is open and available to such entry at the time of filing will operate to segregate the land from subsequent appropriation and invest the applicant with sufficient interest therein to preserve the land from the effect of a subsequent withdrawal which is made subject to valid existing rights.

Richard T. Pope, 27 IBLA 33 (Sept. 20, 1976)

To establish residency on a homestead there must be the intent to make the desired public lands the entryman's home, and also the intent to no longer have a home at the former residence; the law permits an entryman to have two residences, but he may have only one home.

An entryman who, at the time he seeks to establish residence on the entry, owns a house which he leases furnished for 6 and 1/2 months and to which he returns a few days after he has completed the required 7 months on the entry did not establish his home on the entry in good faith, and thus has not met the residence requirement of the homestead law.

A homestead entry made with no intention of establishing a permanent bona fide home on the entry, but merely with a view to submitting a showing sufficient to support occupancy for the briefest time permitted under the law must be canceled, notwithstanding the proof offered shows full technical compliance with respect to inhabitancy of the land for the period required by the law.

Cultivation of a homestead entry must include the breaking, planting or seeding and tillage for a crop and be done in such a manner as to be reasonably calculated to produce profitable results.

The acts performed in attempted satisfaction of the cultivation requirements of the homestead law must be done in good faith seeking to establish a profitable agricultural operation on the entry.

An entryman who performs the minimum acts of cultivation, and seeds late in the last growing season and soon thereafter files final proof, who does not visit the entry to see the results of his attempts or pursue any further agricultural activity on the entry, and who does not establish that he had a market or use for the crop he could have grown, and where the results are meager, has not demonstrated that he made a good faith attempt to comply with the agricultural requirements of the homestead act.

United States v. Leonard E. Nelson (Supp. I), 28 IBLA 314 (Jan. 14, 1977)

Where a homestead entryman has cleared and broken ground and allowed a portion of the cleared, plowed acreage to grow up with a species of native wheat grass, such acreage is not "cultivated" within the meaning of 43 CFR 2567.5(b), and the entryman's final proof is properly rejected where it shows on its face that the native grass acreage constituted an indispensable portion of the entryman's attempt at meeting the cultivation requirements of the homestead laws. Since there was not substantial compliance with the cultivation requirements, equitable adjudication cannot be properly invoked.

Clarence Ray Mathis, 29 IBLA 150 (Mar. 4, 1977)

A request to reconsider a 1968 decision by the Department rejecting final proof for a homestead entry and canceling the entry is properly rejected in the absence of a showing of "extraordinary circumstances." In the absence of compelling legal or equitable reasons for reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Where a homestead entry has been located on land later included within a withdrawal "subject to valid existing rights," the withdrawal attaches to the land within the homestead upon cancellation of the entry. An amendment of a homestead entry cannot include lands within a canceled adjoining entry to which a withdrawal has attached.

Pekka K. Merikallio, 30 IBLA 157 (May 18, 1977)

Where the initial actions of a homesteader are inconsistent in that he appears to initiate his claim both by settlement and by application for allowed entry, the nature of his claim will be determined by the type of official form used by him to initiate the claim, and by his actions with regard thereto.

Where a homestead in Alaska is initiated by an application for allowed entry, the filing of the application creates a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Where a homestead in Alaska is initiated by an application to enter, the statutory period for compliance with the requirements of the homestead laws begins to run on the date of allowance of the entry.

A contest complaint is properly dismissed where the only basis for cancellation of the homestead suggested by it is failure to comply with the residence and cultivation requirements of the homestead law, and where

the time for compliance with these requirements by the entryman has not yet begun.

John Anthony Coggle v. Robert L. Wetherelt, 30 IBLA 311 (June 6, 1977)

Where a notice of location of settlement claim is filed covering land which is not available for entry, the notice must be rejected and cannot be suspended to await the possible restoration of the land to entry.

A powersite classification effects withdrawal of lands to the full extent described therein as of publication in the *Federal Register*, even if the extent of the land withdrawn by it is not accurately entered subsequently on land-status maps, and, notwithstanding this error, lands classified by it are withdrawn under sec. 24 of the Federal Power Act from settlement under the homestead laws, so that a notice of location settlement claim and final proof concerning these lands is properly rejected.

By regulation, final proof of compliance with the homestead laws must be filed within 5 years, failing which the homestead is subject to cancellation, although, in proper cases the time for filing final proof may be extended. However, the statutory life of a homestead claim or entry cannot be extended beyond 5 years, during which time all other requirements must be performed. An extension of the time for filing final proof is not an extension of the time for performing acts of compliance.

A homestead claimant who contracts for the planting of "enough acreage to satisfy the homestead law" in an essentially worthless hay crop in an area of Alaska where there are no livestock, and with no intention to harvest or utilize it even though it successfully matured, has performed only a token compliance which is, prima facie, demonstrative of bad faith. A good faith devotion of the land to productive and profitable agricultural use is essential to satisfy the purpose and intent of the agricultural land entry laws.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John D. Ketscher, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

The rejection of a homestead application in Alaska merely because there are prior-filed homestead applications for the same land is improper and premature where no action has been taken on the conflicting applications. If a prior-filed application is allowed, the land comes within an allowed entry of record and a junior application must be rejected thereafter. However, if the prior application is rejected or withdrawn, it no longer bars allowance of a junior application.

A homestead claimant in Alaska may be given credit for residence, cultivation and improvements after the time

ALASKA--Continued

HOMESTEADS--Continued

his homestead application is filed but before allowance of entry where the land was subject to appropriation by him or included in an entry against which he had initiated a contest resulting in cancellation of the entry.

"Subject to appropriation by him." The provision in 43 CFR 2511.4-2(a) permitting credit for residence and cultivation by a homestead entryman before the date of entry if during that period the land was "subject to appropriation by him" does not refer to land for which there were prior-filed homestead applications which are subsequently withdrawn or rejected. Therefore, until action is taken on prior-filed applications, final proof filed by a junior homestead applicant should not be rejected merely because the land is subject to the prior applications.

The mere fact homestead final proof in Alaska is filed before allowance of the homesteader's application for entry does not preclude consideration of the final proof if entry is allowed.

John B. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

Where the only properly corroborated fact alleged by private contestant related to situs of contestee's residence in 1975 and thereafter, but precomplaint record included assertion by contestee that he lived on homestead in 1972, 1973, and 1974, the contestant has not thereby alleged facts which, if proved, would require cancellation of entry, and contest must be dismissed under 43 CFR 4.450-5(a).

Although in his summary dismissal of private contest against homestead entry administrative law judge discussed issues upon which contestant had failed to submit corroborated allegations of fact along with his complaint, such action by judge did not relieve contestant of his burden of filing corroboration, despite provisions of 43 CFR 4.450-4(b) allowing judge to "raise issues in connection with deciding a contest."

Administrative law judge properly dismissed without a hearing a private homestead entry contest in which complaint failed to allege corroborated facts which, if proved, would provide sufficient basis for cancellation of entry.

Where contestant in private homestead entry contest appeals to Board of Land Appeals and makes certain assignments of error by administrative law judge, but allegations of fact upon which those assignments are based were not corroborated at filing of contest complaint, and issues raised by those assignments were not raised in complaint, such assignments are not material for purposes of appeal to the Board.

Ernest C. Lamb v. Richard B. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

A summary dismissal of a private contest against an Alaska homestead becomes a final administrative ruling on that contest when the contestant, instead of appealing the dismissal, files a second contest which must be considered an entirely new action. When a final departmental adjudication has been made, the doctrine of administrative finality, which is the administrative counterpart of the principle of res judicata, generally bars consideration of a new appeal arising from a later proceeding involving the same homestead and the same issue.

A private contest brought against an Alaska homestead charging that the entryman had failed to meet any of the residence or cultivation requirements of the law must be dismissed where the statutory life of the entry has previously expired without the entryman filing final proof and information was already of record

ALASKA--Continued

HOMESTEADS--Continued

in the BLM office that the entryman had done nothing during the life of the entry to perfect the claim. 43 CFR 4.450-1.

Joe C. Amberger, 43 IBLA 178 (Sept. 28, 1979)

INDIAN AND NATIVE AFFAIRS

Prior to the conveyance of any land pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. § 1601 (1970)) (ANCSA) the Secretary must make a determination of which public easements are necessary and the Secretary must reserve those easements in the conveyance.

The Secretary has authority to reserve public easements in conveyances under ANCSA (43 U.S.C. § 1601 (1970)) other than those easements identified and recommended by the Joint Federal State Land Use Planning Commission.

The authority of the Secretary to reserve easements in conveyances under ANCSA is not limited to those public easements specifically listed in sec. 17(b)(1) of that Act.

The Secretary is not limited to reservation of easements in conveyances under ANCSA which cross the patented lands from one boundary to another. The easements may be for uses within the patented lands.

Easement Reservations in Conveyances to Alaska Native Corporations Under ANCSA, M-36880 (July 8, 1975)
82 I.D. 325

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 while the grazing lease was still extant, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Herman Haakanson, 23 IBLA 54 (Dec. 4, 1975)

Settlement on land in Alaska which is subject to a grazing lease issued under the Alaska Grazing Act of Mar. 4, 1927, 43 U.S.C. §§ 316, 316a-316o (1976), does not create any rights by virtue of such settlement under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), repealed by 43 U.S.C. § 1617 (1976), since such land is segregated from adverse appropriation at least until the Department takes action to cancel the grazing lease *pro tanto*, but the grazing lease does not preclude the filing of a State selection application which, when filed, segregates the land from all appropriation based upon settlement or location.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on

Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Norman Opheim, Billy Boskofsky, Jr. (As Heir of Nicholas Boskofsky), 41 IBLA 338 (July 11, 1979)

LAND GRANTS AND SELECTIONS

Generally

A selection application by the State of Alaska must be rejected where all of the applied for land is withdrawn from State selection.

State of Alaska, 18 IBLA 351 (Jan. 15, 1975)

A notice of location for homestead settlement on lands applied for as a State selection under the Alaska Statehood Act is unacceptable for recordation.

Conrad S. Huckins et al., 18 IBLA 357 (Jan. 22, 1975)

Lands withdrawn by sec. 11(a)(1) & (2) of the Alaska Native Claims Settlement Act are subject to selection by qualified Native villages notwithstanding the prior tentative approval of selections of those lands by the State of Alaska pursuant to the Statehood Act.

Where the State of Alaska had received tentative approval of a land selection and had granted a patent to a third party in accordance with § 6(g) of the Alaska Statehood Act, and where the State patent was granted before the enactment of the Alaska Native Claims Settlement Act, with the express approval of the various Native groups then concerned, a Native village may not later select those lands pursuant to the Alaska Native Claims Settlement Act, as a valid third party right to the land had already been created.

Where statute and regulation provide that lands selected by the State of Alaska must be surveyed before patent can issue, but no similar requirement has been imposed as a precondition to the conveyance of lands selected pursuant to the Alaska Native Claims Settlement Act, the State's contention that this disparity is discriminatory will not afford a basis for reversing a decision which rejected a State selection application in favor of a conflicting Native village selection.

The fact that filing fees are required as a condition precedent for State selections and are not required for Native village selections pursuant to the Alaska Native Claims Settlement Act is not a basis for vacating a decision awarding lands to the Native villages.

State of Alaska, 19 IBLA 178 (Mar. 18, 1975)

The filing of a State selection under the Alaska Statehood Act does not create a right that prevents a Native village from selecting those lands under the terms of the Alaska Native Claims Settlement Act.

State of Alaska, 19 IBLA 242 (Mar. 27, 1975)

Under 43 CFR 2091.6-4 and 2562.1(d) a notice of location for a trade and manufacturing site is unacceptable for recordation where the land is not subject to that form of disposition because it has been segregated by State selection applications.

Lloyd Schade, 19 IBLA 251 (Mar. 31, 1975)

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

The filing of a State selection application under sec. 6(b) of the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, 340, 48 U.S.C. notes prec. § 21 (1970), does not create a right that prevents a Native Village from selecting those lands under the provisions of the Alaska Native Claims Settlement Act of Dec. 18, 1971, 85 Stat. 688, 43 U.S.C. §§ 1601-1624 (Supp. III 1973).

Whether village selections authorized by the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. III 1973), constitute an unwarranted vitiation of the State selection provisions of the Alaska Statehood Act, 48 U.S.C. notes prec. § 21 (1970), and of the Compact of Admission to the Union, is beyond the consideration of this Board.

State of Alaska, 19 IBLA 316 (Apr. 7, 1975)

Oil and gas lease applications, action on which was suspended under PLO 4582, 34 FR 1025 (1969), are properly rejected when the lands are subsequently patented to the State of Alaska under selection application even though the latter postdate the oil and gas lease applications; the first qualified oil and gas lease applicant has no right or interest in the land applied for which is protected by the savings clauses of the Alaska Statehood Act and the Alaska Native Claims Settlement Act.

Haruyuki Yamane et al., 19 IBLA 320 (Apr 7, 1975)

Under the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 181 *et seq.* (1970), the first qualified applicant has a preference right to receive an oil and gas lease where the Department of the Interior has in the exercise of its discretion, determined to issue such a lease. But a lease offer does not create a vested interest where there has been no determination to lease the lands embraced in the lease offer. In the latter instance, the application for a lease is a hope or expectation rather than a valid claim against the Government, and the lease offeror has acquired no rights which are violated by issuance of a patent to the State of Alaska for the lands embraced in the lease offer.

Published notice of a proposed State selection in accordance with regulatory requirements is adequate notice to all persons claiming the lands adversely to the State.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

Published notice of a proposed State selection in accordance with regulatory requirements is adequate notice to all persons claiming the lands adversely to the State.

Sec. 6(b) of the Alaska Statehood Act providing for recognition of valid existing claims does not apply to an oil and gas lease offer filed pursuant to the Mineral Leasing Act of 1920. While an oil and gas lease offeror may have a right to a lease where the Department has exercised its discretion to issue a lease, and the offeror is entitled to a statutory priority right over other offerors, his application does not rise to the level of a "claim" or "right" within the savings clause of the Alaska Statehood Act where there has been no such determination to lease.

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

The Department of the Interior has neither jurisdiction over nor authority to issue oil and gas leases for lands patented to the State of Alaska.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

A selection of land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

A selection application by the State of Alaska must be rejected with respect to those public lands which are reserved or withdrawn from entry or other form of disposal under the public land laws of the United States and cannot be held open pending a possible future change of the status of the land.

State of Alaska, 20 IBLA 341 (June 11, 1975)

The mere filing of a noncompetitive oil and gas lease offer does not invest the offeror with any right to receive a lease. The only right created thereby is the right to an appropriate priority of consideration if, at the discretion of the Department, an oil and gas lease is to be issued for the land which is the subject of the offer, but it will not preclude the filing of a subsequent State selection application, nor bar approval of the State's application and the issuance of a patent to the State.

Yukon Service, Inc., 22 IBLA 220 (Oct. 15, 1975)

A selection filed by the State of Alaska under its Statehood Act segregates the land from all appropriations based on settlement and location when the application is accepted by BLM and posted to the appropriate land status records. A Native allotment application is properly rejected where applicant fails to show occupation and use prior to the filing of an acceptable State selection application.

Martha Isaac, 22 IBLA 224 (Oct. 15, 1975)

A headquarters site claim is invalid when occupancy of the site was initiated more than 90 days prior to the the filing of a notice of location and an intervening State selection application has segregated the land.

William G. Fairbanks, 22 IBLA 255 (Oct. 23, 1975)

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

A Native allotment application is properly rejected where application fails to show occupation and use prior to the filing of a State selection application.

Louise Luke, 22 IBLA 388 (Nov. 24, 1975)

The filing of an amended Alaska State Selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Klatt, Allan D. Klatt, 23 IBLA 59 (Dec. 11, 1975)

A selection application, filed by the State of Alaska under its Statehood Act, segregates the land from all appropriations, including those based on settlement and location, when the application is filed. A Native allotment application is properly rejected where it fails to show use and occupancy initiated prior to the filing of the State selection application.

William B. Tennyson, Jr., 23 IBLA 77 (Dec. 12, 1975)

An appeal will be summarily dismissed when the appellant fails to serve upon all persons required to be served, copies of the Notice of Appeal and other documents filed with the Board in support of its appeal.

43 CFR 4.905, providing for summary dismissal of an appeal for failure to file or serve, upon all persons required to be served, a notice of appeal, statement of reasons, or of standing, merely expresses the inherent authority of the administrative appeals board under 43 CFR Part 4, Subpart G, and, therefore, may be applied to appeals filed prior to the effective date of sec. 4.905, after notice and opportunity to comply with an order of the Board requiring service upon particular persons.

Appeal of Nee-Yea-Lingde Corp., 1 ANCAB 13 (Dec. 29, 1975)

Sec. 14(h)(5) of the Alaska Native Claims Settlement Act establishes a mandatory deadline for applications for a primary place of residence, which may not be waived in the exercise of Secretarial discretion.

Appeal of Theodore M. Witham, 1 ANCAB 20 (Dec. 29, 1975)
83 I.D. 445 (1976)

A selection filed by the State of Alaska segregates the land from all appropriations when the State files its application to select. A Native allotment application is properly rejected where applicant fails to show substantial use and occupancy of the land prior to the filing of a State selection application independently for himself or as the head of a family, and not as a minor child occupying or using the land in company with his parents or ancestors.

Daniel Johansen, 23 IBLA 292 (Jan. 12, 1976)

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

A selection of available land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location. A subsequently filed notice of location for a headquarters site has no effect.

Wilfred S. Wood (On Reconsideration), 25 IBLA 37 (May 6, 1976)

Where an application for an allotment by an Alaskan Native includes land in a State of Alaska selection application that has been tentatively approved to the State, and where the Native alleges occupancy and use from a date prior to the filing of the State selection, the allotment application may be granted, if the facts alleged are ultimately proved and the application is regular in all other respects.

Where the State of Alaska has applied to select certain land and has been given tentative approval of that selection, and thereafter a conflicting Native allotment application is filed which is supported only by meager evidence of use and occupancy, it is error to allow the allotment application and to cancel the State's tentative approval and reject the selection application without notice and an opportunity for a hearing in which the State may participate.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

Lands described in a State selection application under sec. 6(b) of the Alaska Statehood Act are segregated from all forms of appropriation including location under the mining laws from the time the application is filed in the proper office of the BLM. An amendment to a pre-existing application is effective to segregate the land described in the amendment from the time it is filed.

Dennis G. Quinn, 29 IBLA 307 (Mar. 30, 1977)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

Under the "functional" standard to determine administrative standing set forth in *Koniag, Inc.* v. *Andrus*, 580 F.2d 601 (D.C. Cir. 1978), *cert. denied*, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska selection applications should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The State of Alaska has a sufficient interest in land by virtue of its applications for an airport conveyance or by its selection application to have standing to initiate private contests against conflicting Native allotment applications.

State of Alaska applications for prior-filed airport conveyances of land needed for an existing airport should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska, 42 IBLA 1 (July 25, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

Where it appears that a party did not realize that an election of remedies was mandated by Departmental procedures, a decision requiring the initiation of a private contest will be set aside, and the party will be permitted a period of time in which to initiate a private contest, or alternatively, waive such private contest and pursue a direct appeal on the question of whether a Government contest should issue.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Generally--Continued

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of an application by State of Alaska to select lands segregates those lands from all subsequent appropriations, including locations under the mining law. A mining claim located on land which has been segregated and closed to mineral entry is properly declared null and void ab initio.

John C. Schandelmeier, 42 IBLA 240 (Aug. 22, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

A selection filed by the State of Alaska is subject to prior valid existing rights of Natives, irrespective of whether the State selection was filed pursuant to the Alaska Mental Health Enabling Act or the Statehood Act.

State of Alaska v. Mattie B. Bartos, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979) 86 I.D. 441

The regulations in 43 CFR 2627.4(b) provide that lands applied for by the State of Alaska will be segregated from all appropriations when the State files its application to select. A State selection will not extinguish valid prior existing rights. When Alaskan Natives can prove prior qualifying use and occupancy of selected lands, tentative approvals by the Secretary of the Interior of State land selections must be canceled.

Sarah A. Pence et al., 43 IBLA 266 (Oct. 15, 1979)

Applications

A notice of location for homestead settlement on lands applied for as a State selection under the Alaska Statehood Act is unacceptable for recordation.

Stanley Ray Hunt, 19 IBLA 259 (Mar. 31, 1975)

An oil and gas lease offer must be rejected when approval is given to a subsequently filed State selection embracing the same lands, including the mineral rights. Following issuance of patent to the State, the Department loses jurisdiction over the patented land.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Applications--Continued

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Rowe, Daniel Gaudiano, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

The notation on land office records of a noncompetitive oil and gas lease application does not prevent the State of Alaska from selecting the land pursuant to the Alaska Statehood Act.

Yukon Service, Inc., 22 IBLA 220 (Oct. 15, 1975)

In the absence of a timely appeal from a decision rejecting the State of Alaska's selection application for certain lands, the lands are no longer segregated from other disposition and a withdrawal of those lands may attach, precluding subsequent selection by the State.

State of Alaska, 22 IBLA 229 (Oct. 16, 1975)

The filing of an Alaska State selection for land in an Alaska grazing lease constitutes a petition for determination under 43 CFR 4131.3-1, and upon favorable determination and cancellation of the lease, the State's rights, including segregation of the land in its favor, relate back to the filing of the selection.

Native use and occupancy of land within an Alaska grazing lease does not preclude the State from selecting the land as "vacant and unappropriated" land within the meaning of the Alaska Statehood Act, 72 Stat. 339, 48 U.S.C. notes prec. § 21 (1970). The initiation of use and occupancy subsequent to the segregation of the land in favor of the State gives an applicant no rights to an allotment.

Sandra M. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

Settlement on land in Alaska which is subject to a grazing lease issued under the Alaska Grazing Act of Mar. 4, 1927, 43 U.S.C. §§ 316, 316a-316o (1976), does not create any rights by virtue of such settlement under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), repealed by 43 U.S.C. § 1617 (1976), since such land is segregated from adverse appropriation at least until the Department takes action to cancel the grazing lease *pro tanto*, but the grazing lease does not preclude the filing of a State selection application which, when filed, segregates the land from all appropriation based upon settlement or location.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979) 86 I.D. 345

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Mental Health Lands

Sec. 4 of ANCSA states:
"(a) All prior conveyances of public land and water areas in Alaska, or any interest therein, pursuant to Federal law, and all tentative approvals pursuant to sec. 6(g) of the Alaska Statehood Act, shall be regarded as an extinguishment of the aboriginal title thereto, if any.
"(b) All aboriginal titles, if any, and claims of aboriginal title in Alaska based on use and occupancy, including submerged land underneath all water areas, both inland and offshore, and including any aboriginal hunting or fishing rights that may exist, are hereby extinguished.
"(c) All claims against the United States, the State, and all other persons that are based on claims of aboriginal right, title, use, or occupancy of land or water areas in Alaska, or that are based on any statute or treaty of the United States relating to Native use and occupancy, or that are based on the laws of any other nation, including any such claims that are pending before any Federal or State court or the Indian Claims Commission, are hereby extinguished."

The effect of the extinguishment of aboriginal claims by sec. 4 of ANCSA, as explained in the Conference Report (S. Rep. No. 92-581), 92d Cong., 1st Sess., 40 (1971) and interpreted by *Edwardsen* v. *Morton*, 369 F. Supp. 1359 (D.C. Cir. 1973), necessarily defeats arguments that Mental Health lands remained public lands based on assertions of aboriginal title.

Because Alaska acquired a present right or interest in Mental Health lands immediately upon proper selection of same, and because that interest effectively transfers ownership in the lands to the State, such lands can no longer be considered "public lands" within the meaning of sec. 3(e) and are unavailable for Native village selection under secs. 11(a)(1) and 12(a)(1) of ANCSA.

The authority to select lands under the Alaska Mental Health Enabling Act, while confirmed to the State under sec. 6(k) of the Statehood Act, remains separate and distinct from the authority of the State to select lands as provided in secs. 6(a) and (b) of the Statehood Act.

Lands properly selected under the Alaska Mental Health Enabling Act are not "lands * * * that have been selected * * * by the State under the Alaska Statehood Act" and are not available for selection by Native villages under secs. 11(a)(2) and 12(a)(1) of ANCSA.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65
(July 1, 1976)
83 I.D. 461

A selection filed by the State of Alaska is subject to prior valid existing rights of Natives, irrespective of whether the State selection was filed pursuant to the Alaska Mental Health Enabling Act or the Statehood Act.

State of Alaska v. Mattie B. Bartos, 42 IBLA 269
(Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370
(Sept. 11, 1979)
86 I.D. 441

Mineral Lands

Sec. 6(i) of the Alaska Statehood Act provides that grants of mineral lands to the State are made upon the condition that all subsequent State conveyances of the mineral lands shall be subject to and contain a reservation to the State of all the minerals in the lands so

ALASKA--Continued

LAND GRANTS AND SELECTIONS--Continued

Mineral Lands--Continued

conveyed. The Act does not require that Federal patents to the State include a proviso to the above effect, rather, it is subsequent State conveyances which must contain a reservation for minerals.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

Validity

Sec. 6(b) of the Alaska Statehood Act does not require that patents issued to the State include a proviso that the conveyed lands are vacant, unappropriated, and unreserved, and do not affect any valid existing claim, location or entry under the laws of the United States. The Department assures compliance with this provision by excluding from selection all lands noted on its records as being appropriated and reserved, or subject to valid existing interests, and by requiring that adequate notice be given to all other persons claiming an interest in the selected land. The Department can then receive objections to the issuance of a patent and can render a determination as to the availability of the selected lands.

Sec. 6(i) of the Alaska Statehood Act provides that grants of mineral lands to the State are made upon the condition that all subsequent State conveyances of the mineral lands shall be subject to and contain a reservation to the State of all the minerals in the lands so conveyed. The Act does not require that Federal patents to the State include a proviso to the above effect, rather, it is subsequent State conveyances which must contain a reservation for minerals.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

The filing of an amended Alaska State selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Klatt, Allan E. Klatt, 23 IBLA 59 (Dec. 11, 1975)

MINERAL LEASES AND PERMITS

Whether the issuance of PLO No. 5446, prohibiting oil and gas leasing in Alaska, without prior proposed rulemaking is violative of the Administrative Procedure Act or of the Alaska Native Claims Settlement Act need not be decided; by such issuance the Secretary has enunciated a policy of rejecting mineral lease applications well within his discretionary authority.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

MINING CLAIMS

A mining claim located on land in Alaska at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

Where the Bureau of Land Management records reveal that lands in Alaska have been withdrawn under PLO 5250 and certain of those lands have not been recommended, pursuant to sec. 17(d)(2)(C), Alaska Native Claims Settlement Act of Dec. 18, 1971, 43 U.S.C. § 1616(d)(2)(C) (Supp. IV 1974), for addition to or creation as units

ALASKA--Continued

MINING CLAIMS--Continued

of the National Park, Forest, Wildlife Refuge, and Wild and Scenic Rivers Systems within 2 years of the date of the Act, such lands do not nevertheless become available for appropriation under the mining laws. This conclusion is compelled by the reason that PLO 5250 is based upon E.O. 10355, which not only invokes 43 U.S.C. §§ 141-142 (1970), but also the President's general or inherent authority to withdraw public lands completely from mining location.

Sally Lester et al. (On Reconsideration), 35 IBLA 61 (May 10, 1978)

NATIVE ALLOTMENTS

An application for an Alaska Native allotment must be rejected where the applicant failed to initiate use and occupancy prior to Dec. 18, 1971.

Schwalbe Nukwak, 18 IBLA 418 (Feb. 10, 1975)

Where an Alaska Native Allotment application pending in the Department on Dec. 18, 1971, is later amended to include new or additional lands, the amendment to the application will not be considered as timely filed and will be rejected. However, a correction of a description, where the site was not properly identified on protraction diagrams, may be permitted.

A decision of the Bureau of Land Management rejecting a Native Allotment application because the land is within an oil shale withdrawal will be set aside and remanded for further consideration where the Secretary of the Interior has directed the Geological Survey to review its mineral classifications in Alaska and the applicant requests an opportunity to present evidence to dispute the classification.

Raymond Paneak, 19 IBLA 68 (Feb. 25, 1975)

A grazing lease issued in 1933 for reindeer under the Act of Mar. 4, 1927, became subject to the Reindeer Act of Sept. 1, 1937, and rules and regulations thereunder. Interpretations of the effect of grazing rights granted under the 1937 Act upon a Native allotment applicant's claim of occupancy may be applied to such a lease, if they are not to the detriment of the lessee.

A regulation pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows settlement rights to be initiated while a permit issued under that Act is in existence. The policy manifest in that regulation may be followed, in the exercise of the Secretary's discretion, to permit consideration of a Native allotment applicant's occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of Mar. 4, 1927, and the regulation was promulgated after initiation of the occupancy.

Kristeen J. Burke, Joe N. Melovedoff, Victor Melovedoff, 20 IBLA 162 (May 5, 1975)

Lands withdrawn from appropriation under the nonmineral public land laws and lands within Alaska State selection applications are not open to the initiation of Alaska Native allotment claims.

An allotment right is personal to one who has fully complied with the law and regulations. A Native who applies for withdrawn lands must show that he did comply with the law prior to the effective date of withdrawal, and he may not tack on his deceased parents' use and occupancy to establish a right for himself prior to the withdrawal.

The Alaska Native Claims Settlement Act of Dec. 18, 1971, extinguished all aboriginal claims and rights of the Natives and terminated whatever aboriginal rights, if any, the Natives may have had.

Ann McPoise, David Lee Orbeck, Martha Anderson, 20 IBLA 169 (May 7, 1975)

Lands in Naval Petroleum Reserve No. 4 are not available for Alaska Native allotments.

Allie Kittick, Lena Mae Matoomealook, 20 IBLA 241 (May 15, 1975)

Ruth Agnasagga, Andrew Ekak, 21 IBLA 228 (July 31, 1975)

Paul Oarcoogak, 22 IBLA 90 (Sept. 22, 1975)

Withdrawn lands and lands closed to nonmineral entry are not open to appropriation under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 through 270-3 (1970). No rights may be initiated under the Alaska Native Allotment Act by occupation and use of lands not open to appropriation.

Anna Orbeck, Chris Roy Orbeck, Philip Katelnikoff, 20 IBLA 290 (May 27, 1975)

When a Native has initiated use and occupancy of land *prior* to the date of its classification under the Classification and Multiple Use Act of 1964, such classification will not constitute a bar to the completion of the statutory 5-year use and occupancy period, and the allotment may be granted, all else being regular, even though the classification remains in effect.

Katie Wassillie et al., 20 IBLA 330 (June 6, 1975)

Donald F. Nielsen, Ethel Adcox, 21 IBLA 258 (Aug. 11, 1975)

Although a patent issued pursuant to an Alaska State selection may have been issued by mistake, it vested title in the State and removed from the jurisdiction of this Department the right to inquire into and consider all disputed questions of fact as well as rights in the land.

Thomas Albert, 20 IBLA 338 (June 11, 1975)

Native allotment applications for lands in the Tongass National Forest may be allowed only if (1) the application is founded on occupancy prior to the inclusion of the lands within the forest or (2) an authorized officer of the Department of Agriculture certifies that the land in the application is chiefly valuable for agricultural or grazing purposes.

A Native who has applied for an allotment within a national forest must show that he personally complied with the law in establishing occupancy and use prior to the effective date of the forest withdrawal and he may not tack on his parents' or grandparents' use and occupancy to establish a right in himself commencing prior to the creation of the forest.

No property rights were created under the Alaska Native Allotment Act until all requirements of statute and regulation were satisfied during the lifetime of the applicant.

The Government may withdraw lands occupied by Alaskan Natives under alleged aboriginal possessory rights and thus preclude such lands from disposition under the Native Allotment Act.

Louis P. Simpson et al., 20 IBLA 387 (June 16, 1975)

Even if a patent issued to a homestead entryman by mistake or inadvertence, it vested title in the patentee and removed from the jurisdiction of this Department the right to decide all disputed questions of fact as well as rights to land.

Basille Jackson, 21 IBLA 54 (June 18, 1975)

An allotment may issue where a qualified Native shows at least 5 years' continued use and occupancy of land from which he earns subsistence and where his use potentially excludes that of all others.

Jack Koutchak, 21 IBLA 71 (June 25, 1975)

An Alaska Native Allotment application covering lands which have been withdrawn from all forms of appropriation must be rejected unless the applicant can demonstrate that he actually used and occupied the land for a period of 5 years prior to withdrawal.

Henry B. Nashookpuk, Lennie Lane, Jr., Harriet J. Lane, 21 IBLA 116 (June 30, 1975)

The policy manifest in regulations pertaining to grazing permits under the Reindeer Grazing Act of 1937 allows, in the exercise of the Secretary's discretion, consideration of a Native allotment applicant's use and occupancy of land after the 1937 Act, even though the land was covered by a reindeer grazing lease issued prior to that time under the Act of Mar. 4, 1927.

Carl E. Malutin et al., 21 IBLA 152 (July 16, 1975)

An application for a Native allotment consisting of two separate parcels of land is properly rejected as to the one parcel on which there is no evidence of use or occupancy by the applicant and the applicant fails to supply such evidence on request.

A request for an evidentiary hearing will be denied where there is no dispute involving a material fact and there is no chance of development of further material facts which would require a different decision.

Beulah Moses, 21 IBLA 157 (July 21, 1975)

Substantial use and occupancy, as contemplated by the Native Allotment Act, must be by the Native as an independent citizen for himself or as head of a family, and not as a minor child occupying or using the land in company with his parents.

The Native Allotment Act, *as amended*, requires that an applicant must occupy the land he claims for at least 5 years, without distinction as to whether or not the land is part of the national forest system or is part of the unreserved public domain. Even if that requirement of the Act were interpreted to apply only to national forest land, occupancy for 5 years is still required on unreserved public domain by regulations promulgated pursuant to the authority and discretion of the Secretary of the Interior.

The requirement of 5 years' use and occupancy to receive an allotment under the Native Allotment Act must have occurred prior to Dec. 18, 1971, as the Alaska Native Claims Settlement Act extinguished all such unperfected claims from that day forward.

Warner Bergman, 21 IBLA 173 (July 25, 1975)

More than a quarter of a century of nonuse of land by an applicant for a Native allotment negates any assertion of substantially continuous use and occupancy and militates against a finding of substantial actual possession potentially exclusive of others, as required by law and regulation. Such a long period of nonuse by applicant vitiates any effective qualifying use and occupancy which may have preceded the long period of lack of use.

Lands in a powersite withdrawal are not available for Native allotment unless the applicant has completed 5 years of qualifying use and occupancy prior to the filing of the application for withdrawal for powersite purposes.

William Carlo, Sr., 21 IBLA 181 (July 25, 1975)

Where an applicant for a Native allotment asserts use and occupancy of the land in 1959 and the land is included in an application for powersite withdrawal of the lands in 1963, and is withdrawn in 1965 for such purposes, the applicant has failed to demonstrate the 5 years' use and occupancy prior to the effective date of the withdrawal as required by the Secretarial directive of Oct. 18, 1973. This is based upon the finding that an application for power purposes, upon its filing, immediately withdraws the land pursuant to sec. 24 of the Federal Power Act, *as amended*, 16 U.S.C. § 818 (1970).

Herman Joseph, 21 IBLA 199 (July 30, 1975)

An allotment may not be granted unless the applicant demonstrates she has made a substantially continuous use and occupancy for a period of 5 years as an independent citizen for herself or as the head of a household and not as a minor child occupying and using land in company with her parents, grandparents or other forebears.

An allotment right is personal to one who has fully complied with the law and regulations. An applicant must show that she herself has complied with the law and she may not tack on the period of use and occupancy by her parents, grandparents, or other forebears nor may general occupancy under alleged aboriginal rights serve as a basis upon which a Native may predicate a claim to an allotment.

Lula J. Young, 21 IBLA 207 (July 30, 1975)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Alaska Native allotment applications for lands in the Tongass National Forest are properly rejected where (1) the applications are not founded on use and occupancy of the applicants prior to inclusion of lands within the forest or (2) the Department of Agriculture does not certify that the lands are chiefly valuable for agricultural or grazing purposes.

Mary Y. Paul et al., 21 IBLA 223 (July 31, 1975)

The requirement of use and occupancy by an applicant under the Alaska Native Allotment Act contemplates possession at least potentially to the exclusion of all others and not mere intermittent use. Seasonal use for fishing, hunting and trapping within an area used for similar purposes by others without the consent of the applicant does not satisfy the requirements of the regulation that use shall be potentially to the exclusion of all others.

Where a Native allotment applicant has used the land applied for only for hunting, trapping and fishing and there are no improvements on the land, it is proper in the exercise of the Secretary's discretionary authority to reject the application to the extent it conflicts with a special land use permit issued to the Alaska Fish and Game Department for scientific purposes.

Gregory Anelon, Sr., 21 IBLA 230 (Aug. 1, 1975)

An Alaska Native allotment application is properly rejected where applicant fails to show 5 years' substantial continuous use and occupancy prior to the closing of the land to Native allotments. An allotment application is properly rejected when the land applied for is within a powersite withdrawal and initiation of use and occupancy was less than 5 years prior to the time the lands were closed.

Heirs of Charles E. Frank et al., 21 IBLA 248 (Aug. 11, 1975)

Leah Druck, 22 IBLA 253 (Oct. 22, 1975)

An allotment application must be rejected where the Native did not complete 5 years' substantial use and occupancy of the land prior to withdrawal. An applicant who was an infant of tender years at the time of withdrawal cannot qualify for an allotment on the withdrawn land.

Emma Moses, 21 IBLA 264 (Aug. 11, 1975)

An applicant under the Alaska Native Allotment Act does not have a due process "right" under the Constitution to a hearing before an administrative law judge on the rejection of her application in whole or in part.

The requirement of "substantially continuous use and occupancy of the land for a period of 5 years" applies to all applicants under the Alaska Native Allotment Act, regardless of where the land is situated. Such 5-year period must be completed prior to the time the land was withdrawn by the Alaska Native Claims Settlement Act.

Where a Native allotment applicant has had an adequate opportunity to submit her own evidence of use and occupancy, but has failed to do so, a decision rejecting the application in part because of inadequate use and occupancy may be upheld.

Heldina Eluska, 21 IBLA 292 (Aug. 11, 1975)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

The date of the segregation from settlement, caused by the filing of a State selection application in the appropriate office of the Bureau of Land Managment, is not tantamount to the "effective date" of "[a] withdrawal or reservation" described in the Secretarial directive of Oct. 18, 1973. Therefore, Native use and occupancy commenced before such segregation may continue, unhampered by such segregation, to gain the requisite 5 years' use and occupancy required under 43 U.S.C. §§ 270-1 to 270-3 (1970).

Victor A. Anahonak, 21 IBLA 347 (Aug. 18, 1975)

Lands in the Arctic National Wildlife Range may not be made available for Native allotment unless the allotment applicant initiated substantial use and occupancy more than 5 years prior to the withdrawal of the land.

Herman S. Rexford, Wilson Soplu, 22 IBLA 20 (Sept. 5, 1975)

Lands in the Arctic National Wildlife Range may not be made available for Native allotment unless the allotment applicant initiated substantial use and occupancy more than 5 years prior to the withdrawal of the land.

Where an Alaska Native allotment applicant pending in the Department on Dec. 18, 1971, is later amended to include new or additional lands, the amendment to the application will not be considered as timely filed and will be rejected.

Annie Soplu, 22 IBLA 38 (Sept. 10, 1975)

An allotment may be granted only when the Native applicant demonstrates actual substantial use and occupation of the land at least potentially exclusive of others, and not merely intermittent use. Where such use is shown, all else being regular, an allotment ordinarily may issue for the smallest legal 40-acre subdivision embracing the area of use.

Hilma Eakon, 22 IBLA 41 (Sept. 15, 1975)

An application for an Alaska Native allotment filed with the Department of the Interior after Dec. 18, 1971, must be rejected.

Jessie Jim, Georgia Jim, 22 IBLA 54 (Sept. 17, 1975)

The requirement of "substantially continuous use and occupancy of the land for a period of five years" applies to all applicants under the Alaska Native Allotment Act, regardless of where the land is situated.

The requirement of use and occupancy for a period of 5 years in order to receive an allotment under the Alaska Native Allotment Act must be completed by Dec. 18, 1971. If an applicant for a Native allotment has not completed the 5 years prior to that date, he does not qualify under the Alaska Native Allotment Act.

John A. Faine, 22 IBLA 56 (Sept. 17, 1975)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Withdrawn lands are not open to appropriation under the Native Allotment Act. An Alaska Native allotment application is properly rejected where the applicant fails to show substantial use and occupancy at least potentially to the exclusion of others and not mere intermittent use.

Serafina Anelon, 22 IBLA 104 (Sept. 22, 1975)

Lands required for airport approach and aviation purposes, and lands most used in common by the general community, will be retained in public ownership and will not be conveyed pursuant to an application filed under the Alaska Native Allotment Act. Where the record fails to show that a Native has used land at least potentially to the exclusion of others for a 5-year period, his application for Native allotment is properly rejected.

Evan Chiskak, Alex Hunt, Angela Odinzoff, Antonia Raymond, 22 IBLA 153 (Sept. 30, 1975)

Lands withdrawn from appropriation under the nonmineral public land laws are not open to the initiation of Alaska Native Allotment claims. No rights may be initiated under the Alaska Native Allotment Act by occupation and use of lands not open to appropriation.

Substantial use and occupancy, as contemplated by the Alaska Native Allotment Act, must be by the Native as an independent citizen for himself or as head of a family, and not as a minor child occupying or using the land in company with his parents.

An allotment right is personal to one who has fully complied with the law and regulations. A Native who applies for withdrawn lands must show that he did comply with the law prior to the effective date of withdrawal, and he may not tack on his deceased parents' use and occupancy to establish a right for himself prior to the withdrawal.

The Alaska Native Claims Settlement Act of Dec. 18, 1971, extinguished all aboriginal claims and rights of the Natives and terminated whatever aboriginal rights, if any, the Natives may have had.

James S. Picnalook, Sr., Mabel Bullard, 22 IBLA 191 (Oct. 15, 1975)

The Secretarial instruction of Oct. 18, 1973, which mandates a showing by a Native allotment applicant of 5 years of occupancy prior to a withdrawal of the land, was not required to be published as rulemaking since 5 U.S.C. § 553(a)(2) (1970) exempts from its ambit matters pertaining to public property.

Where a Native allotment application is not allowable because of failure to meet requirements of law and the applicant dies, her heirs gain no rights to the land.

Heirs of Dorothy Gordon, 22 IBLA 213 (Oct. 15, 1975)

A selection filed by the State of Alaska under its Statehood Act segregates the land from all appropriations based on settlement and location when the application is accepted by BLM and posted to the appropriate land status records. A Native allotment application is properly rejected where applicant fails to show occupation and use prior to the filing of an acceptable State selection application.

Martha Isaac, 22 IBLA 224 (Oct. 15, 1975)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

The requirement of "substantially continuous use and occupancy of the land for a period of five years" applies to all applicants under the Alaska Native Allotment Act, regardless of where the land is situated.

A Native allotment applicant is not entitled to credit for her use and occupancy of the land as a minor child accompanying her parents. Moreover, failure to use the land for at least 8 years prior to applying for a Native allotment precludes an applicant from showing "substantially continuous use and occupancy of the land."

Applicants under the Alaska Native Allotment Act do not have a right to a formal hearing before an administrative law judge. However, a hearing may be ordered in the discretion of the Secretary of the Interior.

Elsie Bergman, Walter Titus, Steven Bergman, 22 IBLA 233 (Oct. 22, 1975)

The Alaska Native Allotment Act, as amended and supplemented, requires that an applicant must use and occupy the land claimed for at least 5 years, whether or not the land is part of the national forest system or is part of the unreserved public domain. Even if the Act were to be construed as not expressly requiring 5-year use and occupancy prior to issuance of an allotment for unreserved public domain lands, Departmental regulations promulgated pursuant to the authority and discretion of the Secretary of the Interior impose such a requirement.

The preference right created under the Alaska Native Allotment Act is not a property right protected by the Fifth or Fourteenth Amendments to the United States Constitution, and consequently, a Native allotment applicant has no constitutional right to a hearing. While the applicant is not entitled to a hearing as a matter of right, one may be held at the discretion of the Secretary of the Interior, but when the applicant fails to allege any facts which would justify a hearing and the sole issues presented are legal in nature, an evidentiary hearing is not required.

Substantial use and occupancy, as contemplated by the Alaska Native Allotment Act, must be by the Native as an independent citizen for himself or as head of a family, and not as a minor child occupying or using the land in company with his parents.

Paul Koyukuk, 22 IBLA 247 (Oct. 22, 1975)

The Secretarial guideline of Oct. 18, 1973, that a Native allotment applicant should be rejected when the applicant fails to show 5 years of use and occupancy prior to a withdrawal of the land: (a) is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970); and (b) is a proper exercise of the discretion vested in the Secretary by the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), the application of which does not violate any right of the allotment applicant.

Herman Joseph (On Reconsideration), 22 IBLA 266 (Oct. 30, 1975)

Once made, an election to apply under sec. 14(h)(5) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1613(h)(5) (Supp. III 1973), in lieu of a Native allotment application, is irrevocable.

Dwight Ievuk (Deceased), 22 IBLA 296 (Nov. 3, 1975)

Mere seasonal use of land for berry picking, when the land is used for berry picking by others, is not the substantially continuous use and occupancy to the potential exclusion of others contemplated by the regulations. A Native allotment application which asserts seasonal use for berry picking while the land is used by others must be rejected.

Myrtle Jaycox, 22 IBLA 324 (Nov. 10, 1975)

Where, prior to the rejection of her application, an applicant for a Native allotment was advised of findings which, unless rebutted, would result in the rejection of the application, and was afforded an extended period of time in which to submit additional evidence, evidence which is thereafter submitted for the first time on appeal from the rejection decision, without explanation of why it was not submitted when due, will not be favorably considered in adjudicating the propriety of the decision appealed from.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Mary Ayojiak, 22 IBLA 384 (Nov. 21, 1975)

A Native allotment application is properly rejected where applicant fails to show occupation and use prior to the filing of a State selection application.

Substantial use and occupancy, as contemplated by the Alaska Native Allotment Act, must be by the Native as an independent citizen for herself or as head of a family, and not as a minor child occupying or using the land in company with her parents.

Louise Luke, 22 IBLA 388 (Nov. 24, 1975)

The requirement of use and occupancy by an applicant under the Alaska Native Allotment Act contemplates possession at least potentially to the exclusion of all others and not mere intermittent use. The burden to present clear and credible evidence to establish entitlement is upon the applicant.

The requirement of "substantially continuous use and occupancy of the land for a period of 5 years" applies to all allotments under the Alaska Native Allotment Act, regardless of where the land is situated.

An applicant under the Alaska Native Allotment Act does not have a due process right under the Constitution to a hearing before an administrative law judge on the rejection of his application.

Jack Gosuk, 22 IBLA 392 (Nov. 24, 1975)

Lands withdrawn from appropriation under the public land laws and lands within Alaska State selection applications are not open to the initiation of Alaska Native allotment claims.

An applicant for a Native allotment cannot tack on the use and occupancy of the land by his relatives to his own use and occupancy in order to establish the statutory 5-year period of substantially continuous use and occupancy.

Cecil R. Sholl, 23 IBLA 17 (Nov. 26, 1975)

Native allotment applications for lands in the Tongass National Forest may be allowed only if (1) the application is founded on occupancy prior to the inclusion of the lands within the forest or (2) an authorized officer of the Department of Agriculture certifies that the land in the application is chiefly valuable for agricultural or grazing purposes.

A Native who has applied for an allotment within a national forest must show that he personally complied with the law in establishing occupancy and use prior to the effective date of the forest withdrawal and he may not tack on his parents' or grandparents' use and occupancy to establish a right in himself commencing prior to the creation of the forest.

Under the Alaska Native Allotment Act, a Native must be old enough to exert independent use and control of the land at the time he initiates his claim, and must occupy the land to the potential exclusion of others.

Christine Laverne Hanlon et al., 23 IBLA 36 (Dec. 2, 1975)

Substantial use and occupancy, as contemplated by the Native Allotment Act, must be by the Native independently for himself or as head of a family prior to the effective date of withdrawal, and he may not tack on use and occupancy by his parents or ancestors to establish a right for himself prior to the withdrawal.

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 while the grazing lease was still extant, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Herman Haakanson, 23 IBLA 54 (Dec. 4, 1975)

A selection application, filed by the State of Alaska under its Statehood Act, segregates the land from all appropriations, including those based on settlement and location, when the application is filed. A Native allotment application is properly rejected where it fails to show use and occupancy initiated prior to the filing of the State selection application.

William F. Tennyson, Jr., 23 IBLA 77 (Dec. 12, 1975)

The use and occupancy requirement is satisfied when a qualified Native shows at least 5 years of continued use and occupancy of land from which she earns subsistence and where her use potentially excludes that of all others.

Bernice A. Brown, 23 IBLA 79 (Dec. 12, 1975)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from a rejection of a Native allotment application in the absence of a satisfactory showing why the evidence was not submitted to Bureau of Land Management within the period afforded the applicant for the submission of such evidence.

An applicant for a Native allotment has no right to a hearing, and none is required where there is no offer of proof which indicates that the findings of the State Office were incorrect, or where an offer of evidence is unaccompanied by a satisfactory explanation why it was not submitted to the State Office within the time provided.

A request by a Native allotment applicant for a new field examination will be denied where the applicant was given the opportunity to submit evidence in support of her claim and failed to do so.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

Where a field examination reveals substantial use and occupancy by persons other than the claimant, a decision rejecting a Native allotment application will be affirmed.

Nora E. Kongkpeok, 23 IBLA 86 (Dec. 16, 1975)

An Alaska Native allotment application is properly rejected where the applicant fails to demonstrate completion of 5 years of substantially continuous use and occupancy prior to an application for withdrawal of the land for power purposes.

Wayne C. Williams, 23 IBLA 88 (Dec. 16, 1975)

The right to an allotment is personal to a Native who has complied with the law and regulations. An applicant who applies for withdrawn lands must show personal compliance with the law prior to the effect of the withdrawal. Such applicant may not tack on the use and occupancy of parents or other relatives to establish her right prior to the withdrawal.

An allotment application must be rejected where the applicant was an infant of tender years at the time the subject land was withdrawn, and where it is obvious that because of her age she could not have exerted independent use and occupancy of the land to the exclusion of others.

Catherine Angaiak, 23 IBLA 91 (Dec. 18, 1975)

Where a Native allotment applicant alleges that he has used the applied for land for hunting and trapping and submits several affidavits for the first time on appeal which verify this use, and the applicant makes a satisfactory showing explaining why he was unable to submit this evidence to the Bureau of Land Management prior to its decision, the case will be remanded to the Bureau for further consideration of the application in light of the new evidence.

Jack Egnaty, Sr., 23 IBLA 95 (Dec. 18, 1975)

Where a Native allotment applicant has had an adequate opportunity to submit credible evidence of substantially continuous use and occupancy of the land at least potentially exclusive of others, but has failed to make such a showing, the application is properly rejected.

Over 20 years of nonuse of land by an applicant for a Native allotment negates any assertion of substantially

continuous use and occupancy and militates against a finding of substantial actual possession potentially exclusive of others, as required by law and regulations. The period of nonuse vitiates any effective qualifying use and occupancy which may have preceded the long period of lack of use.

Natalia Peruk, 23 IBLA 99 (Dec. 18, 1975)

Lucy Brezikck, 23 IBLA 145 (Dec. 23, 1975)

Native allotment applications for lands in the Tongass National Forest may be allowed only if (1) the application is founded on occupancy prior to the inclusion of the lands within the forest, or (2) an authorized officer of the Department of Agriculture certifies that the land in the application is chiefly valuable for agricultural or grazing purposes.

A Native who has applied for an allotment within a national forest must show that he personally complied with the law in establishing occupancy and use prior to the effective date of the forest withdrawal and he may not tack on his parents' or grandparents' use and occupancy to establish a right in himself commencing prior to the creation of the forest.

Estate of Benjamin A. Wright, 23 IBLA 120 (Dec. 23, 1975)

Nadja Davis Gamble, 23 IBLA 128 (Dec. 23, 1975)

A decision rejecting a Native allotment application which alleges occupancy only as of a date after a State selection application for the land has been filed will be upheld and a request for a hearing on appeal denied where appellant has refused after repeated opportunities to provide factual allegations of qualifying occupancy and the statement of reasons on appeal fails to assert any facts which would tend to establish qualifying occupancy.

A Native allotment applicant is charged with notice of the official land records of the Bureau of Land Management. No estoppel will result from a delay in the rejection of a Native allotment where the basis of the decision is that the land was segregated by a State selection application prior to commencement of occupancy, the delay was not unreasonable, the State selection was a matter of public record, and no misrepresentations were made to the applicant.

Roselyn Isaac, 23 IBLA 124 (Dec. 23, 1975)

The burden is upon an applicant for an Alaska Native allotment to provide clear and credible evidence of his or her entitlement to an allotment. Failure to do so will result in rejection of the application.

When an applicant for an Alaska Native allotment dies without having complied with the law and regulations necessary to earn an allotment, no property right is created which could have passed to the heirs of the applicant upon her death.

Heirs of Madrona Wassillie, 23 IBLA 131 (Dec. 23, 1975)

Under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), issuance of a grazing lease appropriates the lands and segregates them from public domain, barring

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from lease.

Edward F. Naughton, 23 IBLA 134 (Dec. 23, 1975)

An allotment may be granted only when the Native applicant demonstrates actual substantial use and occupancy of the land at least potentially exclusive of others and not merely intermittent use.

Where a Native allotment applicant has had an adequate opportunity to clearly identify his area of allotment and to present clear and credible evidence to establish his entitlement but has failed to do so, a decision rejecting the application will be affirmed.

Lavilla Pauk, 23 IBLA 151 (Dec. 23, 1975)

A Native allotment may not be approved where the land applied for has been within a powersite withdrawal long prior to the initiation of applicant's use and occupancy.

Davis Hobson, 23 IBLA 159 (Dec. 23, 1975)

There must be "substantially continuous use and occupancy of the land" by an Alaska Native allotment applicant to qualify such an applicant for an allotment.

Heirs of Macauley Alakayak, 23 IBLA 170 (Dec. 29, 1975)

The substantial use and occupancy required under the Native Allotment Act must be achieved by the Native himself as an independent citizen (or family head) and such use must be at least potentially exclusive of others. Although a minor may initiate such use and occupancy, use and occupancy by a dependent accompanied by his parents does not qualify.

An allotment right is personal to one who has fully complied with the law and the regulations. An applicant for a Native allotment may not tack on use and occupancy of the land by his ancestors to establish the right. The applicant must have completed the 5-year period of use and occupancy prior to withdrawal of the land to qualify.

Where the decision appealed from is based essentially on the facts disclosed by appellant, there is no dispute as to any material fact, and the sole question presented is a legal issue, no evidentiary hearing is required on appeal.

Sarah P. Lindgren, Emery V. Showalter, 23 IBLA 174 (Dec. 31, 1975)

The requirement of use and occupancy by an applicant under the Alaska Native Allotment Act contemplates possession at least potentially to the exclusion of all others and not mere intermittent use. The burden to present clear and credible evidence to establish entitlement is upon the applicant.

An applicant under the Alaska Native Allotment Act does not have a due process "right" under the Constitution to a hearing before an administrative law judge on the rejection of her application in whole or in part.

Anuska Tugatuk, 23 IBLA 182 (Jan. 5, 1976)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Where an applicant for an allotment pursuant to the Alaska Native Allotment Act did not occupy the land prior to its inclusion in a national forest, and the land is found not to be chiefly valuable for agricultural or grazing purposes by the authorized officer, the application will be rejected.

Albert Shields, Sr., 23 IBLA 188 (Jan. 5, 1976)

In order to qualify for an allotment an Alaska Native applicant must show substantially continuous use and occupancy of the land for a period of 5 years. When there is no evidence that the applicant used and occupied the land as required, the application must be rejected.

Angeline Gooden, 23 IBLA 192 (Jan. 6, 1976)

An Alaska Native allotment applicant may not use the occupancy of public land by forebears to qualify herself for an allotment, nor does the use and occupancy of public land by a forebear, while the land was open to settlement, create any right that excepts the land from a withdrawal in favor of an applicant who initiated independent use and occupancy subsequent to the withdrawal.

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 *et seq.* (1970), until the lease is canceled of record.

Native use and occupancy of land within an Alaska grazing lease does not preclude the State from selecting the land as "vacant and unappropriated" land within the meaning of the Alaska Statehood Act, 72 Stat. 339, 48 U.S.C. notes prec. § 21 (1970). The initiation of use and occupancy subsequent to the segregation of the land in favor of the State gives an applicant no rights to an allotment.

Sandra H. Pestrikoff, 23 IBLA 197 (Jan. 6, 1976)

Where evidence shows use and occupancy of only a part of the land claimed in a Native allotment application, an allotment may be approved for the smallest legal 40-acre subdivision embracing the area of use, and the application as to the remainder of the land is properly rejected.

Emily D. Hunt, 23 IBLA 205 (Jan. 6, 1976)

An allotment may be granted only when the Native applicant demonstrates actual substantial use and occupation of the land at least potentially exclusive of others, and not merely intermittent use.

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. However, where there does appear to be a dispute as to material facts raised by conflicting affidavits as to the alleged use of land by conflicting applicants, a further field investigation will be directed in an attempt to resolve the factual uncertainties.

Amelia K. Elastervold et al., 23 IBLA 207 (Jan. 6, 1976)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Where the record of a Native allotment application at the time of adjudication shows that rejection would be proper, appellant will not be allowed on appeal to submit data which might warrant a different result, absent a clear and convincing showing explaining why the information was not afforded to the Bureau of Land Management when appellant was called upon for such data.

David E. Stevens, 23 IBLA 221 (Jan. 8, 1976)

Where the evidence shows that an applicant for a Native allotment has never occupied the land, the application will be rejected.

Elia Wassillie, 23 IBLA 276 (Jan. 12, 1976)

Where a Native allotment application is properly rejected and on appeal the applicant first submits assertions which, if proved, might qualify her, but fails to make a showing explaining why the data was not timely filed, the rejection of the application will stand.

Marion Stevens, 23 IBLA 280 (Jan. 12, 1976)

Where a Native allotment applicant has had an adequate opportunity to submit credible evidence of substantially continuous use and occupancy of the land at least potentially exclusive of others, but has failed to make such a showing, the application is properly rejected.

A request by a Native allotment applicant for a new field examination will be denied where the applicant was given the opportunity to submit evidence in support of her claim and failed to do so.

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. A hearing is not appropriate when there is no offer of proof which if established would impel a different legal conclusion.

Kathryn Eluska, 23 IBLA 284 (Jan. 12, 1976)

A Native allotment application for lands within a wildlife range withdrawal is properly rejected where the applicant did not initiate and complete substantial use and occupancy for a 5-year period prior to the effective date of withdrawal or segregation.

The requirement of "substantially continuous use and occupancy of the land for a period of 5 years" applies to all applicants under the Alaska Native Allotment Act, regardless of where the land is situated.

Medina Flynn, 23 IBLA 288 (Jan. 12, 1976)

A selection filed by the State of Alaska segregates the land from all appropriations when the State files its application to select. A Native allotment application is properly rejected where applicant fails to show substantial use and occupancy of the land prior to the filing of a State selection application independently for himself or as the head of a family, and not as a minor child occupying or using the land in company with his parents or ancestors.

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

The burden to present clear and credible evidence to establish entitlement to a Native allotment is upon the applicant.

Daniel Johansen, 23 IBLA 292 (Jan. 12, 1976)

The requirement of use and occupancy by an applicant under the Alaska Native Allotment Act contemplates possession at least potentially to the exclusion of all others and not mere intermittent use. The burden to present clear and credible evidence to establish entitlement is upon the applicant.

An applicant for a Native allotment does not have a right to a formal hearing before an administrative law judge. Hearings may be held in the discretion of the Secretary of the Interior and will not be held where it is unlikely that further evidence will result in a different conclusion.

John C. Knutsen, 23 IBLA 296 (Jan. 12, 1976)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from rejection of a Native allotment satisfactory to it why the evidence was not submitted to the Bureau of Land Management within the 60-day period afforded the applicant to submit a further evidence in support of his application. General, rather than specific, allegations of difficulties in travel and communicating in Alaska are not satisfactory showings of the reason for late filing of such evidence.

A field examination of a land claimed for a Native allotment is not sufficiently thorough where the field examiner reveals in his report that only a portion of the parcel was actually examined for evidence of use and occupancy.

Linda L. Walker, 23 IBLA 299 (Jan. 14, 1976)

An allotment right is personal to one who has fully complied with the law and regulations. Substantially continuous use and occupancy by the Native himself, as an independent citizen or head of a family, is required, and such use must be at least potentially exclusive of others. A minor may initiate such use and occupancy, but use and occupancy by a dependent accompanied by his parents does not qualify. An applicant may not tack on use and occupancy of the land by his ancestors.

To be entitled to an Alaska Native allotment there must be 5 years of substantially continuous use and occupancy, whether or not the land is part of the national forest system or part of the unreserved public domain.

Secretarial Guideline of Oct. 18, 1973, established that an applicant for an Alaska Native allotment must have completed a 5-year period of substantially continuous use and occupancy prior to withdrawal of the land. This guideline is not subject to the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970).

A request for an evidentiary hearing will be denied where there is no dispute involving a material fact, and there is no chance of development of further material facts which would require a different decision.

Stanley E. McCormick, 23 IBLA 304 (Jan. 16, 1976)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Land patented to the State of Alaska pursuant to the Act of Jan. 21, 1929, 45 Stat. 1091, is no longer in Federal ownership and is not available for an Alaska Native allotment.

A BLM State Office decision rejecting an Alaska Native allotment application will be affirmed when the applicant has failed to submit satisfactory proof of substantially continuous use and occupancy of any land.

Mary A. A. Aspinwall, 23 IBLA 309 (Jan. 16, 1976)

An allotment right is personal to one who has fully complied with the law and the regulations. An applicant for a Native allotment on land withdrawn from appropriation and reserved for lighthouse purposes by Executive Order, subject to valid existing rights, must have completed the 5-year period of substantially continuous use and occupancy prior to the withdrawal in order to be eligible for an allotment.

The substantial use and occupancy required by the Native Allotment Act must be achieved by the Native as an independent citizen for himself (or as head of a family) and not as a minor, dependent child occupying or using the land in the company of his parents.

An evidentiary hearing is not required where a decision is based upon the facts as stated by the applicant, there is no dispute as to any material fact, and the sole question presented is a legal issue.

Rachael Topsekok, 23 IBLA 314 (Jan. 16, 1976)

Under the Alaska Native Allotment Act, no rights are acquired by an applicant who asserted commencement of settlement on land when it was included in a grazing lease issued under the Alaska Grazing Act of 1927, because the land was segregated from adverse appropriation.

Christine Von Scheele, 23 IBLA 346 (Jan. 21, 1976)

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 et seq. Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to schedule a hearing at which the applicant may produce evidence to establish entitlement to his allotment.

Donald Peters, 26 IBLA 235 (Aug. 17, 1976) 83 I.D. 308

Where an Alaskan Native alleges that the land described in her Native Allotment Certificate is not the land she settled on and posted, her application for an amendment of the certificate will not be rejected solely because the certificate description is consistent with her application if she offers a reasonable explanation for the mistake and has actually occupied the land she seeks to have included in her certificate.

Edith Jacquot, 27 IBLA 231 (Oct. 12, 1976)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

Where an application for an allotment by an Alaskan Native includes land in a State of Alaska selection application that has been tentatively approved to the State, and where the Native alleges occupancy and use from a date prior to the filing of the State selection, the allotment application may be granted, if the facts alleged are ultimately proved and the application is regular in all other respects.

Where the State of Alaska has applied to select certain land and has been given tentative approval of that selection, and thereafter a conflicting Native allotment application is filed which is supported only by meager evidence of use and occupancy, it is error to allow the the allotment application and to cancel the State's tentative approval and reject the selection application without notice and an opportunity for a hearing in which the State may participate.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

Where a petition for reconsideration of a previous Board decision applying departmental contest procedures to Alaska Native allotment applications fails to show that the original decision was erroneous in any matter, the original decision will be sustained.

Donald Peters (On Reconsideration), 28 IBLA 153 (Nov. 23, 1976) 83 I.D. 564

The filing of an option form by an Alaska Native to receive his "primary place of residence" pursuant to sec. 14(h)(5) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1613(h)(5) (Supp. III, 1973), does not terminate a prior allotment application filed under the Native Allotment Act, 43 U.S.C. § 270-1 (1970). Allowance of an application under either act renders the applicant ineligible for allowance of the other application.

Dwight Tevuk (Deceased) (On Reconsideration), 29 IBLA 160 (Mar. 9, 1977)

An allotment application must be rejected where the Native has not completed a 5-year period of substantial use and occupancy prior to the withdrawal of the land. The substantial use and occupancy required must be achieved by the Native as an independent citizen for himself (or as head of a family), at least potentially exclusive of others, and not as a minor, dependent child occupying or using the land in the company of his parents or ancestors.

An allotment right is personal to one who has fully complied with the law and the regulations and an applicant for a Native allotment may not tack on ancestral use and occupancy of the land to establish the right.

A request for a hearing on a Native allotment application will be denied where an evidentiary hearing is not necessary because there are no facts in dispute and the sole question is a legal issue.

Mable Melovedoff, 29 IBLA 250 (Mar. 25, 1977)

An Alaska Native allotment applicant may not use the occupancy of public land by forebears to qualify herself for an allotment, nor does the use and occupancy of public land by a forebear, while the land was open to settlement, create any right that excepts the land

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

from a withdrawal in favor of an applicant who initiated independent use and occupancy subsequent to the withdrawal.

Whether or not a lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), was properly issued, the land in such a lease is segregated from settlement, location or entry, including the acquisition of rights under the Alaska Native Allotment Act, 43 U.S.C. § 270-1 *et seq.* (1970), until the lease is canceled of record *pro tanto*.

Myrtle M. Jensen Shanigan, 29 IBLA 255 (Mar. 25, 1977)

Where an Alaska Native has timely filed an allotment application pursuant to the Act of May 17, 1906 (34 Stat. 197, *as amended*), asserting that his use and occupancy of the land was initiated prior to the withdrawal imposed on Jan. 17, 1969, by PLO 4582, neither the imposition of that withdrawal nor the subsequent repeal of the 1906 Act will interdict his continuing lawful occupancy or preclude him from thereafter completing the required 5 years of substantially continuous use and occupancy.

Warner Bergman (On Reconsideration), 31 IBLA 21 (June 20, 1977)

Issuance of a certificate of allotment vests full title to the parcel concerned in the allottee, notwithstanding the fact that the Department retains the right to approve a subsequent sale of the parcel by the allottee.

State of Alaska, 35 IBLA 140 (May 22, 1978)

Where the State of Alaska has shown an interest in land in its existing airport, it may bring a private contest to challenge Native allotment applications for land in conflict with the airport.

State of Alaska, 40 IBLA 79 (Mar. 22, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

Alaska Natives who allege substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to the Act of May 17, 1906, *as amended*, 43 U.S.C. §§ 270-1 to 270-3 (1970), and the regulations at 43 CFR Subpart 2561 are entitled to notice and an opportunity for a hearing prior to rejection of their application. Such notice shall specify the reasons for the proposed rejection. Claimant shall have an opportunity to present evidence and testimony of favorable witnesses at a hearing before the trier of fact prior to a decision.

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq.* Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to schedule a hearing, at which the applicant may produce evidence to establish entitlement to his allotment.

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

When an Alaska Native allotment applicant alleges that there has been substantial use and occupancy of vacant, unappropriated, and unreserved public land in Alaska for a period of at least 5 years pursuant to 43 U.S.C. §§ 270-1 to 270-3 (1970) and 43 CFR Subpart 2561, and the Bureau of Land Management determines the application should be rejected because the land was not so used and occupied, the Native is entitled under contest procedures, 43 CFR 4.451, to notice and an opportunity for a hearing prior to rejection of his application.

Mary Bobby, 41 IBLA 44 (May 29, 1979)

Rika Murphy, Gene H. Smagge, 42 IBLA 51 (July 31, 1979)

The substantial use and occupancy required by the Native Allotment Act must be achieved by the Native as an independent citizen for himself (or as head of a family) and not as a minor, dependent child occupying or using the land in the company of his parents. This does not mean that a minor may not establish qualifying use or occupancy--the issue is the nature of the use and occupancy. It must be achieved by an independent citizen in his own right and it must be at least potentially exclusive of others.

Where an applicant for an Alaska Native allotment was a minor at the time she alleges the initial use and occupancy of the land, but not so young as to preclude any possibility that she was then capable of doing so as an independent citizen in her own right to the potential exclusion of others, prior to rejection of her application on the basis of her youth BLM should provide notice and an opportunity for hearing.

Nellie Boswell Beecroft, 41 IBLA 70 (May 31, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before the trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject an application for an allotment.

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq.*

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the case involves the propriety of proofs submitted by the Bureau of Indian Affairs in behalf of a deceased Native allotment applicant, that issue may be resolved.

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

Where the Bureau of Land Management (BLM) determines that an Alaska Native allotment application should be rejected in part because the Native did not use all of the land applied for, the BLM shall initiate a contest proceeding pursuant to 43 CFR 4.451 et seq.

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Hulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

Native occupancy and use commenced at a time when land is withdrawn from settlement, location, sale, or entry provides no basis for a Native allotment. Withdrawal of the land in 1940 by Exec. Order No. 8344, inclusion of the land in a grazing lease and homesite, and the subsequent selection of the land by the State of Alaska in 1966 have effectively kept the land closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1940 to Dec. 18, 1971, when the Act was repealed by the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, as amended, 43 U.S.C. §§ 316, 316a-316o (1976).

Milton H. Pagano, 41 IBLA 214 (June 27, 1979)

Native use and occupancy commenced at a time when land is otherwise appropriated and segregated from such use and occupancy provides no basis for a claim under the Act of May 17, 1906. Inclusion of the subject lands in 1932 in a grazing lease, withdrawal of the lands in 1940, selection of the lands in 1967 by the State of Alaska, and subsequent withdrawals in 1973 pursuant to the Alaska Native Claims Settlement Act have effectively kept the lands closed to the initiation of rights

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

under the Act of May 17, 1906, at all times during the period from 1932 to Dec. 18, 1971, when the Act was repealed by sec. 18 of the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, as amended, 43 U.S.C. §§ 316, 316a-316o (1976).

Magnel E. Drabek, 41 IBLA 219 (June 27, 1979)

The Alaska Native Allotment Act authorizes a nonalienable, nontransferable, and noninheritable right of selection which terminates upon death. Only when an allotment selection has been made by the filing of an acceptable application for public land open to such application and the applicant had used and occupied the land for not less than 5 years in his lifetime is the preference right to an allotment earned and an inheritable right established. A Native who applies for withdrawn lands must show that he himself complied with the law prior to the date of withdrawal. No Native may avail himself of any period of use and occupancy by his ancestors to establish a right to an allotment. Where a Native was born after lands were withdrawn, the application must be rejected.

Arthur R. Martin et al., 41 IBLA 224 (June 27, 1979)

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

An allotment right is personal to one who has complied with the laws and regulations. An applicant for a Native allotment may not rely or tack on use and occupancy of the land by his ancestors to establish his right.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

A grazing lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 et seq. (1970), appropriates the lands and segregates them from the public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from the lease.

The substantial use and occupancy as required by the Native Allotment Act must be by the Native independently for himself or as head of a family prior to the effective date of withdrawal, and he may not tack on use and occupancy by his parents or ancestors to establish a right for himself prior to the withdrawal.

Herman Anderson, Jr., Nicholas Pestrikoff, Anthony Drabek, 41 IBLA 296 (June 29, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

Under the "functional" standard to determine administrative standing set forth in Koniag, Inc. v. Andrus, 580 F.2d 601 (D.C. Cir. 1978), cert. denied, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska selection applications should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The substantial use and occupancy as required by the Native Allotment Act must be by the Native himself prior to the effective date of withdrawal, and he may not tack on use and occupancy by his parents or ancestors to establish a right for himself prior to the withdrawal.

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Norman Opheim, Billy Boskofsky, Jr. (As Heir of Nicholas Boskofsky), 41 IBLA 338 (July 11, 1979)

Where an applicant for a Native allotment alleges use and occupancy of lands which had previously been withdrawn in accordance with sec. 24, Federal Water Power Act of June 10, 1920, an application is properly denied despite the fact that a public land order designating the area a powersite classification is issued subsequent to the applicant's commencement of use and occupancy. Lands included in an application for powersite development under the Act shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

A request for a hearing on a Native allotment application will be denied where there are no facts in dispute and the sole question is a legal issue.

Lindberg Alexander, 41 IBLA 382 (July 23, 1979)

The State of Alaska has a sufficient interest in land by virtue of its applications for an airport conveyance or by its selection application to have standing to initiate private contests against conflicting Native allotment applications.

State of Alaska applications for prior-filed airport conveyances of land needed for an existing airport should not be rejected because of conflicts with Native allotment applications which are to be approved without first affording the State notice of such action to be taken and an opportunity to contest the conflicting claims if it desires.

State of Alaska, 42 IBLA 1 (July 25, 1979)

The substantial use and occupancy required under the Native Allotment Act must be achieved by the Native himself as an independent citizen (or family head) and such use must be at least potentially exclusive of others. Although a minor may initiate such use and occupancy, use and occupancy by a dependent accompanied by his parents does not qualify.

Where a Native allotment application has been rejected, based on the guidelines of Oct. 18, 1973, on the basis that the applicant had not demonstrated 5 years use and occupancy of the land prior to the withdrawal affecting the land, and that requirement is abolished by Secretarial Order No. 3040, of May 25, 1979, the decision will be set aside and the case remanded for action.

Bella Nova, 42 IBLA 59 (Aug. 2, 1979)

Withdrawn lands are not open to appropriation under the Native Allotment Act. Appellant's settlement upon a tract of land withdrawn from entry is a trespass, and such settlement does not provide a basis for any claim to the land.

Publication in the Federal Register of PLO No. 3422 withdrawing certain lands in Alaska from all forms of appropriation under the public land laws, except leasing under the mineral leasing laws, gives valid notice of its contents.

Elizabeth J. Martini, 42 IBLA 82 (Aug. 13, 1979)

Where BLM fails to show that there was service of a decision rejecting an Alaska Native allotment and the applicant learns of his rejection 4-1/2 years after rejection, the applicant may file a timely appeal within 30 days of notice of the decision.

Mailing to the Bureau of Indian Affairs a carbon copy of a decision rejecting an application for an Alaska Native allotment is not service upon the applicant so as to comply with 43 CFR 4.401.

Gust J. Seft, Sr., 42 IBLA 86 (Aug. 13, 1979)

The relaxed procedural rules relating to the filing of statements of reasons for appeal in Native allotment cases enunciated in the letter of Sept. 24, 1975, and extended in the order of Nov. 26, 1976, IBLA 76-715, are hereby revoked. All future requests for extensions of time must comport with the regulations found at 43 CFR 4.22(f)(2).

Where, in a decision holding a Native allotment for approval and a State selection for rejection to the extent of a conflict, the Bureau of Land Management grants the State 30 days to initiate a private contest challenging the Native allotment, the 30-day appeal period will commence upon expiration of the 30 days accorded the State for initiation of a private contest and not with receipt of the decision.

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

Where it appears that a party did not realize that an election of remedies was mandated by Departmental procedures, a decision requiring the initiation of a private contest will be set aside, and the party will be permitted a period of time in which to initiate a private contest, or alternatively, waive such private contest and pursue a direct appeal on the question of whether a Government contest should issue.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

An allotment right is personal to one who has fully complied with the law and regulations and an applicant for a Native allotment may not tack on ancestral use and occupancy of the land to establish his right thereto. Ancestral use of the land while open to settlement does not create any right that excepts the land from a withdrawal in favor of an applicant who may have initiated use and occupancy subsequent to the withdrawal.

Sam Hanlon, Sr., 42 IBLA 161 (Aug. 17, 1979)

Where issues of material fact are in dispute, due process requires that, before a decision is reached to reject an application for an allotment, the applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted.

The nonuse of land within a Native allotment application for a period of time is relevant to the issues of abandonment of the claim, and whether there have been substantially continuous use and occupancy as required by the law. Such nonuse or highly limited and intermittent use also affords a basis for rejecting an application in the exercise of the Secretary's discretion where such nonuse or highly limited and intermittent use demonstrates the land is not needed by the Native and that the purpose of the Native Allotment Act to secure land

actually used and occupied by the Native for his/her needs has not been met.

A hearing will be afforded to a Native allotment applicant to show his/her entitlement to a Native allotment in view of court decisions requiring hearings on Native allotment applications. Where the applicant requests a hearing and alleges there are factual disputes concerning abandonment and nonuse of the claim, although the showings on the application show nonuse of the land for a lengthy period of time sufficient ordinarily to constitute a prima facie case for rejection of the application, a hearing is nevertheless mandated.

Mildred Sparks, 42 IBLA 155 (Aug. 19, 1979)

Selection of the land by the State of Alaska under authority of the Statehood Act in 1962, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1962 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

James Sims, 42 IBLA 231 (Aug. 22, 1979)

Lands included in an application for powersite development under the Federal Power Act of June 10, 1920, 16 U.S.C. § 818 (1976), shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

Where an applicant for a Native allotment alleges for the first time on appeal his use and occupancy of lands prior to their withdrawal, a decision rejecting the Native's application shall be vacated and the case remanded to BLM for its consideration of appellant's new evidence.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

A selection filed by the State of Alaska is subject to prior valid existing rights of Natives, irrespective of whether the State selection was filed pursuant to the Alaska Mental Health Enabling Act or the Statehood Act.

State of Alaska v. Mattie D. Barton, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979) 86 I.D. 441

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before the trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject an application for an allotment.

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

A decision rejecting a Native allotment application because there was not 5 years of use and occupancy of the land prior to a withdrawal affecting the land, will be set aside and the case remanded to the Bureau of Land Management for readjudication in accordance with Secretarial Order No. 3040 of May 25, 1979, which rescinds a former guideline requiring the 5 years prior to the withdrawal and now permits allotment after 5 years' use and occupancy has been completed provided the applicant had either filed an application or commenced use and occupancy prior to a withdrawal.

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

The Department of the Interior is only authorized to approve Native allotment applications which were pending before the Department on Dec. 18, 1971. If an applicant provides satisfactory evidence that he had delivered his application before that time to the agency office of the Bureau of Indian Affairs which held it past the time when it should have been filed with the Bureau of Land Management, the application may be adjudicated as having been timely filed.

William Yurioff, Gust K. Wahl, Charlie Chocknok, Olia Oyaluk, 43 IBLA 14 (Sept. 11, 1979)

An allotment right is personal to one who has complied with the laws and regulations. An applicant for a Native allotment may not rely on or tack on use and occupancy of the land by his ancestors to establish his right.

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Public Land Order No. 2213 of Dec. 8, 1960, establishing the Kuskokwim National Wildlife Range withdrew certain lands from all forms of appropriation under the public land laws, and although such order preserved to Natives the right to hunt, fish, and trap thereon, the lands were no longer subject to initiation of rights under the Native Allotment Act once the order became effective.

Peter Pangruk, 43 IBLA 69 (Sept. 19, 1979)

The Alaska Native Claims Settlement Act, 43 U.S.C. § 1617 (1976), repealed the Act of May 17, 1906, *as amended*, 43 U.S.C. §§ 270-1 to 270-3 (1970), with the exception of applications pending on Dec. 18, 1971. A State Office decision rejecting a Native allotment application for an additional parcel of land filed pursuant to the Act of May 17, 1906, after Dec. 18, 1971, will be affirmed. Equitable adjudication, which requires substantial compliance with the law, will not

be invoked where there is no evidence that such an application was timely filed with BIA.

Nora L. Sanford, 43 IBLA 74 (Sept. 19, 1979)

The substantial use and occupancy as required by the Native Allotment Act must be by the Native herself prior to the effective date of withdrawal, and she may not tack on use and occupancy by her parents or ancestors to establish a right for herself prior to the withdrawal.

A recreation and public purposes classification, issued pursuant to the Recreation Act of 1926, *as amended*, 43 U.S.C. § 869 (1976), segregates Alaskan lands from Native allotment applications until such time as the classification is revoked.

A request for a hearing on a Native allotment application will be denied where no factual dispute exists and all issues are legal ones.

Under Secretarial Order No. 3040, it is sufficient if the 5 years' use and occupancy, required under the Native Allotment Act, is completed prior to the granting of the allotment, providing applicant either filed for his allotment or commenced use and occupancy prior to the withdrawal.

Betty J. Thompson, 43 IBLA 174 (Sept. 28, 1979)

Where an application to acquire Federal land is rejected by BLM for the reason that the applicant's own declaration of material facts stated in his application demonstrate conclusively that he is not entitled to the land as a matter of law, an effort on appeal to revise, amend, or deny the facts will not be considered absent a persuasive explanation of error in the application.

Where the State of Alaska has filed an application to select certain land 2 years prior to the date when an applicant for a Native allotment declares that he first began his use and occupancy of that land, the segregative effect of the State selection will preclude allowance of the Native allotment as a matter of law.

The substantial use and occupancy required by the Native Allotment Act must be achieved by the Native as an independent citizen acting for himself, and not as a dependent child visiting and using the land in the company of his parents. Where the allotment applicant admits that this was his only presence on the land prior to its segregation from the operation of public land laws, the allotment application is properly rejected.

Where an Alaska Native allotment application is pending in the Department on the date of repeal of the Allotment Act, an attempt to subsequently amend the application to encompass different or additional land will not be considered as timely filed, and will be rejected as a new application barred by statute, unless it can be shown that there was an error in the original description resulting from the inability to properly identify the site on the protraction diagram.

The segregative effect of a State of Alaska selection application is operative on the land for which the State has applied from the date of filing, and remains in effect until the State's application is finally disposed, during which time no new rights may be initiated. The ultimate disallowance of the State's application will neither negate the segregative effect of its filing on the land, nor validate *nunc pro tunc* any claim initiated during the period when the land was so segregated.

Although the equitable interest of any applicant who has perfected his claim to an allotment may pass by inheritance, the substantial use and occupancy required under the Allotment Act must be achieved by the applicant himself as an independent citizen, and he may not tack the use and occupancy of his ancestors to his own use, or rely on aboriginal rights to establish his personal qualification to receive an allotment.

Where, even if all of the allegations of material fact made by an applicant for a Native allotment are accepted as true, allowance of the application is barred as a matter of law, the rule of Pence v. Kleppe, 529 F.2d 135 (9th Cir. 1976), is not applicable, and the application is properly rejected without a hearing.

Andrew Petla, 43 IBLA 186 (Oct. 5, 1979)

Settlement upon a tract of land withdrawn from entry is a trespass and provides no basis for any claim to the land under the Alaska Native Allotment Act of May 17, 1906, 34 Stat. 197. Any subsequent revocation or modification of the withdrawal and the restoration of the land to entry will not validate an application for a Native allotment. An application for land withdrawn from entry is nugatory and cannot be given life, even by restoration of land during the pendency of an appeal from its rejection.

Although this Department recognizes a fiduciary relationship of the United States to Alaska Natives, this relationship does not authorize the Secretary to ignore the terms of 43 U.S.C. § 270-1 (1970) limiting Native allotments to those lands which are "vacant, unappropriated, and unreserved."

The preference right authorized by the Alaska Native Allotment Act is a personal one and does not survive the death of the applicant unless the applicant has complied with the law and regulations as to a specific parcel of land available for allotment.

Paul D. Tony, 43 IBLA 245 (Oct. 10, 1979)

The regulations in 43 CFR 2627.4(b) provide that lands applied for by the State of Alaska will be segregated from all appropriations when the State files its application to select. A State selection will not extinguish valid prior existing rights. When Alaskan Natives can prove prior qualifying use and occupancy of selected lands, tentative approvals by the Secretary of the Interior of State land selections must be canceled.

The right to seek an allotment is personal to one who has fully complied with the law and the regulations. An applicant for a Native allotment may not tack on use and occupancy of the land by his ancestors to establish his qualification. Claims based upon "aboriginal rights," or upon use and occupancy by ancestors, are simply not qualified.

The substantial use and occupancy required by the Native Allotment Act must be achieved by the Native as an independent citizen for himself (or as head of a family) and not as a minor, dependent child occupying or using the land in the company of his parents. This does not mean that a minor may not establish qualifying use or occupancy--the issue is the nature of the use and occupancy. It must be achieved by an independent citizen in his own right and it must be at least potentially exclusive.

Generally where BLM determines that an Alaska Native allotment application should be rejected because the use of the land by a minor child was not sufficiently established as an independent citizen in his own right, at least potentially exclusive of others, BLM shall issue a contest complaint pursuant to 43 CFR 4.451 et seq., and the guidelines set forth in Donald Peters, 26 IBLA 235, 83 I.D. 308 (1976).

Sarah A. Pence et al., 43 IBLA 266 (Oct. 15, 1979)

An allotment may be granted only when the Native applicant demonstrates actual substantial use and occupancy of the land, at least potentially exclusive of others, and not merely intermittent use. The Bureau of Land Management is the proper agency for determining whether the applicant has satisfactorily proven his or her use and occupancy.

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before the trier of fact where evidence and testimony of favorable witnesses may be submitted before a decision is reached to reject an application for an allotment.

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 et seq.

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

The filing of an acceptable application for a Native allotment segregates the lands designated in the application. The Bureau of Land Management properly rejects subsequent conflicting applications for such lands.

Where legal conclusions are reached upon undisputed facts and there has been no proffer of further facts which could compel different legal conclusions, an allotment application may be rejected as a matter of law subject to the right to appeal to this Board. Hearings under the rule enunciated in Pence v. Kleppe, 529 F.2d 135 (9th Cir. 1976), are required only where there is a factual dispute.

Sec. 18(a) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1617 (1976), repealed the Native Allotment Act of 1906, as amended, 43 U.S.C. §§ 270-1 to 270-3 (1970), except as to applications pending on the date of enactment, Dec. 18, 1971. Accordingly, the Board of Land Appeals has no authority to now permit the selection of lands for allotment.

Norma B. Richards, 43 IBLA 288 (Oct. 17, 1979)

An application pending on Dec. 18, 1971, which is amended after this date to embrace different lands not described in the original application in order to avoid conflicts with earlier claims must be rejected as untimely.

A Native allotment applicant, who was 5 years old at the time when the land was withdrawn from all forms of appropriation, is properly deemed to be incapable as a matter of law of having exerted independent use and occupancy of the land to the exclusion of others prior to the withdrawal and consequently the allotment application is properly rejected.

Ricky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

Where issues of material fact are in dispute, due process requires that an applicant for a Native allotment be notified of the specific reasons for the proposed rejection, allowed to submit written evidence to the contrary, and granted an opportunity for an oral hearing before a trier of fact where evidence and testimony of favorable witnesses may be submitted before a

ALASKA--Continued

NATIVE ALLOTMENTS--Continued

decision is reached to reject the application for allotment.

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukapigak, 44 IBLA 313 (Dec. 31, 1979)

NAVIGABLE WATERS

Generally

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Hulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

Impediments to Navigation

Physical impediments to navigation, such as gravel bars, riffles, or occasional log jams, do not, in themselves, make a water body nonnavigable.

The presence of physical impediments on a water body will not result in a finding of nonnavigability when the record shows that the water body has been used and is capable of use as a highway of commerce.

Appeal of Doyon, Ltd., 4 ANCAB 50 (Dec. 14, 1979)
86 I.D. 692

Use of Waterway

Where conditions of exploration and settlement explain the infrequency or limited nature of actual use of a water body for commercial purposes, evidence of private use may be considered to demonstrate susceptibility of commercial use for purposes of determining navigability.

Historic use of a water body by trappers may be properly considered in determining whether a water body has been used or is susceptible of use as a highway of commerce for purposes of navigability.

Where pole boats, tunnel boats, and outboard river boats constituted the customary modes of trade and travel on a river and its tributaries, the use of these watercraft may be appropriately considered in determining whether rivers in the area were used or are susceptible of being used as highways of commerce.

While recreational use, of itself, may not suffice to meet the susceptibility test for purposes of navigation for title, present use for recreation purposes may be properly considered, as a corroborating factor, in determining susceptibility for use as a highway of commerce.

To be navigable, a river must be so situated and have such length and capacity as will enable it to accommodate the public generally as a means of transportation.

When the record shows that, historically, trapping was the primary reason for trade and travel in an area, and where the water body in question was commonly utilized by trappers as a route of trade and travel in boats of

ALASKA--Continued

NAVIGABLE WATERS--Continued

Use of Waterway--Continued

the period customarily used to freight supplies, such use will result in a finding that the water body has been used and is susceptible for use as a highway of commerce.

The presence of physical impediments on a water body will not result in a finding of nonnavigability when the record shows that the water body has been used and is capable of use as a highway of commerce.

The legal concept of navigability embraces both public and private interests. It is not to be determined by a formula which fits every type of stream under all circumstances and at all times.

Appeal of Doyon, Ltd., 4 ANCAB 50 (Dec. 14, 1979)
86 I.D. 692

OIL AND GAS LEASES

Sec. 6(b) of the Alaska Statehood Act providing for recognition of valid existing claims does not apply to an oil and gas lease offer filed pursuant to the Mineral Leasing Act of 1920. While an oil and gas lease offeror may have a right to a lease where the Department has exercised its discretion to issue a lease, and the offeror is entitled to a statutory priority right over other offerors, his application does not rise to the level of a "claim" or "right" within the savings clause of the Alaska Statehood Act where there has been no such determination to lease.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

POSSESSORY RIGHTS

Settlement on a homestead claim in Alaska 2 days prior to a withdrawal of the land does not except the land from the withdrawal where the claimant failed to file his notice of location within 90 days after settlement as required by the Act of Apr. 29, 1950, 64 Stat. 94, 43 U.S.C. §§ 270, 270-5, 270-6 (1970), and his notice is properly held to be unacceptable for recordation.

Gary Lee Slay, 18 IBLA 345 (Jan. 14, 1975)

A claimant's occupancy of a headquarters site prior to a withdrawal does not establish a "valid existing right" excepted by the withdrawal where credit for his occupancy prior to the withdrawal cannot be given under the Act of Apr. 29, 1950, because the claimant initiated his occupancy more than 90 days prior to the filing of his notice and did not file a notice of location or purchase application prior to the withdrawal.

Rene P. Lamoureux, 20 IBLA 243 (May 16, 1975)

A claimant's occupancy of a homesite prior to a withdrawal does not establish a "valid existing right," excepted by the withdrawal, under the Act of Apr. 29, 1950, where claimant did not file his notice of location within 90 days after occupancy, nor did he file a notice of location or purchase application prior to the withdrawal.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

There can be no "valid existing right" in a claimant of a headquarters site on land withdrawn by Public Land Order No. 4582 unless a notice of location or application to purchase had been filed in accordance with the Act of Apr. 29, 1950. The filing of an application for a survey of omitted land did not by itself create any preference rights to the land.

Notices of location for headquarters sites must be accepted for filing by the authorized Bureau of Land Management office if the land has been subject to location during the preceding 90 days. The fact that land had been omitted from the original survey is not a valid reason for the Bureau of Land Management to refuse to record a properly filed notice of location for a headquarters site.

An application to purchase a headquarters site is subject to rejection if it is filed after the 5-year period from the filing of a notice of location of the claim, or, if no notice had been filed, it was filed more than 90 days after the land has been withdrawn.

Ray W. Ferguson, 22 IBLA 160 (Sept. 30, 1975)

Where the claimant of a headquarters site filed his notice of location, occupied the land, and began making improvements thereon prior to the segregation of the land by a withdrawal made subject to valid existing rights, it is error for the Bureau of Land Management to refuse to record the claimant's notice of location, or to cancel the claim without notice and an opportunity for hearing.

Donald J. Thomas, 22 IBLA 210 (Oct. 15, 1975)

Location of a homesite claim without substantial use or occupancy of the land in compliance with the law creates no property interest in the land. Where the claimant under sec. 10 of the Act of May 14, 1898, as amended, 43 U.S.C. § 687(a) (1970), has merely marked the boundaries of the claim prior to a withdrawal of the land, such activity does not constitute occupation or possession of the land and the claim will be defeated by that withdrawal.

A notice of location for a homesite which alleges only acts of occupancy and improvement insufficient to create any interest in the land is properly denied recordation.

Edward P. Dooley, 22 IBLA 338 (Nov. 14, 1975)

A decree of foreclosure by a United States District Court, which upholds the validity of a deed of trust executed on a trade and manufacturing site, is not subject to collateral attack in the Department of the Interior. Where the applicant to purchase the site has thus been deprived of any interest in the improvements and the site, he is no longer entitled to purchase the site.

Greater Alaska Development Corp., 23 IBLA 179 (Jan. 5, 1976)

The filing of a notice of location for a homesite will not prevent a withdrawal from attaching to the land if, prior to the effective date of the withdrawal, the locator of the homesite fails to perform the requisite acts of use, occupancy and development necessary to establish a valid existing right excepted from a withdrawal.

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and alleges that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the Bureau of Land Management to hold that the location notice was unacceptable for recordation, and the claim may only be canceled following notice to the claimant and an opportunity to demonstrate the establishment of a valid existing homesite claim prior to the withdrawal.

Steven F. Heine, 24 IBLA 23 (Feb. 11, 1976)

A trade and manufacturing site notice of location not supported by actual settlement and occupancy authorized by 43 U.S.C. § 687a (1976) does not change the status of the public lands.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

James Sims, 42 IBLA 231 (Aug. 22, 1979)

Where the claimant of a homesite filed his notice of location prior to the segregation of the land by a withdrawal made subject to valid existing rights, and he alleges, and the field reports so indicate, that he initiated the development of improvements sufficient to establish a valid existing right prior to the withdrawal, it is error for the State Office to hold that the withdrawal terminated the claimant's rights.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

An Alaska Native Townsite lot applicant is not precluded from settling on and improving a townsite lot until the date of approval of final subdivisional survey except by prior adverse settlement and occupancy; a city does not initiate such an adverse claim by posting lots with "city property" signs without otherwise using or improving the lots.

Ruth E. Sandvik, 26 IBLA 97 (July 19, 1976)

An allotment right is personal to one who has fully complied with the law and regulations and an applicant for a Native allotment may not tack on ancestral use and occupancy of the land to establish his right thereto. Ancestral use of the land while open to settlement does not create any right that excepts the land from a withdrawal in favor of an applicant who may have initiated use and occupancy subsequent to the withdrawal.

Sam Hanlon, Sr., 42 IBLA 161 (Aug. 17, 1979)

STATEHOOD ACT

Sec. 6(k) of the Alaska Statehood Act does not require that patents issued to the State include a proviso that the conveyed lands are vacant, unappropriated, and unreserved, and do not affect any valid existing claim, location or entry under the laws of the United States. The Department assures compliance with this provision by excluding from selection all lands noted on its records as being appropriated and reserved, or subject to valid existing interests, and by requiring that adequate notice be given to all other persons claiming an interest in the selected land. The Department can then receive objections to the issuance of a patent and can render a determination as to the availability of the selected lands.

Sec. 6(i) of the Alaska Statehood Act provides that grants of mineral lands to the State are made upon the condition that all subsequent State conveyances of the mineral lands shall be subject to and contain a reservation to the State of all the minerals in the lands so conveyed. The Act does not require that Federal patents to the State include a proviso to the above effect, rather, it is subsequent State coneyances which must contain a reservation for minerals.

Sec. 6(b) of the Alaska Statehood Act providing for recognition of valid existing claims does not apply to an oil and gas lease offer filed pursuant to the Mineral Leasing Act of 1920. While an oil and gas lease offeror may have a right to a lease where the Department has exercised its discretion to issue a lease, and the offeror is entitled to a statutory priority right over other offerors, his application does not rise to the level of a "claim" or "right" within the savings clause of the Alaska Statehood Act where there has been no such determination to lease.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

A selection of land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

The inclusion of lands belonging to the United States in a proposed power project pursuant to sec. 24 of the Federal Power Act of 1920, 16 U.S.C. § 818 (1970), has the effect of reserving or withdrawing those lands from entry, location, or other disposal under the public land laws of the United States until otherwise directed by the Federal Power Commission or by Congress and until the withdrawal is revoked by the Secretary of the Interior.

A selection application by the State of Alaska must be rejected with respect to those public lands which are reserved or withdrawn from entry or other form of disposal under the public land laws of the United States and cannot be held open pending a possible future change of the status of the land.

State of Alaska, 20 IBLA 341 (June 11, 1975)

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 while the grazing lease was still extant, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Herman Haakenson, 23 IBLA 58 (Dec. 4, 1975)

A selection application under the Alaska Statehood Act filed in the appropriate Bureau of Land Management office for properly described land segregates the land from all appropriation based upon subsequent application or settlement and location.

A selection application under the Alaska Statehood Act that describes land according to an approved protraction diagram properly describes those lands if the official plat of survey has not been accepted.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

A selection of available land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location. A subsequently filed notice of location for a headquarters site has no effect.

Wilfred S. Wood (On Reconsideration), 25 IBLA 37 (May 6, 1976)

The authority to select lands under the Alaska Mental Health Enabling Act, while confirmed to the State under sec. 6(k) of the Statehood Act, remains separate and distinct from the authority of the State to select lands as provided in secs. 6(a) and (b) of the Statehood Act.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65 (July 1, 1976) 83 I.D. 461

Lands tentatively approved for State selection and conveyed by the State to municipalities or boroughs prior to enactment of ANCSA are not available for Native selection under ANCSA.

Lands tentatively approved for State selection and leased by the State to individuals with an option to buy will, if selected by a Native corporation, be included in the interim conveyance with the provision that the option to buy may be exercised against the Native corporation. Where the option had been exercised against the State and a State patent issued prior to the enactment of ANCSA, the land will be excluded from interim conveyance to the Native corporation.

Third party rights created by the State in lands selected by Natives under ANCSA should be identified by BLM in the decision to issue interim conveyance if possible, but need not be adjudicated.

ANCSA and the implementing regulations draw a basic distinction between valid existing rights leading to the acquisition of title and those of a temporary nature, requiring exclusion of the former from the interim conveyance but inclusion of the latter with provisions protecting the third parties rights for the duration of his interest. The statute and the implementing regulations do not distinguish, in protecting rights leading to the acquisition of title between those arising under Federal law and those arising under State law.

Valid Existing Rights Under the Alaska Native Claims Settlement Act, Sec. Order No. 3016 (Dec. 14, 1977) 85 I.D. 1 (1978)

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Hulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 302

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on

ALASKA--Continued

STATEHOOD ACT--Continued

Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Norman Opheim, Billy Boskofsky, Jr. (As Heir of Nicholas Boskofsky), 41 IBLA 338 (July 11, 1979)

TIDELANDS

Federal title to land may be lost by erosion, and land which has become submerged under water is no longer subject to disposition under the Alaska Native Allotment Act. The fact that an Alaska Native may have used, occupied, and filed an application for such land when it was dry does not prevent the loss of Federal title to that land by erosion. Neither the Alaska Statehood Act nor the Submerged Lands Act prevents the passage of title to such land to the State.

Frank Bullard, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

TOWNSITES

A city organized under Alaska State law has standing to appeal from the rejection of its application for townsite deeds to land within its city limits, and the awarding of deeds to occupants of the townsite lots at the time of final subdivisional survey.

To the extent they do not vitiate the purposes or provisions of the Alaska Native townsite law, the provisions of the non-Native Alaska townsite law are to be applied in the disposition of Native townsite lands; in such cases, references to the Act of Mar. 3, 1891, 43 U.S.C. § 732 (1970), in the documents relating to a Native townsite are not pro forma, and the non-Native townsite provisions may be applied.

The date determinative of the rights of occupants of Alaska Native townsite land is the date of final subdivisional survey, not the date of patent; if, at the date of final subdivisional survey, the lots are occupied by non-Natives as well as Natives, the lots will be disposed of under both the non-Native and Native townsite provisions.

The Alaska townsite trustee's lot awards will not be disturbed when the appellant challenging the awards fails to assert facts that might demonstrate error in the application of the Alaska townsite rules: (1) that, in the absence of conflicting occupants on the same parcel, occupancy of a portion of a lot is occupancy of the whole lot; (2) that occupancy may be established by the initiation of settlement if the intent to possess and improve is clearly evidenced on the ground; and (3) that lots will be awarded to those who occupy or are entitled to occupancy of the lots at issue.

City of Klawock v. P. H. Andrew et al.; City of Klawock v. State of Alaska, Department of Highways, 24 IBLA 85 (Feb. 25, 1976) 83 I.D. 47

An Alaska Native Townsite lot applicant is not precluded from settling on and improving a townsite lot until the date of approval of final subdivisional survey except by prior adverse settlement and occupancy; a city does not initiate such an adverse claim by posting lots with "city property" signs without otherwise using or improving the lots.

Ruth E. Sandvik, 26 IBLA 97 (July 19, 1976)

ALASKA--Continued

TOWNSITES--Continued

To the extent that the provisions of the non-Native townsite law do not vitiate the purposes of provisions of the Alaska Native townsite law, the provisions of the non-Native townsite law are to be applied in the disposition of Native townsite lands.

The person or persons who may be awarded a deed to a lot in a townsite are those individuals who occupied or who were entitled to occupancy of such lot on the date of final subdivisional survey.

Where there are conflicting claimants to lots in a Native townsite and the record does not clearly reflect who occupied or who was entitled to occupancy of the lots on the date of final subdivisional survey, the Board may, on its own motion, order a hearing.

Louie B. Strang, 26 IBLA 144 (Aug. 2, 1976)

To the extent that the provisions of the non-Native townsite law do not vitiate the purposes of provisions of the Alaska Native townsite law, the provisions of the non-Native townsite regulations may be applied in the disposition of Native townsite lands.

The person or persons who may be awarded a deed to a lot in a townsite are those individuals who occupied the lot on the date of final subdivisional survey or were entitled to such occupancy, or their assigns thereafter.

Where there are conflicting claimants to lots in a Native townsite and the record does not clearly reflect who occupied or who was entitled to occupancy of the lots on the date of final subdivisional survey, the matter will be remanded for clarification.

Nancy A. Delkittie, 35 IBLA 370 (June 23, 1978)

Authority to dispose of land within Alaska railroad townsites under 43 U.S.C. § 975b (1970) was repealed by sec. 704(a) of the Federal Land Policy and Management Act of 1976.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

Where there are conflicting applications for a lot in a Native townsite and the evidence as to who has the better claim is vague and inconclusive, the townsite trustee should submit the matter for a hearing before an administrative law judge. 43 CFR 2565.4(b).

James T. Friedman, 39 IBLA 229 (Feb. 12, 1979)

Rights may be established by occupancy of a trade and manufacturing site on vacant, unappropriated public domain in Alaska and filing of a notice of location thereof, despite a prior survey pursuant to a petition for survey of townsite lands, when the notice of location and occupancy of the claim for trade and manufacturing precedes settlement and occupancy under the townsite laws.

Carl A. Ling, 40 IBLA 63 (Mar. 16, 1979)

ALASKA--Continued

TOWNSITES--Continued

Alaska Natives who occupied lots in a Native townsite on date of approval of final subdivisional townsite survey, prior to Oct. 21, 1976, are entitled to receive deeds thereto from the townsite trustee.

Leona B. Strang (Supp.), 43 IBLA 156 (Sept. 28, 1979)

The Alaska townsite laws, 43 U.S.C. §§ 732-736 (1970), were repealed by the Federal Land Policy and Management Act of 1976, sec. 703(a), 90 Stat. 2789, so that no rights under the townsite laws could be derived from occupancy commenced after Oct. 21, 1976.

Stu Mack, 43 IBLA 306 (Oct. 17, 1979)

TRADE AND MANUFACTURING SITES

Under 43 CFR 2091.6-4 and 2562.1(d) a notice of location for a trade and manufacturing site is unacceptable for recordation where the land is not subject to that form of disposition because it has been segregated by State selection applications.

Lloyd Schade, 19 IBLA 251 (Mar. 31, 1975)

One who has qualified for a patent to a trade and manufacturing site may legally take a partner into the business or contract for the sale of the business, and so long as he retains legal title and the sales contract remains executory on the part of the purchaser he is not thereby disqualified from receiving a patent.

Where the claimant of a trade and manufacturing site who has substantially complied with the requirements of law and regulation makes a legitimate contract for the conditional sale of the business to another before filing his application for patent, equitable adjudication will be invoked to prevent an intervening land classification action from operating to destroy the interest of both the claimant and his buyer and defeating the purpose of the Act.

Paul M. Jovick, 19 IBLA 283 (Apr. 7, 1975)

An applicant for a trade and manufacturing site who has sold his entire interest in the claim prior to submitting his purchase application is no longer a qualified applicant under the trade and manufacturing site law. Any rights he may have earlier established terminated at the time he conveyed his interest in the claim.

A transferee of an original locator's possessory interest in a trade and manufacturing site cannot qualify for the site under his transferor's notice to avoid the effect of a withdrawal where the transferee had not filed his own notice or purchase application prior to the withdrawal.

Rights to public land can only be gained by compliance with governing public land laws. Trade and manufacturing site occupancy initiated and continued under a defective notice of location filed in the name of one individual, but alleged to have been filed on behalf of an association of persons, cannot lead to qualification by the association to purchase the site.

Frederick E. Heinz, 20 IBLA 174 (May 7, 1975)

ALASKA--Continued

TRADE AND MANUFACTURING SITES--Continued

Under the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), a notice of location of a trade and manufacturing site filed after withdrawal of the land is acceptable if it is filed within 90 days of settlement and the settlement occurs prior to a withdrawal of the land. An application to purchase based on such an asserted settlement and filing will be rejected when it is not filed within the statutory life of the asserted claim, but the applicant may be afforded an opportunity to submit a justification for his late filing under the principles of equitable adjudication.

Edwin William Seiler (On Reconsideration), 20 IBLA 221 (May 9, 1975)

A locator of a trade and manufacturing location initiates no rights against the United States unless he actually uses and occupies the land for trade and manufacturing purposes. A prospective business site is not within the contemplation of the trade and manufacturing site law; improvements of contiguous land in connection with the development of a prospective trade and manufacturing site create no rights in the locator.

Elden L. Reese, 21 IBLA 251 (Aug. 11, 1975)

Where land within a trade and manufacturing site is withdrawn from appropriation prior to its occupancy and use for purposes of trade or manufacture under 43 U.S.C. § 687a (1970) and 43 CFR Subpart 2562, the invalid claim cannot be perfected.

Allan D. Hodge, 22 IBLA 150 (Sept. 30, 1975)

A decree of foreclosure by a United States District Court, which upholds the validity of a deed of trust executed on a trade and manufacturing site, is not subject to collateral attack in the Department of the Interior. Where the applicant to purchase the site has thus been deprived of any interest in the improvements and the site, he is no longer entitled to purchase the site.

Greater Alaska Development Corp., 23 IBLA 179 (Jan. 5, 1976)

A settlement claim initiated after a State selection application is filed and the land segregated from appropriation creates no rights in the settler.

Any right gained under a notice of location for a trade and manufacturing site or a homesite as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), is personal to the party filing the notice.

A trade and manufacturing site notice of location not supported by actual settlement and occupancy authorized by 43 U.S.C. § 687a (1970) does not change the status of the public lands.

John W. Eastlund et al., 24 IBLA 240 (Mar. 25, 1976)

One who appeals from the rejection of a trade and manufacturing site purchase application and disputes the factual findings and conclusions in the field examiner's report, is not entitled to an opportunity for a hearing on the disputed issues of fact when appellant's assertions of use and improvement, taken as true, do not show use of the land that qualifies her for the right of purchase.

Improvement of land by fencing, and use as horse pasture, constitutes agricultural use which does not qualify as "trade, manufacture, or other productive industry" within the meaning of the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687a (1970), regardless of the type of business in connection with which the pasturage is desired.

Improvement of land by a road, and use of the land for access to a private inholding do not by themselves qualify the locator to purchase the land as a trade and manufacturing site.

Evelyn M. Bunch, 25 IBLA 46 (May 13, 1976)

Where a notice of location is filed for a trade and manufacturing site and such notice is declared unacceptable for recordation because the lands containing the business improvements are tidelands owned by the State of Alaska, the decision must be set aside and the case remanded when the record does not show that there ever was a survey conducted of such lands to determine whether they are, in fact, tidelands owned by the State.

Sandra L. Lough, Damon E. Blackburn, 25 IBLA 96 (June 3, 1976)

Sec. 10 of the Act of May 14, 1898, 30 Stat. 413, 43 U.S.C. § 687a (1970), limits the number of trade and manufacturing sites which any individual or corporation may acquire to one, and actions taken pursuant to advice of Bureau of Land Management employees which consolidate a number of applications into one application, thereby possibly avoiding the proscriptions of sec. 10, do not estop the Government from enforcing the limitation of 80-rods of shoreline on navigable waters to the single application.

B.G.R., Inc., 27 IBLA 27 (Sept. 17, 1976)

A trade and manufacturing site application is properly rejected when there is only a cabin on the site, roads and clearing for a campground and the land has been used intermittently for campsite rentals, only a few people used the campsites during the life of the claim, and any revenues which were derived or could have been derived from use of the site as a campground would not be such as to engender the belief that appellant was engaged in a productive industry or that he hopes to garner a profit from operation of a business.

United States v. Jerry L. Crow, 28 IBLA 345 (Jan. 26, 1977)

A trade and manufacturing site applicant, who alleges that the activities on his trade and manufacturing site were undertaken in conjunction with his primary business which is headquartered at another location, bears the burden of establishing a direct and economic purpose for his trade and manufacturing site in connection with his entire business operation.

A field examination report of a trade and manufacturing site claim is not evidence on which the final action of cancellation may be taken, until such time as the pertinent facts are admitted by the applicant or the report is admitted into evidence at a hearing initiated by a contest complaint.

John H. Coghill, 29 IBLA 177 (Mar. 18, 1977)

An applicant to purchase either a trade and manufacturing site or a headquarters site has the burden of proving that he has complied with the requirements of the law, 43 U.S.C. § 687a (1970). Rejection of such an application is proper where the evidence shows that the tract was used (1) for trapping by the applicant to repay a neighbor for assistance in improving the site, and (2) as a wilderness camp area, and that no substantial revenue was derived from the trapping, and nominal revenues were derived from camping tourists in the park during the life of the claim.

Where an applicant to purchase a trade and manufacturing site or a headquarters site states he was frustrated in completing his improvements and showing sufficient use of the land as required by the law because of more difficult or complex problems than anticipated, but has not shown that this operation could reasonably be expected to be successful, such problems will not afford any basis for equitable adjudication of his application to purchase.

United States v. Ronald D. Tippetts, 29 IBLA 346 (Mar. 31, 1977)

When an applicant for an 80-acre trade and manufacturing site has demonstrated that he has used a substantial portion of that 80-acre parcel for the activity of motorcycle and snow machine testing in connection with his business of motorcycle and snow machine sales located some distance away in Anchorage, Alaska, and that parcel contains substantial improvements made in connection with this testing activity, and he has satisfactorily shown a need for and a direct and necessary economic purpose in furthering his enterprise, the applicant has successfully satisfied the requirements for this trade and manufacturing site.

Where an applicant seeks 80 acres for a trade and manufacturing site, he can only obtain title to as much land in the claim as is actually occupied by improvements and used in his business. Each portion of the site need not contain substantial improvements. It is sufficient to meet the requirements of the law if the applicant can show active use of the unimproved land as an integral part of his business.

David A. Burns, 30 IBLA 359 (June 10, 1977)

Where, in Alaska, a settlement or occupancy claim is initiated by the filing of a location notice which is acceptable on its face at a time when the land is open to the establishment of such a claim, the notice of location is acceptable for recordation by the BLM. But whether the BLM chooses to record the location notice is totally immaterial to a consideration of the validity of the claim, and BLM decisions purporting to adjudicate the validity of any such claim should address that issue on its merits rather than the acceptability of the notice for recordation.

John E. Ketscher, Alfred L. DeCicco, 32 IBLA 235 (Sept. 21, 1977)

Where evidence shows that as of final day of 5-year statutory period for proving up a trade and manufacturing site, claimant's business on site was only prospective, concept of substantial compliance may not properly be invoked to bring claimant within bounds of legal requirements for proving up of such a site. Such evidence showed rough completion of golf course in final month of entry, only $120 gross receipts, and three lifetime memberships in exchange for labor expended in construction of golf course.

Contestee's rights, if any, in trade and manufacturing site claim had to be earned prior to Nov. 23, 1966 (the

ALASKA--Continued

TRADE AND MANUFACTURING SITES--Continued

expiration date of the entry), and no action by BLM after that date could prejudice contestee since the evidence shows her failure to meet requirements during the statutory period. Accordingly, Board rejects equitable estoppel and laches arguments based on asserted BLM actions in 1967 and thereafter.

Since contestee has shown no prejudice suffered as result of delay by BLM in bringing contest, the Board concludes that there is no reason for dismissal of contest based on "reasonable time" provision of 5 U.S.C. § 555(b) (1970).

United States v. Barbara Jean Hill, 33 IBLA 395 (Jan. 30, 1978)

Where land within a trade and manufacturing site is withdrawn from appropriation prior to cognizable occupancy and use for purposes of trade or manufacture under 43 U.S.C. § 687a (1970) and 43 CFR Subpart 2562, an invalid claim cannot be perfected, and appellant has not shown wherein she is entitled to equitable adjudication under 43 CFR 1871.1.

Sandy Pondy, 37 IBLA 48 (Sept. 18, 1978)

A cattle feedlot operation, including cattle handling facilities, grain storage, and logging operations falls within the statutory requisite of "trade, manufacture or other productive industry" as used in the Act of May 14, 1898, as amended, 43 U.S.C. § 687(a) (1970), notwithstanding, that a feedlot operation in Alaska may differ in certain respects from a feedlot operation in the lower 48 States.

United States v. Omar Stratman, 37 IBLA 352 (Oct. 30, 1978)

An entryman may not take advantage of sec. 7 of the Act of Mar. 3, 1891, entitling an entryman to a patent after 2 years from date of issuance of a receiver's receipt when there is no pending contest or protest against the validity of the entry, where he has not shown that preconditions of the Act have been met, i.e., making the final payments required.

In a contest proceeding the Government has the burden of establishing a prima facie case of noncompliance with the requirements for trade and manufacturing, and headquarters sites. The burden then shifts to the applicant to show by a preponderance of the evidence that he has used, occupied, and improved the sites for trade, manufacture, or other productive industry.

A claimant of a trade and manufacturing site must show that at the time of filing his application to purchase he was engaged in trade, manufacture, or other productive industry in connection with the sites. While it is not necessary for the claimant to show that all functions of the business were carried on at the site, he must show a bona fide commercial enterprise from which he reasonably hoped to derive a profit; mere preparation for a prospective business is not sufficient under the regulations. A claimant for a headquarters site must also be engaged in such a business or be an employee of such a business.

United States v. Jack Lamar Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

ALASKA--Continued

TRADE AND MANUFACTURING SITES--Continued

Rights may be established by occupancy of a trade and manufacturing site on vacant, unappropriated public domain in Alaska and filing of a notice of location thereof, despite a prior survey pursuant to a petition for survey of townsite lands, when the notice of location and occupancy of the claim for trade and manufacturing precedes settlement and occupancy under the townsite laws.

Carl A. Liss, 40 IBLA 63 (Mar. 16, 1979)

Where a trade and manufacturing site is located on land that is withdrawn from appropriation prior to its occupancy and use, an application to purchase is properly denied despite the fact that applicant entered the land as a special use permittee.

Mardelle M. Smith, Sherman C. Smith, 42 IBLA 136 (Aug. 16, 1979)

Any right which may be gained under a notice of location for a trade and manufacturing site or a homesite, as required by the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1976), is personal to the party filing the notice.

A trade and manufacturing site notice of location not supported by actual settlement and occupancy authorized by 43 U.S.C. § 687a (1976) does not change the status of the public lands.

James Sims, 42 IBLA 231 (Aug. 22, 1979)

In a contest proceeding the Government has the burden of establishing a prima facie case of noncompliance with the requirements for trade and manufacturing sites. The burden then shifts to the applicant to show by a preponderance of the evidence that he used, occupied, and improved the site for trade, manufacture, or other productive industry.

A claimant of a trade and manufacturing site must show that at the time of filing his application to purchase he was engaged in trade, manufacture, or other productive industry in connection with the site. While it is not necessary for the claimant to show that all functions of the business were carried on at the site, he must show a bona fide commercial enterprise from which he reasonably hoped to derive a profit; mere preparation for a prospective business is not sufficient under the statute.

United States v. Graham Keith Ward, 43 IBLA 333 (Oct. 29, 1979)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)

GENERALLY

Where a Public Land Order withdrawn land from all forms of appropriation under the public land laws for proper classification of the lands under Alaska Native Claims Settlement Act and for protection of public interest values, but provides that the withdrawn lands are subject to administration by the Secretary of the Interior under applicable laws and regulations and his authority to grant leases, an application for Small Tract lease accompanied by a petition for classification may be accepted for filing by the Bureau of Land Management.

ultimate disposition of the application will be dependent upon the classification of the land involved.

Elizabeth A. Sharp, 19 IBLA 312 (Apr. 7, 1975)

Where approval of an application to purchase sand and gravel pursuant to the Materials Disposal Act of 1947 is opposed by a Native village which has already selected the land on which the sand and gravel is located, and to whom conveyance is imminent, the application will be rejected.

Clarence Wren, 20 IBLA 47 (Apr. 21, 1975)

Lands withdrawn under sec. 11 of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1610 (Supp. III 1973), are withdrawn from all forms of appropriation under the public land laws, including, without limitation, the Recreation and Public Purposes Act, as amended, 43 U.S.C. §§ 869 to 869-3 (1970), and an application under the latter Act for such withdrawn lands is properly rejected.

Alaska Department of Fish and Game, 20 IBLA 50 (Apr. 23, 1975)

The requirement of 5 years' use and occupancy to receive an allotment under the Native Allotment Act must have occurred prior to Dec. 18, 1971, as the Alaska Native Claims Settlement Act extinguished all such unperfected claims from that day forward.

Warner Bergman, 21 IBLA 173 (July 25, 1975)

The requirement of use and occupancy for a period of 5 years in order to receive an allotment under the Alaska Native Allotment Act must be completed by Dec. 18, 1971. If an applicant for a Native allotment has not completed the 5 years prior to that date, he does not qualify under the Alaska Native Allotment Act.

John A. Paine, 22 IBLA 56 (Sept. 17, 1975)

Where an application for an allotment by an Alaskan Native includes land in a State of Alaska selection application that has been tentatively approved to the State, and where the Native alleges occupancy and use from a date prior to the filing of the State selection, the allotment application may be granted, if the facts alleged are ultimately proved and the application is regular in all other respects.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

Lands withdrawn for the protection of Alaska Natives' selection rights are not available for oil and gas leasing under the Mineral Leasing Act. 43 U.S.C. § 1621(i) (Supp. III. 1973).

A pending noncompetitive oil and gas lease offer is not a valid existing right protected by the savings clause in the Alaska Native Claims Settlement Act.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

Provision in sec. 4(b) of the Alaska Native Claims Settlement Act requiring the Secretary to issue patents to all persons who have made a lawful entry on the public lands in compliance with the public land laws for the purpose of gaining title to homesteads, prior to Aug. 31, 1971, does not apply to an invalid settlement claim on withdrawn land.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

The Alaska Native Claims Appeal Board, in its discretion, will not rule on issues raised on appeal which were not the grounds cited by the Bureau of Land Management for rejection of applicant's application and which are not dispositive of the issue on appeal.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977)
84 I.D. 891

The Alaska Native Claims Appeal Board cannot ignore existing and related laws and decisions whether raised by the parties or not when the same are dispositive of the appeal itself.

Appeal of Ketchikan Indian Corp., 2 ANCAB 169 (Nov. 8, 1977)

Lands tentatively approved for State selection and conveyed by the State to municipalities or boroughs prior to enactment of ANCSA are not available for Native selection under ANCSA.

Lands tentatively approved for State selection and leased by the State to individuals with an option to buy will, if selected by a Native corporation, be included in the interim conveyance with the provision that the option to buy may be exercised against the Native corporation. Where the option had been exercised against the State and a State patent issued prior to the enactment of ANCSA, the land will be excluded from interim conveyance to the Native corporation.

Third party rights created by the State in lands selected by Natives under ANCSA should be identified by BLM in the decision to issue interim conveyance if possible, but need not be adjudicated.

ANCSA and the implementing regulations draw a basic distinction between valid existing rights leading to the acquisition of title and those of a temporary nature, requiring exclusion of the former from the interim conveyance but inclusion of the latter with provisions protecting the third parties rights for the duration of his interest. The statute and the implementing regulations do not distinguish, in protecting rights leading to the acquisition of title between those arising under Federal law and those arising under State law.

Valid Existing Rights Under the Alaska Native Claims Settlement Act, Sec. Order No. 3016 (Dec. 14, 1977)
85 I.D. 1 (1978)

The determination that a Village Corporation is eligible under sec. 11 of ANCSA is a finding that such village had at least a minimum Native population of 25 on the 1970 census enumeration date and thus entitles such village to at least the minimum acreage allocation pursuant to sec. 14(a) of ANCSA.

U.S. Fish and Wildlife Service, 2 ANCAB 264 (Jan. 23, 1978)

Appeal of State of Alaska, 2 ANCAB 284 (Feb. 1, 1978)

The determination that a Village Corporation is eligible under sec. 11 of ANCSA is a finding that such village had at least a minimum Native population of 25 on the 1970 census enumeration date and thus entitles such village to at least the minimum acreage allocation of 69,120 acres of land pursuant to sec. 14(a) of ANCSA.

Appeal of Omar Stratman et al., 2 ANCAB 329 (Mar. 23, 1978)

Where the Bureau of Land Management records reveal that lands in Alaska have been withdrawn under PLO 5250 and certain of those lands have not been recommended, pursuant to sec. 17(d)(2)(C), Alaska Native Claims Settlement Act of Dec. 18, 1971, 43 U.S.C. § 1616(d)(2)(C) (Supp. IV 1974), for addition to or creation as units of the National Park, Forest, Wildlife Refuge, and Wild and Scenic Rivers Systems within 2 years of the date of the Act, such lands do not nevertheless become available for appropriation under the mining laws. This conclusion is compelled by the reason that PLO 5250 is based upon E.O. 10355, which not only invokes 43 U.S.C. §§ 141-142 (1970), but also the President's general or inherent authority to withdraw public lands completely from mining location.

Sally Lester et al. (On Reconsideration), 35 IBLA 61 (May 10, 1978)

GENERALLY--Continued

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry R. Wilson, 35 IBLA 349 (June 19, 1978)

As an amendment to the Alaska Native Claims Settlement Act, P.L. 94-204 (89 Stat. 1145, 43 U.S.C. § 1611 (Supp. IV, 1974)), is subject to both the provisions of ANCSA and the regulations promulgated to implement ANCSA, unless such provisions or regulations conflict with, or are specifically excepted or preempted in the amendment.

Appeal of Cook Inlet Region, Inc., 3 ANCAB 111 (Dec. 27, 1978) 85 I.D. 462

The Alaska Native Claims Settlement Act, 43 U.S.C. § 1617 (1976), repealed the Act of May 17, 1906, as amended, 43 U.S.C. §§ 270-1 to 270-3 (1970), with the exception of applications pending on Dec. 18, 1971. A State Office decision rejecting a Native allotment application for an additional parcel of land filed pursuant to the Act of May 17, 1906, after Dec. 18, 1971, will be affirmed. Equitable adjudication, which requires substantial compliance with the law, will not be invoked where there is no evidence that such an application was timely filed with BIA.

Nora L. Sanford, 43 IBLA 74 (Sept. 19, 1979)

ABORIGINAL CLAIMS

Sec. 4 of ANCSA states:
"(a) All prior conveyances of public land and water areas in Alaska, or any interest therein, pursuant to Federal law, and all tentative approvals pursuant to sec. 6(g) of the Alaska Statehood Act, shall be regarded as an extinguishment of the aboriginal title thereto, if any.
"(b) All aboriginal titles, if any, and claims of aboriginal title in Alaska based on use and occupancy, including submerged land underneath all water areas, both inland and offshore, and including any aboriginal hunting or fishing rights that may exist, are hereby extinguished.
"(c) All claims against the United States, the State, and all other persons that are based on claims of aboriginal right, title, use, or occupancy of land or water areas in Alaska, or that are based on any statute or treaty of the United States relating to Native use and occupancy, or that are based on the laws of any other nation, including any such claims that are pending before any Federal or State court or the Indian Claims Commission, are hereby extinguished."

The effect of the extinguishment of aboriginal claims by § 4 of ANCSA, as explained in the Conference Report (S. Rep. No. 92-581), 92d Cong., 1st Sess., 40 (1971) and interpreted by Edwardsen v. Morton, 369 F. Supp. 1359 (D.C. Cir. 1973), necessarily defeats arguments that Mental Health lands remained public lands based on assertions of aboriginal title.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65 (July 1, 1976) 83 I.D. 461

ABORIGINAL CLAIMS--Continued

In express provisions of the Treaty of Cession and the Organic Act of 1884, and through disclaimers in the Statehood Act, aboriginal title in Alaska received statutory protection in addition to that normally extended on the basis of Native occupancy.

Until Congress acted to extinguish rights of Alaskan Natives to use and occupancy of aboriginal lands, such rights remained as an encumbrance on the fee, and title to land claimed by Alaska Natives, to which use and occupancy might be proved, was void when given.

Prior to ANCSA, the State's interest in its tentatively approved selections was subject to divestment upon proof of Native use and occupancy, and was subject to Congressional resolution of such claims. Unadjudicated claims of aboriginal title remained the only impediment to selection of such lands.

The express terms of secs. 11 and 12 of ANCSA make lands previously TA'd to the State of Alaska available for selection by qualified Native Corporations, indicating the conclusion of Congress that such lands were subject to disposal in settlement of Native claims.

The retroactive extinguishment of aboriginal title, and the resulting validation of State title, mandated by sec. 4(a) of ANCSA, applies to those lands tentatively approved to the State which are located outside Native village withdrawal areas.

Extinguishment of aboriginal title did not vest the State's title to those TA'd lands located within sec. 11(a)(2) withdrawal areas, for Congress clearly conferred on Native village corporations a superior right to select up to 69,120 acres of such lands.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

Until Congress acted to extinguish rights of Alaskan Natives to use and occupancy of aboriginal lands, such rights remained as an encumbrance on the fee, and title to land claimed by Alaska Natives, to which use and occupancy might be proved, was void when given.

The retroactive extinguishment of aboriginal title, and the resulting validation of State title, mandated by sec. 4(a) of ANCSA, applies to those lands tentatively approved to the State which are located outside Native village withdrawal areas.

Extinguishment of aboriginal title did not vest the State's title to those TA'd lands located within sec. 11(a)(2) withdrawal areas, for Congress clearly conferred on Native Village Corporations a superior right to select up to 69,120 acres of such lands.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

Under the "functional" standard to determine administrative standing set forth in Koniag, Inc. v. Andrus, 580 F.2d 601 (D.C. Cir. 1978), cert. denied, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

ADMINISTRATIVE PROCEDURE

Generally

Absent another party aligned in interest with the appellant(s) or other reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant(s) before the Board withdraw(s) the appeal.

Generally--Continued

by the Alaska Native Claims Appeal Board, or the Secretary or his delegate."

Absent another party aligned in interest with the appellant or other reason from the record file justifying the continuance of the appeal, the appeal will be dismissed pursuant to the terms of the settlement agreement to which appellant is party.

Appeal of Ukpeagvik Inupiat Corp., 1 ANCAB 185 (Nov. 1, 1976)

Since ANCSA recognizes and protects State-created interests as valid existing rights, as well as interests recognized or created under Federal law, and thus involves interests which would not be of record in the BLM land office, BLM's administrative responsibility to identify, adjudicate and protect "valid existing rights" under ANCSA, are broader than under general Federal public land laws.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Where the Secretary pursuant to regulations in 43 CFR 4.5 takes original jurisdiction of a case and renders the final decision in the matter, the Board is bound by his findings, conclusions, and statements of Departmental policy in such decision.

Where BLM, in accord with Secretarial policy, rejects a noncompetitive oil and gas lease offer because of a conflict with a conveyance under ANCSA, such rejection by BLM constitutes final agency action from which no administrative appeal will lie by the offeror to the Board or to the Interior Board of Land Appeals.

Appeal of R. W. Wargo, 2 ANCAB 98 (July 15, 1977)

Appeal of William G. Samuel, 2 ANCAB 115 (July 15, 1977)

Appeal of Terry R. Kriss and J. Burglin, 2 ANCAB 126 (Aug. 4, 1977)

Appeal of Clifford C. Burglin, 2 ANCAB 134 (Aug. 4, 1977)

The Alaska Native Claims Appeal Board and the Bureau of Land Management are bound by the rules and regulations enacted by the Department of the Interior.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977) 84 I.D. 891

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

The Board vacates its previous ruling that BLM's rejection of a noncompetitive oil and gas lease offer,

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ADMINISTRATIVE PROCEDURE--Continued

Generally--Continued

because of conflict with an ANCSA conveyance, constitutes final agency action from which no appeal will lie.

Appeal of Terry R. Kriss and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board withdraws the appeal.

Appeal of Darrell R. Short, 2 ANCAB 290 (Feb. 13, 1978)

Appeal of State of Alaska, Department of Fish and Game, 2 ANCAB 325 (Mar. 9, 1978)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ADMINISTRATIVE PROCEDURE--Continued

Generally--Continued

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

The Board vacates its previous ruling that BLM's rejection of a noncompetitive oil and gas lease offer, because of conflict with an ANCSA conveyance, constitutes final agency action from which no appeal will lie.

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which statements of reasons and standing may be filed.

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the remaining appellant before the Board withdraws its appeal.

Appeal of City of Kodiak and In the Matter of Port Lions Native Corp., 3 ANCAB 85 (Sept. 14, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board requests that the appeal be dismissed.

Appeal of J. Bruce Crow, 3 ANCAB 96 (Nov. 20, 1978)

Appeal of Doyon, Ltd., 3 ANCAB 105 (Dec. 11, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant and all parties of record before the Board stipulate to a dismissal of the appeal.

Appeal of State of Alaska, Dept. of Transportation and Public Facilities, 3 ANCAB 124 (Jan. 5, 1979)

Appeal of the State of Alaska, 4 ANCAB 108 (Dec. 19, 1979)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ADMINISTRATIVE PROCEDURE--Continued

Generally--Continued

ANCAB is bound by statements of Secretarial policy contained in Secretarial Orders published in the *Federal Register*.

Appeal of State of Alaska, 3 ANCAB 129 (Jan. 19, 1979)
86 I.D. 45

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board files a voluntary dismissal.

Appeal of Kenai Peninsula Borough, 3 ANCAB 258 (May 18, 1979)

This Board does not have jurisdiction to adjudicate the Secretary's authority to withdraw lands for possible selection by a Native corporation pursuant to § 14(h)(8) of ANCSA.

Appeal of the State of Alaska, 3 ANCAB 285 (June 11, 1979)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the parties stipulate to a dismissal of the appeal.

Appeal of State of Alaska, Department of Transportation, 3 ANCAB 291 (June 29, 1979)

Appeal of the State of Alaska, 3 ANCAB 294 (July 10, 1979)

The Board is bound by Secretarial policy and interpretation of law expressed in a Solicitor's Opinion in which the Secretary of the Interior concurred.

Regulations in 43 CFR 2650.5-1(b) deal explicitly with chargeability of acreage and implicitly with land title, establishing two categories of submerged lands not required to be selected and charged: those underlying navigable waters, and those underlying nonnavigable waters of one-half section or more.

Under regulations in 43 CFR 2650.5-1(b), Federal ownership of submerged lands does not require all such lands to be charged against a Native corporation's acreage entitlement.

The Secretary, and this Board, are bound by duly promulgated regulations of the Department.

As between a published regulation applicable to chargeability of submerged land and an unpublished Departmental decision paper applicable to the same issue, the Board is bound to follow the regulation. Therefore, regardless of whether the United States retains ownership of the bed of the Colville River, the Bureau of Land Management must, pursuant to 43 CFR 2650.5-1(b), determine whether the river is navigable and, if it is found navigable, must exclude the riverbed from the acreage to be charged against Kuugpik's entitlement.

Appeal of State of Alaska, 3 ANCAB 297 (July 31, 1979)
86 I.D. 381

Applications

Primary Place of Residence

Under sec. 14(h)(5) of ANCSA and 43 CFR Part 2653, an applicant who desired to file an application for the conveyance of a primary place of residence was required to do so by Dec. 18, 1973, regardless of the status of the land at the date of filing.

Neither the Act nor regulations permit an applicant for a primary place of residence to refile an application for a primary place of residence once a sec. 11 withdrawal terminates and the land becomes available for selection as a primary place of residence.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977) 84 I.D. 891

Decisions

The Decision of the Bureau of Land Management vacating the previously granted tentative approval and rejecting the land selection application of the State of Alaska must be vacated and remanded for further proceedings when it does not appear that the land selection application by the Native Corporation has been adjudicated.

Appeal of the State of Alaska, 1 ANCAB 281 (Dec. 20, 1976) 83 I.D. 685

Where Departmental regulations provide for the elapse of a 30-day appeal period before a decision to convey becomes final, waiver by one of a number of parties who might appeal does not render BLM's decision final so as to permit conveyance before elapse of the 30-day appeal period.

While decisions of the Bureau of Land Management and documents conveying title to Native corporations pursuant to ANCSA properly contain a general provision protecting "valid existing rights" in accordance with the provisions of sec. 14(g) of ANCSA and the regulations in 43 CFR 2650, such documents must additionally describe valid existing rights according to the nature of the right and approximate location on the land, and may incorporate by reference other BLM files and files of the Alaska Division of Lands only as a supplemental source of information.

Under ANCSA and the regulations in 43 CFR 2650, the Bureau of Land Management has the duty to ascertain whether a less-than-fee interest was issued to a third party, and must recite in the decision approving lands for conveyance to a Native Corporation that the conveyance is "subject to" such an interest.

Where the claimed "valid existing rights" were created by the State on lands tentatively approved to the State under the Statehood Act, the adjudication of the State's selection must be consolidated with the adjudication of the Native land selection, and valid existing rights in the land must be determined in a single decision.

Both the decision to convey lands, and the interim conveyance, must specifically identify those interests protected under ANCSA as valid existing rights. Where the title conveyed will be "subject to" a less-than-fee interest, the nature of the interest must be identified and the lands affected must be described, at least by section and, where possible, according to the smallest legal subdivision.

Decisions to convey and interim conveyances should, as a minimum, state the use for which each easement is reserved, state the width of each easement, state at least the sections through which an easement passes or, if a site easement, the section or sections in which the easement is located; alternatively, the easement could be located by incorporating in the conveyance document a map depicting the easement.

Where the Bureau of Land Management has developed new procedures for the reservation and identification of easements subsequent to issuance of a Decision to Convey, the Board will remand the Decision to Convey to the Bureau of Land Management for the limited purpose of identifying the easements reserved in the Decision to Convey under appeal according to the uniform easement identification system currently being followed.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which Statements of Reasons and Standing may be filed.

Appeal of Terry E. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

Appeal of Jerry S. Beach, 2 ANCAB 277 (Jan. 26, 1978)

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which Statements of Reasons and Standing may be filed.

Appeals of Ethyl D. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antweil, 2 ANCAB 302 (Feb. 21, 1978)

When a Secretarial decision purports to decide multiple appeals designated by docket numbers in the caption, all interests included within each group of appeals designated by a docket number are adjudicated by such a decision.

Appeal of Gayle D. Fogelson, 2 ANCAB 316 (Mar. 7, 1978)

Estoppel

The State Director, Bureau of Land Management, is not estopped from denying appellant's (Village Corporation) application for certain lands because BLM erroneously included those lands on its land records and on the map of lands sent to appellant as eligible for withdrawal under sec. 11(a)(1) of ANCSA.

Appeal of Tanacross, Inc., 2 ANCAB 379 (May 12, 1978)
85 I.D. 97

Interim Conveyance

An agreement in settlement of an appeal which requires the Bureau of Land Management to include specified provisions in Interim Conveyances to be issued in the future, but which does not require BLM to amend an Interim Conveyance that has already been issued by the addition of easements thereto, may be approved by the Board without consideration of BLM's authority to amend Interim Conveyances.

Appeal of State of Alaska, 1 ANCAB 51 (June 18, 1976)

Where Departmental regulations provide for the elapse of a 30-day appeal period before a decision to convey becomes final, waiver by one of a number of parties who might appeal does not render BLM's decision final so as to permit conveyance before elapse of the 30-day appeal period.

The interests described in sec. 14(g) of ANCSA are of a temporary or limited nature, in contrast to those interests derived from laws leading to a grant of fee title such as the entries protected by sec. 22(b). Inclusion in Native conveyances of lands subject to such interests, under administrative arrangements outlined in sec. 14(g) is appropriate, because such temporary or limited interests are not incompatible with Native ownership of the fee.

Leases issued for the surface or minerals covered by a Native selection constitute a valid existing right protected by sec. 14(g) of ANCSA and any conveyance to a Native Corporation of lands on which such a lease has issued must be subject to the leasehold interest.

State-issued permits and contracts for resource uses issued to third parties before Dec. 18, 1971, are protected as valid existing rights under sec. 14(g) of ANCSA, and any conveyance to a Native Corporation of lands on which such permits or contracts have been issued must be subject to such interests.

Under ANCSA and the regulations in 43 CFR 2650, the Bureau of Land Management has the duty to ascertain whether a less-than-fee interest was issued to a third party, and must recite in the decision approving lands for conveyance to a Native Corporation that the conveyance is "subject to" such an interest.

Both the decision to convey lands, and the interim conveyance, must specifically identify those interests protected under ANCSA as valid existing rights. Where the title conveyed will be "subject to" a less-than-fee interest, the nature of the interest must be identified and the lands affected must be described, at least by section and, where possible, according to the smallest legal subdivision.

Decisions to convey and interim conveyances should, as a minimum, state the use for which each easement is reserved, state the width of each easement, state at least the sections through which an easement passes or, if a site easement, the section or sections in which the easement is located; alternatively, the easement could be located by incorporating in the conveyance document a map depicting the easement.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Third party rights created by the State in lands selected by Natives under ANCSA should be identified by BLM in the decision to issue interim conveyance if possible, but need not be adjudicated.

ANCSA and the implementing regulations draw a basic distinction between valid existing rights leading to the acquisition of title and those of a temporary nature, requiring exclusion of the former from the interim conveyance but inclusion of the latter with provisions protecting the third parties rights for the duration of his interest. The statute and the implementing regulations do not distinguish, in protecting rights leading to the acquisition of title between those arising under Federal law and those arising under State law.

Valid Existing Rights Under the Alaska Native Claims Settlement Act, Sec. Order No. 3016 (Dec. 14, 1977)
85 I.D. 1 (1978)

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which Statements of Reasons and Standing may be filed.

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

An interim conveyance is the conveyance of title to unsurveyed lands, subject to the reservations set forth in sec. 14(c) and other sections of ANCSA, and in other provisions of law.

Appeal of Kodiak Island Setnetters Ass'n, 3 ANCAB 1 (June 12, 1978) 85 I.D. 200

Appeal of Mark A. Wartes et al., 3 ANCAB 21 (June 21, 1978)

Appeal of Mr. & Mrs. G. Gregory Moo, 3 ANCAB 27 (June 26, 1978)

Appeal of Kodiak Island Borough, 3 ANCAB 65 (July 11, 1978)

The granting of a right-of-way under FLPMA and the superseded Acts of Feb. 15, 1901, and Mar. 4, 1911, is within the Secretary's discretion and neither the filing of the application nor the existence of improvements earns appellant a right to the right-of-way. No rights vest in the applicant until the grant is approved by the Secretary. An application for a right-of-way is properly rejected where the land is in an interim conveyance to a Native Corporation.

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ADMINISTRATIVE PROCEDURE--Continued

Settlement Approval

43 CFR 4.913(b) provides: "Where an appeal is before the Alaska Native Claims Appeal Board, and no unit of the Department of the Interior is a party to the appeal, no agreement between parties which may require future action or forbearance from action by the Department of the Interior shall bind the Department unless such agreement is approved by the Alaska Native Claims Appeal Board, or the Secretary or his delegate." When the Bureau of Land Management is the only agency of the U.S. Department of the Interior which is a party to the appeal, and a settlement agreement does not require or provide for future action or forbearance from action by any agency of the U.S. Department of the Interior, an appeal from a Decision of the Bureau of Land Management will be dismissed upon the motion of the appellant based upon a settlement agreement, and no approval of the settlement agreement is required by the Board, or the Secretary or his delegate.

Appeal of RCA Alaska Communications, Inc., 1 ANCAB 94 (July 8, 1976)

Standing

The State of Alaska has standing to appeal a Decision of the Bureau of Land Management to the Alaska Native Claims Appeal Board as a party "who claims a property interest in land affected" by a Decision of the Bureau of Land Management, within the meaning of 43 CFR 4.902, when the BLM Decision vacates the tentative approval previously given to the State's selection and rejects the State's land selection application filed under the Alaska Statehood Act because of a conflict with the provisions of the Alaska Native Claims Settlement Act.

Appeal of the State of Alaska, 1 ANCAB 201 (Dec. 20, 1976)
83 I.D. 685

ALASKA NATIVE CLAIMS APPEAL BOARD

Administrative Procedure

Decisions

ANCAB is bound by the rules and regulations promulgated by the Secretary of the Interior pursuant to sec. 25 of ANCSA.

Appeal of Eyak Corp., 1 ANCAB 132 (Sept. 9, 1976)
83 I.D. 484

The Board is bound by statements of Secretarial policy contained in Secretarial Orders published in the *Federal Register*.

Appeal of Ouzinkie Native Corp., 4 ANCAB 3 (Oct. 31, 1979)
86 I.D. 618

Appeal of William J. and Jean B. Schwaab, 4 ANCAB 17 (Oct. 31, 1979)

Interim Conveyance

A special use permit shall be terminated upon issuance of a decision of interim conveyance to a Native corporation when the permit contains language to the effect that should the permit fall within the boundaries of a present or future Native claims selection area, such permit will be terminated.

Appeal of Yak-Tat Kwaan, Inc., 3 ANCAB 182 (Mar. 20, 1979)

Interim conveyance and patent are documents of equal significance in the granting of title under ANCSA, and when interim conveyance has been issued, the Secretary and this Board lose jurisdiction over those interests in land which has been conveyed.

Appeal of James W. Lee, 3 ANCAB 334 (Aug. 31, 1979)

Standing

Where, pursuant to Departmental regulations, a party must claim a property interest in land affected by a decision in order to have standing to appeal such a decision, and the Secretary has found as a matter of law that a noncompetitive oil and gas lease offeror has no property interest in his offer, the Board finds that an offeror for a noncompetitive oil and gas lease does not have standing under 43 CFR 4.902 to appeal a BLM decision to reject his lease offer, or to issue a conveyance to a Native Corporation under ANCSA.

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Appeals of Ethyl E. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antwell, 2 ANCAB 302 (Feb. 21, 1978)

In the absence of any interest in the lands in issue, the appellant has no standing to raise the necessity of a sec. 3(e) determination.

Appeal of State of Alaska, 3 ANCAB 11 (June 20, 1978)
85 I.D. 219

Appeals

Generally

Where the Secretary pursuant to regulations in 43 CFR 4.5 takes original jurisdiction of a case and renders the final decision in the matter, the Board is bound by his findings, conclusions, and statements of Departmental policy in such decision.

Appeal of E. H. Wargo, 2 ANCAB 98 (July 15, 1977)

Appeal of William G. Zaegel, 2 ANCAB 115 (July 15, 1977)

Appeal of Terry E. Krize and J. Burglin, 2 ANCAB 126 (Aug. 4, 1977)

Appeal of Clifford C. Burglin, 2 ANCAB 134 (Aug. 4, 1977)

A regulation enacted to implement the sale of isolated tracts pursuant to 43 U.S.C. § 1171 which defined the term "cornering" for purposes of that Act and which was not enacted pursuant to ANCSA, is not binding upon this

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Generally--Continued

Board in interpreting the meaning of the phrase "cornering" pursuant to sec. 11(a) of ANCSA.

This Board will not reverse an administrative determination of the Bureau of Land Management that is a reasonable, consistently applied interpretation of the law, and on which many Village Corporations relied in making their land selections under ANCSA, even though it is not the only reasonable interpretation of the statute.

Appeal of Eklutna, Inc., 2 ANCAB 214 (Dec. 19, 1977) 84 I.D. 982

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

Appeal of Terry R. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

Appeals of Ethyl D. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antweil, 2 ANCAB 302 (Feb. 21, 1978)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Generally--Continued

Where the Secretary, pursuant to regulations in 43 CFR 4.5, takes original jurisdiction of a case and renders a final decision, the Board is bound by his findings, conclusions, and statements of Departmental policy.

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

Where Departmental policy is to expedite conveyances under ANCSA by rejecting noncompetitive oil and gas leases which conflict with conveyances under ANCSA, and the Secretary has announced that oil and gas leases will not be issued as a consequence of administrative appeals, the Board interprets this policy as a mandate to affirm a BLM decision rejecting a noncompetitive oil and gas lease offer because of conflict with a conveyance under ANCSA.

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which statements of reasons and standing may be filed.

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

ANCAB is bound by statements of Secretarial policy contained in Secretarial Orders published in the *Federal Register*.

A timely appealed Bureau of Land Management decision does not constitute a final Departmental decision as that term is used in sentence 5, sec. 2 of S.O. 3029.

Appeal of State of Alaska, 3 ANCAB 129 (Jan. 19, 1979) 86 I.D. 45

The Board is bound by Secretarial policy and interpretation of law expressed in a Solicitor's Opinion in which the Secretary of the Interior concurred.

The Secretary, and this Board, are bound by duly promulgated regulations of the Department.

As between a published regulation applicable to chargeability of submerged land and an unpublished Departmental decision paper applicable to the same issue, the Board is bound to follow the regulation. Therefore, regardless of whether the United States retains ownership of the bed of the Colville River, the Bureau of Land Management must, pursuant to 43 CFR 2650.5-1(b), determine whether the river is navigable and, if it is found navigable, must exclude the riverbed from the acreage to be charged against Kuugpik's entitlement.

Appeal of State of Alaska, 3 ANCAB 297 (July 31, 1979) 86 I.D. 381

Generally--Continued

Until a village corporation makes its determination of an appellant's rights claimed under § 14(c) of ANCSA (85 Stat. 688, 703, 43 U.S.C. §§ 1601, 1613(c) (Supp. I 1977)), there is no way to determine if a dispute exists between a person claiming under § 14(c) and the village corporation.

There is no administrative appeal process available to claimants under § 14(c) of ANCSA, and such claims must be brought in a judicial forum.

Appeal of James W. Lee, 3 ANCAB 334 (Aug. 31, 1979)

Dismissal

An appeal to the Alaska Native Claims Appeal Board will be dismissed as being untimely filed when the appellant fails to file a Notice of Appeal within the time limits set forth in 43 CFR 2650.7(d).

Appeal of Mark J. Cottini, 2 ANCAB 327 (Mar. 22, 1978)

Jurisdiction

Issues arising from GSA's disposal of lands as "surplus property" pursuant to the Federal Property and Administrative Services Act are not within the jurisdiction of the Board.

Appeal of Ounalashka Corp., 1 ANCAB 104 (July 13, 1976)
83 I.D. 475

In the absence of evidence that a primary place of business of a Native applicant would also qualify as a primary place of residence within the meaning of sec. 14(h) of ANCSA and the regulations in 43 CFR Part 2650, *as amended*, 41 FR 14734 (Apr. 7, 1976), neither the Bureau of Land Management nor this Board have jurisdiction to adjudicate the merits of a primary place of business application under sec. 14(c)(1) of ANCSA.

Appeal of Natalie Simeonoff, 1 ANCAB 116 (Aug. 10, 1976)

The Alaska Native Claims Appeal Board does not have jurisdiction to adjudicate the Secretary's authority to withdraw and reserve public lands for a utility and transportation corridor within the meaning of sec. 17(c) of the Alaska Native Claims Settlement Act.

Appeal of Wisenak, Inc., 1 ANCAB 157 (Sept. 15, 1976)
83 I.D. 496

Under 43 CFR, Part 4, 4.1(5) and Subpart J, the Alaska Native Claims Appeal Board has jurisdiction over an appeal by the State of Alaska from an adverse decision of the Bureau of Land Management on a land selection application pursuant to the Alaska Statehood Act when the BLM's adverse decision is based upon a construction of the provisions of the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. IV 1974), *as amended*, 89 Stat. 1145 (1976).

Appeal of the State of Alaska, 1 ANCAB 281 (Dec. 20, 1976)
83 I.D. 685

When an interim conveyance and/or patent has been issued pursuant to the Alaska Native Claims Settlement Act, the Secretary of the Interior and this Board lose all authority and jurisdiction over those interests in land which have been conveyed.

Under 43 CFR Part 4, Subpart J, and 43 CFR 2650 appeals to the Secretary under ANCSA relating to land selection are to the Alaska Native Claims Appeal Board. In the absence of regulations establishing a procedure by which the Secretary will review easements reserved in conveyances as contemplated by 43 CFR 2650.4-7(c)(1) and Secretarial Order No. 2982, the Board is not precluded from exercising the Secretary's authority to review easement reservations when such review is requested through an appeal to the Board.

Appeal of Eklutna, Inc., 1 ANCAB 305 (Mar. 15, 1977)
84 I.D. 105

When an interim conveyance has been issued pursuant to ANCSA, the Secretary of the Interior and ANCAB lose all authority and jurisdiction over those interests in the land which have been conveyed, and the Secretary is without jurisdiction to reserve any easements not originally contained in the conveyance or to deprive the grantee of the interim conveyance of any interests conveyed therein.

For the purpose of determining jurisdiction, a patent issued by the State of Alaska on TA'd lands within an 11(a)(2) withdrawal, will be accorded the same dignity as a Federal patent, *i.e.*, the effect of the issuance of a patent to public lands by the United States, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to end all authority and jurisdiction in the Department of the Interior over the lands conveyed. Therefore the Board finds it lacks jurisdiction to decide the status of patents issued by the State of Alaska prior to ANCSA to third parties on TA'd lands, as the proper form for such an adjudication is in a judicial proceeding.

Although the validity of S.O. 2982 is being challenged on numerous grounds in pending litigation, the Board currently is bound by S.O. 2982, and insofar as it purports to limit and restrict the Board's jurisdictional authority, the Board's jurisdiction is so affected.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Where interim conveyance has been issued for the lands embraced by oil and gas lease offers, the Department no longer has jurisdiction over the lands and has no authority to convey any interests in the lands, including mineral leases.

All challenges to the validity of ANCSA are beyond the jurisdiction of an administrative adjudicative body organized to decide appeals under that statute.

Appeal of Terry E. Krize and J. Purolin, 2 ANCAB 247 (Dec. 28, 1977)
84 I.D. 1007

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

Jurisdiction--Continued

Appeal of Kodiak Island Borough, 3 ANCAB 65 (July 11, 1978)

Where interim conveyance has been issued for the lands embraced by oil and gas lease offers, the Department no longer has jurisdiction over the lands and has no authority to convey any interest in the lands, including mineral leases.

All challenges to the validity of ANCSA are beyond the jurisdiction of an administrative adjudicative body organized to decide appeals under that statute.

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

The effect of the issuance of a patent to public lands by the United States, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to end all authority and jurisdiction of the Department of the Interior over the lands conveyed. The proper forum to further adjudicate the status of such an interest is in a judicial proceeding and the Board lacks jurisdiction to decide the issue.

Appeal of Choggiung, Ltd., 3 ANCAB 100 (Nov. 20, 1978)

Appeal of Alaska Railroad, 3 ANCAB 273 (June 7, 1979) 86 I.D. 357

Appeal of Alaska Railroad, 3 ANCAB 280 (June 8, 1979)

An appeal based on interests created by § 14(c) of ANCSA, filed prior to issuance of interim conveyance to the appropriate village corporation, is premature, and the Board lacks jurisdiction to hear such an appeal.

Appeal of James W. Lee, 3 ANCAB 334 (Aug. 31, 1979)

The effect of the issuance of a patent by the United States, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to end all authority and jurisdiction of the Department of the Interior over the lands conveyed. The proper forum to further adjudicate the status of an alleged interest in the conveyed lands in someone other than the patentee is in a judicial proceeding, and the Board lacks jurisdiction to decide an appeal based on a claim to patented lands.

Appeal of the Alaska Railroad, 3 ANCAB 346 (Aug. 31, 1979)

The effect of the issuance of a patent to public lands by the United States, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to end all authority and jurisdiction of the Department of the Interior over the lands conveyed. The proper forum to further adjudicate the status of such an interest is in a judicial proceeding and the Board lacks jurisdiction to decide the issue.

Sec. 316 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2743, 2770, 43 U.S.C. §§ 1701-1782 at 1746 (1976), was not intended to alter the long-established rule regarding the Department of the Interior's loss of jurisdiction to adjudicate interests in land following the issuance of patent for that land.

Appeal of the Alaska Railroad (On Reconsideration), 3 ANCAB 351 (Sept. 18, 1979) 86 I.D. 452

Appeal of Alaska Railroad (On Reconsideration), 3 ANCAB 377 (Sept. 21, 1979)

The effect of the issuance of a patent or interim conveyance by the United States, even if issued by mistake or inadvertence, is to transfer the legal title from the United States and to end all authority and jurisdiction of the Department of the Interior over the lands conveyed. The proper forum to further adjudicate the status of an alleged interest in the conveyed lands is in a judicial proceeding, and the Board lacks jurisdiction to decide an appeal based on a claim to conveyed lands.

Appeal of the Alaska Railroad, 3 ANCAB 365 (Sept. 19, 1979)

Appeal of the Alaska Railroad, 3 ANCAB 371 (Sept. 19, 1979)

Neither the Board nor the BLM is the appropriate forum in which to adjudicate the validity of third-party interests created by the State of Alaska.

Appeal of Ouzinkie Native Corp., 4 ANCAB 3 (Oct. 31, 1979) 86 I.D. 618

Appeal of William J. and Jean H. Schwaab, 4 ANCAB 17 (Oct. 31, 1979)

The Board lacks jurisdiction to adjudicate the validity of homestead entries; the Board, rather, adjudicates the effect of ANCSA on such entries.

Appeal of Carmel J. McIntyre, 4 ANCAB 24 (Nov. 30, 1979) 86 I.D. 663

Parties

Where the Board's appeal file discloses that persons who may have an interest in the land in dispute have not been named as adverse parties by the Bureau of Land Management and served with a copy of all documents relating to the appeal, the Board will designate such persons necessary parties on whom such service must be made and direct that such persons file an appearance and respond to the pleadings prior to adjudication of the appeal.

Absent another party aligned in interest with the appellant, or other reasons justifying the continuance of the appeal, an appeal will be dismissed when the sole appellant before the Board withdraws its appeal.

Appeal of State of Alaska, 1 ANCAB 51 (June 18, 1976)

Under regulations contained in 43 CFR 4.902, a Regional Corporation has a right of appeal.

Where a person is designated a necessary party by Order of the Board and is given actual notice of administrative proceedings which may affect a claimed property interest, and such person fails to appeal and assert any claim, such person may be dismissed as a party and the Board may adjudicate the property interest of other parties without regard to any interest which may be claimed by the party who fails to appear.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Where multiple appellants are listed on an Appendix to the appellants' Statement of Facts and Reasons, and such Appendix incorporates by reference a list of additional individuals (listed as simultaneous drawing drawees by land description, drawing card number, name and address), the incorporation by reference of the second list is sufficient to identify the individuals and interests designated thereon as appellants.

Appeal of Gayle D. Fogelson, 2 ANCAB 316 (Mar. 2, 1976)

Reconsideration

Where regulations provide that a party may promptly request the reconsideration of a decision but provides no time limit for the filing of such a request, a request for reconsideration filed within a reasonable time under the circumstances of the appeal will be considered timely.

A Petition for Reconsideration will be granted when in its discretion, the Alaska Native Claims Appeal Board finds that extraordinary circumstances do exist that had not been considered by the Board in rendering its decision.

Appeal of Eklutna, Inc., 2 ANCAB 214 (Dec. 19, 1977) 84 I.D. 982

Where a person received no notice of a decision affecting his open-to-entry lease, and where the Secretary has reconsidered and reversed the Board's ruling on valid existing rights in an appeal from that decision, the Board considers these circumstances extraordinary within the meaning of 43 CFR 4.21(c) and will reconsider its ruling.

Appeal of Raymond E. Miller, 3 ANCAB 238 (May 14, 1979) 86 I.D. 285

Where an appellant fails to appeal an administrative decision and, after 15 years, seeks reversal on reconsideration of that decision, and where reconsideration would prejudice third-party interests created in the interim, the Board will not reconsider such appeal.

Appeal of Carmel J. McIntyre, 4 ANCAB 24 (Nov. 30, 1979) 86 I.D. 663

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Res Judicata

A prior decision of the Department will not be overturned by this Board where the claimant has failed to prosecute an appeal from such decision and in essence acquiesced to the decision for a prolonged period of time.

Appeal of State of Alaska, 3 ANCAB 11 (June 20, 1978)
85 I.D. 219

The Board will not reverse a prior final decision of the Department where the appellant did not appeal such decision for 15 years, and now seeks reversal of such decision through a new administrative appeal. The principle of finality of administrative action bars consideration of such a new appeal when it involves the same claim of land and the same issues as were the subject of the prior appeal.

Appeal of Carmel J. McIntyre, 4 ANCAB 24 (Nov. 30, 1979)
86 I.D. 663

Settlement Approval

Where the Bureau of Land Management is a party to an appeal because a decision of the State Director has been appealed, and no other organizational unit of the Department of the Interior is a party, approval of any settlement agreement which may require future action or forbearance by the Department is a prerequisite to binding the Department, and is within the authority of the Board under regulations contained in 43 CFR 4.913(b).

An agreement in settlement of an appeal which requires the Bureau of Land Management to include specified provisions in Interim Conveyances to be issued in the future, but which does not require BLM to amend an Interim Conveyance that has already been issued by the addition of easements thereto, may be approved by the Board without consideration of BLM's authority to amend Interim Conveyances.

Appeal of State of Alaska, 1 ANCAB 51 (June 18, 1976)

43 CFR 4.913(b) provides:
"Where an appeal is before the Alaska Native Claims Appeal Board, and no unit of the Department of the Interior is a party to the appeal, no agreement between parties which may require future action or forbearance from action by the Department of the Interior shall bind the Department unless such agreement is approved by the Alaska Native Claims Appeal Board, or the Secretary or his delegate."

Absent another party aligned in interest with the appellant or other reason from the record file justifying the continuance of the appeal, the appeal will be dismissed pursuant to the terms of the settlement agreement to which appellant is party.

Appeal of Ukpeagvik Inupiat Corp., 1 ANCAB 185 (Nov. 1, 1976)

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Standing

The State of Alaska has standing to appeal a Decision of the Bureau of Land Management to the Alaska Native Claims Appeal Board as a party "who claims a property interest in land affected" by a Decision of the Bureau of Land Management, within the meaning of 43 CFR 4.902, when the BLM Decision vacates the tentative approval previously given to the State's selection and rejects the State's land selection application filed under the Alaska Statehood Act because of a conflict with the provisions of the Alaska Native Claims Settlement Act.

Appeal of the State of Alaska, 1 ANCAB 281 (Dec. 20, 1976)
83 I.D. 685

The Board, in its discretion, will not summarily dismiss an appeal for failure to file a Statement of Standing merely because a Statement of Standing was not separately filed or separately labeled, where the timely filed Statement of Reasons clearly discloses the claim of property interests required for standing to appeal by 43 CFR 4.902.

Where the State clearly has standing to appeal a decision, and its appeal is consolidated by the Board for adjudication with another appeal in which the State's standing to appeal is challenged, the State's standing to appeal in the consolidated matter will not be prejudiced.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

In view of Secretarial policy to expedite conveyances under ANCSA by rejecting pending noncompetitive oil and gas lease offers which conflict in whole or in part with such conveyances, and in view of the Secretary's conclusion that oil and gas lease offerors do not have a "property interest in land" sufficient to convey standing under 43 CFR 4.902, an appeal by an offeror from a BLM decision rejecting an offer for a noncompetitive oil and gas lease will be dismissed.

Appeal of E. H. Wargo, 2 ANCAB 98 (July 15, 1977)

Appeal of William G. Zaegel, 2 ANCAB 115 (July 15, 1977)

Appeal of Terry E. Brize and J. Burglin, 2 ANCAB 126 (Aug. 4, 1977)

Appeal of Clifford C. Burglin, 2 ANCAB 134 (Aug. 4, 1977)

Where, pursuant to Departmental regulations, a party must claim a property interest in land affected by a decision in order to have standing to appeal such a decision, and the Secretary has found as a matter of law that a noncompetitive oil and gas lease offeror has no property interest in his offer, the Board finds that offerors for noncompetitive oil and gas leases do not have standing under 43 CFR 4.902 to appeal a BLM decision to issue conveyance to a Native Corporation under ANCSA.

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Standing--Continued

period in which Statements of Reasons and Standing may be filed.

Appeal of Terry E. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Pursuant to regulations in 43 CFR Part 4, Subpart J, 4.902, a party may bring an appeal before the Alaska Native Claims Appeal Board if it (1) "claims a property interest in land" that is (2) "affected by a determination from which an appeal to the Alaska Native Claims Appeal Board is allowed," or is an agency of the Federal Government, or in cases involving land selection is a Regional Corporation.

The mere assertion by an appellant that he "frequently uses" land which might be conveyed to a Village Corporation under the Alaska Native Claims Settlement Act, is insufficient by itself to constitute a claim of "property interest in land affected by a determination appealable to the Alaska Native Claims Appeal Board" as is required by 43 CFR Part 4, Subpart J, 4.902, to bring an appeal before this Board.

An assertion by an appellant that a Village Corporation might alter its selection pattern if an appeal of an entitlement determination is successful, is insufficient to show that an appellant's property interest in land is affected by a determination appealable to this Board as required by 43 CFR Part 4, Subpart J, 4.902, when the Village Corporation would be entitled to select the disputed land regardless of the outcome of an appeal from the entitlement determination.

Appeal of Omar Stratman et al., 2 ANCAB 329 (Mar. 23, 1978)

The appropriate test for determining whether or not a party has standing to bring an appeal before the Alaska Native Claims Appeal Board is not whether such party is an "aggrieved party" but whether such party "claims a property interest in land affected by a determination from which an appeal to the ANCAB is allowed," or is an agency of the Federal Government, or in cases involving land selection is a Regional Corporation.

The mere assertion of recreational use of a bank of a river by an appellant or appellants does not by itself constitute a claim of "property interest" which is required by 43 CFR Part 4, Subpart J, 4.902, to bring an appeal before this Board.

Appeal of Sam E. McDowell, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of George C. Stek, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of David F. Botens, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of Kenneth E. Chamberlain, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of Walter Galetti, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of Gesena M. Galetti, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of John W. Scott, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of Dorothea Taylor, 2 ANCAB 350 (Mar. 28, 1978)

Appeal of George Murphy, 2 ANCAB 350 (Mar. 28, 1978)

The mere allegation of ownership and use of State and Federal lands as members of the public does not constitute a claim of "property interest in land" as is required for standing by 43 CFR 4.902, and, therefore, the appellant lacks standing to bring an appeal before the Board.

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 363 (Mar. 31, 1978)

Where, pursuant to Departmental regulations, a party must claim a property interest in land affected by a decision in order to have standing to appeal such a decision, and the Secretary has found as a matter of law that a noncompetitive oil and gas lease offeror has no property interest in his offer, the Board finds that offerors for noncompetitive oil and gas leases do not have standing under 43 CFR 4.902 to appeal a BLM decision to issue conveyance to a Native Corporation under ANCSA.

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

To have standing to bring an appeal before this Board, an appellant other than a regional corporation or an agency of the Federal Government, must make a claim of property interest in land affected by a determination appealable to this Board.

Appeal of Lois A. Mayer, 3 ANCAB 77 (Aug. 17, 1978)

Where the lands in which an appellant claims a property interest are not included in the decision to convey, and appellant fails to show any connection between such land and land interests which are conveyed pursuant to such a decision, the Board finds that appellant has failed to meet the requirement for standing set forth in 43 CFR 4.902 and the appeal must therefore be dismissed.

Appeal of Norrec, Inc., 3 ANCAB 89 (Oct. 24, 1978)

Where the State of Alaska has not selected lands within the lands in dispute in an appeal, the State cannot be found to claim a property interest in such lands, within the meaning of standing regulations in 43 CFR 4.902, by reason of a prior selection.

The test of standing to appeal under 43 CFR 4.902 is not whether a person is an "aggrieved party," but whether a person "claims a property interest in land affected by a determination from which an appeal to ANCAB is allowed."

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Appeals--Continued

Standing--Continued

While a "property interest" sufficient to confer standing under 43 CFR 4.902 need not be a vested interest, it may not be completely speculative.

Where the State's "interest" in a particular tract of land is based only on the possibility of a decision, at some future time, to select such land in preference to other land under the Statehood Act, the State's "interest" is too speculative to constitute a "property interest" under 43 CFR 4.902.

Appeal of State of Alaska, 3 ANCAB 196 (Apr. 11, 1979) 86 I.D. 225

Statement of Facts for Standing

Pursuant to 43 CFR Subpart J, 4.903(b)(2), within 30 days after filing of the Notice of Appeal, the appellant shall file with the Board a statement of facts upon which the appellant relies for standing.

Appeal of Cook Inlet Region, Inc., 2 ANCAB 166 (Nov. 16, 1977)

Statement of Reasons

Pursuant to 43 CFR Subpart J, 4.903(b)(1), if a Notice of Appeal does not include a Statement of Reasons for the appeal, such a statement shall be filed with the Board within 30 days after the Notice of Appeal was filed.

Appeal of Cook Inlet Region, Inc., 2 ANCAB 166 (Nov. 16, 1977)

The Board will accept appeals from decisions rejecting noncompetitive oil and gas lease offers based on conflicts with interim conveyances under ANCSA, but will dismiss such appeals after elapse of the 30-day period in which Statements of Reasons and Standing may be filed.

Appeal of Terry R. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Appeals of Ethel D. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antwell, 2 ANCAB 302 (Feb. 21, 1978)

Summary Dismissal

Absent another party aligned in interest with the appellant(s) or other reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant(s) before the Board withdraw(s) the appeal.

Appeal of Choggiung, Ltd., 2 ANCAB 181 (Dec. 16, 1977)

Appeal of Natives of Akhiok, Inc., 2 ANCAB 275 (Jan. 27, 1978)

An appeal will be summarily dismissed for lack of diligent prosecution when the appellant fails to file with the Board and to serve upon all persons required to be served, copies of the Notice of Appeal, Statement of Reasons, and other documents required to be filed with the Board in support of the appeal.

Appeal of Natalie Simeonoff, 1 ANCAB 116 (Aug. 10, 1976)

An appeal will be dismissed for lack of diligent prosecution when the appellant fails to comply with an order of the Board requiring a showing of cause or the filing of other documents.

Appeal of Leonard A. Sivertsen, 1 ANCAB 294 (Jan. 14, 1977)

The Board, in its discretion, will not summarily dismiss an appeal for failure to file a Statement of Standing merely because a Statement of Standing was not separately filed or separately labeled, where the timely filed Statement of Reasons clearly discloses the claim of property interests required for standing to appeal by 43 CFR 4.902.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Pursuant to 43 CFR Subpart J, 4.905, an appeal may, in the discretion of the Board, be dismissed for failure to file with the Board a Statement of Reasons and Statement of Standing as required by 43 CFR Subpart J, 4.903.

Appeal of Cook Inlet Region, Inc., 2 ANCAB 166 (Nov. 16, 1977)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board withdraws the appeal.

An appeal will be dismissed for lack of diligent prosecution when the appellant fails to comply with an Order of the Board requiring a showing of cause or the filing of other documents.

Appeal of William E. Torgramsen, 2 ANCAB 371 (May 9, 1978)

Appeal of Jack E. Alexander, 2 ANCAB 376 (May 9, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the remaining appellant before the Board withdraws its appeal.

Appeal of City of Kodiak and In the Matter of Port Lions Native Corp., 3 ANCAB 85 (Sept. 14, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board requests that the appeal be dismissed.

Appeal of J. Bruce Crow, 3 ANCAB 96 (Nov. 20, 1978)

Appeal of Doyon, Ltd., 3 ANCAB 105 (Dec. 11, 1978)

An appeal will be summarily dismissed when, in response to a motion to show cause, the appellant states in writing it has no objection to the dismissal.

Appeal of Kodiak Island Borough, 3 ANCAB 108 (Dec. 18, 1978)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant and all parties of record before the Board stipulate to a dismissal of the appeal.

Appeal of State of Alaska, Dept. of Transportation and Public Facilities, 3 ANCAB 124 (Jan. 5, 1979)

Appeal of the State of Alaska, 4 ANCAB 108 (Dec. 19, 1979)

An issue in an appeal will be dismissed for lack of diligent prosecution when a party fails to respond to an Order of this Board requiring a showing of cause why an issue should not be dismissed.

Appeal of State of Alaska, 3 ANCAB 129 (Jan. 19, 1979)
86 I.D. 45

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the appellant before the Board files a voluntary dismissal.

Appeal of Kenai Peninsula Borough, 3 ANCAB 258 (May 18, 1979)

Appeal of Pacific Pearl Seafoods, 3 ANCAB 383 (Sept. 25, 1979)

This Board does not have jurisdiction to adjudicate the Secretary's authority to withdraw lands for possible selection by a Native corporation pursuant to § 14(h)(8) of ANCSA.

Appeal of the State of Alaska, 3 ANCAB 285 (June 11, 1979)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the parties stipulate to a dismissal of the appeal.

Appeal of State of Alaska, Department of Transportation, 3 ANCAB 291 (June 29, 1979)

Appeal of the State of Alaska, 3 ANCAB 294 (July 10, 1979)

An appeal will be summarily dismissed when in response to a motion to show cause, the appellant states in writing it has no objections to the dismissal.

Appeal of Lone Star Industries, Inc., 3 ANCAB 321 (Aug. 17, 1979)

Absent reasons justifying continuance of the appeal, an appeal will be dismissed when the only appellant before the Board files a motion to dismiss its appeal.

Appeal of Doyon, Ltd., 4 ANCAB 110 (Dec. 19, 1979)

Waiver

Where Departmental regulations provide for the elapse of a 30-day appeal period before a decision to convey becomes final, waiver by one of a number of parties who might appeal does not render BLM's decision final so as to permit conveyance before elapse of the 30-day appeal period.

Proper filing of a Notice of Appeal during the 30-day appeal period will be treated as a revocation of a prior waiver of appeal rights.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

ALASKA NATIVE CLAIMS APPEAL BOARD--Continued

Dismissal

Generally

An appeal will be dismissed for lack of diligent prosecution when the appellant fails to file with the Board and to serve upon all parties required to be served a Statement of Facts for Standing as required by 43 CFR 4.903, or any other document which discloses a claim of property interest in land required for standing to appeal by 43 CFR 4.902, and further fails to comply with an Order of the Board requiring a showing of cause.

Appeal of Omar Stratman et al., 2 ANCAB 269 (Jan. 26, 1978)

Appeal of Omar Stratman et al., 2 ANCAB 272 (Jan. 26, 1978)

When a special use permit states that it expires on a specified date, the Board is bound by that language and will dismiss the permit holder from the appeal on the grounds that the permit holder no longer has a property interest affected after the expiration date of the permit.

When a person is made a necessary party to an appeal by the Board, is served with the Board's Order naming him as a necessary party, and subsequently neither files an appearance nor files an answer or reply within the time allotted by the Board, such person will be dismissed as a party to this appeal.

Appeal of Yak-Tat Kwaan, Inc., 3 ANCAB 182 (Mar. 20, 1979)

CONVEYANCES

Generally

For the purpose of determining whether or not the Secretary of the Interior retains jurisdiction to review easement interests reserved to the Federal Government, interim conveyance and patent, pursuant to 43 CFR 2650.0-5(h) and (i), are documents of equal significance in the granting of title under the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. IV, 1974), *as amended*, 89 Stat. 1145 (1976).

When an interim conveyance and/or patent has been issued pursuant to the Alaska Native Claims Settlement Act, the Secretary of the Interior and this Board lose all authority and jurisdiction over those interests in land which have been conveyed.

Pursuant to 43 CFR 2650.4-7(c)(1) and Secretarial Order No. 2982, the Secretary of the Interior does have jurisdiction to review those easement interests reserved to the Federal Government in an interim conveyance or patent issued under the Alaska Native Claims Settlement Act.

When an interim conveyance or patent has issued, the Secretary of the Interior is without jurisdiction to reserve any easements not originally contained in the conveyance, or to deprive the grantee of the interim conveyance or patent of any interest conveyed therein.

Appeal of Eklutna, Inc., 1 ANCAB 305 (Mar. 15, 1977)
84 I.D. 105

CONVEYANCES--Continued

Generally--Continued

For the purpose of determining whether or not the Secretary of the Interior retains jurisdiction to review easement interests reserved to the Federal Government, interim conveyance and patent are documents of equal significance in the granting of title under ANCSA.

When an interim conveyance has been issued pursuant to ANCSA, the Secretary of the Interior and ANCAB lose all authority and jurisdiction over those interests in the land which have been conveyed, and the Secretary is without jurisdiction to reserve any easements not originally contained in the conveyance or to deprive the grantee of the interim conveyance of any interests conveyed therein.

The Secretary retains jurisdiction pursuant to 43 CFR 2650.4-7(c)(1) and S.O. 2982, to review easements interests reserved to the Federal Government in an interim conveyance; and in the absence of regulations establishing a procedure for such review, the Board is not precluded from exercising the Secretary's authority to review easement reservations when such review is requested through appeal to the Board.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

In view of Secretarial policy to expedite conveyances under ANCSA by rejecting pending noncompetitive oil and gas lease offers which conflict in whole or in part with such conveyances, and in view of the Secretary's conclusion that oil and gas lease offerors do not have a "property interest in land" sufficient to convey standing under 43 CFR 4.902, an appeal by an offeror from a BLM decision rejecting an offer for a noncompetitive oil and gas lease will be dismissed.

Where BLM, in accord with Secretarial policy, rejects a noncompetitive oil and gas lease offer because of a conflict with a conveyance under ANCSA, such rejection by BLM constitutes final agency action from which no administrative appeal will lie by the offeror to the Board or to the Interior Board of Land Appeals.

Appeal of E. B. Wargo, 2 ANCAB 98 (July 15, 1977)

Appeal of William G. Zaegel, 2 ANCAB 115 (July 15, 1977)

Appeal of Terry B. Brize and J. Burglin, 2 ANCAB 126 (Aug. 4, 1977)

Appeal of Clifford C. Burglin, 2 ANCAB 134 (Aug. 4, 1977)

Where, pursuant to Departmental regulations, a party must claim a property interest in land affected by a decision in order to have standing to appeal such a decision, and the Secretary has found as a matter of law that a noncompetitive oil and gas lease offeror has no property interest in his offer, the Board finds that offerors for noncompetitive oil and gas leases do not have standing under 43 CFR 4.902 to appeal a BLM decision to issue conveyance to a Native Corporation under ANCSA.

Where interim conveyance has been issued for the lands embraced by oil and gas lease offers, the Department no longer has jurisdiction over the lands and has no authority to convey any interests in the lands, including mineral leases.

Sec. 22(i) of ANCSA, 43 U.S.C. § 1621(i) (1976), does not authorize the issuance of mineral leases on lands to be conveyed under ANCSA.

The Board vacates its previous ruling that BLM's rejection of a noncompetitive oil and gas lease offer, because of conflict with an ANCSA conveyance, constitutes final agency action from which no appeal will lie.

Appeal of Terry E. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

Where, pursuant to Departmental regulations, a party must claim a property interest in land affected by a decision in order to have standing to appeal such a decision, and the Secretary has found as a matter of law that a noncompetitive oil and gas lease offeror has no property interest in his offer, the Board finds that an offeror for a noncompetitive oil and gas lease does not have standing under 43 CFR 4.902 to appeal a BLM decision to reject his lease offer, or to issue a conveyance to a Native Corporation under ANCSA.

Where interim conveyance has been issued for the lands embraced by oil and gas lease offers, the Department no longer has jurisdiction over the lands and has no authority to convey any interests in the lands, including mineral leases.

Sec. 22(i) of ANCSA, 43 U.S.C. § 1621(i) (Supp. IV 1974), does not authorize the issuance of mineral leases on lands to be conveyed under ANCSA.

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Appeals of Ethyl D. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antwell, 2 ANCAB 302 (Feb. 21, 1978)

Valid existing rights held by third parties that lead to acquisition of title, must be identified in the conveyancing document and the land covered thereby excluded from the conveyance to the selecting Native corporation.

Appeal of Raymond A. Kreig, 3 ANCAB 168 (Mar. 9, 1979) 86 I.D. 189

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Where conditions of exploration and settlement explain the infrequency or limited nature of actual use of a water body for commercial purposes, evidence of private use may be considered to demonstrate susceptibility of commercial use for purposes of determining navigability.

Historic use of a water body by trappers may be properly considered in determining whether a water body has been used or is susceptible of use as a highway of commerce for purposes of navigability.

Where pole boats, tunnel boats, and outboard river boats constituted the customary modes of trade and travel on a river and its tributaries, the use of these watercraft may be appropriately considered in determining whether rivers in the area were used or are susceptible of being used as highways of commerce.

While recreational use, of itself, may not suffice to meet the susceptibility test for purposes of navigation for title, present use for recreation purposes may be properly considered, as a corroborating factor, in determining susceptibility for use as a highway of commerce.

Physical impediments to navigation, such as gravel bars, riffles, or occasional log jams, do not, in themselves, make a water body nonnavigable.

To be navigable, a river must be so situated and have such length and capacity as will enable it to accommodate the public generally as a means of transportation.

When the record shows that, historically, trapping was the primary reason for trade and travel in an area, and where the water body in question was commonly utilized by trappers as a route of trade and travel in boats of the period customarily used to freight supplies, such use will result in a finding that the water body has been used and is susceptible for use as a highway of commerce.

The presence of physical impediments on a water body will not result in a finding of nonnavigability when the record shows that the water body has been used and is capable of use as a highway of commerce.

The legal concept of navigability embraces both public and private interests. It is not to be determined by a formula which fits every type of stream under all circumstances and at all times.

Appeal of Doyon, Ltd., 4 ANCAB 50 (Dec. 14, 1979) 86 I.D. 692

Reconveyances

Municipal corporations, organized to provide necessary Government services, are beneficiaries of sec. 14(c) of ANCSA in that they receive title to lands they use and occupy, and to additional lands for community expansion.

The Municipality's interest in lands improved for recognized public purposes is protected by sec. 14(c)(3) of ANCSA because the Municipality occupies the same position with regard to Eklutna as the local Government entities envisioned by Congress in enacting such reconveyance provision and the disputed land, while outside Eklutna Village, is within the village withdrawal area and has been improved for a public purpose.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976) 83 I.D. 619

Until a village corporation makes its determination of an appellant's rights claimed under § 14(c) of ANCSA (85 Stat. 688, 703, 43 U.S.C. §§ 1601, 1613(c) (Supp. I 1977)), there is no way to determine if a dispute exists

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

CONVEYANCES--Continued

Reconveyances--Continued

between a person claiming under § 14(c) and the village corporation.

An appeal based on interests created by § 14(c) of ANCSA, filed prior to issuance of interim conveyance to the appropriate village corporation, is premature, and the Board lacks jurisdiction to hear such an appeal.

Interim conveyance and patent are documents of equal significance in the granting of title under ANCSA, and when interim conveyance has been issued, the Secretary and this Board lose jurisdiction over those interests in land which has been conveyed.

There is no administrative appeal process available to claimants under § 14(c) of ANCSA, and such claims must be brought in a judicial forum.

A reservation in a decision to convey, stating that conveyance to the village corporation is subject to the requirements of § 14(c) of ANCSA, protects rights in use and occupancy of the land, if any, claimed by the appellant under § 14(c), until the village corporation makes a determination as to the appellant's rights under § 14(c).

Appeal of James W. Lee, 3 ANCAB 334 (Aug. 31, 1979)

The appellant's possible rights to a reconveyance under § 14(c)(1) of ANCSA are not decided by the Board or affected by this decision.

Appeal of Carmel J. McIntyre, 4 ANCAB 24 (Nov. 30, 1979) 86 I.D. 663

Valid Existing Rights

All lands leased prior to Dec. 18, 1971, pursuant to open-to-entry leases which are valid on their face must be excluded from conveyances to Native corporations.

The date upon which parties to an open-to-entry lease acknowledge their signing of the lease does not effect the facial validity of the lease instrument, even though the acknowledgment date is subsequent to the effective date of ANCSA.

Appeal of Ouzinkie Native Corp., 4 ANCAB 3 (Oct. 31, 1979) 86 I.D. 618

All lands leased prior to Dec. 18, 1971, pursuant to open-to-entry leases which are valid on their face must be excluded from conveyances to Native corporations.

Appeal of William J. and Jean H. Schwaab, 4 ANCAB 17 (Oct. 31, 1979)

DEFINITIONS

Generally

"Public lands" are defined in sec. 3(e) of the Alaska Native Claims Settlement Act, as follows: "'Public lands' means all Federal lands and interests therein located in Alaska except: (1) the smallest practicable tract, as determined by the Secretary, enclosing land actually used in connection with the administration of any Federal installation, and (2) land selections of the State of Alaska which have been patented or tentatively approved under sec. 6(g) of the Alaska Statehood Act, *as amended* (72 Stat. 341, 77 Stat. 223), or identified for selection by the State prior to Jan. 17, 1969." The "except" clause contained in the definition of public lands in sec. 3(e) of ANCSA must be read as an expression of Congressional intent not to include particular lands rather than as an "exception" from lands included in the general definition of public lands.

The definition of public lands in sec. 3(e) cannot be interpreted to mean that all classes of State land in Alaska are *necessarily* "Federal lands or interests therein" unless such classes of lands are specifically excepted within the definition itself.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65 (July 1, 1976) 83 I.D. 461

Lands on which the United States has issued patent either to the State or to a private individual are not within the definition of "public lands" in sec. 3(e) of ANCSA, were not withdrawn by sec. 11 of ANCSA, and therefore are not available for selection under ANCSA.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Land Selections

Lands conveyed to private parties by quitclaim deeds issued by the General Services Administration pursuant to the Federal Property and Administrative Services Act of 1949, *as amended*, 40 U.S.C. § 471 *et seq*. (1970), have ceased to be "Federal lands and interests therein;" are not within the definition of "public lands" in sec. 3(e) of ANCSA; and are, therefore, not available for selection.

Appeal of Ounalashka Corp., 1 ANCAB 104 (July 13, 1976) 83 I.D. 475

Public Lands

Lands withdrawn pursuant to ANCSA are held for the benefit of Indians, Aleuts, and Eskimos, and thus are not "public lands" within the scope of the Federal Land Policy and Management Act (FLPMA), 43 U.S.C. §§ 1701-1782 (1976). 43 U.S.C. § 1702(e) (1976).

Appeal of Alaska Railroad, 3 ANCAB 273 (June 7, 1979) 86 I.D. 397

On reconsideration, the Board vacates its prior holdings that lands withdrawn under the Alaska Native Claims Settlement Act, 85 Stat. 688, *as amended*, 43 U.S.C. §§ 1601-1628 (1976 and Supp. I 1977), are lands held for the benefit of Indians, Aleuts and Eskimos and thus are not "public lands" within the scope of FLPMA, *supra*, and that FLPMA does not apply to such lands.

Appeal of the Alaska Railroad (On Reconsideration), 3 ANCAB 351 (Sept. 18, 1979) 86 I.D. 452

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

DISENROLLMENT

Computation of Time for Filing and Service

Except as otherwise provided by law, in computing any period of time prescribed for filing and serving a document, the day upon which the decision or document to be appealed from or answered was served or the day of any other event after which the designated period of time begins to run is not to be included, unless it is a Saturday, Sunday, Federal legal holiday, or other nonbusiness day, in which event the period runs until the end of the next day which is not a Saturday, Sunday, Federal legal holiday, or other nonbusiness day.

Henry Sam Littlefield, Jr., 7 IBIA 128 (Mar. 30, 1979)
86 I.D. 217

EASEMENTS

Generally

Prior to the conveyance of any land pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. § 1601 (1970)) (ANCSA) the Secretary must make a determination of which public easements are necessary and the Secretary must reserve those easements in the conveyance.

The Secretary has authority to reserve public easements in conveyances under ANCSA (43 U.S.C. § 1601 (1970)) other than those easements identified and recommended by the Joint Federal State Land Use Planning Commission.

The authority of the Secretary to reserve easements in conveyances under ANCSA is not limited to those public easements specifically listed in sec. 17(b)(1) of that Act.

The Secretary is not limited to reservation of easements in conveyances under ANCSA which cross the patented lands from one boundary to another. The easements may be for uses within the patented lands.

Easement Reservations in Conveyances to Alaska Native Corporations under ANCSA, M-36880 (July 8, 1975)
82 I.D. 325

Review

For the purpose of determining whether or not the Secretary of the Interior retains jurisdiction to review easement interests reserved to the Federal Government, interim conveyance and patent, pursuant to 43 CFR 2650.0-5(h) and (i), are documents of equal significance in the granting of title under the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. IV, 1974), *as amended*, 89 Stat. 1145 (1976).

Pursuant to 43 CFR 2650.4-7(c)(1) and Secretarial Order No. 2982, the Secretary of the Interior does have jurisdiction to review those easement interests reserved to the Federal Government in an interim conveyance or patent issued under the Alaska Native Claims Settlement Act.

Under 43 CFR Part 4, Subpart J, and 43 CFR 2650 appeals to the Secretary under ANCSA relating to land selection are to the Alaska Native Claims Appeal Board. In the absence of regulations establishing a procedure by which the Secretary will review easements reserved in conveyances as contemplated by 43 CFR 2650.4-7(c)(1) and Secretarial Order No. 2982, the Board is not precluded from exercising the Secretary's authority to review easement reservations when such review is requested through an appeal to the Board.

When an interim conveyance or patent has issued, the Secretary of the Interior is without jurisdiction to reserve any easements not originally contained in the conveyance, or to deprive the grantee of the interim conveyance or patent of any interest conveyed therein.

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

EASEMENTS--Continued

Review--Continued

Appeal of Eklutna, Inc., 1 ANCAB 305 (Mar. 15, 1977)
84 I.D. 105

For the purpose of determining whether or not the Secretary of the Interior retains jurisdiction to review easement interests reserved to the Federal Government, interim conveyance and patent are documents of equal significance in the granting of title under ANCSA.

The Secretary retains jurisdiction pursuant to 43 CFR 2650.4-7(c)(1) and S.O. 2982, to review easement interests reserved to the Federal Government in an interim conveyance; and in the absence of regulations establishing a procedure for such review, the Board is not precluded from exercising the Secretary's authority to review easement reservations when such review is requested through appeal to the Board.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

ENROLLMENT

Metlakatla Natives

No person enrolled in the Metlakatla Indian Community of the Annette Islands Reserve as of Apr. 1, 1970, shall be eligible for enrollment under the Act.

Henry Sam Littlefield, Jr., 7 IBIA 128 (Mar. 30, 1979)
86 I.D. 217

The appearance of one's name on the Metlakatla Indian community rolls of the Annette Islands Reserve in 1976 in itself is not conclusive of membership status. However, that fact considered in conjunction with other evidence indicating active involvement and contact with the community over the years including the year 1970 does not constitute continuous absence from the community.

Absent active involvement and contact and continuous absence of 2 years prior to Apr. 1, 1970, by a minor born outside the Metlakatla community and having never resided therein constitutes forfeiture of membership in the community, derived solely through a parent member of that community.

Alaska Native Disenrollment Appeals of: James Edward Scott, Sr., and Robert Charles Scott, 7 IBIA 157 (June 21, 1979)
86 I.D. 333

INDIAN RESIDENCE ALLOTMENT

Once made, an election to apply under sec. 14(h)(5) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1613(h)(5) (Supp. III 1973) in lieu of a Native allotment application, is irrevocable.

Dwight Tevuk (Deceased), 22 IBLA 296 (Nov. 3, 1975)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

INDIAN RESIDENCE ALLOTMENT--Continued

The filing of an option form by an Alaska Native to receive his "primary place of residence" pursuant to sec. 14(h)(5) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1613(h)(5) (Supp. III, 1973), does not terminate a prior allotment application filed under the Native Allotment Act, 43 U.S.C. § 270-1 (1970). Allowance of an application under either act renders the applicant ineligible for allowance of the other application.

Pursuant to 43 CFR 2653.8-3, appeals from decisions made by the Bureau of Land Management on applications filed pursuant to sec. 14(h)(5) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1613(h)(5) (Supp. III, 1973), "shall be made to the Alaska Native Claims Appeals Board."

Dwight Tevuk (Deceased) (On Reconsideration), 29 IBLA 160 (Mar. 9, 1977)

LAND SELECTIONS

Generally

Selection of lands by Native Village Corporations pursuant to provisions of sec. 12(a) of ANCSA is not permitted outside of lands withdrawn by provisions of sec. 11(a)(1) as they relate to the location of the selecting village.

Failing to select land available within its sec. 11(a)(1) withdrawal, a Native Village Corporation cannot by giving consent and waiver to another Native Village Corporation make said lands available for selection under provision of sec. 12(a) of ANCSA.

Appeal of English Bay Corp., 1 ANCAB 35 (June 4, 1976)
83 I.D. 454

Where BLM's determination that lands are "property" not suitable for return to the public domain pursuant to the Federal Property and Administrative Services Act of 1949, 40 U.S.C. § 472(d) (1970), is not challenged, and the Administrator of the General Services Administration concurs, such determination and concurrence transfer the land from the administrative jurisdiction of the Department of the Interior to that of GSA.

Appeal of Ounalashka Corp., 1 ANCAB 104 (July 13, 1976)
83 I.D. 475

Where an unlisted Native village qualified under sec. 11(b)(3) of ANCSA is subsequently annexed by a first class or home-rule city, which is not a Native village, such village does not by reason of such annexation become one and the same as the city so as to enable selection of land under 43 CFR 2650.6(a).

Provision of sec. 12(a)(2) of ANCSA and regulations in 43 CFR 2651.4(b) requiring selections to be "contiguous and in reasonably compact tracts," is limited to lands that are otherwise available for selection under ANCSA and has no application so as to make available lands which are prohibited from being selected under provisions of sec. 22(*l*) of ANCSA.

Appeal of Eyak Corp., 1 ANCAB 132 (Sept. 9, 1976)
83 I.D. 484

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Generally--Continued

A withdrawal of public lands for a utility and transportation corridor under sec. 17(c) of the Alaska Native Claims Settlement Act, subject to valid existing rights, precludes selection of those lands by a Native group under sec. 14(h) of the Alaska Native Claims Settlement Act.

Appeal of Wisenak, Inc., 1 ANCAB 157 (Sept. 15, 1976)
83 I.D. 496

The provisions of sec. 12(a)(2) of ANCSA and regulations in 43 CFR 2651.4 that lands selected--"be contiguous and in reasonably compact tracts"--are not inconsistent with a finding that townships are property withdrawn under secs. 11(a)(1)(B) or (C) though actual physical cornering is prevented due to a township-offset resulting from location of a "standard parallel."

Appeal of Eklutna, Inc., 1 ANCAB 165 (Sept. 28, 1976)
83 I.D. 500

Under 43 CFR, Part 4, 4.1(5) and Subpart J, the Alaska Native Claims Appeal Board has jurisdiction over an appeal by the State of Alaska from an adverse decision of the Bureau of Land Management on a land selection application pursuant to the Alaska Statehood Act when the BLM's adverse decision is based upon a construction of the provisions of the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. IV 1974), *as amended*, 89 Stat. 1145 (1976).

The State of Alaska has standing to appeal a Decision of the Bureau of Land Management to the Alaska Native Claims Appeal Board as a party "who claims a property interest in land affected" by a Decision of the Bureau of Land Management, within the meaning of 43 CFR 4.902, when the BLM Decision vacates the tentative approval previously given to the State's selection and rejects the State's land selection application filed under the Alaska Statehood Act because of a conflict with the provisions of the Alaska Native Claims Settlement Act.

The Decision of the Bureau of Land Management vacating the previously granted tentative approval and rejecting the land selection application of the State of Alaska must be vacated and remanded for further proceedings when it does not appear that the land selection application by the Native Corporation has been adjudicated.

Appeal of the State of Alaska, 1 ANCAB 281 (Dec. 20, 1976)
83 I.D. 685

As of Dec. 18, 1975, lands withdrawn under sec. 11(a)(1) or sec. 11(a)(3) and not selected under secs. 12 or 19 of the Act, became lands outside the areas withdrawn by sec. 11 and became available for selection as a primary place of residence under sec. 14(h)(5).

An applicant who filed an application for a primary place of residence within the time limits set forth by sec. 14(h)(5) and 43 CFR 2653.8 on land which was withdrawn by sec. 11(a)(1) or sec. 11(a)(3) as of the date of filing, shall not have his application rejected pursuant to 43 CFR 2091.1 as a premature filing when Departmental regulations specifically permit the selection of formerly withdrawn land after Dec. 18, 1975, but do not permit a primary place of residence applicant to refile his application.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977)
84 I.D. 891

LAND SELECTIONS--Continued

Generally--Continued

Lands available for selection by a Regional Corporation under sec. 12 of ANCSA are limited to those lands withdrawn pursuant to sec. 11 of ANCSA.

Sec. 17(d)(2)(E) of ANCSA is not intended to provide lands for selection by a Regional Corporation in addition to lands withdrawn for selection pursuant to sec. 11 of ANCSA. Sec. 17(d)(2)(E), rather, is intended to postpone the time within which the Regional Corporations may receive patent to any lands under dual withdrawal until Congress has first acted upon the same or has failed to act within the 5-year period mandated by sec. 17(d)(2)(D).

Appeal of Doyon, Ltd., 2 ANCAB 336 (Mar. 22, 1978)

Conveyances

The interests described in sec. 14(g) of ANCSA are of a temporary or limited nature, in contrast to those interests derived from laws leading to a grant of fee title such as the entries protected by sec. 22(b). Inclusion in Native conveyances of lands subject to such interests, under administrative arrangements outlined in sec. 14(g) is appropriate, because such temporary or limited interests are not incompatible with Native ownership of the fee.

Leases issued for the surface or minerals covered by a Native selection constitute a valid existing right protected by sec. 14(g) of ANCSA and any conveyance to a Native Corporation of lands on which such a lease has issued must be subject to the leasehold interest.

State-issued permits and contracts for resource uses issued to third parties before Dec. 18, 1971, are protected as valid existing rights under sec. 14(g) of ANCSA, and any conveyance to a Native Corporation of lands on which such permits or contracts have been issued must be subject to such interests.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Easements

Generally

Where the Bureau of Land Management has developed new procedures for the reservation and identification of easements subsequent to issuance of a Decision to Convey, the Board will remand the Decision to Convey to the Bureau of Land Management for the limited purpose of identifying the easements reserved in the Decision to Convey under appeal according to the uniform easement identification system currently being followed.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Description

Description of easements solely by reference to a BLM or State Division of Lands case file number is not sufficient to meet the requirements of sec. 17(b) of ANCSA, regulations promulgated thereunder, and Secretarial Order No. 2982.

Decisions to convey and interim conveyances should, as a minimum state the use for which each easement is reserved, state the width of each easement, state at least the sections through which an easement passes or if a site easement, the section or sections in which the easement is located; alternatively, the easement could be located by incorporating in the conveyance document a map depicting the easement.

LAND SELECTIONS--Continued

Easements--Continued

Description--Continued

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Entrymen

Sec. 22(b) is specific and unambiguous, reflecting the concern of Congress for a class of persons carefully described: *i.e.*, entrymen under the Federal public land laws governing homesteads, headquarters sites, trade and manufacturing sites, and small tract sites.

Sec. 22(b) of ANCSA is not applicable to, and does not protect, the Municipality because having an interest created by the State of Alaska under State law, it is not an entryman under Federal public land laws leading to acquisition of title to homesteads, headquarters sites, trade and manufacturing sites, or small tract sites.

ANCSA protects as "valid existing rights," those rights, whether derived from the State or Federal Government, which do not lead to a grant of fee title and which were created prior to enactment of ANCSA. Rights leading to a fee, which had vested prior to enactment, would not be subject to Congressional disposal and would be excluded from withdrawals for Native selection. Rights of entrymen leading to grant of a fee under Federal public land laws, which had not vested prior to enactment of ANCSA, are treated by ANCSA as if vesting had occurred and are not categorized as "valid existing rights."

The interests described in sec. 14(g) of ANCSA are of a temporary or limited nature, in contrast to those derived from laws leading to a grant of fee title such as the entries protected in sec. 22(b), and, therefore, are not incompatible with Native fee ownership of the land.

The Municipality is not protected under sec. 14(g) of ANCSA because its interest leads to grant of fee title by the State, if the State were able to issue patent; such an interest is incompatible with conveyance to a Native grantee as contemplated by sec. 14(g).

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976) 83 I.D. 619

ANCSA protects, as "valid existing right," those rights, whether derived from the State or Federal Government, which do not lead to a grant of fee title and which were created prior to enactment of ANCSA. Rights leading to a fee, which had vested prior to enactment, would not be subject to Congressional disposal and would be excluded from withdrawals for Native selection. Rights of entrymen leading to a grant in fee under Federal public land laws, which had not vested prior to ANCSA, are treated by ANCSA as if vesting had occurred and are not categorized as "valid existing rights."

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Primary Place of Residence

In the absence of evidence that a primary place of business of a Native applicant would also qualify as a primary place of residence within the meaning of sec. 14(h) of ANCSA and the regulations in 43 CFR 2650, *as amended*, 41 FR 14734 (Apr. 7, 1976), neither the Bureau of Land Management nor this Board have jurisdiction to adjudicate the merits of a primary place of business application under sec. 14(c)(1) of ANCSA.

Appeal of Natalie Simeonoff, 1 ANCAB 116 (Aug. 10, 1976)

Proof

The data upon which BLM has relied as the basis for compiling a protraction diagram will be deemed sufficient to determine boundaries of lands affected by the provisions of sec. 22(l) of ANCSA unless controverted by specific showing of error.

Appeal of Eyak Corp., 1 ANCAB 132 (Sept. 9, 1976)
83 I.D. 484

Regional Corporations

A land selection application filed pursuant to secs. 12(b)(1), 12(b)(3), and 14(h)(1) of the Alaska Native Claims Settlement Act must conform to the regulations promulgated under the statute as enacted at the time the application is filed unless a later amendment to the statute provides otherwise.

Neither P.L. 94-204 (89 Stat. 1145, 43 U.S.C. § 1611 (Supp. IV 1974)), nor the Terms & Conditions incorporated in the amendment, contain language which conflicts with, excludes, or preempts ANCSA regulations 43 CFR 2650.2(e)(1) and (2) requiring a legal description of lands applied for pursuant to ANCSA, or 43 CFR 2653.5(f) requiring a description and location of historical sites selected pursuant to sec. 14(h)(1) of ANCSA.

A land selection application filed pursuant to secs. 12(a)(1), 12(a)(3), and 14(h)(1) of ANCSA containing only a metes and bounds description of the exterior boundaries of a region, does not meet the requirements for a legal description of 43 CFR 2650.2(e)(1) and (2) and 2653.5(f).

A land selection determined finally to be invalid pursuant to ANCSA or its implementing regulations is not protected within the meaning of sec. 22(h)(1) after the date of terminations.

Appeal of Cook Inlet Region, Inc., 3 ANCAB 111 (Dec. 27, 1978)
85 I.D. 462

Section 14(c)

The reservation in the decision to convey, stating that conveyance to the Village Corporation is subject to the requirements of sec. 14(c) of ANCSA, protects rights in use and occupancy of the land, if any, claimed by appellants under sec. 14(c), until the date of the patent of the land to the Village Corporation, at which time the village must make a determination as to these appellants' rights under sec. 14(c).

Until such time as the Village Corporation makes a determination of the appellants' rights claimed under sec. 14(c) of ANCSA, this Board lacks jurisdiction to hear appellants' appeal concerning such rights.

Appeal of Kodiak Island Setnetters Ass'n, 3 ANCAB 1 (June 12, 1978)
85 I.D. 200

Appeal of Mark A. Wartes et al., 3 ANCAB 21 (June 21, 1978)

Appeal of Mr. & Mrs. G. Gregory Moo, 3 ANCAB 27 (June 26, 1978)

The reservation in the decision to convey, stating that conveyance to the Village Corporation is subject to the requirements of sec. 14(c) of ANCSA, protects whatever rights appellant may have pursuant to sec. 14(c), until the date of the patent of the land to the Village Corporation, at which time the village must make a determination as to the appellant's rights under sec. 14(c).

Until such time as the Village Corporation makes a determination of the appellant's rights claimed under sec. 14(c) of ANCSA, this Board lacks jurisdiction to hear appellants' appeal concerning such rights.

Appeal of Kodiak Island Borough, 3 ANCAB 65 (July 11, 1978)

State Interests

Generally

The Municipality, as grantee of the State, could not acquire greater interests than its grantor and could not, prior to ANCSA, acquire equitable title; accordingly, any protection or priority afforded the Municipality must be statutory, conferred by ANCSA.

The Municipality is organized and may be dissolved under State law and presently has the power to exercise governmental functions including the acquisition, management, and disposal of land independent of control by the State. Until revoked or modified by constitutional or legislative amendment, such powers remain in force and render the Municipality an entity separate from the State for purposes of holding third-party interests under ANCSA.

Because the State was not prohibited by sec. 6(g) of the Statehood Act from granting tentatively approved lands to local governments, and neither the Statehood Act nor selection procedures in A.S. 29.18.190 require payment of consideration, the Municipality's interest in the disputed lands does not fail for lack of consideration.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

Where the State had not acquired equitable title to tentatively approved land selections within village withdrawal areas prior to ANCSA, a grantee of the State could not acquire a greater interest than its grantor and could not, prior to ANCSA, acquire equitable title sufficient to deprive Congress of power to dispose of the land in settlement of Native claims. Accordingly, any protection or priority afforded to third-party interests in the disputed lands must be statutory, conferred by ANCSA.

"Valid existing rights" protected by ANCSA include not only interests created by the Federal Government, but may also include interests created by the State of

Alaska so long as the latter are not interests leading to acquisition of fee title.

Open-to-entry leases issued by the State of Alaska pursuant to A.S. 38.05.077 are protected as valid existing rights by the specific terms of sec. 14(g) of ANCSA because they are leases issued under sec. 6(g) of the Alaska Statehood Act.

Where open-to-entry leases contain no provisions to purchase the leased land, but provide only for renewal upon expiration of a five-year term, the right of purchase asserted under A.S. 38.05.077 is not granted by the lease within the terms of sec. 14(g) of ANCSA, but appears to be an associated preference right granted in connection with the leasing program to individuals holding such leases.

Where the asserted right to purchase lands held under an open-to-entry lease can be exercised under State statutes only if the lease is relinquished, relinquishment of the lease and subsequent issuance of patent to the land would constitute a new interest created subsequent to ANCSA, contrary to sec. 11(a)(2) which specifically withdraws lands TA'd to the State "from the creation of third-party interests under the Alaska Statehood Act."

The State may not extend a preference right to purchase lands under an open-to-entry lease program to which a Native Corporation will hold title; although a Native Corporation, succeeding under sec. 14(g) to the interest of the State as lessor, may wish to sell the leased land to the lessee, the Board finds no mechanism in ANCSA for the enforcement of such a right in the lessee against a Native patentee.

When an interest in land selected by and tentatively approved to the State of Alaska was transferred from one State agency to another, the complete interest remained subject to the withdrawal and selection provisions of sec. 11(a) and sec. 12 of ANCSA; thus transfer by the State of a permit to extract natural resources from the State Division of Lands to the State Division of Aviation does not place the State in the position of a protected third party under ANCSA.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Inasmuch as the disputed gravel free use permits were transferred from one State agency, the Division of Lands, to another State agency, the Department of Highways, they do not constitute third-party interests protected as valid existing rights under § 14(g) of ANCSA.

Appeal of Chugach Natives, Ltd., 3 ANCAB 325 (Aug. 17, 1979) 86 I.D. 392

Statehood Act Selections

Generally

Under 43 CFR, Part 4, 4.1(5) and Subpart J, the Alaska Native Claims Appeal Board has jurisdiction over an appeal by the State of Alaska from an adverse decision of the Bureau of Land Management on a land selection application pursuant to the Alaska Statehood Act when the BLM's adverse decision is based upon a construction

of the provisions of the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. IV 1974), *as amended*, 89 Stat. 1145 (1976).

The State of Alaska has standing to appeal a Decision of the Bureau of Land Management to the Alaska Native Claims Appeal Board as a party "who claims a property interest in land affected" by a Decision of the Bureau of Land Management, within the meaning of 43 CFR 4.902, when the BLM Decision vacates the tentative approval previously given to the State's selection and rejects the State's land selection application filed under the Alaska Statehood Act because of a conflict with the provisions of the Alaska Native Claims Settlement Act.

Appeal of the State of Alaska, 1 ANCAB 281 (Dec. 20, 1976) 83 I.D. 685

Tentative Approvals

Prior to ANCSA, the State's interest in its tentatively approved selections was subject to divestment upon proof of Native use and occupancy, and was subject to Congressional resolution of such claims. Unadjudicated claims of aboriginal title remained the only impediment to selection of such lands.

The express terms of secs. 11 and 12 of ANCSA make lands previously TA'd to the State of Alaska available for selection by qualified Native Corporations, indicating the conclusion of Congress that such lands were subject to disposal in settlement of Native claims.

ANCSA provides in secs. 11(a)(2) and 12(a)(1) that each village may select up to 69,120 acres of its total entitlement from TA'd lands within the area, usually 25 townships, surrounding the village. Such State TA's, already encumbered by aboriginal title to lands on which use and occupancy could be proved, were now subject to a statutory prior right of selection by village corporations; a Native right of selection, based not on aboriginal title, but on Congressional grant in ANCSA.

The retroactive extinguishment of aboriginal title, and the resulting validation of State title, mandated by sec. 4(a) of ANCSA, applies to those lands tentatively approved to the State which are located outside Native village withdrawal areas.

Extinguishment of aboriginal title did not vest the State's title to those TA'd lands located *within* sec. 11(a)(2) withdrawal areas, for Congress clearly conferred on Native village corporations a superior right to select up to 69,120 acres of such lands.

The State's interest in TA'd lands located within sec. 11(a)(2) withdrawal areas did not vest prior to ANCSA, and did not vest subsequent to ANCSA as to lands properly selected by village corporations within the 3-year period mandated by sec. 12(a).

The State's interest vests in those TA'd lands within sec. 11(a)(2) withdrawals *not* selected by village corporations within statutory deadlines, for, upon completion of Native selections, the last encumbrance on the State's title is removed.

In withdrawing lands around villages tentatively approved to the State, Congress rejected the State's

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

State Interests--Continued

Statehood Act Selections--Continued

Tentative Approvals--Continued

contention that tentative approval vested title in the State, and in consequence rejected the title the State had relied upon to dispose of TA'd lands to third parties.

Secs. 11(a)(1) and 11(a)(2) of ANCSA direct withdrawals for village selections to be made subject to valid existing rights. The withdrawal of State TA'd lands in sec. 11(a)(2) impliedly recognizes the existence of third-party interests created by the State prior to ANCSA, by prohibiting the creation of such interests subsequent to the withdrawal.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

ANCSA provides in secs. 11(a)(2) and 12(a)(1) that each village may select up to 69,120 acres of its total entitlement from TA'd lands surrounding the village. Such State TA's, already encumbered by aboriginal title to lands on which use and occupancy could be proved, were not subject to a statutory prior right of selection by Village Corporations; a Native right of selection, based not on aboriginal title, but on Congressional grant in ANCSA.

The retroactive extinguishment of aboriginal title, and the resulting validation of State title, mandated by sec. 4(a) of ANCSA, applies to those lands tentatively approved to the State which are located outside Native village withdrawal areas.

Extinguishment of aboriginal title did not vest the State's title to those TA'd lands located within sec. 11(a)(2) withdrawal areas, for Congress clearly conferred on Native Village Corporations a superior right to select up to 69,120 acres of such lands.

The State's interest in TA'd lands located within sec. 11(a)(2) withdrawal areas did not vest prior to ANCSA, and did not vest subsequent to ANCSA as to lands properly selected by Village Corporations within the three-year period mandated by sec. 12(a).

The State's interest vests in those TA'd lands within sec. 11(a)(2) withdrawals not selected by Village Corporations within statutory deadlines, for, upon completion of Native selections, the last encumbrance on the State's title is removed.

In withdrawing sec. 11(a)(2) lands tentatively approved to the State, Congress rejected the State's contention that tentative approval vested equitable title in the State, and in consequence rejected the title the State had relied upon to dispose of TA'd lands to third parties.

Where the claimed "valid existing rights" were created by the State on lands tentatively approved to the State under the Statehood Act, the adjudication of the State's selection must be consolidated with the adjudication of the native land selection, and valid existing rights in the land must be determined in a single decision.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Survey

Pursuant to provisions of sec. 13 of ANCSA and regulations in 43 CFR 2650.5, selection of lands shall be in conformance with the United States Survey System. Therefore, those provisions which apply to the rectangular system of surveys as provided in 43 U.S.C. §§ 751-774 (1970), are applicable to selection made under ANCSA.

The smallest legal subdivision authorized pursuant to the rectangular system of surveys of the public lands, 43 U.S.C. §§ 751-774 (1970), is a quarter quarter section.

Unless all of the smallest legal subdivision, i.e., 1/4 1/4 of section, is within the prohibited 2-mile distance from the city boundary, BLM shall not reject said land for selection as being contrary to provisions of sec. 22(l) of ANCSA.

Appeal of Eyak Corp., 1 ANCAB 132 (Sept. 9, 1976)
83 I.D. 484

Third-Party Interests

The Municipality, as grantee of the State, could not acquire greater interests than its grantor and could not, prior to ANCSA, acquire equitable title; accordingly, any protection or priority afforded the Municipality must be statutory, conferred by ANCSA.

The Municipality is organized and may be dissolved under State law and presently has the power to exercise governmental functions including the acquisition, management, and disposal of land independent of control by the State. Until revoked or modified by constitutional or legislative amendment, such powers remain in force and render the Municipality an entity separate from the State for purposes of holding third-party interests under ANCSA.

Because the State was not prohibited by sec. 6(g) of the Statehood Act from granting tentatively approved lands to local governments, and neither the Statehood Act nor selection procedures in A.S. 29.18.190 require payment of consideration, the Municipality's interest in the disputed lands does not fail for lack of consideration.

Sec. 22(b) of ANCSA is not applicable to, and does not protect, the Municipality because having an interest created by the State of Alaska under State law, it is not an entryman under Federal public land laws leading to acquisition of title to homesteads, headquarters sites, trade and manufacturing sites, or small tract sites.

Secs. 11(a)(1) and 11(a)(2) of ANCSA direct withdrawals for village selections to be made subject to valid existing rights. The withdrawal of State TA'd lands in sec. 11(a)(2) impliedly recognizes the existence of third-party interests created by the State prior to ANCSA, by prohibiting the creation of such interests subsequent to the withdrawal.

The Municipality is not protected under sec. 14(g) of ANCSA because its interest leads to grant of fee title by the State, if the State were able to issue patent; such an interest is incompatible with conveyance to a Native grantee as contemplated by sec. 14(g).

Municipal corporations, organized to provide necessary Government services, are beneficiaries of sec. 14(c) of ANCSA in that they receive title to lands they use and occupy, and to additional lands for community expansion.

The Municipality's interest in lands improved for recognized public purposes is protected by sec. 14(c)(3) of ANCSA because the Municipality occupies the same position with regard to Eklutna as the local Government entities envisioned by Congress in enacting such reconveyance provision and the disputed land, while outside Eklutna Village, is within the village withdrawal area and has been improved for a public purpose.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976) 83 I.D. 619

Where the State had not acquired equitable title to tentatively approved land selections within village withdrawal areas prior to ANCSA, a grantee of the State could not acquire a greater interest than its grantor and could not, prior to ANCSA, acquire equitable title sufficient to deprive Congress of power to dispose of the land in settlement of Native claims. Accordingly, any protection or priority afforded to third-party interests in the disputed lands must be statutory, conferred by ANCSA.

Open-to-entry leases issued by the State of Alaska pursuant to A.S. 38.05.077 are protected as valid existing rights by the specific terms of sec. 14(g) of ANCSA because they are leases issued under sec. 6(g) of the Alaska Statehood Act.

Where open-to-entry leases contain no provisions to purchase the leased land, but provide only for renewal upon expiration of a five-year term, the right of purchase asserted under A.S. 38.05.077 is not granted by the lease within the terms of sec. 14(g) of ANCSA, but appears to be an associated preference right granted in connection with the leasing program to individuals holding such leases.

Where the asserted right to purchase lands held under an open-to-entry lease can be exercised under State statutes only if the lease is relinquished, relinquishment of the lease and subsequent issuance of patent to the land would constitute a new interest created subsequent to ANCSA, contrary to sec. 11(a)(2) which specifically withdraws lands TA'd to the State "from the creation of third-party interests under the Alaska Statehood Act."

The State may not extend a preference right to purchase lands under an open-to-entry lease program to which a Native Corporation will hold title; although a Native Corporation, succeeding under sec. 14(g) to the interest of the State as lessor, may wish to sell the leased land to the lessee, the Board finds no mechanism in ANCSA for the enforcement of such a right in the lessee against a Native patentee.

When an interest in land selected by and tentatively approved to the State of Alaska was transferred from one State agency to another, the complete interest remained subject to the withdrawal and selection provisions of sec. 11(a) and sec. 12 of ANCSA; thus transfer by the State of a permit to extract natural resources from the State Division of Lands to the State Division of Aviation does not place the State in the position of a protected third party under ANCSA.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Sec. 22(i) of ANCSA, 43 U.S.C. § 1621(i) (1976), does not authorize the issuance of mineral leases on lands to be conveyed under ANCSA.

Appeal of Terry E. Krize and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Appeal of Jerry S. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Appeals of Ethyl D. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antweil, 2 ANCAB 302 (Feb. 21, 1978)

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 7, 1978)

Inasmuch as the disputed gravel free use permits were transferred from one State agency, the Division of Lands, to another State agency, the Department of Highways, they do not constitute third-party interests protected as valid existing rights under § 14(g) of ANCSA.

Appeal of Choggiung, Ltd., 3 ANCAB 325 (Aug. 17, 1979) 86 I.D. 392

Valid Existing Rights

Secs. 11(a)(1) and 11(a)(2) of ANCSA direct withdrawals for village selections to be made subject to valid existing rights. The withdrawal of State TA'd lands in sec. 11(a)(2) impliedly recognizes the existence of third-party interests created by the State prior to ANCSA, by prohibiting the creation of such interests subsequent to the withdrawal.

ANCSA protects as "valid existing rights," those rights, whether derived from the State or Federal Government, which do not lead to a grant of fee title and which were created prior to enactment of ANCSA. Rights leading to a fee, which had vested prior to enactment, would not be subject to Congressional disposal and would be excluded from withdrawals for Native selection. Rights of entrymen leading to grant of a fee under Federal public land laws, which had not vested prior to enactment of ANCSA, are treated by ANCSA as if vesting had occurred and are not categorized as "valid existing rights."

The interests described in sec. 14(g) of ANCSA are of a temporary or limited nature, in contrast to those derived from laws leading to a grant of fee title such as the entries protected in sec. 22(b), and, therefore, are not incompatible with Native fee ownership of the land.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976) 83 I.D. 619

ANCSA protects, as "valid existing rights," those rights, whether derived from the State or Federal government, which do not lead to a grant of fee title and which were created prior to enactment of ANCSA. Rights leading to a fee, which had vested prior to enactment, would not be subject to Congressional disposal and would be excluded from withdrawals for Native selection. Rights of entrymen leading to a grant in fee under Federal public land laws, which had not vested prior to ANCSA, are treated by ANCSA as if vesting had occurred and are not categorized as "valid existing rights."

"Valid existing rights" protected by ANCSA include not only interests created by the Federal Government, but may also include interests created by the State of Alaska so long as the latter are not interests leading to acquisition of fee title.

The interests described in sec. 14(g) of ANCSA are of a temporary or limited nature, in contrast to those interests derived from laws leading to a grant of fee title such as the entries protected by sec. 22(b). Inclusion

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Valid Existing Rights--Continued

in Native conveyances of lands subject to such interests, under administrative arrangements outlined in sec. 14(g) is appropriate, because such temporary or limited interests are not incompatible with Native ownership of the fee.

Open-to-entry leases issued by the State of Alaska pursuant to A.S. 38.05.077 are protected as valid existing rights by the specific terms of sec. 14(g) of ANCSA because they are leases issued under sec. 6(g) of the Alaska Statehood Act.

Where open-to-entry leases contain no provisions to purchase the leased land, but provide only for renewal upon expiration of a five-year term, the right of purchase asserted under A.S. 38.05.077 is not granted by the lease within the terms of sec. 14(g) of ANCSA, but appears to be an associated preference right granted in connection with the leasing program to individuals holding such leases.

Where the asserted right to purchase lands held under an open-to-entry lease can be exercised under State statutes only if the lease is relinquished, relinquishment of the lease and subsequent issuance of patent to the land would constitute a new interest created subsequent to ANCSA, contrary to sec. 11(a)(2) which specifically withdraws lands TA'd to the State "from the creation of third-party interests under the Alaska Statehood Act."

The State may not extend a preference right to purchase lands under an open-to-entry lease program to which a Native Corporation will hold title; although a Native Corporation, succeeding under sec. 14(g) to the interest of the State as lessor, may wish to sell the leased land to the lessee, the Board finds no mechanism in ANCSA for the enforcement of such a right in the lessee against a Native patentee.

Leases issued for the surface or minerals covered by a Native selection constitute a valid existing right protected by sec. 14(g) of ANCSA and any conveyance to a Native Corporation of lands on which such a lease has issued must be subject to the lease hold interest.

State-issued permits and contracts for resource uses issued to third parties before Dec. 18, 1971, are protected as valid existing rights under sec. 14(g) of ANCSA, and any conveyance to a Native Corporation of lands on which such permits or contracts have been issued must be subject to such interests.

When an interest in land selected by and tentatively approved to the State of Alaska was transferred from one State agency to another, the complete interest remained subject to the withdrawal and selection provisions of sec. 11(a) and sec. 12 of ANCSA; thus transfer by the State of a permit to extract natural resources from the State Division of Lands to the State Division of Aviation does not place the State in the position of a protected third party under ANCSA.

Since ANCSA recognizes and protects State-created interests as valid existing rights, as well as interests recognized or created under Federal law, thus involves interests which would not be of record in the BLM land office, BLM's administrative responsibility to identify, adjudicate and protect "valid existing rights" under ANCSA, are broader than under general Federal public land laws.

While decisions of the Bureau of Land Management and documents conveying title to Native corporations pursuant to ANCSA properly contain a general provision protecting "valid existing rights" in accordance with the provisions of sec. 14(g) of ANCSA and the regulations in 43 CFR 2650, such documents must additionally describe valid existing rights according to the nature of the right and approximate location on the land, and may incorporate by reference other BLM files and files of the Alaska Division of Lands only as a supplemental source of information.

Under ANCSA and the regulations in 43 CFR 2650, the Bureau of Land Management has the duty to ascertain whether a less-than-fee interest was issued to a third party, and must recite in the decision approving lands for conveyance to a Native Corporation that the conveyance is "subject to" such an interest.

Where the claimed "valid existing rights" were created by the State on lands tentatively approved to the State under the Statehood Act, the adjudication of the State's selection must be consolidated with the adjudication of the Native land selection, and valid existing rights in the land must be determined in a single decision.

Both the decision to convey lands, and the interim conveyance, must specifically identify those interests protected under ANCSA as valid existing rights. Where the title conveyed will be "subject to" a less-than-fee interest, the nature of the interest must be identified and the lands affected must be described, at least by section and, where possible, according to the smallest legal subdivision.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

Sec. 14(g) of ANCSA protects existing permits as valid existing rights and provides that patent is to be subject to the right of the permittee to the complete enjoyment of all rights, privileges, and benefits granted to him by the permit.

An expired special use permit is not an existing right and does not constitute a "valid existing right" under sec. 14(g) of ANCSA.

Use and occupancy of land under a permit from the U.S. Fish and Wildlife Service does not constitute a "valid existing right" in the land separate from the permittee's rights under the permit.

Appeal of Kodiak Island Setnetters Ass'n, 3 ANCAB 1 (June 12, 1978) 85 I.D. 200

Mere use and occupancy of a tract of land does not constitute a "valid existing right" pursuant to sec. 14(g) of ANCSA when neither the persons claiming such right nor their predecessors entered the land under any State or Federal law.

Appeal of Mr. & Mrs. G. Gregory Roe, 3 ANCAB 27 (June 26, 1978)

Pursuant to the policy of the Department of the Interior as set forth in Secretarial Order 3029 (43 FR 55287 (1978)), open-to-entry leases issued prior to the passage of ANCSA must be excluded from lands conveyed to village corporations pursuant to the Alaska Native Claims Settlement Act of Dec. 18, 1971, 85 Stat. 688; 43 U.S.C. §§ 1601-1611 (Supp. V 1975).

Appeal of Richard H. Robinson, 3 ANCAB 140 (Jan. 31, 1979) 86 I.D. 55

Appeal of James B. Bedell, 3 ANCAB 153 (Jan. 31, 1979) 86 I.D. 60

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Valid Existing Rights--Continued

Preference rights to purchase set forth in Public Land Order No. 1613, Apr. 7, 1958, that were outstanding as of the date of the passage of ANCSA, are valid existing rights protected by ANCSA.

Valid existing rights held by third parties that lead to acquisition of title, must be identified in the conveyancing document and the land covered thereby excluded from the conveyance to the selecting Native corporation.

Appeal of Raymond A. Kreig, 3 ANCAB 168 (Mar. 9, 1979)
86 I.D. 189

"Valid existing rights" protected by § 14(g) of ANCSA include both interests of a temporary or limited nature and interests leading to the acquisition of title, when such interests were created prior to ANCSA and are being perfected or maintained pursuant to State or Federal law.

Application by the State of Alaska for lands under the Federal Airport Act, and compliance with such law leading to the acquisition of title prior to ANCSA, is sufficient to create a valid existing right in the State of Alaska protected by § 14(g) of ANCSA.

Pursuant to regulations in 43 CFR 2650.3-1(a), interests protected pursuant to ANCSA which lead to fee title in the State are to be excluded from conveyance to a Native corporation.

Appeal of Tanacross, Inc., 3 ANCAB 219 (Apr. 23, 1979)
86 I.D. 257

An open-to-entry lease issued under A.S. 38.05.077, including any associated right to purchase the leased land granted by State statute, is protected as a valid existing right under ANCSA, and the leasehold must be excluded from any conveyance to a Native corporation under ANCSA.

Appeal of Raymond E. Miller, 3 ANCAB 238 (May 14, 1979)
86 I.D. 285

"Valid existing rights" protected by § 14(g) of ANCSA include interests of a temporary or limited nature when such interests were created prior to ANCSA and are being maintained pursuant to State or Federal law.

The leases in issue are sufficient to create valid existing rights in the appellants (to the extent of their terms) which are protected by § 14(g) of ANCSA. The affected lands must therefore be conveyed "subject thereto."

Though creating interests in the appellants which are protected by § 14(g) of ANCSA, Alaska Stat. § 38.05.102, as applied to the leases in issue, does not create a valid existing right leading to the acquisition of title which would require the subject lands to be excluded from the Native conveyance as required by Order No. 3029 (43 FR 55287) in its treatment of open-to-entry leases.

Appeal of Reed E. Oswalt et al., 3 ANCAB 261 (May 24, 1979)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Valid Existing Rights--Continued

Inasmuch as the disputed gravel free use permits were transferred from one State agency, the Division of Lands, to another State agency, the Department of Highways, they do not constitute third-party interests protected as valid existing rights under § 14(g) of ANCSA.

Appeal of Choggiung, Ltd., 3 ANCAB 325 (Aug. 17, 1979)
86 I.D. 392

Village Selections

ANCSA provides in secs. 11(a)(2) and 12(a)(1) that each village may select up to 69,120 acres of its total entitlement from TA'd lands within the area, usually 25 townships, surrounding the village. Such State TA's, already encumbered by aboriginal title to lands on which use and occupancy could be proved, were now subject to a statutory prior right of selection by village corporations; a Native right of selection, based not on aboriginal title, but on Congressional grant in ANCSA.

Eklutna, Inc., is not estopped from selecting the disputed lands by Resolutions 68-9 and 68-10 of the Eklutna Village Council because there is no evidence of any identity of interest or membership between the Council, an unincorporated community association, and Eklutna, Inc., nor is there any indication that the Eklutna Village Council was authorized to bind the Natives of Palmer.

Municipal corporations, organized to provide necessary Government services, are beneficiaries of sec. 14(c) of ANCSA in that they receive title to lands they use and occupy, and to additional lands for community expansion.

The Municipality's interest in lands improved for recognized public purposes is protected by sec. 14(c)(3) of ANCSA because the Municipality occupies the same position with regard to Eklutna as the local Government entities envisioned by Congress in enacting such reconveyance provision and the disputed land, while outside Eklutna Village, is within the village withdrawal area and has been improved for a public purpose.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

ANCSA provides in secs. 11(a)(2) and 12(a)(1) that each village may select up to 69,120 acres of its total entitlement from TA'd lands surrounding the village. Such State TA's, already encumbered by aboriginal title to lands on which use and occupancy could be proved, were not subject to a statutory prior right of selection by Village Corporations; a Native right of selection, based not on aboriginal title, but on Congressional grant in ANCSA.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

The State Director, Bureau of Land Management, is not estopped from denying appellant's (Village Corporation) application for certain lands because BLM erroneously included those lands on its land records and on the map of lands sent to appellant as eligible for withdrawal under sec. 11(a)(1) of ANCSA.

Appeal of Tanacross, Inc., 2 ANCAB 379 (May 12, 1978)
85 I.D. 97

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

LAND SELECTIONS--Continued

Withdrawals

Lands located outside of sec. 11(a)(1) withdrawal area for a Native Village Corporation can only be withdrawn for selection pursuant to provisions of sec. 11(a)(3)(A) of ANCSA.

Appeal of English Bay Corp., 1 ANCAB 35 (June 4, 1976)
83 I.D. 454

Because Alaska acquired a present right or interest in Mental Health Lands immediately upon proper selection of same, and because that interest effectively transfers ownership in the lands to the State, such lands can no longer be considered "public lands" within the meaning of sec. 3(e) and are unavailable for Native village selection under secs. 11(a)(1) and 12(a)(1) of ANCSA.

Lands properly selected under the Alaska Mental Health Enabling Act are not "lands * * * that have been selected * * * by the State under the Alaska Statehood Act" and are not available for selection by Native villages under secs. 11(a)(2) and 12 (a)(1) of ANCSA.

Appeal of Seldovia Native Ass'n, Inc., 1 ANCAB 65 (July 1, 1976)
83 I.D. 461

Lands tentatively approved to the State under the Alaska Statehood Act are withdrawn for village selection by sec. 11(a)(2) of ANCSA. Because sec. 11(a)(2) withdrawals are terminated 3 years from the date of enactment of ANCSA by sec. 22(h)(2), a village land selection filed subsequent to Dec. 18, 1974, for tentatively approved State lands must be rejected.

Appeal of Port Graham Corp., 1 ANCAB 125 (Sept. 3, 1976)
83 I.D. 481

Lands withdrawn pursuant to ANCSA are not subject to § 316 of FLPMA, 43 U.S.C. § 1746 (1976).

Appeal of Alaska Railroad, 3 ANCAB 273 (June 7, 1979)
86 I.D. 397

On reconsideration, the Board vacates its prior holdings that lands withdrawn under the Alaska Native Claims Settlement Act, 85 Stat. 688, *as amended*, 43 U.S.C. §§ 1601-1628 (1976 and Supp. I 1977), are lands held for the benefit of Indians, Aleuts and Eskimos and thus are not "public lands" within the scope of FLPMA, *supra*, and that FLPMA does not apply to such lands.

Appeal of the Alaska Railroad (On Reconsideration), 3 ANCAB 351 (Sept. 18, 1979)
86 I.D. 452

NATIVE VILLAGE LAND SELECTIONS

Generally

An appeal will be summarily dismissed when the appellant fails to serve upon all persons required to be served, copies of the Notice of Appeal and other documents filed with the Board in support of its appeal.

Appeal of Bee-Yea-Lingde Corp., 1 ANCAB 13 (Dec. 29, 1975)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

NATIVE VILLAGE LAND SELECTIONS--Continued

Generally--Continued

Lands tentatively approved for State selection and conveyed by the State to municipalities or boroughs prior to enactment of ANCSA are not available for Native selection under ANCSA.

Lands tentatively approved for State selection and leased by the State to individuals with an option to buy will, if selected by a Native corporation, be included in the interim conveyance with the provision that the option to buy may be exercised against the Native corporation. Where the option had been exercised against the State and a State patent issued prior to the enactment of ANCSA, the land will be excluded from interim conveyance to the Native corporation.

Third party rights created by the State in lands selected by Natives under ANCSA should be identified by BLM in the decision to issue interim conveyance if possible, but need not be adjudicated.

ANCSA and the implementing regulations draw a basic distinction between valid existing rights leading to the acquisition of title and those of a temporary nature, requiring exclusion of the former from the interim conveyance but inclusion of the latter with provisions protecting the third parties rights for the duration of his interest. The statute and the implementing regulations do not distinguish, in protecting rights leading to the acquisition of title between those arising under Federal law and those arising under State law.

Valid Existing Rights Under the Alaska Native Claims Settlement Act, Sec. Order No. 3016 (Dec. 14, 1977)
85 I.D. 1 (1978)

Procedural Requirements

Summary Dismissal

Retroactive Application

43 CFR 4.905, providing for summary dismissal of an appeal for failure to file or serve, upon all persons required to be served, a notice of appeal, statement of reasons, or of standing, merely expresses the inherent authority of the administrative appeals board under 43 CFR Part 4, Subpart G, and, therefore, may be applied to appeals filed prior to the effective date of sec. 4.905, after notice and opportunity to comply with an order of the Board requiring service upon particular persons.

Appeal of Bee-Yea-Lingde Corp., 1 ANCAB 13 (Dec. 29, 1975)

NATIVE VILLAGE SELECTIONS

Lands withdrawn by sec. 11(a)(1) and (2) of the Alaska Native Claims Settlement Act are subject to selection by qualified Native villages notwithstanding the prior tentative approval of selections of those lands by the State of Alaska pursuant to the Statehood Act.

Where the State of Alaska had received tentative approval of a land selection and had granted a patent to a third party in accordance with § 6(g) of the Alaska Statehood Act, and where the State patent was granted before the enactment of the Alaska Native Claims Settlement Act, with the express approval of the various Native groups then concerned, a Native village may not later select those lands pursuant to the Alaska Native

NATIVE VILLAGE SELECTIONS--Continued

Claims Settlement Act, as a valid third party right to the land had already been created.

Where statute and regulation provide that lands selected by the State of Alaska must be surveyed before patent can issue, but no similar requirement has been imposed as a precondition to the conveyance of lands selected pursuant to the Alaska Native Claims Settlement Act, the State's contention that this disparity is discriminatory will not afford a basis for reversing a decision which rejected a State selection application in favor of a conflicting Native village selection.

The fact that filing fees are required as a condition precedent for State selections and are not required for Native village selections pursuant to the Alaska Native Claims Settlement Act is not a basis for vacating a decision awarding lands to the Native villages.

State of Alaska, 19 IBLA 178 (Mar. 18, 1975)

The filing of a State selection under the Alaska Statehood Act does not create a right that prevents a Native village from selecting those lands under the terms of the Alaska Native Claims Settlement Act.

State of Alaska, 19 IBLA 242 (Mar. 27, 1975)

The filing of a State selection application under sec. 6(b) of the Alaska Statehood Act of July 7, 1958, 72 Stat. 339, 340, 48 U.S.C. notes prec. § 21 (1970), does not create a right that prevents a Native Village from selecting those lands under the provisions of the Alaska Native Claims Settlement Act of Dec. 18, 1971, 85 Stat. 688, 43 U.S.C. §§ 1601-1624 (Supp. III 1973).

Whether Village selections authorized by the Alaska Native Claims Settlement Act, 43 U.S.C. §§ 1601-1624 (Supp. III 1973), constitute an unwarranted vitiation of the State selection provisions of the Alaska Statehood Act, 48 U.S.C. notes prec. § 21 (1970), and of the Compact of Admission to the Union, is beyond the consideration of this Board.

State of Alaska, 19 IBLA 316 (Apr. 7, 1975)

Where approval of an application to purchase sand and gravel pursuant to the Materials Disposal Act of 1947 is opposed by a Native village which has already selected the land on which the sand and gravel is located, and to whom conveyance is imminent, the application will be rejected.

Clarence Wren, 20 IBLA 47 (Apr. 21, 1975)

PRIMARY PLACE OF RESIDENCE

Generally

When a Village Corporation selects withdrawn lands in one section, but excepts from selection a smaller tract of withdrawn land within the section, no determination can be made as to whether a sec. 11 withdrawal terminated on the tract of land excepted from selection until such time as a decision is rendered by the Bureau of Land Management on the validity of the exception from selection.

As of Dec. 18, 1975, lands withdrawn under sec. 11(a)(1) or sec. 11(a)(3) and not selected under secs. 12 or 19

PRIMARY PLACE OF RESIDENCE--Continued

Generally--Continued

of the Act, became lands outside the areas withdrawn by sec. 11 and became available for selection as a primary place of residence under sec. 14(h)(5).

An applicant who filed an application for a primary place of residence within the time limits set forth by sec. 14(h)(5) and 43 CFR 2653.8 on land which was withdrawn by sec. 11(a)(1) or sec. 11(a)(3) as of the date of filing, shall not have his application rejected pursuant to 43 CFR 2091.1 as a premature filing when Departmental regulations specifically permit the selection of formerly withdrawn land after Dec. 18, 1975, but do not permit a primary place of residence applicant to refile his application.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977) 84 I.D. 891

Criteria

The language of regulation 43 CFR 2653.8-2(b)(1) is unequivocal that the applicant "must have a dwelling" on the tract of land applied for as a primary place of residence pursuant to sec. 14(h)(5) of ANCSA. Absent the meeting of this criteria the application must be rejected.

Appeal of Wilfred A. Young, 2 ANCAB 211 (Dec. 19, 1977)

In order to establish a primary place of residence pursuant to sec. 14(h)(5) of ANCSA, a dwelling must be constructed upon the land applied for as a primary place of residence.

The fact that an applicant has a dwelling in the vicinity or adjacent to land sought as a primary place of residence is not sufficient to meet the criteria necessary to establish a primary place of residence.

Appeal of Donald Watson, 2 ANCAB 258 (Dec. 29, 1977) 84 I.D. 1015

In order to establish a primary place of residence there must be evidence that the applicant resided on the tract applied for as his primary place of residence on a regular or seasonal basis for a substantial period of time.

Appeal of Donald A. Watson, 2 ANCAB 289 (Feb. 2, 1978) 85 I.D. 27

Filing Deadline

Waiver

Sec. 14(h)(5) of the Alaska Native Claims Settlement Act establishes a mandatory deadline for applications for a primary place of residence, which may not be waived in the exercise of Secretarial discretion.

Appeal of Theodore M. Witham, 1 ANCAB 20 (Dec. 29, 1975) 83 I.D. 445

PRIMARY PLACE OF RESIDENCE--Continued

Intent to Reside W/o Evidence of Actual Resid. is Insuff. to Estab. Claim to Land as Prim. Place of Resid.

Sec. 14(h)(5) and 43 CFR 2653.0-5 of the Alaska Native Claims Settlement Act require that land applied for as a primary place of residence be occupied by the applicant as a primary place of residence on Aug. 31, 1971. "Primary place of residence" as contemplated by 43 CFR 2653.0-5(d) means a place comprising a primary place of residence of an applicant on Aug. 31, 1971, at which he regularly resides on a permanent or seasonal basis for a substantial period of time.

Appeal of Joe Klimas, 1 ANCAB 26 (Apr. 28, 1976)
83 I.D. 452

REGIONAL CORPORATIONS

Lands available for selection by a Regional Corporation under sec. 12 of ANCSA are limited to those lands withdrawn pursuant to sec. 11 of ANCSA.

Sec. 17(d)(2)(E) of ANCSA is not intended to provide lands for selection by a Regional Corporation in addition to lands withdrawn for selection pursuant to sec. 11 of ANCSA. Sec. 17(d)(2)(E), rather, is intended to postpone the time within which the Regional Corporations may receive patent to any lands under dual withdrawal until Congress has first acted upon the same or has failed to act within the 5-year period mandated by sec. 17(d)(2)(D).

Appeal of Doyon, Ltd., 2 ANCAB 336 (Mar. 22, 1978)

RENUNCIATION OF ENROLLMENT IN METLAKATLA INDIAN COMMUNITY

The right of renunciation or expatriation is the natural and inherent right of the individual.

Any member of any Indian tribe is at full liberty to terminate his tribal relationship whenever he so chooses, although it has been said that such termination will not be inferred "from light and trifling circumstances."

Henry Sam Littlefield, Jr., 7 IBIA 120 (Mar. 30, 1979)
86 I.D. 217

SUMMARY DISMISSAL

An appeal will be summarily dismissed when the appellant fails to serve upon all persons required to be served, copies of the Notice of Appeal and other documents filed with the Board in support of its appeal.

Appeal of Nee-Tes-Lingde Corp., 1 ANCAB 13 (Dec. 29, 1975)

An appeal will be summarily dismissed when, in response to a motion to show cause, the appellant states in writing it has no objection to the dismissal.

Appeal of Kodiak Island Borough, 3 ANCAB 108 (Dec. 18, 1978)

SURVEY

Generally

Procedures adopted to implement the Public Land Survey System as provided in Title 43, Chapters 1 and 16, and regulations promulgated thereunder are made applicable to land withdrawals by sec. 13 of ANCSA.

Establishing of "standard parallel" or "correction" lines in compliance with authorized procedure to implement Public Land Survey System is not inconsistent with provisions of sec. 11(a)(1) withdrawal.

Where townships, which by legal description have a common corner, are not in actual physical contact due solely to the location of a "standard parallel" or "correction" line, the requirement of sec. 11(a)(1)(B) or (C) that townships "corner" will be considered complied with.

Appeal of Eklutna, Inc., 1 ANCAB 165 (Sept. 20, 1976)
83 I.D. 500

The Alaska Native Claims Appeal Board, in reversing a previous decision, finds that townships, which by legal description have a common corner, but are not in actual physical contact due to the location of a "standard parallel" or "correction" line, such townships shall be considered as not cornering for purposes of sec. 11(a) of ANCSA.

Appeal of Eklutna, Inc., 2 ANCAB 214 (Dec. 19, 1977)
84 I.D. 982

Procedures

The Bureau of Land Management was not in error in using survey procedures which varied from those specifically stated in the 1947 BLM Manual of Surveying Instructions when such procedures were utilized in order to avoid perpetuating an earlier surveying error into a new original township survey.

Appeal of Tanacross, Inc., 2 ANCAB 379 (May 12, 1978)
85 I.D. 97

Standard Parallel

Where townships, which by legal description have a common corner, are not in actual physical contact due solely to the location of a "standard parallel" or "correction" line, the requirement of sec. 11(a)(1)(B) or (C) that townships "corner" will be considered complied with.

Appeal of Eklutna, Inc., 1 ANCAB 165 (Sept. 20, 1976)
83 I.D. 500

The Alaska Native Claims Appeal Board, in reversing a previous decision, finds that townships, which by legal description have a common corner, but are not in actual physical contact due to the location of a "standard parallel" or "correction" line, such townships shall be considered as not cornering for purposes of sec. 11(a) of ANCSA.

Appeal of Eklutna, Inc., 2 ANCAB 214 (Dec. 19, 1977)
84 I.D. 982

VILLAGE ELIGIBILITY

Generally

After expiration of the period in which a decision finding a village eligible may be appealed, and the village has been certified as eligible for benefits under § 11 of ANCSA, the Board has no jurisdiction over an appeal challenging the eligibility of the village and will dismiss such an appeal.

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 363 (Mar. 31, 1978)

Appeal of Irving C. Wedmore, 3 ANCAB 252 (May 16, 1979)

Unlisted Villages

A village or community in southeast Alaska which is not listed within sec. 16(a) of the Alaska Native Claims Settlement Act is not eligible for benefits under the Act.

Appeal of Ketchikan Indian Corp., 2 ANCAB 169 (Nov. 8, 1977)

VILLAGE ENTITLEMENT

The determination that a Village Corporation is eligible under sec. 11 of ANCSA is a finding that such village had at least a minimum Native population of 25 on the 1970 census enumeration date and thus entitles such village to at least the minimum acreage allocation pursuant to sec. 14(a) of ANCSA.

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 183 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 187 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 191 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 195 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 199 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 203 (Dec. 19, 1977)

Appeal of Kodiak-Aleutian Chapter, Alaska Conservation Society, 2 ANCAB 207 (Dec. 19, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 223 (Dec. 20, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 227 (Dec. 20, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 231 (Dec. 20, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 235 (Dec. 20, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 239 (Dec. 20, 1977)

Appeal of U.S. Fish and Wildlife Services, 2 ANCAB 243 (Dec. 20, 1977)

U.S. Fish and Wildlife Service, 2 ANCAB 264 (Jan. 23, 1978)

Appeal of State of Alaska, 2 ANCAB 284 (Feb. 1, 1978)

VILLAGE ENTITLEMENT--Continued

The determination that a Village Corporation is eligible under sec. 11 of ANCSA is a finding that such village had at least a minimum Native population of 25 on the 1970 census enumeration date and thus entitles such village to at least the minimum acreage allocation of 69,120 acres of land pursuant to sec. 14(a) of ANCSA.

Appeal of Omar Stratman et al., 2 ANCAB 329 (Mar. 23, 1978)

WAIVER

Failing to select land available within its sec. 11(a)(1) withdrawal, a Native Village Corporation cannot by giving consent and waiver to another Native Village Corporation make said lands available for selection under provision of sec. 12(a) of ANCSA.

Appeal of English Bay Corp., 1 ANCAB 35 (June 4, 1976) 83 I.D. 454

WITHDRAWALS AND RESERVATIONS

Generally

Selection of lands by Native Village Corporations pursuant to provisions of sec. 12(a) of ANCSA is not permitted outside of lands withdrawn by provisions of sec. 11(a)(1) as they relate to the location of the selecting village.

Appeal of English Bay Corp., 1 ANCAB 35 (June 4, 1976) 83 I.D. 454

A withdrawal of public lands for a utility and transportation corridor under sec. 17(c) of the Alaska Native Claims Settlement Act, subject to valid existing rights, precludes selection of those lands by a Native group under sec. 14(h) of the Alaska Native Claims Settlement Act.

Appeal of Wisenak, Inc., 1 ANCAB 157 (Sept. 15, 1976) 83 I.D. 496

The express terms of secs. 11 and 12 of ANCSA make lands previously TA'd to the State of Alaska available for selection by qualified Native Corporations, indicating the conclusion of Congress that such lands were subject to disposal in settlement of Native claims.

The State's interest in TA'd lands located within sec. 11(a)(2) withdrawal areas did not vest prior to ANCSA, and did not vest subsequent to ANCSA as to lands properly selected by village corporations within the 3-year period mandated by sec. 12(a).

The State's interest vests in those TA'd lands within sec. 11(a)(2) withdrawals not selected by village corporations within statutory deadlines, for, upon completion of Native selections, the last encumbrance on the State's title is removed.

In withdrawing lands around villages tentatively approved to the State, Congress rejected the State's contention that tentative approval vested title in the State, and in consequence rejected the title the State had relied upon to dispose of TA'd lands to third parties.

Secs. 11(a)(1) and 11(a)(2) of ANCSA direct withdrawals for village selections to be made subject to valid existing rights. The withdrawal of State TA'd lands in sec. 11(a)(2) impliedly recognizes the existence of

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

WITHDRAWALS AND RESERVATIONS--Continued

Generally--Continued

third-party interests created by the State prior to ANCSA, by prohibiting the creation of such interests subsequent to the withdrawal.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976) 83 I.D. 619

The State's interest in TA'd lands located within sec. 11(a)(2) withdrawal areas did not vest prior to ANCSA, and did not vest subsequent to ANCSA as to lands properly selected by Village Corporations within the three-year period mandated by sec. 12(a).

The State's interest vests in those TA'd lands within sec. 11(a)(2) withdrawals not selected by Village Corporations within statutory deadlines, for, upon completion of Native selections, the last encumbrance on the State's title is removed.

In withdrawing sec. 11(a)(2) lands tentatively approved to the State, Congress rejected the State's contention that tentative approval vested equitable title in the State, and in consequence rejected the title the State had relied upon to dispose of TA'd lands to third parties.

Lands on which the United States has issued patent either to the State or to a private individual are not within the definition of "public lands" in sec. 3(e) of ANCSA, were not withdrawn by sec. 11 of ANCSA, and therefore are not available for selection under ANCSA.

Appeals of the State of Alaska and Seldovia Native Ass'n, Inc., 2 ANCAB 1 (June 9, 1977) 84 I.D. 349

The withdrawal of lands pursuant to sec. 11(a)(1) of ANCSA took place on Dec. 18, 1971, the date of passage of ANCSA.

When a Village Corporation selects withdrawn lands in one section, but excepts from selection a smaller tract of withdrawn land within the section, no determination can be made as to whether a sec. 11 withdrawal terminated on the tract of land excepted from selection until such time as a decision is rendered by the Bureau of Land Management on the validity of the exception from selection.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977) 84 I.D. 891

Segregation of lands covered by a withdrawal application filed by a military agency, accomplished by a notation of the land records, does not prevent statutory withdrawal of such lands for selection by a Native Corporation pursuant to sec. 11 of ANCSA.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

Where a decision rejects an application for an Alaska grazing lease because of an asserted Secretarial policy against granting such applications for land withdrawn pursuant to sec. 17(d)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1616(d)(2) (Supp. V 1975), but the record on appeal is incomplete with respect to the existence of such policy, the record should be remanded for further documentation.

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

WITHDRAWALS AND RESERVATIONS--Continued

Cornering

Generally

Where townships, which by legal description have a common corner, are not in actual physical contact due solely to the location of a "standard parallel" or "correction" line, the requirement of sec. 11(a)(1)(B) or (C) that townships "corner" will be considered complied with.

The provisions of sec. 12(a)(2) of ANCSA and regulations in 43 CFR 2651.4 that lands selected--"be contiguous and in reasonably compact tracts"--are not inconsistent with a finding that townships are properly withdrawn under sec. 11(a)(1)(B) or (C) though actual physical cornering is prevented due to a township-offset resulting from location of a "standard parallel."

Appeal of Eklutna, Inc., 1 ANCAB 165 (Sept. 28, 1976) 83 I.D. 500

The Alaska Native Claims Appeal Board, in reversing a previous decision, finds that townships, which by legal description have a common corner, but are not in actual physical contact due to the location of a "standard parallel" or "correction" line, such townships shall be considered as not cornering for purposes of sec. 11(a) of ANCSA.

Appeal of Eklutna, Inc., 2 ANCAB 214 (Dec. 19, 1977) 84 I.D. 982

Survey Offsets

A township, which is by legal description and in the prescribed plan of rectangular survey, located within a sec. 11(a)(1)(C) of ANCSA withdrawal, becomes excluded from such withdrawal when it fails to physically share a common corner with a township withdrawn under sec. 11(a)(1)(B) of ANCSA because BLM made an offset at that corner in order to cure a survey error.

Appeal of Tanacross, Inc., 2 ANCAB 379 (May 12, 1978) 85 I.D. 97

Deficiency

Lands located outside of sec. 11(a)(1) withdrawal area for a Native Village Corporation can only be withdrawn for selection pursuant to provisions of sec. 11(a)(3)(A) of ANCSA.

Appeal of English Bay Corp., 1 ANCAB 35 (June 4, 1976) 83 I.D. 454

Federal Installations

The exception in sec. 3(e) of ANCSA for the smallest practicable tract, as determined by the Secretary, enclosing land actually used in connection with the administration of any Federal installation, can apply to lands which are not formally withdrawn for the agency using such lands and seeking to protect its use by invoking the exception.

Appeal of Paug-Vik, Inc., Ltd., 3 ANCAB 49 (July 5, 1978) 85 I.D. 229

ALASKA NATIVE CLAIMS SETTLEMENT ACT (Dec. 18, 1971, 85 Stat. 688)--Continued

WITHDRAWALS AND RESERVATIONS--Continued

Termination

Under sec. 22(h)(1) of ANCSA, the withdrawal of lands pursuant to sec. 11(a)(1) terminated as of Dec. 18, 1975, a date 4 years after the date of enactment of the Act, unless the lands were selected by a Native Corporation under sec. 12 of ANCSA.

Appeal of William Thomas Woolard, 2 ANCAB 150 (Nov. 3, 1977)
84 I.D. 891

APPEALS
(See also Civil Rights, Contracts, Federal Coal Mine Health and Safety Act of 1969, Grazing Permits and Licenses, Indian Probate, Indian Tribes, Rules of Practice, Torts, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970--if included in this Index.)

A decision by a district manager denying a requested award of grazing privileges must state the reasons therefore, and not simply the conclusion that the applicant is not qualified.

Ervin J. Crowder, 20 IBLA 305 (May 30, 1975)

Under 43 CFR 4.402, an appeal is subject to summary dismissal by the Board of Land Appeals when notice of appeal or statement of reasons is not served on adverse parties within the time prescribed.

Elmer Peterson, 21 IBLA 52 (June 17, 1975)

Where an oil and gas lessee appeals from a decision of an Oil and Gas Supervisor's determination that additional royalties are due to the Government, and simultaneously files a request for suspension of the ruling, which is granted by the Geological Survey "until further notice," prejudgment interest continues to accrue during the period of the suspension. This conclusion is premised on the doctrine that interest is compensation for delay in payment.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

A Bureau of Land Management office has no jurisdiction to take further action on an oil and gas lease application where there has been an appeal to the Board of Land Appeals on that application.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

Where high bids, not clearly spurious or irresponsible, tendered at a competitive sale of oil and gas leases, are rejected solely on the statement of a field official that the bids are inadequate, and no basis whatever for that conclusion is reflected in the case records, the decision will be set aside and the case will be remanded for the compilation of a proper record and readjudication of the acceptability of the bids.

Arkla Exploration Co., 22 IBLA 92 (Sept. 22, 1975)

Frances J. Richmond, 24 IBLA 303 (Apr. 5, 1976)

APPEALS--Continued

A qualified heir or devisee of a deceased applicant for a mineral lease under 43 CFR 3564, or the administrator or executor of his estate, may receive the lease in the applicant's stead, or maintain an appeal from the rejection of such application on the same basis as the heirs or representatives of deceased applicants for other kinds of mineral leases where no third-party interests require consideration.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

Where, prior to the rejection of her application, an applicant for a Native allotment was advised of findings which, unless rebutted, would result in the rejection of the application, and was afforded an extended period of time in which to submit additional evidence, evidence which is thereafter submitted for the first time on appeal from the rejection decision, without explanation of why it was not submitted when due, will not be favorably considered in adjudicating the propriety of the decision appealed from.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Mary Arcjiak, 22 IBLA 384 (Nov. 21, 1975)

An appeal to the Director, Geological Survey, is properly dismissed by him where the appellant failed to comply with the procedure prescribed by the applicable regulations with respect to the form and content of the notice of appeal, the time afforded for the filing of additional reasons, arguments or briefs, and the procedure for obtaining an extension of such time, and no valid reason is given which would warrant excusing such failures as an exercise of administrative discretion.

Robert B. Ferguson, 23 IBLA 29 (Dec. 2, 1975)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from a rejection of a Native allotment application in the absence of a satisfactory showing why the evidence was not submitted to Bureau of Land Management within the period afforded the applicant for the submission of such evidence.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from rejection of a Native allotment satisfactory to it why the evidence was not submitted to the Bureau of Land Management within the 60-day period afforded the applicant to submit a further evidence in support of his application. General, rather than specific, allegations of difficulties in travel and communicating in Alaska are not satisfactory showings of the reason for late filing of such evidence.

Linda L. Walker, 23 IBLA 299 (Jan. 14, 1976)

Rejection of the high bid tendered for a parcel of land offered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the pre-sale minimum evaluation for the tract was accomplished by a GS lease sale committee consisting of an engineer and a geologist, and their reasoned evaluation was considerably in excess of appellant's bid.

Arkla Exploration Co., 25 IBLA 220 (June 21, 1976)

Frances J. Richmond, 29 IBLA 137 (Mar. 3, 1977)

Statements of reasons for appeal will not be accorded favorable consideration where they do not state with some particularity the exact reason for appeal and the allegations are not supported by evidence.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

Since the Bureau of Land Management has no authority to issue a public land order withdrawing land, such authority existing only in the Secretary, the Under Secretary, and the Assistant Secretaries of the Department of the Interior, recommendations by officers of the Bureau of Land Management relating to withdrawals are not subject to review under the provisions of 43 CFR 4.450-2 or 43 CFR 4.410.

City of Kotzebue, 26 IBLA 264 (Aug. 20, 1976)
83 I.D. 313

Where the transmittal of an appeal to the Board of Land Appeals is accompanied by the request of the State Director that the case be remanded because the special stipulation which accompanied the decision from which the appeal was taken was not the correct one, the case is remanded for further consideration by the Bureau of Land Management, and the Board of Land Appeals does not pass on the reasonableness of either stipulation.

A A Minerals Corp., 27 IBLA 1 (Sept. 17, 1976)

Where an appellant fails to point out some error in a decision or to show that he has wrongly been deprived of some right, and instead limits his statement of reasons for appeal to allegations which are irrelevant and immaterial, the appeal will be dismissed as frivolous.

Duncan Miller, 28 IBLA 62 (Nov. 10, 1976)

A statement of reasons in support of an appeal which does not point out affirmatively in what respect the decision appealed from is in error does not meet the requirements of the Department's rules of practice and may be dismissed.

Duncan Miller, 29 IBLA 174 (Mar. 14, 1977)

Duncan Miller, 34 IBLA 283 (Apr. 17, 1978)

United States v. David F. Mangum and Donald D. DeGuerre, 35 IBLA 131 (May 22, 1978)

Duncan Miller, 41 IBLA 129 (June 13, 1979)

A rejection of a high bid tendered for a parcel of land offered at a sale of competitive oil and gas leases will be affirmed on appeal where the record contains sufficient information from the U.S. Geological Survey to establish that the pre-sale minimum evaluation for the tract, which greatly exceeded the rejected bid, was not arbitrary or capricious, it having been arrived at by a lease sale committee consisting of two geologists and three engineers which in addition to considering the results of a computer analysis took into account a hand compilation and the judgment and knowledge of the committee.

Coquina Oil Corp., 29 IBLA 310 (Mar. 30, 1977)

Where a decision of the Board of Land Appeals is based upon an interpretation of Departmental policy, and that policy is subsequently revised and clarified so as to impel a different result in the case without prejudice to the right of any third party, on reconsideration by the Board that portion of its original decision will be modified and the revised policy will be implemented.

Werner Bergman (On Reconsideration), 31 IBLA 21 (June 20, 1977)

Where a right-of-way application has been rejected in part, an appeal therefrom should be dismissed if not filed within the period prescribed in 43 CFR 4.411.

When a right-of-way applicant fails to submit corrected maps and payment of charges within a reasonable time after notice, which notice does not prescribe a specific time therefor, but on appeal applicant explains the reasons for delay, a rejection of the application may be set aside and the case remanded.

Jerrold B. Cooley, Lucy M. Cooley, 32 IBLA 387 (Nov. 7, 1977)

Where appellant's allegations on appeal are immaterial and irrelevant and appellant fails to establish any error in the decision below or any infringement of appellant's rights, the appeal is properly dismissed as lacking in merit.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

Under 43 CFR 3522.2-1(a), a proposed readjustment of a coal lease should not be appealed directly to the Board of Land Appeals under 43 CFR 4.410, but, rather, a lessee's objections thereto should first be referred to and acted upon by the State Office, Bureau of Land Management.

California Portland Cement Co., 33 IBLA 223 (Dec. 28, 1977)

Under 43 CFR 4.410, any party to a case who is adversely affected by a decision of the Bureau of Land Management has a right of appeal to the Board of Land Appeals, even where the decision concerns legislation which has been repealed.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

APPEALS--Continued

A private contest decision canceling a disputed homestead entry will, in the absence of a timely and proper appeal, cut off all rights which the contestee may have acquired by his entry, and this result will not be affected by the fact that the contestee failed to appear at the contest hearing and, through his own neglect, failed to receive notice of the decision of the administrative law judge.

Wesley Laverne Edwards v. Paul Ugrub, 33 IBLA 277 (Jan. 5, 1978)

Under 43 CFR 4.401(a), a notice of appeal to the Board of Land Appeals may be considered even if not filed within the 30-day appeal period, where it is filed within 10 days of the deadline date and is transmitted within the appeal period.

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

A timely appeal from rejection of an oil and gas lease offer because of a determination of known geologic structure suspends the rejection pending decision by this Board, and where the Geological Survey rescinds the KGS determination as having been erroneously made during the pendency of the appeal, the status quo ante of land involved is restored.

Where land was omitted from an oil and gas lease only because of an erroneous KGS determination, and the applicant has preserved his priority by timely appealing the rejection, it is proper to amend such lease to include such omitted land when the Geological Survey rescinds its erroneous KGS determination.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

A decision to return an application for a public sale constitutes an action adverse to the applicant by an officer of the Bureau of Land Management and is thus appealable to the Board of Land Appeals under 43 CFR 4.410.

United Park City Mines Co., 33 IBLA 358 (Jan. 18, 1978)

The Boards of Appeal of the Department of the Interior have no authority to declare invalid a regulation of this Department.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

When an appeal is filed with the Board of Surface Mining and Reclamation Appeals from a decision made by the Office of Surface Mining Reclamation and Enforcement, that office loses jurisdiction and has no authority to take any action concerning it until that jurisdiction is restored by action of the Board that is dispositive of the appeal.

Apache Mining Co., 1 IBSMA 14 (July 13, 1978)
85 I.D. 395

APPEALS--Continued

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer was not proper and must be rejected, the applicant may not thereafter appeal the matter to this Board merely because the Bureau of Land Management, in implementing the Board's decision, mistakenly advised him that he had the right to such an appeal. The matter is res judicata, and the subsequent appeal must be dismissed.

Where the Board of Land Appeals, by a previous decision, has held that a particular oil and gas lease offer must be rejected, and the rejected applicant files suit for judicial review of that decision in the United States District Court, and also files a contemporaneous appeal to the Board from a BLM decision implementing the Board's decision, the Board will defer to the Court's jurisdiction and make no decision on the merits of the appeal, which is subject to summary dismissal by the Board.

Donald W. Coyer (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that certain coal prospecting permits have terminated and that no preference right to a coal lease is attached to any of them, an unapproved assignee of the permits may not thereafter appeal the matter to this Board following Bureau of Land Management notification to the permittees of this Board's decision. The matter is res judicata and such subsequent appeal must be dismissed, absent compelling legal or equitable considerations.

Peabody Coal Co., 36 IBLA 242 (Aug. 14, 1978)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error, and the allegations in his statement of reasons are irrelevant and immaterial.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

Where the Board of Land Appeals has considered an appeal and rendered a final decision holding that a particular oil and gas lease offer may properly be rejected for the reason that title to the lands involved was uncertain, and a new lease offer for the same lands is again rejected for the same reason, the matter is res judicata, and the subsequent appeal is properly dismissed.

N. L. Industries, Inc., 37 IBLA 335 (Oct. 26, 1978)

Under 43 CFR 4.1 the existence of a Secretarial policy limits review by the Board of Land Appeals to the question of whether the action under review is consistent with that policy.

The Board of Land Appeals will not exercise its de novo review authority to deny applications for Alaska grazing leases on the basis of trespass where (1) trespass was not cited as a reason for denial of the applications in the decision under appeal, (2) the record does not provide a clear basis for determining the applicant's responsibility for the trespass, and (3) there is no record of compliance with the procedures specified in 43 CFR 9239.0-9(b).

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

APPEALS--Continued

A final Departmental appellate decision construing a regulation will be given immediate effect, and will not be applied with prospective effect only, unless the decision alters materially the interpretation given the regulation by earlier Departmental decisions or official published opinions, and unless the equitable benefit of the decision is not outweighed by ill effects of allowing a benefit in derogation of the regulation.

D. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 9, 1978) 85 I.D. 408

Gertrude H. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

An appeal is properly dismissed where the appellant fails to point out the grounds on which the decision appealed from is in error and the allegations in his statement of reasons are vague and unsupported.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

An appeal from an appraisal of a communication site right-of-way will not be accorded favorable consideration where it does not with some particularity show adequate reason for appeal and support the allegations with evidence showing error.

Valley Mobile Communications, Inc., 38 IBLA 359 (Dec. 29, 1978)

An appeal from a decision denying a protest against the issuance of a patent must be dismissed if the patent has been issued, because the Department has no jurisdiction to act further in the matter.

Because issuance of a patent removes the land from Departmental jurisdiction, it is not proper to issue that patent simultaneously with dismissal of a protest against the patent application because such action deprives the protester of his right to review and precludes compliance with 43 U.S.C.A. § 1701(a)(5) (West Supp. 1978) which mandates objective administrative review of initial decisions.

Matanuska-Susitna Borough, Inc., 38 IBLA 382 (Dec. 29, 1978)

A mining claim contestee's allegation that BLM wrongly held a mining claim null and void ab initio will not be entertained where the contention is raised long after the time for appealing the decision has passed.

United States v. Jerry Proch et al., 39 IBLA 148 (Jan. 29, 1979)

A party adversely affected by a final order or decision of an officer of the Conservation Division of the Geological Survey has a right to appeal to the Director, Geological Survey, unless the decision was approved by the Secretary or Director prior to promulgation.

A party adversely affected by a final decision of the Director, Geological Survey, had a right of appeal to the Board of Land Appeals in the Office of Hearings and Appeals, Office of the Secretary.

Phoenix Resources Co., 39 IBLA 153 (Jan. 29, 1979)

APPEALS--Continued

Where Bureau of Land Management terminates a sodium lease because lessee failed to submit justification for holding a lease in excess of the acreage limitation, the decision will be set aside upon submission or explanation of failure to provide written information, and the case will be remanded for the State Office to determine whether the information submitted on appeal justifies continued lease tenure.

Clip Corp., 39 IBLA 161 (Jan. 29, 1979)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

R. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

A notice of appeal must be filed within 30 days after appellant is served with the decision from which he is appealing. When a party does not appeal, the doctrine of administrative finality, the administrative equivalent of res judicata, generally bars consideration of the same issue in a later appeal.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas R. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

The applicable regulation, 43 CFR 4.414 (1977), allows the Board some discretion in deciding whether to disregard the answer of an appellee who fails to file an answer within 30 days after service on him of the notice of appeal or statement of reasons and whose delay in filing is not waived under the provisions of 43 CFR 4.401(a) (1977).

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

The right of appeal to the Board is limited to parties to a case adversely affected by a decision of BLM. A person protesting a timber sale does not become a party to a case until such time as BLM has issued a final decision adverse to his or her interests. The case is ordinarily ripe for appeal only when an adverse decision is made on the protest.

Elaine Mikels et al., 41 IBLA 305 (July 3, 1979)

APPEALS--Continued

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

Where BLM fails to show that there was service of a decision rejecting an Alaska Native allotment and the applicant learns of his rejection 4-1/2 years after rejection, the applicant may file a timely appeal within 30 days of notice of the decision.

Mailing to the Bureau of Indian Affairs a carbon copy of a decision rejecting an application for an Alaska Native allotment is not service upon the applicant so as to comply with 43 CFR 4.401.

Gust J. Heft, Sr., 42 IBLA 86 (Aug. 13, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

Where it appears that a party did not realize that an election of remedies was mandated by Departmental procedures, a decision requiring the initiation of a private contest will be set aside, and the party will be permitted a period of time in which to initiate a private contest, or alternatively, waive such private contest and pursue a direct appeal on the question of whether a Government contest should issue.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

APPEALS--Continued

Where, on appeal, a mining claimant alleges that he timely mailed the affidavits of assessment work to the proper BLM office but there is no evidence to indicate they were ever received, the claimant must bear the consequences of the loss and his inability to prove his allegation that they may have been received by the Bureau and subsequently lost.

Amanda Mining & Manufacturing Ass'n., 42 IBLA 144 (Aug. 16, 1979)

Roger Kohn, 43 IBLA 182 (Sept. 28, 1979)

Allegations on appeal will not be afforded favorable consideration where they are not stated with some particularity and supported by evidence.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

State of Alaska v. Mattie B. Bartos, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979) 86 I.D. 441

Failure to obtain counsel at a hearing into the validity of a mining claim will afford the mining claimant no greater rights on appeal than if he had obtained counsel.

United States v. Howard D. Long, Dolores M. Killion, 43 IBLA 150 (Sept. 28, 1979)

Where an appellant admits in correspondence with the Department that the decision of the Bureau of Land Management State Office holding his mining claim invalid is correct, the appeal may be dismissed.

Ernest F. Hiniker, 43 IBLA 153 (Sept. 28, 1979)

Where an application to acquire Federal land is rejected by BLM for the reason that the applicant's own declaration of material facts stated in his application demonstrate conclusively that he is not entitled to the land as a matter of law, an effort on appeal to revise, amend, or deny the facts will not be considered absent a persuasive explanation of error in the application.

Andrew Petla, 43 IBLA 186 (Oct. 5, 1979)

APPEALS--Continued

Where a person moves from his record address without leaving a forwarding address, and a copy of a BLM decision affecting him is mailed to this last address of record and returned by the postal service as undeliverable, the decision is considered to have been "served" him as of the date it is returned to BLM. 43 CFR 4.401(c). Accordingly, the deadline for filing a notice of appeal is 30 days after the date the decision is returned to BLM.

BLM may not properly waive the untimely filing of a notice of appeal under 43 CFR 4.401(a) where it is clear that the notice of appeal was not transmitted to BLM until after the end of the time in which it was required to be filed.

Where a notice of appeal is not timely filed, it must be dismissed.

Micky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

Where a decision by an official of the Bureau of Land Management is interlocutory in nature, and the future implementation of the decision is contingent upon the occurrence of an event not scheduled, an appeal from such decision will be dismissed in the absence of any showing of necessity for immediate resolution.

Marathon Oil Co., Union Oil Co. of California, 43 IBLA 309 (Oct. 22, 1979)

Under 43 CFR 3120.3-1, rejection of a high bid tendered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the rejection has a reasonable basis in fact.

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

A notice of appeal from Geological Survey's failure to approve a communitization agreement must be filed within 30 days after appellant is served with the decision thereof or the doctrine of administrative finality generally bars consideration of the same issue in a later appeal.

Gulf Oil Corp., 44 IBLA 292 (Dec. 26, 1979)

APPLICATIONS AND ENTRIES

GENERALLY

A notice of location for homestead settlement on lands applied for as a State selection under the Alaska Statehood Act is unacceptable for recordation.

Conrad S. Huckins et al., 18 IBLA 357 (Jan. 22, 1975)

Stanley Ray Hunt, 19 IBLA 259 (Mar. 31, 1975)

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

Richard E. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

Clifford Prisbrey, 24 IBLA 108 (Mar. 1, 1976)

Lewis H. Eslick, 24 IBLA 237 (Mar. 24, 1976)

Dallas C. Qualman et al., 36 IBLA 119 (July 25, 1978)

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

Where applications for a right-of-way and a special land-use permit are filed in conformity with the requirements of regulations then in effect, and the regulations are amended while final action on the applications is pending, but the amended regulations are made effective at a future date, then if the right-of-way and permit are issued prior to the effective date of the amendments they will not be subject to the added requirements; but if the applications are still pending when the amendments become effective, the new regulations will govern.

Arizona Public Service Co., 20 IBLA 120 (Apr. 25, 1975)

A selection of land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

The issuance of a special land-use permit is discretionary, and the Bureau of Land Management may reject a special land-use permit application when the proposed use would adversely affect the public interest, and may offer, in the alternative, a permit providing for use consonant with proper management of national resource lands.

Jerry Tecklin, Leonard Brackett, 20 IBLA 308 (May 30, 1975)

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his failure to do so cannot be excused because of the asserted "apparent inefficiency of the United States Mails."

Mar-Win Development Co., 20 IBLA 383 (June 12, 1975)

An acquired lands lease offer for land in which the United States owns only a fractional mineral interest is defective and subject to rejection when the applicant fails to accompany his offer with the statement required by the regulations showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror subsequently submits his statement regarding ownership of operating rights prior to a final decision rejecting the offer, the defect may be considered cured with priority of filing as of the time the statement was filed.

John Oakason, Jean Oakason, 21 IBLA 185 (July 25, 1975)

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Austral Oil Co., Inc., 21 IBLA 243 (Aug. 11, 1975)

The issuance of a public airport lease on the public domain lies within the discretion of the Secretary of the Interior. A decision rejecting an airport lease application in the exercise of that discretion will be affirmed when, even though the Board differs in its opinion of the importance of some of the factors recited as grounds for the rejection, the record shows the decision to be a reasoned analysis of the factors

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

involved, and no sufficient basis to disturb the decision is shown.

Boulder City Aero Club, Inc., 21 IBLA 343 (Aug. 18, 1975)

Until a final authoritative judicial determination is made of the title to geothermal resources in lands patented with a reservation of all minerals to the United States, a geothermal lease application which omits such patented lands from a section will not be considered in compliance with 43 CFR 3210.2-1(c) requiring all available lands in a section to be described in the lease application. However, the application may be suspended as to that section, rather than rejected, until the title question is resolved.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

The Recreation and Public Purposes Act authorizes the Secretary, in his discretion, to sell or lease tracts of national resource lands. The proposed mode for financing the development of land applied for pursuant to the Recreation and Public Purposes Act cannot compel issuance of a patent instead of a lease if issuance of a patent would be contrary to the public interest as determined by the Secretary or his delegate. Thus, in the event the applicant has secured financial resources by promising acquisition of title to the land, the proper action is not for the Bureau of Land Management to change the applicant's tenure status in violation of the public interest, but rather for the applicant to secure alternate financing arrangements.

Board of County Commissioners, Ouray County, Colorado, 22 IBLA 182 (Oct. 7, 1975)

In the absence of a timely appeal from a decision rejecting the State of Alaska's selection application for certain lands, the lands are no longer segregated from other disposition and a withdrawal of those lands may attach, precluding subsequent selection by the State.

State of Alaska, 22 IBLA 229 (Oct. 16, 1975)

A decree of foreclosure by a United States District Court, which upholds the validity of a deed of trust executed on a trade and manufacturing site, is not subject to collateral attack in the Department of the Interior. Where the applicant to purchase the site has thus been deprived of any interest in the improvements and the site, he is no longer entitled to purchase the site.

Greater Alaska Development Corp., 23 IBLA 179 (Jan. 5, 1976)

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his/her failure to do so cannot be excused because of the asserted delay of the postal service.

John Paul Pratt, 24 IBLA 110 (Mar. 1, 1976)

Carma M. Pooley, 29 IBLA 304 (Mar. 30, 1977)

Jack Koegel, 30 IBLA 143 (May 12, 1977)

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia D. Ellis, 24 IBLA 387 (May 3, 1976)

A selection of available land filed by the State of Alaska pursuant to its Statehood Act segregates the land from subsequent appropriation based on settlement or location. A subsequently filed notice of location for a headquarters site has no effect.

Wilfred S. Wood (On Reconsideration), 25 IBLA 37 (May 6, 1976)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed therefor and any payment submitted therewith will be returned. Should there be a subsequent reclassification as suitable for disposal under the desert land laws, the land will be opened to entry on an equal opportunity basis.

One who submits a desert land entry petition-application for lands which have been classified as being unsuitable for disposal under the desert land laws gains no preference right to such lands should they be reclassified as disposable under the desert land laws. Lands which are reclassified as suitable for disposal will be opened to entry on an equal opportunity basis.

A desert land entry petition-application for land classified as being unsuitable for disposal under the desert land laws may not be held in suspense pending the possible future availability of the land.

Ralph G. Faulkner et al., 26 IBLA 110 (July 26, 1976)

The execution of an application for patent to a mining claim by an attorney in fact for the claimant, at a time when the claimant himself is both resident of and physically within the land district in which the mining claim is located, is unauthorized, and such an application is invalid. The defect cannot be cured by an amendment signed by the claimant.

Floyd R. Bleak, 26 IBLA 378 (Sept. 9, 1976)

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

Pursuant to 43 CFR 2567.5(a)(1), a homestead entryman in Alaska must establish residence upon the land within 6 months of the date of allowance of the entry or within a maximum period of 12 months, if a 6-month extension of time was requested and granted. These periods do not commence at the time of the filing of the application.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, is defective and is properly rejected when the applicant fails to accompany its offer with the statement required by the regulation showing the extent of its ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror submits its statement of operating rights with its appeal, the defect may be considered cured with priority of filing as of that time.

Arkansas Western Gas Co., 27 IBLA 207 (Oct. 6, 1976)

Where an applicant to purchase a trade and manufacturing site or a headquarters site states he was frustrated in completing his improvements and showing sufficient use of the land as required by the law because of more difficult or complex problems than anticipated, but has not shown that this operation could reasonably be expected to be successful, such problems will not afford any basis for equitable adjudication of his application to purchase.

United States v. Ronald B. Tippetts, 29 IBLA 348 (Mar. 31, 1977)

A delay in the adjudication of an application by officers or employees of the Department cannot create rights in Federal property contrary to law.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

Failure to answer completely a question on an application form for a desert land entry concerning citizenship of the applicant is not an adequate basis for rejecting the application when the requested information is readily apparent elsewhere on the application form.

Failure to include as required by 43 CFR 2521.2(b) the post office addresses of witnesses whose statements are part of an application for desert land entry is an adequate basis for rejecting the application.

William J. Hart, Lucile B. Hart, 30 IBLA 138 (May 12, 1977)

It is the responsibility of an applicant and entryman to keep BLM informed of his current address, with specific reference to the serial numbers of all cases affected thereby. Notification to BLM of a change of address with respect to a particular case does not constitute notice with respect to other cases not specifically described in such notification.

Apostolos Paliombeis, 30 IBLA 153 (May 16, 1977)

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

Where the regulation allows the filing of an application for a prospecting permit on a copy of the approved form not correctly reproduced, and the application contains a statement that the applicant agrees to be bound by the term conditions on the approved form, an application which consists of a copy of only the first page of a two-page form is properly rejected when it is not accompanied by the required statement.

UOP, Inc., 31 IBLA 142 (June 30, 1977)

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

A geothermal lease application is properly rejected to the extent that it includes land which has been reconveyed to the United States but which has only been opened to applications under the nonmineral public land laws.

Chevron Oil Co., 32 IBLA 275 (Sept. 27, 1977)

An applicant for prospecting permits is not the "sole party in interest," within the meaning of 43 CFR 3500.0-5(a), where another party participates in the preparation and filing of the application, and where an agreement exists at the time of filing under which the applicant is bound to assign to the other party any advantages gained by him from the applications.

Williadean Patton, Essex Minerals, Inc., National Bulk Carriers, Inc., 32 IBLA 350 (Oct. 21, 1977)

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed.

Rulon Van Tassel, 33 IBLA 221 (Dec. 22, 1977)

It is a proper exercise of discretion under the Federal Land Policy and Management Act of 1976 for the Bureau of Land Management to refuse to process and to reject applications for public sale pending on the date of the Act, even though it will continue to process bids and preference right applications for a sale held prior to the Act.

United Park City Mines Co., 33 IBLA 358 (Jan. 16, 1978)

"Subject to appropriation by him." The provision in 43 CFR 2511.4-2(a) permitting credit for residence and cultivation by a homestead entryman before the date of entry if during that period the land was "subject to appropriation by him" does not refer to land for which there were prior-filed homestead applications which are subsequently withdrawn or rejected. Therefore, until action is taken on prior-filed applications, final proof filed by a junior homestead applicant should not be rejected merely because the land is subject to the prior applications.

John R. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

Where a mineral patent application is supported by information sufficient to permit a mineral examination of the claims, but not sufficient for the adjudicator to approve the application for patent, he may properly call on the applicant for supplemental evidence to support the application. However, if the claimant fails to submit it, the adjudicator may not penalize such failure by summary rejection of the application for reasons relating to disputed issues of fact without notice and an opportunity for hearing.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

Sec. 9(b) of the Administrative Procedure Act, *as amended*, 5 U.S.C. § 558(c) (1976), does not apply to coal prospecting permit extension applications because the prospecting is not an "activity of a continuing nature" within the meaning of the statute. As the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 30 U.S.C. § 201 (1976), removed the Secretary of the Interior's discretion to grant extensions, applications for preference right leases filed after expiration of the initial 2-year permit term, and during pendency of extension applications, cannot be issued.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

Neither an application for an Alaska grazing lease nor an application for assignment of a grazing lease confer upon the applicant a right to a lease, the granting thereof being discretionary and subject to any changes in Secretarial policy.

Kenneth H. Bunch, 37 IBLA 346 (Oct. 27, 1978)

An application for an oil and gas lease filed in the name of a person deceased at the time of filing is properly rejected as there then was no offeror qualified to hold a lease.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

Where consideration of an application to participate in the Government royalty oil sales program filed after the deadline could interfere with the rights of other applicants and would unduly interfere with the orderly conduct of the program, the application is properly rejected.

A. Johnson & Co., Inc., 38 IBLA 182 (Dec. 6, 1978)

A land selection application filed pursuant to secs. 12(b)(1), 12(b)(3), and 14(h)(1) of the Alaska Native Claims Settlement Act must conform to the regulations promulgated under the statute as enacted at the time the application is filed unless a later amendment to the statute provides otherwise.

Neither P.L. 94-204 (89 Stat. 1145, 43 U.S.C. § 1611 (Supp. IV 1974)), nor the Terms & Conditions incorporated in the amendment, contain language which conflicts with, excludes, or preempts ANCSA regulations 43 CFR 2650.2(e)(1) and (2) requiring a legal description of lands applied for pursuant to ANCSA, or 43 CFR 2653.5(f) requiring a description and location of historical sites selected pursuant to sec. 14(h)(1) of ANCSA.

A land selection application filed pursuant to secs. 12(a)(1), 12(a)(3), and 14(h)(1) of ANCSA containing only a metes and bounds description of the exterior boundaries of a region, does not meet the requirements

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

for a legal description of 43 CFR 2650.2(e)(1) and (2) and 2653.5(f).

A land selection determined finally to be invalid pursuant to ANCSA or its implementing regulations is not protected within the meaning of sec. 22(h)(1) after the date of terminations.

Appeal of Cook Inlet Region, Inc., 3 ANCAB 111 (Dec. 27, 1978)
85 I.D. 462

Where the Secretary by appropriate notice in the *Federal Register* has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in *Federal Register* of termination of classification, BLM properly denied petition-application for desert land entry.

Paul M. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

Melvin V. Frandsen, Mary C. Frandsen, 43 IBLA 130 (Sept. 26, 1979)

An entryman may not take advantage of sec. 7 of the Act of Mar. 3, 1891, entitling an entryman to a patent after 2 years from date of issuance of a receiver's receipt when there is no pending contest or protest against the validity of the entry, where he has not shown that preconditions of the Act have been met, *i.e.*, making the final payments required.

United States v. Jack Zeggy Boyd, Jr., 39 IBLA 321 (Feb. 27, 1979)

Rights may be established by occupancy of a trade and manufacturing site on vacant, unappropriated public domain in Alaska and filing of a notice of location thereof, despite a prior survey pursuant to a petition for survey of townsite lands, when the notice of location and occupancy of the claim for trade and manufacturing precedes settlement and occupancy under the townsite laws.

Carl A. Line, 40 IBLA 63 (Mar. 16, 1979)

When an applicant for a noncompetitive oil and gas lease is requested to provide additional information for the adjudication of his drawing entry card offer, the offer is properly rejected where the evidence provided is illegible, and applicant was notified of the illegibility but responded by sending more illegible evidence.

Richard E. Lewis, 40 IBLA 100 (Mar. 27, 1979)

Where an application for a special use permit is not filed until more than 10 months after a deadline for doing so imposed by BLM, it is properly rejected.

Outdoor Adventure River Specialists, Inc., 41 IBLA 132 (June 14, 1979)

APPLICATIONS AND ENTRIES--Continued

GENERALLY--Continued

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

An application for permit to drill for oil and gas in a designated Potash Area is properly denied where the applicant fails to show that his application comes within either of the two exceptions to the policy in favor of potash development enunciated in an Order of the Secretary, dated Oct. 7, 1975, 40 FR 51486.

Belco Petroleum Corp., 42 IBLA 150 (Aug. 16, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Under the Federal Land Policy and Management Act of 1976, § 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file an affidavit of assessment work or a notice of intention to hold the claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned. Where an appellant asserts on appeal that he timely mailed proof of labor to the Bureau of Land Management, but the documents were not received by that office, the documents cannot be considered as filed with that office unless and until they are received by it.

John Newkirk et al., 42 IBLA 292 (Aug. 27, 1979)

James E. Yates, 42 IBLA 391 (Sept. 11, 1979)

BLM personnel may not attempt to "correct," complete, or interpret entries on oil and gas lease offer application forms in such a way as to perfect an otherwise unacceptable application, nor may an applicant "cure" a defect on his drawing entry card by the submission of supplemental information after the drawing.

Resources Exploration & Mining, Inc. (On Reconsideration), 43 IBLA 89 (Sept. 19, 1979)

Where a mineral patent application is supported by a mineral examination of the claim which finds a valid discovery and recommends issuance of a patent for a portion of the claim, the BLM may not summarily reject the application on the face of the record for reasons related to disputed issues of fact without notice and an opportunity for hearing.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

APPLICATIONS AND ENTRIES--Continued

AMENDMENTS

Where an Alaska Native allotment application pending in the Department on Dec. 18, 1971, is later amended to include new or additional lands, the amendment to the application will not be considered as timely filed and will be rejected. However, a correction of a description, where the site was not properly identified on protraction diagrams, may be permitted.

Raymond Kapeak, 19 IBLA 68 (Feb. 25, 1975)

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation, 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in a noncompetitive geothermal lease application received after the close of the monthly filing period in which the initial offer was filed will not be allowed.

Edward B. Towne, 21 IBLA 304 (Aug. 14, 1975)

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in such an application received after the close of the monthly filing period in which the initial application was filed will not be allowed.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

Where an Alaska Native allotment applicant pending in the Department on Dec. 18, 1971, is later amended to include new or additional lands, the amendment to the application will not be considered as timely filed and will be rejected.

Annie Sorly, 22 IBLA 38 (Sept. 10, 1975)

An application for the amendment of a patent is properly rejected where the record contains insufficient evidence to show that the entryman entered lands not intended by him as his entry, and where the record fails to show what precaution to avoid error was taken by the entryman at the time of making the original entry, if in fact he intended to enter other lands.

Domenico Tussio et ux., 24 IBLA 141 (Mar. 8, 1976)

The amendment of a notice of location of a homesite in Alaska may be allowed where the application is filed within the life of the 5-year period granted, and where the amendment embraces lands which the applicant has actually occupied and possessed.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 96 (June 3, 1976)

The execution of an application for patent to a mining claim by an attorney in fact for the claimant, at a time when the claimant himself is both resident of and physically within the land district in which the mining claim is located, is unauthorized, and such an application is invalid. The defect cannot be cured by an amendment signed by the claimant.

Floyd B. Bleak, 26 IBLA 378 (Sept. 9, 1976)

APPLICATIONS AND ENTRIES--Continued

AMENDMENTS--Continued

Where an Alaskan Native alleges that the land described in her Native Allotment Certificate is not the land she settled on and posted, her application for an amendment of the certificate will not be rejected solely because the certificate description is consistent with her application if she offers a reasonable explanation for the mistake and has actually occupied the land she seeks to have included in her certificate.

Edith Jacquot, 27 IBLA 231 (Oct. 12, 1976)

Where a homestead entry has been located on land later included within a withdrawal "subject to valid existing rights," the withdrawal attaches to the land within the homestead upon cancellation of the entry. An amendment of a homestead entry cannot include lands within a canceled adjoining entry to which a withdrawal has attached.

Pekka E. Merikallio, 30 IBLA 157 (May 10, 1977)

Where noncompetitive acquired lands oil and gas lease offers were allegedly deposited on the cashier's counter in the proper Bureau of Land Management office prior to close of business on a certain day, yet were not discovered by a Bureau employee until 6 a.m. the following day and date-time stamped as filed at 10 a.m. on such day, a protest and petition to amend the filing date of such offers are properly denied where the offeror produces no evidence to support her claim other than her personal affidavit; where no Bureau employee saw the offeror in the Bureau office at the time she claimed to have been there; where no Bureau employee saw the offers on the counter until the following day; and where third-party rights are involved.

Laura J. Spangler, 30 IBLA 265 (May 31, 1977)

CANCELLATION

The filing of a notice of location for a headquarters site does not prevent a withdrawal from attaching to the land prior to the time the locator of the headquarters site performs the requisite acts with respect to use and occupancy necessary to establish the right to purchase.

A headquarters site claim located prior to a withdrawal may be declared invalid by the Bureau of Land Management without awaiting the filing of a patent application where there has been insufficient compliance with the law to appropriate the land before the withdrawal. However, the Bureau should follow appropriate procedures. These should include giving notice to the claimant to show cause why the claim should not be invalidated where the notice of location does not show adequate compliance with the law sufficient to preclude the withdrawal, and initiating a contest and affording an opportunity for a hearing where there are disputed facts on the compliance with the law.

Richard T. Pope, 22 IBLA 374 (Nov. 17, 1975)

A request to reconsider a 1968 decision by the Department rejecting final proof for a homestead entry and canceling the entry is properly rejected in the absence of a showing of "extraordinary circumstances." In the absence of compelling legal or equitable reasons for reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

APPLICATIONS AND ENTRIES--Continued

CANCELLATION--Continued

Pekka E. Merikallio, 30 IBLA 157 (May 10, 1977)

BLM has discretion to reject public sale applications pursuant to R.S. 2455, repealed by the Federal Land Policy and Management Act of 1976, effective Oct. 21, 1976, where the sale has not been held by this date. The filing of a public sale application creates no rights under sec. 701(a) of FLPMA which prevent BLM from exercising its discretion to dismiss the application.

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

FILING

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George M. Crapo, Richard L. Crapo, 19 IBLA 208 (Mar. 21, 1975)

Under the Act of Apr. 29, 1950, 43 U.S.C. § 687a-1 (1970), a notice of location of a trade and manufacturing site filed after withdrawal of the land is acceptable if it is filed within 90 days of settlement and the settlement occurs prior to a withdrawal of the land. An application to purchase based on such an asserted settlement and filing will be rejected when it is not filed within the statutory life of the asserted claim, but the applicant may be afforded an opportunity to submit a justification for his late filing under the principles of equitable adjudication.

Edwin William Seiler (On Reconsideration), 20 IBLA 221 (May 9, 1975)

Since the statute authorizing cash payment to the holder of soldiers' additional rights requires that an applicant for such payment must give written notice to the Secretary of the Interior of his election to receive such payment prior to Jan. 1, 1975, an application received on Jan. 2, 1975, must be rejected.

J. Sidney Bood, 20 IBLA 319 (June 4, 1975)

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his failure to do so cannot be excused because of the asserted "apparent inefficiency of the United States Mails."

Mar-Win Development Co., 20 IBLA 383 (June 12, 1975)

Where a desert land applicant appeals from a decision of the Bureau of Land Management holding his application incomplete and, therefore, without priority of filing as against subsequent applications which were allegedly perfected before the earlier application was corrected and refiled, the case will be remanded for final action on the respective applications so as to avoid premature, piecemeal adjudication.

Michael E. Heaney, 21 IBLA 339 (Aug. 18, 1975)

Nelda E. McAndrew, 24 IBLA 205 (Mar. 22, 1976)

It is improper for the Bureau of Land Management to require an applicant having partially conflicting noncompetitive acquired lands oil and gas lease offers filed in the regular over-the-counter procedure at different times to withdraw either his senior or junior offer simply because of the conflict.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

The notation on land office records of a noncompetitive oil and gas lease application does not prevent the State of Alaska from selecting the land pursuant to the Alaska Statehood Act.

Yukon Service, Inc., 22 IBLA 220 (Oct. 15, 1975)

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his/her failure to do so cannot be excused because of the asserted delay of the postal service.

John Paul Pratt, 24 IBLA 110 (Mar. 1, 1976)

Carma M. Pooley, 29 IBLA 304 (Mar. 30, 1977)

Jack Koegel, 30 IBLA 143 (May 12, 1977)

A selection application under the Alaska Statehood Act filed in the appropriate Bureau of Land Management Office for properly described land segregates the land from all appropriation based upon subsequent application or settlement and location.

A selection application under the Alaska Statehood Act that describes land according to an approved protraction diagram properly describes those lands if the official plat of survey has not been accepted.

John W. Eastland et al., 24 IBLA 240 (Mar. 25, 1976)

It is the responsibility of an applicant and entryman to keep BLM informed of his current address, with specific reference to the serial numbers of all cases affected thereby. Notification to BLM of a change of address with respect to a particular case does not constitute notice with respect to other cases not specifically described in such notification.

Apostolos Paliombeis, 30 IBLA 153 (May 16, 1977)

The filing of a petition-application is treated as a petition for classification of the land. The mere filing of the application does not vest in the applicant any interest in the land and repeal of the authorizing statute mandates rejection of the application.

Arthur H. Wallace, 30 IBLA 239 (May 31, 1977)

Where noncompetitive acquired lands oil and gas lease offers were allegedly deposited on the cashier's counter in the proper Bureau of Land Management office prior to close of business on a certain day, yet were not discovered by a Bureau employee until 6 a.m. the following day and date-time stamped as filed at 10 a.m. on such day, a protest and petition to amend the filing date of such offers are properly denied where the offeror produces no evidence to support her claim other than her personal affidavit; where no Bureau employee saw the offeror in the Bureau office at the time she claimed to have been there; where no Bureau employee saw the offers on the counter until the following day; and where third-party rights are involved.

Laura J. Spangler, 30 IBLA 265 (May 31, 1977)

An application for modification of an existing coal lease to include an entire section is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Estate of Malcolm B. McKinnon, 31 IBLA 290 (July 22, 1977)

An application for modification of an existing coal lease to include an additional 361.52 acres is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Gulf Oil Corp., 32 IBLA 13 (Aug. 29, 1977)

The authorized officer may not deem an oil and gas rental payment to have been timely filed, pursuant to 43 CFR 1821.2-2(g) if it is received at the State Office when it is not open to the public, even though the payment is presented on the last day in which payment can be made. Such payment is deemed to have been made on the day and hour the office is next open to business, as provided in 43 CFR 1821.2-2(d).

It is proper to deny a petition for reinstatement of an oil and gas lease terminated for failure to pay rental on time as required by sec. 31 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 188(b) (1970), where 20 minutes before the State Office closes to the public on the last day on which rental can be paid, petitioner instructs by telephone an agent who lives in the vicinity of the State Office to make the payment and the agent who alleges she was delayed by traffic and security measures makes payment after the office is closed to the public. In such circumstances the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Bob Burch, 32 IBLA 93 (Sept. 12, 1977)

Where a party is not the sole party in interest in applications for prospecting permits, his applications must be rejected under 43 CFR 3511.2-4(a)(7) if they do not comply with the mandatory provisions of 43 CFR 3502.7, which require submission of statements of all parties' respective interests and of any agreement between them, and submission of evidence of the qualifications of all parties to hold prospecting permits.

Where a party files applications for prospecting permits as an attorney-in-fact of another party, he must disclose his status as an agent by designating his principal as the "applicant" on the application forms, and must, under 43 CFR 3502.3-1 and 3502.6-1(a), file statements of qualifications for both himself and his principal, as well as a copy of the agreement establishing his power of attorney, or his applications must be rejected under 43 CFR 3511.2-4(a)(7).

Willadean Patton, Essex Minerals, Inc., National Bulk Carriers, Inc., 32 IBLA 350 (Oct. 21, 1977)

A decision by a Bureau of Land Management District Office rejecting an application for an extension of a mineral materials sale contract solely for the reason it was not timely filed in accordance with 43 CFR 3610.7 will be set aside and remanded for the authorized officer to determine whether the application may be considered as timely pursuant to 43 CFR 1821.2-2(g). This section permits the authorized officer to consider a document as being timely filed except where the law does not permit him to do so, the rights of a third party or parties have intervened, or the authorized officer determines that further consideration of the document would unduly interfere with the orderly conduct of business.

Don Kelland Materials, Inc., 35 IBLA 133 (May 22, 1978)

Where consideration of an application to participate in the Government royalty oil sales program filed after the deadline could interfere with the rights of other applicants and would unduly interfere with the orderly conduct of the program, the application is properly rejected.

A. Johnson & Co., Inc., 38 IBLA 182 (Dec. 6, 1978)

Rights may be established by occupancy of a trade and manufacturing site on vacant, unappropriated public domain in Alaska and filing of a notice of location thereof, despite a prior survey pursuant to a petition for survey of townsite lands, when the notice of location and occupancy of the claim for trade and manufacturing precedes settlement and occupancy under the townsite laws.

Carl A. Line, 40 IBLA 63 (Mar. 16, 1979)

Under the Federal Land Policy and Management Act of 1976, § 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file an affidavit of assessment work or a notice of intention to hold the claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned. Where an appellant asserts on appeal that he timely mailed proof of labor to the Bureau of Land Management, but the documents were not received by that office, the documents cannot be considered as filed with that office unless and until they are received by it.

John Newkirk et al., 42 IBLA 292 (Aug. 27, 1979)

James E. Yates, 42 IBLA 391 (Sept. 11, 1979)

The Alaska Native Claims Settlement Act, 43 U.S.C. § 1617 (1976), repealed the Act of May 17, 1906, *as amended*, 43 U.S.C. §§ 270-1 to 270-3 (1970), with the exception of applications pending on Dec. 18, 1971. A State Office decision rejecting a Native allotment application for an additional parcel of land filed pursuant to the Act of May 17, 1906, after Dec. 18, 1971, will be affirmed. Equitable adjudication, which requires substantial compliance with the law, will not be invoked where there is no evidence that such an application was timely filed with BIA.

Nora L. Sanford, 43 IBLA 74 (Sept. 19, 1979)

INHERITABILITY

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed in all cases an offer to lease in compliance with 43 CFR 3102.8. Such offer will be effective as of the date of the original lease offer filed by the deceased.

Lamar M. Richardson, Jr., 42 IBLA 333 (Aug. 30, 1979)

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed an offer to lease in compliance with 43 CFR 3102.8.

Estate of F. J. Bradshaw, 44 IBLA 107 (Nov. 20, 1979)

PRIORITY

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George W. Crago, Richard L. Crago, 19 IBLA 208 (Mar. 21, 1975)

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference-right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

Where a desert land applicant appeals from a decision of the Bureau of Land Management holding his application incomplete and, therefore, without priority of filing as against subsequent applications which were allegedly perfected before the earlier application was corrected and refiled, the case will be remanded for

APPLICATIONS AND ENTRIES--Continued

PRIORITY--Continued

final action on the respective applications so as to avoid premature, piecemeal adjudication.

Michael E. Heaney, 21 IBLA 339 (Aug. 18, 1975)

Nelda E. McAndrew, 24 IBLA 205 (Mar. 22, 1976)

An over-the-counter oil and gas lease offer, properly rejected because it failed to meet the requirements of the regulations, may be considered as having priority as of the date the defect is cured where the curative action was taken during an appeal from the rejection of the offer.

Emerald Oil Co., 31 IBLA 119 (June 24, 1977)

The rejection of a homestead application in Alaska merely because there are prior-filed homestead applications for the same land is improper and premature where no action has been taken on the conflicting applications. If a prior-filed application is allowed, the land comes within an allowed entry of record and a junior application must be rejected thereafter. However, if the prior application is rejected or withdrawn, it no longer bars allowance of a junior application.

John E. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

An over-the-counter oil and gas lease offer, properly rejected because of a failure to meet the requirements of the regulations, but which rejection did not become final because an appeal was timely filed, may be considered as having priority as of the date the defect was cured.

Phillips Petroleum Co., 38 IBLA 344 (Dec. 22, 1978)

RIGHTS OF WIDOWS, HEIRS, OR DEVISEES

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

VALID EXISTING RIGHTS

The mere filing of a notice of location for a headquarters site under 43 U.S.C. § 687a (1970) does not establish rights to land. If a claimant cannot also demonstrate the necessary use and occupancy of the site prior to the effective date of a withdrawal and establish a right of purchase, he does not have a "valid existing right" excepted from the withdrawal, and the withdrawal attaches to the land in the site.

Stephen E. Sorensen, 22 IBLA 258 (Oct. 28, 1975)

APPLICATIONS AND ENTRIES--Continued

VALID EXISTING RIGHTS--Continued

A homestead notice of location filed for lands open to location is acceptable for recordation. Where a homestead settler has marked the corners of his claim by posts prior to a withdrawal subject to valid existing rights, the claim survives the withdrawal if the location notice requirements have been satisfied.

Robert A. Rice, Jr., 22 IBLA 291 (Nov. 3, 1975)

The filing by a qualified applicant of a homestead application to enter unappropriated surveyed lands in Alaska segregates the land covered by the application from appropriation. Such an application will be considered to have created a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

The filing by a qualified applicant of an application for an allowed homestead entry of land which is open and available to such entry at the time of filing will operate to segregate the land from subsequent appropriation and invest the applicant with sufficient interest therein to preserve the land from the effect of a subsequent withdrawal which is made subject to valid existing rights.

Richard T. Pope, 27 IBLA 33 (Sept. 20, 1976)

A pending noncompetitive oil and gas lease offer is not a valid existing right protected by the savings clause in the Alaska Native Claims Settlement Act.

Neither the filing of an over-the-counter oil and gas lease offer, nor the holding of a drawing of simultaneously filed offers to determine the first-qualified offeror, creates any right to a lease or any property rights in the offeror that diminish the Secretary's discretion whether or not to issue a noncompetitive oil and gas lease on a given tract.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

The filing of a petition-application is treated as a petition for classification of the land. The mere filing of the application does not vest in the applicant any interest in the land and repeal of the authorizing statute mandates rejection of the application.

Arthur R. Wallace, 30 IBLA 239 (May 31, 1977)

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

BLM has discretion to reject public sale applications pursuant to R.S. 2455, repealed by the Federal Land Policy and Management Act of 1976, effective Oct. 21, 1976, where the sale has not been held by this date. The filing of a public sale application creates no rights under sec. 701(a) of FLPMA which prevent BLM

VALID EXISTING RIGHTS--Continued

from exercising its discretion to dismiss the application.

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

Sec. 4 of the Federal Coal Leasing Amendments Act of 1975 removes the authority of the Secretary to grant extensions of coal prospecting permits, subject to valid existing rights, and applies to applications for permit extensions pending at the time the law was enacted by Congress. Such pending applications are not valid existing rights under sec. 4 of the 1975 Amendments Act because the authority to grant coal prospecting permit extensions was discretionary with the Secretary.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978)
85 I.D. 161

Thomas C. Woodward, 35 IBLA 262 (May 31, 1978)

Virgil V. Peterson and Hiko Bell Mining & Oil Co., 37 IBLA 18 (Sept. 12, 1978)

A delay in taking action on an application for extension of a coal prospecting permit while the Secretary formulates a new leasing policy does not violate the Administrative Procedure Act, 5 U.S.C. § 555(b) (1976), nor does it constitute an abuse of discretion which would create any rights not authorized by law. No hearing is required when the facts of a case are not in dispute and the only issues are questions of law.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

Without adequate proof of a tender of a notice of location or application to purchase a headquarters site which was wrongfully denied by Bureau of Land Management personnel prior to a withdrawal of the land, the mere occupancy of land prior to the withdrawal did not create a "valid existing right" excepted from the effect of the withdrawal, and an application to purchase a headquarters site filed after the withdrawal is properly rejected.

Rene P. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

Rights may be established by occupancy of a trade and manufacturing site on vacant, unappropriated public domain in Alaska and filing of a notice of location thereof, despite a prior survey pursuant to a petition for survey of townsite lands, when the notice of location and occupancy of the claim for trade and manufacturing precedes settlement and occupancy under the townsite laws.

Carl A. Ling, 40 IBLA 63 (Mar. 16, 1979)

VESTED RIGHTS

The filing of an application for a special land use permit does not vest in the applicant any rights which preclude the Bureau of Land Management from requiring compliance with fee assessments adopted after the date of such filing but before issuance of the permit. In the absence of a provision that pending applications are to be exempted from the effects of the change in

VESTED RIGHTS--Continued

fee requirements, the applicant must comply with the fee assessment in effect at the time of the issuance of the special land use permit.

An applicant's special land use permit application does not fall within the "firm commitment" exception of a Bureau of Land Management instruction memorandum requiring revised fee assessments for off-road vehicle (ORV) permits where, subsequent to issuance and notice of the memorandum, the application is still in the preliminary processing stage requiring additional pre-event meetings, the applicant's acceptance of special stipulations, and further staff investigation and review before approval; however, the case will be remanded for further consideration where the District Office decision does not determine whether the application falls within the memorandum exception which permits the honoring of "negotiations which have progressed too far to negate."

Walt's Racing Ass'n, 18 IBLA 359 (Jan. 30, 1975)

The rejection of an application for the purchase of land under the Recreation and Public Purposes Act does not violate the tenets of due process since the disposition of the application is at the discretion of the Department, and the applicant has acquired no vested right protected by the United States Constitution.

Board of County Commissioners, Ouray County, Colorado, 22 IBLA 182 (Oct. 7, 1975)

An applicant's special land use permit application does not fall within a Bureau of Land Management instruction memorandum exception which permits the honoring of past "negotiations which have progressed too far to negate," in lieu of the new revised fee assessment required by the memorandum for off-road vehicle events, where at the time of issuance and notice of the memorandum only preliminary negotiations had occurred which could still be negated.

Walt's Racing Ass'n, 22 IBLA 238 (Oct. 22, 1975)

The filing of a phosphate prospecting permit application creates no vested rights in the applicant, and the application must be rejected if the land described therein is determined to be subject to the competitive leasing provisions of the Mineral Leasing Act. Rejection is required even if the application was filed prior to the ascertainment of the extent or workability of the phosphate bed underlying the applied for land, which finding requires competitive leasing of the land.

William E. Martin, 24 IBLA 271 (Mar. 30, 1976)

An application for a phosphate prospecting permit is properly rejected when the lands applied for have been classified as containing deposits of oil shale. The lands are thereby subjected to the withdrawal from leasing and other disposal imposed by Executive Order No. 5327. Rejection of the application is required even though the application was filed prior to the oil shale classification and withdrawal.

Thomas E. Gaynor, 24 IBLA 320 (Apr. 20, 1976)

APPLICATIONS AND ENTRIES--Continued

VESTED RIGHTS--Continued

The holder of equitable title has a vested interest: *i.e.*, that interest, acquired by a party when all prerequisites for the acquisition of title have been complied with, which, attaching to the land, deprives Congress of its power to dispose of the property.

Appeal of Eklutna, Inc., 1 ANCAB 190 (Dec. 10, 1976)
83 I.D. 619

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Estate of Malcolm W. McKinnon, 31 IBLA 290 (July 22, 1977)

Gulf Oil Corp., 32 IBLA 13 (Aug. 29, 1977)

"Valid Existing Right." An application for modification of a coal lease filed prior to enactment of the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C.A. § 203 (Supp. 1977), is insufficient to establish a "valid existing right" excepted from the acreage limit on lease modifications imposed by the amendment.

Nevada Power Co., 36 IBLA 62 (June 30, 1978)

The filing of an application does not itself create a vested property interest or right. It creates at most merely a hope or expectation.

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

APPRAISALS

An applicant for land under the Small Tract Act cannot acquire any right in the land by virtue of administrative delay in reappraising the land prior to issuance of patent. The mere filing of a small tract application does not create in the applicant any right or interest in the land.

Where the current fair market value of land has been determined in accordance with accepted appraisal procedures, the appraisal will not be disturbed in the absence of positive, substantial evidence that it is in error.

George D. Jackson, 20 IBLA 253 (May 16, 1975)

APPRAISALS--Continued

Where a decision fixes a small tract rental derived from an appraisal report which does not comport with Departmental standards, the decision will be set aside and the case remanded for a new appraisal to establish the fair rental value.

Junction Oil Co., Inc., 21 IBLA 78 (June 25, 1975)

Where an appraisal has followed established criteria in calculating the fair-market value of rental for a right-of-way, it will be affirmed, absent a showing by positive and substantial evidence that the appraisal is in error.

Western Slope Gas Co., 21 IBLA 119 (July 14, 1975)

A notification to a small tract lessee, which was authorized by a memorandum of the Director, Bureau of Land Management, dated Oct. 19, 1955, and approved by the Secretary of the Interior on Nov. 9, 1955, that the lessee could purchase the tract under lease without constructing the improvements required in the option to purchase clause of the lease, if he paid the appraised price shown on the lease within a set time, was an offer to sell the tract by the United States, and exercise of the option by the lessee created a binding contract. Where issuance of the patent was delayed for years because of the contest of a conflicting mining claim, reappraisal to determine changed value since that time is not permissible because there was a binding contract under special authority.

Abraham Epstein, 24 IBLA 195 (Mar. 19, 1976)

Under 43 CFR 2802.1-7(e), which provides that charges for use and occupancy of a communication site on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Under 602 DM 1.3, standards for evaluating easements granted by the Department are set forth in Interagency Land Acquisition Conference, *Uniform Appraisal Standards for Federal Land Acquisitions*.

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communications sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is a proper method of determining the fair market value of such site where there is sufficient comparable data available.

Under 43 CFR 2802.1-7(e), a revision of charges for use and occupancy of a microwave communication site should be based upon the physical condition of the right-of-way at the time the user properly commenced occupancy of the site or at time of grant thereof, whichever was earlier, with value adjusted to present value in that condition.

"Highest and best use." As to the improver of a communication site during the term of his grant, a determination that the highest and best use of property is for communications purposes must be based on evidence showing it is so reasonably likely the site would be chosen for use as a communication site in the absence of improvements made by the improver that the suitability of the land for communications purposes would affect its general market value.

"Before and after rule." In reappraisal of a communication site, the before and after rule is applied by determining the market value of the Government tract including the site at the time of reappraisal, excluding any enhancement to or diminution from the site project, and subtracting therefrom the market value of the remaining Government property interest, including enhancement or diminution from the project.

In the absence of better evidence of comparable leases, the "before and after" method should be employed in appraisals of communication sites under 43 CFR 2802.1-7.

In a case where a substantial increase is proposed in charges for a communication site under 43 CFR 2802.1-7(e), the required hearing should be conducted in accordance with the accepted concepts of due process.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

Under 43 CFR 2802.1-7(e), which provides that charges for a right-of-way on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Paradise Oil, Water and Land Development, Inc., 26 IBLA 374 (Sept. 8, 1976)

Under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7(a), an applicant has no right to a hearing in connection with original charges for use and occupancy of a communication site, and a hearing pursuant to a request under 43 CFR 4.415 will not be granted where applicant fails to make specific allegations or offer specific proof to show in what factors a Departmental appraisal is in error.

Without convincing evidence that charges prescribed under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7 for use and occupancy of a communication site are excessive, charges properly prescribed by an authorized officer will be sustained on appeal.

Departmental regulation 43 CFR 2802.1-7 contemplates that a charge will be initially established for the entire term of the grant of a communication site right-of-way.

Mountain States Telephone and Telegraph Co., 26 IBLA 393 (Sept. 16, 1976)
83 I.D. 332

Where the current fair rental value of a small tract lease has been determined in accordance with accepted appraisal procedures, and the lessee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Junction Oil Co., Inc., 28 IBLA 183 (Dec. 6, 1976)

One challenging the accuracy of an appraisal of water based on fair market value must show by substantial evidence the nature of the alleged error; where the appraisal has been conducted in accordance with generally accepted appraisal principles, allegations of error unsupported by evidence will be given little weight.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

Where the current fair rental value of a right-of-way has been determined in accordance with accepted appraisal procedures, and the permittee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Four States Television, Inc., 32 IBLA 205 (Sept. 19, 1977)

Under 43 CFR 2802.1-7(e), the charge for a right-of-way on public lands may be revised upon compliance with procedural requirements at any time 5 years or more from the date when the rate was initially established.

XYZ Television, Inc., 32 IBLA 317 (Sept. 30, 1977)

An applicant has no right to a hearing in connection with original Federal charges for use and occupancy of a communication site, and in the absence of any specific assertion showing error in the appraisal, the appraisal will be sustained on appeal if it is properly formulated.

When a parcel of land is properly determined to have a highest and best use for communication site purposes, an annual use charge based on the fair market value of the right-of-way grant may be determined by comparison with value of the right of use for similar sites and by making whatever adjustments may be necessary because of differences in factors influencing value.

XYZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

A Bureau of Land Management appraisal from which the annual rental for a special use permit is calculated will be upheld unless the permittee shows by substantial and positive evidence, specific errors in the method or facts on which the appraisal is based.

Evidence that Forest Service land has been appraised at lower values and leased at lower rates than allegedly comparable Bureau of Land Management land will not suffice to overturn the latter's practices where no specific error in its methods has been shown.

Where a permittee introduces an alternative comparative sales analysis in opposition to that of the Bureau of Land Management, he must show by substantial and positive evidence why his analysis is valid and the Bureau of Land Management's invalid. Where the issue rests on the assertion of each party's expert on the validity of his respective analysis and the record fails to contain evidence by which this deadlock can be resolved, the case will be remanded for further factfinding.

Michael S. Deering, 33 IBLA 142 (Dec. 19, 1977)

When the Bureau of Land Management has appraised the damages for a mineral trespass under 43 CFR Part 9230, a hearing will not be ordered and an appraisal will not be disturbed in the absence of an offer of specific substantial evidence that the determination is incorrect.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

APPRAISALS--Continued

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but are only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on increased charges due on an annual basis for the years prior to payment of such amount.

Under sec. 504(g) of the Federal Land Policy and Management Act of 1976, payments for use of right-of-way sites should be on an annual basis at the fair market value unless the annual payment would be less than $100. Therefore, although lands may be appraised for a longer future period of time, lump-sum payments for future years may not be demanded for amounts exceeding the statutory amount; instead charges for such amounts should be made on an annual basis.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but may be only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Interest may be imposed on use charges for right-of-way sites depending on considerations of fairness and equity. In the absence of contrary directives, interest may be imposed for occupancy of a site where use charges should have been imposed at the same rate as past permitted use. Also, interest may be imposed on increased charges for the period commencing with the date from which increased charges are established.

Under sec. 504(g) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1978), payments for use of right-of-way sites should be on an annual basis at the fair market value unless the annual payment would be less than $100. Therefore, although lands may be appraised for a longer future period of time, lump-sum payments for future years may not be demanded for amounts exceeding the statutory amount; instead charges for such amounts should be made on an annual basis.

APPROPRIATIONS
(See also Expenditures, Funds--if included in this Index.)

The denial of a private landowner's request that the Bureau of Land Management share in the expenses of constructing a fence between Federal and private land will be upheld where the landowner has failed to show a valid legal or factual reason for granting the request.

John L. Tims and Ruth C. Blomgren, 30 IBLA 317 (June 6, 1977)

ASSISTANT SECRETARIES OF THE INTERIOR

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

ATTORNEYS

Qualifications to practice before the Department of the Interior are prescribed by regulations. Where an appeal is brought by a person who does not appear to fall within any of the categories of persons authorized to practice, the appeal is subject to dismissal.

W. Duane Kennedy, 24 IBLA 152 (Mar. 10, 1976)

Although respondent in a grazing license trespass hearing brought by the Bureau of Land Management has the right to be represented and aided by legal counsel, the Department has no duty or responsibility under the Constitution or the Administrative Procedure Act to provide such counsel for him.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Service of a document upon a person's attorney of record constitutes effective service upon such person.

U.S. v. Hite Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

United States v. John Gavanich, 36 IBLA 111 (July 14, 1978)

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the case involves the propriety of proofs submitted by the Bureau of Indian Affairs in behalf of a deceased Native allotment applicant, that issue may be resolved.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

The Department has determined that an official of the Bureau of Indian Affairs is not entitled to represent a Native allotment applicant in an appeal to the Board of Land Appeals. However, where the partial rejection of an Alaska Native allotment application turns on the resolution of a factual issue, the case will be remanded to BLM so that heirs or claimants to the estate of the deceased applicant may be afforded notice and opportunity for hearing.

Unknown Heirs of Migley Kelly, 41 IBLA 387 (July 24, 1979)

Failure to obtain counsel at a hearing into the validity of a mining claim will afford the mining claimant no greater rights on appeal than if he had obtained counsel.

United States v. Howard D. Long, Dolores M. Killion, 43 IBLA 150 (Sept. 28, 1979)

AUTHORITY TO BIND GOVERNMENT

The United States is not estopped to assert title to, survey, or deny the swamp and overflowed character of public lands constituting offshore islands in Florida either by Departmental inaction on the State's swampland application, or by inclusion of the islands in a swampland selection list, or by the survey protestants' adverse chain of title and claims of occupancy and use.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Assertions, even if established, that employees of the Bureau of Land Management assured an oil and gas lessee that drilling a leasehold on the last day of the lease term was sufficient, without more, to extend the lease, and that the lessee relied upon such representations, afford the lessee no relief. Rights not authorized by law cannot be acquired through misinformation given by employees of the Bureau of Land Management.

Charles M. Goad, 25 IBLA 130 (June 7, 1976)

Reliance upon erroneous information provided by employees of the Bureau of Land Management cannot create any rights not authorized by law. The fact that a coal prospecting permittee alleges he was assured by BLM employees that he would receive permit extensions does not prevent the applicability of subsequent legislation which prohibits such extensions from causing his extension applications to be rejected.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978)
85 I.D. 161

The burden of signing and fully executing a drawing entry card rests on the applicant. Reliance on instructions provided by a non-governmental filing service does not excuse the failure to fully execute a card.

Walter D. Moore, Jr., 41 IBLA 95 (June 4, 1979)

AVULSION

Where one who protests the performance and acceptance of a survey of land, identified by the cadastral engineer making the survey as public domain land, offers probative evidence that changes arose because of avulsion rather than accretion and so the land is not in fact Federally owned, a hearing will be ordered to receive and consider such evidence and to ascertain the facts.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

Submerged and filled tidelands passed to the State of Alaska on the date of its admission to the Union, Jan. 3, 1959. Ownership of tidelands subsequently created by avulsive action remains in those persons or entities, including the Federal Government, who held title to the land prior to the avulsive action.

Sandra L. Lough, Damon M. Blackburn, 25 IBLA 56 (June 3, 1976)

AVULSION--Continued

Federal law determines the legal characterization of accretions, avulsions, and relictions to land riparian to navigable bodies of water, where title to the land or reserved interests in the land remains in the United States.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

BONNEVILLE POWER ADMINISTRATION

GENERALLY

The Bonneville Power Administrator has authority to undertake or fund a study or project to help restore the Columbia River anadromous fishery if he finds that such a study or project is necessary or appropriate to carry out his power marketing responsibilities under the Bonneville Project Act, 16 U.S.C. §§ 832-832l, and other related statutes.

Authority of Bonneville Power Administrator to Participate in Funding of Program to Help Restore the Columbia River Anadromous Fishery, M-36885 (Nov. 22, 1976)
83 I.D. 589

BOUNDARIES
(*See also* Accretion, Avulsion, Reliction, Surveys of Public Lands--if included in this Index.)

Where one who protests the performance and acceptance of a survey of land, identified by the cadastral engineer making the survey as public domain land, offers probative evidence that changes arose because of avulsion rather than accretion and so the land is not in fact Federally owned, a hearing will be ordered to receive and consider such evidence and to ascertain the facts.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

The survey of an offshore island without the use of 18.6-year mean high tide data, which governs boundary disputes between private upland and tideland owners, is proper; the 18.6-year lunar cycle tide data does not govern meander lines established in public land surveys.

Meander of an offshore island is ordinarily based on a mean high tide determined by the vegetative line upon the soil in accordance with the Bureau of Land Management's *Manual of Surveying Instructions*.

The Secretary of the Interior is authorized and under a duty to determine what lands are public lands and to survey such lands. Neither the Acts admitting Florida into the Union, nor the Reconstruction Act of Mar. 2, 1867, divested the Secretary of the Interior of that authority regarding islands in the State of Florida, nor divested the United States of title to any public lands in the State.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Courts have long recognized, in determining boundaries, that calls for natural objects and fixed monuments control those for distances.

Taos Pueblo Tract C, M-36888 (Oct. 28, 1976)
83 I.D. 529

BOUNDARIES--Continued

In determining what land is conveyed under patents or grants of public land bordering a meandered watercourse, the general rule is that the waterline itself, not the meander line, constitutes the boundary. There is an exception where the meander line may constitute the boundary between lands omitted from the survey and the watercourse if fraud or gross error is shown in the survey. This exception is only applicable to limit the boundary of the surveyed lots on the side of the watercourse where the omitted land is shown. It does not apply to a lot on the opposite side of the watercourse from the omitted land so as to pass title to the omitted land with title to the lot on the opposite side. The waterline would remain the actual boundary of that lot.

Extrinsic evidence may be used to make definite the description in a private deed which contains a latent ambiguity, either to determine actual or color of title. Therefore, a color of title claimant may introduce extrinsic evidence to establish whether the deeds in her chain of title were based upon plats, records and other documents which can be read together with the deeds as creating a color of title beyond the actual title shown on an official Federal survey plat.

Nels N. Barlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

The primary rule which the courts apply in construing and interpreting a conveyance where the location of the boundary lines is uncertain by reason of inconsistent or conflicting descriptive calls in the conveyance is that the intention of the parties controls and is to be followed. Where the calls for the location of boundaries to land are inconsistent, calls to monuments, natural or artificial, are of paramount importance and will prevail over all other calls inconsistent therewith. Calls to boundaries are of secondary importance, and courses and distances must be altered if, as given, they will not reach the designated boundary. Calls of course take precedence over distances, so that where it is necessary to either change direction to reach a boundary or else reduce or extend the prescribed distance, the distance must yield to the course. The recital of quantity or area of land conveyed or retained will be least influential.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

BUREAU OF INDIAN AFFAIRS
(*See also* Indian Probate--if included in this Index.)

GENERALLY

Appellant's pending court action does not present a bar to further agency review.

Administrative Appeal of Helen S. Kirschling v. Bureau of Indian Affairs, 7 IBIA 36 (Mar. 17, 1978)

Title I of the Highway Beautification Act, 79 Stat. 1028, which applies to all "public lands or reservations of the United States," does not apply to Indian reservations.

California's Outdoor Advertising Act, implementing the Highway Beautification Act, 79 Stat. 1028, may not be applied to non-Indian lessees on the Morongo Indian Reservation.

The Department's policy established in 1965 of requiring lessees of Indian lands in California to comply with State standards regulating land use and development can be achieved without subjecting developing tribal governments to the full enforcement powers of

BUREAU OF INDIAN AFFAIRS--Continued

the State, viz., through adding appropriate State standards to the provisions of any lease.

Administrative Appeal of the Morongo Band of Mission Indians v. Area Director, Sacramento Area Office, 7 IBIA 299 (Dec. 13, 1979) 86 I.D. 680

ADMINISTRATIVE APPEALS

Generally

Administrative appeals decided by the Commissioner of Indian Affairs under 25 CFR Part 2 on the basis of an exercise of discretionary authority should contain in the written decision a statement that the decision is based on the exercise of discretionary authority and that the decision is final for the Department.

It is not the function of the Board of Indian Appeals to review discretionary determinations of the Commissioner of Indian Affairs.

Administrative Appeal of Means Construction Co. et al. v. Commissioner of Indian Affairs, 5 IBIA 242 (Nov. 5, 1976)

All owners of interest in property are "interested parties" within the meaning of 25 CFR 2.11. It was therefore improper for appellant to serve a copy of her notice of appeal only on those persons whom she considered to be "adverse parties."

Notwithstanding that the notice of appeal is to be served on all interested parties, failure to do so does not make dismissal of the appeal mandatory.

Administrative Appeal of Iris Bear Heels v. Aberdeen Area Director, 6 IBIA 253 (Dec. 15, 1977)

The party challenging the terms or conditions of a sale of Indian land bears the burden of proving the violation or misconduct alleged.

Administrative Appeal of Hazel Hawk Visser v. Area Director, Portland Area Office, Bureau of Indian Affairs, 7 IBIA 22 (Feb. 17, 1978)

Determining the reasonableness of administrative fees assessed under authority of 25 CFR 141.18 is a matter requiring the exercise of discretionary authority and as such the issue must be directed to the Assistant Secretary for Indian Affairs for resolution.

The Board of Indian Appeals may not resolve a discretionary matter without clear authority from the Secretary.

Administrative Appeal of Helen S. Kirschling v. Bureau of Indian Affairs, 7 IBIA 36 (Mar. 17, 1978)

Acts of Agents of the United States

Limitation on Authority to Act

Generally

Mailing to the Bureau of Indian Affairs a carbon copy of a decision rejecting an application for an Alaska Native allotment is not service upon the applicant so as to comply with 43 CFR 4.401.

Gust J. Heft, Sr., 42 IBLA 86 (Aug. 13, 1979)

BUREAU OF INDIAN AFFAIRS--Continued

ADMINISTRATIVE APPEALS--Continued

Acts of Agents of the United States--Continued

Limitation on Authority to Act--Continued

Contracts Express or Implied in Fact

The limitation that the United States is bound only by acts of agents which are within his authority applies not only to express contracts but to contracts implied in fact as well.

Administrative Appeal of Doyon, Ltd., 7 IBIA 63 (Aug. 8, 1978)

Notice of Limitation on Authority

Persons dealing with an agent of the United States are charged with notice of limitation on his authority and that the United States is bound only by acts of an agent which are within his authority.

Administrative Appeal of Doyon, Ltd., 7 IBIA 63 (Aug. 8, 1978)

Filing

Mandatory Time Limit

The appellant shall file his appeal with the Area Director or the Assistant Secretary (formerly Commissioner) for Indian Affairs within 30 days after filing of the notice of appeal in the office of the official who made the decision being appealed.

Benson-Montin-Greer Drilling Corp. v. Acting Area Director, Albuquerque Area Office, Bureau of Indian Affairs, 7 IBIA 67 (May 31, 1978)

BUREAU OF LAND MANAGEMENT

(*See also* Mineral Leasing Act--if included in this Index.)

There is no authority for a State Director, Bureau of Land Management, to make a determination of a known geothermal resources area. Instead, the authority has been delegated by the Secretary of the Interior to the Director, Geological Survey. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 393 (Feb. 7, 1975) 82 I.D. 60

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136 (Mar. 6, 1975)

Delta Funds, Inc., 19 IBLA 185 (Mar. 18, 1975)

The Bureau of Land Management has no authority to make a determination of a known geothermal resources area; such authority rests with the Geological Survey.

Robert C. Harper, 24 IBLA 44 (Feb. 23, 1976)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Bess et al., 27 IBLA 4 (Sept. 17, 1976)

Where a protest has been made against the validity of a drawing entry card (DEC) in the simultaneous oil and gas lease filing procedure, it is improper to issue a lease in response to the protested DEC before the protest is finally dismissed. The Board of Land Appeals, rather than a BLM State Office, has the authority to make final administrative determinations for the Department in matters relating to protests against oil and gas lease offers.

D. E. Pack, 31 IBLA 283 (July 22, 1977)

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

An organization appealing a Bureau of Land Management decision will be considered a "party to a case" within the meaning of 43 CFR 4.410 where the organization uses the lands in question, is recognized as a bona fide representative of the community, receives notice of Bureau actions concerning the lands, actively and extensively participates in the formulation of land use plans for the lands in question, and takes a position in a dispute concerning the use of the land contrary to another group or individual.

Headwaters, 33 IBLA 91 (Dec. 16, 1977)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system is binding on all employees of the Bureau of Land Management, until such time as it is properly changed.

Milton D. Feinberg, Benson J. Lamp, 37 IBLA 39 (Sept. 18, 1978) 85 I.D. 380

Erroneous issuance by BLM of oil and gas lease on other withdrawn land in area of tract for which appellant submitted lease offer does not effect restoration to leasing of latter withdrawn tract.

E. M. Tully, 39 IBLA 137 (Jan. 29, 1979)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system, premised upon regulatory interpretation, is binding on all employees of the Bureau of Land Management, until such time as it is properly changed.

Milton D. Feinberg, Benson J. Lamp (On Reconsideration), 40 IBLA 222 (Apr. 11, 1979) 86 I.D. 234

The filing of a timely protest suspends the authority of the State Office to act upon the matter until the protest has been ruled upon. Further, action is to be additionally suspended after a ruling on the protest for the period of time in which a person adversely affected may file a notice of appeal therefrom.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

BUREAU OF RECLAMATION

GENERALLY

Under the Mineral Leasing Act for Acquired Lands of 1947, as amended, 30 U.S.C. §§ 351-359 (1970), if the lands embraced within an oil and gas lease application are under surface jurisdiction of a service or bureau within the Department of the Interior, as are the National Park Service and the Bureau of Reclamation, the consent of the Secretary of the Interior is necessary under the Act to the leasing of the land. Where the National Park Service recommends that oil and gas leases for lands within the boundaries of the Chickasaw National Recreation Area be rejected in order to maintain the area for the purposes for which it was established, it is proper to accept this recommendation and reject the offers.

Earlfine Shear, David L. Shear, 29 IBLA 33 (Feb. 10, 1977)

The Federal reclamation laws are limited by their own terms to application in the 17 Western "reclamation states."

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act Projects, M-36904 (July 17, 1978) 85 I.D. 254

AUTHORIZATION

When Congress is relatively specific in authorizing a Government project, it takes equally specific Congressional action to change that authorization.

Certification that lands are irrigable is a separate and distinct process from authorizing a Bureau of Reclamation project and cannot be construed as authorization to serve lands in excess of those specifically authorized in the project act.

BUREAU OF RECLAMATION--Continued

AUTHORIZATION--Continued

The agencies have the responsibility in cases where authority to act may be in question to bring the matter to the direct and specific attention of Congress and to request clarifying legislation.

Congressional ratification of a significant modification in an authorized project ordinarily cannot be gained through mere references in testimony or documents presented to Congress for appropriation purposes; the intent of Congress as a whole to ratify must be clearly expressed and manifested in the record.

Sec. 9(e) of the Reclamation Project Act of 1939, 43 U.S.C. § 485h(e) (1970), does not give the Secretary any independent authority for entering water service contracts for areas except as separately authorized by Congress.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

Where there is no clear Congressional authority to operate a Bureau of Reclamation project one way as opposed to another and there are proposed inconsistent methods of operation contained in the draft set of Operating Principles and feasibility report, it is the responsibility of the agency to seek additional and clarifying authority from Congress as to how the project is to be operated, particularly when important and controversial economic and environmental interests are involved.

Authority to Divert Flows from Hunter Creek Tributaries, Fryingpan-Arkansas Project, Colorado, M-36902 (July 31, 1978) 85 I.D. 326

The Secretary of the Interior has discretion to modify the physical features or plans of a Bureau of Reclamation project after Congressional authorization when the authorizing legislation only states what the general features of the project are to be and does not specifically incorporate any detailed feasibility report into the legislation. The Secretary cannot, however, deviate from the general plans or facilities specifically defined by Congress to be part of the project without obtaining the approval of Congress.

When Congress places a cost ceiling in legislation authorizing construction of a project, the agency must obtain additional authority from Congress to continue construction of the project if it is projected that the cost ceiling will be exceeded.

The Bureau of Reclamation is required to seek additional Congressional authority to continue a project at the earliest point in time that it determines the authorized cost ceiling will be exceeded so that Congress can determine whether the project should be completed at the increased cost.

Adequacy of Legislative Authorization for the San Felipe Division, Central Valley Project, California, M-36903 (July 31, 1978) 85 I.D. 337

CONSTRUCTION

Where there is no clear Congressional authority to operate a Bureau of Reclamation project one way as opposed to another and there are proposed inconsistent methods of operation contained in the draft set of Operating Principles and feasibility report, it is the responsibility of the agency to seek additional and clarifying authority from Congress as to how the project is to be operated, particularly when important

BUREAU OF RECLAMATION--Continued

CONSTRUCTION--Continued

and controversial economic and environmental interests are involved.

Authority to Divert Flows from Hunter Creek Tributaries, Fryingpan-Arkansas Project, Colorado, M-36902 (July 31, 1978) 85 I.D. 326

The Secretary of the Interior has discretion to modify the physical features or plans of a Bureau of Reclamation project after Congressional authorization when the authorizing legislation only states what the general features of the project are to be and does not specifically incorporate any detailed feasibility report into the legislation. The Secretary cannot, however, deviate from the general plans or facilities specifically defined by Congress to be part of the project without obtaining the approval of Congress.

When Congress places a cost ceiling in legislation authorizing construction of a project, the agency must obtain additional authority from Congress to continue construction of the project if it is projected that the cost ceiling will be exceeded.

The Bureau of Reclamation is required to seek additional Congressional authority to continue a project at the earliest point in time that it determines the authorized cost ceiling will be exceeded so that Congress can determine whether the project should be completed at the increased cost.

Adequacy of Legislative Authorization for the San Felipe Division, Central Valley Project, California, M-36903 (July 31, 1978) 85 I.D. 337

ENVIRONMENT

The requirement for a permit under sec. 404 of the Federal Water Pollution Control Act applies to the Bureau of Reclamation to the same extent as any other person, and with certain exceptions the Bureau must obtain a permit from the Corps of Engineers prior to any discharge of dredged or fill material into the navigable waters.

Activities "affirmatively authorized by Congress," which are excepted from sec. 10 of the Rivers and Harbors Act of 1899, are not excepted from sec. 404 of the Federal Water Pollution Control Act. Notwithstanding the exception of a discharge of dredged or fill material under sec. 10 of the Rivers and Harbors Act, compliance with sec. 404 is required.

A permit under sec. 404 of the Federal Water Pollution Control Act is required for the discharge of dredged or fill material whenever: (a) the "discharge" constitutes any addition of any pollutant to navigable waters from any discernible, confined and discrete conveyance, including the placement of fill and the building of any structure or impoundment; and (b) the "dredged material" is dredged spoil that is excavated or dredged from the waters of the United States; or (c) the "fill material" includes any material used for the primary purpose of replacing an aquatic area with dry land or of changing the bottom elevation of a water body, including any structure which requires rock, sand, dirt or other material for its construction; and (d) the discharge is made into "waters of the United States," which extend beyond those waters meeting the traditional tests of navigability to those encompassed by the broadest possible constitutional interpretation.

To secure the exemption under sec. 404(r) of the Federal Water Pollution Control Act for projects described in an environmental statement, compliance with seven specific

BUREAU OF RECLAMATION--Continued

ENVIRONMENT--Continued

conditions is required. The exemption does not apply to the maintenance of existing Federal projects, but only to new construction. While the exemption provides an alternative procedure to achieve compliance with sec. 404 of the Act for a limited category of Federal projects under very specific conditions, it does not lessen the substantive requirements that apply to the discharge of dredged or fill material.

To secure the exemption under sec. 404(f)(1) of the Federal Water Pollution Control Act for the maintenance of currently serviceable structures, compliance with four specific conditions is required. The exemption does not apply to the discharge of dredged material incident to maintenance dredging, or to new construction.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979) 86 I.D. 400

EXCESS LANDS

Congress intended to replace the excess land provisions of the general reclamation laws when it passed the SRPA by providing in sec. 5(c) thereof that excess landowners could receive Federally subsidized water on their excess holdings if they would repay with interest "a pro rata share of the loan which is attributable to furnishing irrigation benefits * * * to land held * * * in excess of 160 acres."

Where lands are receiving benefits from both an SRPA loan project and an ordinary reclamation project, general reclamation law, including residency and acreage limitations, apply to those lands.

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act Projects, M-36904 (July 17, 1978) 85 I.D. 254

Sec. 46 of the Omnibus Adjustment Act of 1926, 43 U.S.C. § 423e (1976), requires the Secretary of the Interior to control and approve the purchase price of both initial sales of excess land, and resales of this formerly excess land until one-half the construction charges allocated to such land has been paid, in order for the land to continue to be eligible for project water.

In approving the sale price of formerly excess land until one-half the construction charges allocated to such land has been paid, the Secretary of the Interior is required to use the same standard used for approving the sale price of the initial sale of excess land; that is, the sale price must be fixed by the Secretary on the basis of the actual bona fide value of the land on the date of appraisal without reference to the value added by the project. The price approval requirement will not apply to formerly excess lands which were acquired, with Secretarial approval, from excess into non-excess status prior to May 18, 1979, the date of this opinion.

Reclamation Law - Control of the Sale Price of Formerly Excess Lands, M-36913 (May 18, 1979)
86 I.D. 306

FINDINGS OF FEASIBILITY

The Secretary of the Interior has discretion to modify the physical features or plans of a Bureau of Reclamation project after Congressional authorization when the authorizing legislation only states what the general features of the project are to be and does not specifically incorporate any detailed feasibility report into the legislation. The Secretary cannot, however, deviate from the general plans or facilities specifically

BUREAU OF RECLAMATION--Continued

FINDINGS OF FEASIBILITY--Continued

defined by Congress to be part of the project without obtaining the approval of Congress.

Adequacy of Legislative Authorization for the San Felipe Division, Central Valley Project, California, M-36903 (July 31, 1978) 85 I.D. 337

OPERATION AND MAINTENANCE

Where there is no clear Congressional authority to operate a Bureau of Reclamation project one way as opposed to another and there are proposed inconsistent methods of operation contained in the draft set of Operating Principles and feasibility report, it is the responsibility of the agency to seek additional and clarifying authority from Congress as to how the project is to be operated, particularly when important and controversial economic and environmental interests are involved.

Authority to Divert Flows from Hunter Creek Tributaries, Fryingpan-Arkansas Project, Colorado, M-36902 (July 31, 1978) 85 I.D. 326

REPAYMENT AND WATER SERVICE CONTRACTS

A short-term or temporary contract will not rescind a long-term contract under the doctrine of superseding contracts unless the parties clearly intended that to be the effect of the new agreement and the terms of the new agreement are flatly inconsistent with the former agreement.

Sec. 9(e) of the Reclamation Project Act of 1939, 43 U.S.C. § 485h(e) (1970), does not give the Secretary any independent authority for entering water service contracts for areas except as separately authorized by Congress.

No water may be delivered to a reclamation district until the district has signed a repayment contract which establishes a sufficient repayment obligation guaranteeing that the United States will recover the costs of the project as provided by law.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

RESIDENCY REQUIREMENTS

Even though Congress stated that the SRPA was to be a supplement to the reclamation law, SRPA's legislative history indicates that the Act was not intended to include the remainder of reclamation law, including the residency requirement.

Where lands are receiving benefits from both an SRPA loan project and an ordinary reclamation project, general reclamation law, including residency and acreage limitations, apply to those lands.

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act Projects, M-36904 (July 17, 1978) 85 I.D. 254

SMALL PROJECTS PROGRAM

The Small Reclamation Projects Act (SRPA), 43 U.S.C. § 422a *et seq.* (1970), has two principal objectives: (1) to provide more direct involvement of non-Federal

BUREAU OF RECLAMATION--Continued

SMALL PROJECTS PROGRAM--Continued

public agencies in water development, and (2) to simplify the authorization procedures for smaller projects.

The SRPA does not incorporate general reclamation law.

Congress intended to replace the excess land provisions of the general reclamation laws when it passed the SRPA by providing in sec. 5(c) thereof that excess landowners could receive Federally subsidized water on their excess holdings if they would repay with interest "a pro rata share of the loan which is attributable to furnishing irrigation benefits * * * to land held * * * in excess of 160 acres."

When those provisions of reclamation law which are specifically incorporated by SRPA are added to the provisions of SRPA itself, they form a complete scheme which is capable of standing by itself without need to incorporate the general body of reclamation law.

Even though Congress stated that the SRPA was to be a supplement to the reclamation law, SRPA's legislative history indicates that the Act was not intended to include the remainder of reclamation law, including the residency requirement.

Where lands are receiving benefits from both an SRPA loan project and an ordinary reclamation project, general reclamation law, including residency and acreage limitations, apply to those lands.

Application of the Acreage Limitation and Residency Requirements to Small Reclamation Projects Act Projects, M-36904 (July 17, 1978) 85 I.D. 254

CLASSIFICATION AND MULTIPLE USE ACT OF 1964

When a Native has initiated use and occupancy of land *prior* to the date of its classification under the Classification and Multiple Use Act of 1964, such classification will not constitute a bar to the completion of the statutory 5-year use and occupancy period, and the allotment may be granted, all else being regular, even though the classification remains in effect.

Katie Wassillie et al., 20 IBLA 330 (June 6, 1975)

Donald F. Nielsen, Ethel Adcox, 21 IBLA 258 (Aug. 11, 1975)

Publication in the *Federal Register* of a notice of proposed classification pursuant to 43 CFR 2461.2 will segregate the affected land to the extent indicated in the notice.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

United States v. H. B. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

CLASSIFICATION AND MULTIPLE USE ACT OF 1964--Continued

Where the Secretary by appropriate notice in the *Federal Register* has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in *Federal Register* of termination of classification, BLM properly denied petition-application for desert land entry.

Paul H. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

Melvin V. Frandsen, Mary C. Frandsen, 43 IBLA 130 (Sept. 26, 1979)

Classification of lands under the Classification and Multiple Use Act of 1964, 43 U.S.C. § 1411 *et seq.* (1970), does not create reserved water rights.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979) 86 I.D. 553

COAL LANDS

In order for an assertion of competitive interest to create a bar to the allowance of an application to modify an existing coal lease by the addition of contiguous land, the competitive interest asserted must be identifiable, substantial and genuine, and not merely speculative or casual.

Malcolm N. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

COAL LEASES AND PERMITS

GENERALLY

In order for an assertion of competitive interest to create a bar to the allowance of an application to modify an existing coal lease by the addition of contiguous land, the competitive interest asserted must be identifiable, substantial and genuine, and not merely speculative or casual.

Malcolm N. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

The Mineral Leasing Act of 1920, *as amended and supplemented*, most recently by the Coal Leasing Amendments Act of 1975, allows the Secretary to authorize development of coal leases by methods which were not utilized by the industry at the time of passage of the 1920 Act. The broad grants of authority to the Secretary in the 1920 Act allow technological developments in the coal mining industry.

The grant of the privilege to mine and dispose of all coal includes in situ methods of development.

In Situ Gasification of Coal, M-36890 (May 24, 1977) 84 I.D. 244

The Federal Coal Leasing Amendments Act of 1975, which amended sec. 2(b) of the Mineral Leasing Act, subject to "valid existing rights" terminated the Secretary's authority to extend previously granted prospecting permits.

Authority to Extend Coal Prospecting Permits: Effect of Sec. 4 of the Federal Coal Leasing Amendments Act of 1975, M-36894 (July 21, 1977) 84 I.D. 415

COAL LEASES AND PERMITS--Continued

GENERALLY--Continued

A mining plan submitted to the U.S. Geological Survey is properly classified a "new operation" as defined by 30 CFR 211.1(d)(1)(iii) where as of the date of its submission to the Department, the Department has not completed its environmental impact analysis involving the area in which the mining plan is located, nor has it, as of that date, commenced and expended substantial resources in the preparation or completion of that analysis.

Routt County Development, Ltd., 33 IBLA 130 (Dec. 19, 1977)

Reliance upon erroneous information provided by employees of the Bureau of Land Management cannot create any rights not authorized by law. The fact that a coal prospecting permittee alleges he was assured by BLM employees that he would receive permit extensions does not prevent the applicability of subsequent legislation which prohibits such extensions from causing his extension applications to be rejected.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978)
85 I.D. 161

Where a qualifying discovery of mineral has been made by a permittee during the term of a permit, a coal preference right lease application need not be rejected because it was filed after the permit expired.

Even though the Bureau of Land Management from Jan. 26, 1972, to Aug. 19, 1977, considered preference right coal lease applications in a pending status, it is not estopped to reject such applications as having been filed late because it has not been demonstrated that appellant relied on the Bureau's representations to appellant's detriment.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

APPLICATIONS

Decisions rejecting coal prospecting permit applications will be affirmed where the decision was made pursuant to and in accordance with Secretarial Order No. 2952 of Feb. 13, 1973.

Utah Resources International, Inc., 18 IBLA 320 (Jan. 6, 1975)

Charlene Dickman, R. J. Hollberg, Jr., Vernon W. Dickman, 21 IBLA 397 (Aug. 28, 1975)

Rod Shepard, 22 IBLA 60 (Sept. 18, 1975)

D. C. Anderson, 23 IBLA 161 (Dec. 23, 1975)

L. A. Walstrom, Jr., 25 IBLA 186 (June 14, 1976)

Where a company requesting the Bureau of Land Management to offer coal lands for lease by competitive bidding fails to furnish the information requested by BLM so that it is impossible to determine if the Department's criteria for issuance of coal leases has been satisfied, the request for competitive lease offering will be denied.

Reliable Coal & Mining Co., 18 IBLA 342 (Jan. 13, 1975)

COAL LEASES AND PERMITS--Continued

APPLICATIONS--Continued

When a coal lease applicant asserts, on appeal, facts which may show it to be entitled to favorable consideration of its lease application under the short-term need criteria promulgated by the Department, the decision rejecting the lease application will be set aside and the case remanded for further consideration.

Idaho Power Co., 20 IBLA 125 (Apr. 28, 1975)

An application for modification of an existing coal lease to include an entire section is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Estate of Malcolm N. McKinnon, 31 IBLA 290 (July 22, 1977)

An application for modification of an existing coal lease to include an additional 361.52 acres is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Gulf Oil Corp., 32 IBLA 13 (Aug. 29, 1977)

An application for modification of a coal lease which exceeds the acreage limitation provided by the Federal Coal Leasing Amendments Act of 1975 is properly rejected notwithstanding the fact that the application was filed prior to enactment of the amendment.

The filing of an application for modification of an existing coal lease does not give rise to a vested property right. Thus, such an application qualifies as neither a valid existing right excepted from application of the acreage limit on lease modifications set by the Federal Coal Leasing Amendments Act of 1975 nor a right protected by the Fifth Amendment from application of subsequently amended statutes or regulations.

Nevada Electric Investment Co., 33 IBLA 3 (Nov. 14, 1977)

An application for an extension of a prospecting permit under the Mineral Leasing Act is not a "valid existing right" within the meaning of the savings clause of sec. 4 of the Federal Coal Leasing Amendments Act of 1975, and is not, therefore, an interest which survives the amendment of the Mineral Leasing Act.

Peabody Coal Co., 34 IBLA 139 (Mar. 10, 1978)

COAL LEASES AND PERMITS--Continued

APPLICATIONS--Continued

Where an applicant for a preference right coal lease fails to respond to a request for further information needed to process his application within a prescribed period of not less than 60 days, under 43 CFR 3521.1(g)(3), BLM properly rejected the lease application.

The failure of an applicant for a preference right coal lease to respond to a request for further information needed to process his application is not excused because he relied on a third party who failed to recognize that such action was required.

A prospecting permit for coal is properly canceled under 43 CFR 3511.4-2(a)(1) for failure to pay annual rental on or before the anniversary date, as extended. An application for a preference right coal lease is properly rejected if it is based on prospecting permits which have been canceled for failure to pay rental timely.

Cortella Coal Corp., 35 IBLA 172 (May 23, 1978)

Applications for short-term coal leases may be accepted only where it is shown that such coal is needed to maintain an existing operation or that such coal is needed as a reserve for production in the near future under the provisions of 43 CFR 3525.3-1.

Shell Oil Co., 35 IBLA 195 (May 23, 1978)

Sec. 4 of the Federal Coal Leasing Amendments Act of 1975 removes the authority of the Secretary to grant extensions of coal prospecting permits, subject to valid existing rights, and applies to applications for permit extensions pending at the time the law was enacted by Congress. Such pending applications are not valid existing rights under sec. 4 of the 1975 Amendments Act because the authority to grant coal prospecting permit extensions was discretionary with the Secretary.

The Federal coal program was substantially revised in 1975 by the Secretary in proper exercise of his discretion. The Bureau of Land Management did not act in an arbitrary and capricious manner when, under the new coal policy, it suspended applications for coal prospecting permit extensions and the applications were eventually rejected because the Federal Coal Leasing Amendments Act of 1975 removed the authority to grant coal prospecting permit extensions. A program pursued for a period of time under a statutory grant of discretionary authority may be reviewed and revised at any time provided it is not done in an arbitrary manner and is done within the authority granted by Congress.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978)
85 I.D. 161

Thomas C. Woodward, 35 IBLA 262 (May 31, 1978)

"Valid Existing Right." An application for modification of a coal lease filed prior to enactment of the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C.A. § 203 (Supp. 1977), is insufficient to establish a "valid existing right" excepted from the acreage limit on lease modifications imposed by the amendment.

A decision rejecting an application for modification of a coal lease will be affirmed where the additional acreage requested exceeds the limit imposed by the Federal Coal Leasing Amendments Act of 1975 notwithstanding the fact that the application was filed prior to enactment of the amendment.

Nevada Power Co., 36 IBLA 62 (June 30, 1978)

Where a coal prospecting permittee demonstrates that lands described in its permit contain coal in commercial quantities, the permittee is entitled to consideration of a lease to such lands and its request that its coal preference right lease application be restored to its status as a pending preference right lease application may be honored.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

Sec. 4 of the Federal Coal Leasing Amendments Act of 1975 removes the authority of the Secretary to grant extensions of coal prospecting permits, subject to valid existing rights, and applies to applications for permit extensions pending at the time the law was enacted by Congress. Such pending applications are not valid existing rights under sec. 4 of the 1975 Amendments Act because the authority to grant coal prospecting permit extensions was discretionary with the Secretary.

Virgil V. Peterson and Mike Bell Mining & Oil Co., 37 IBLA 18 (Sept. 12, 1978)

A delay in taking action on an application for extension of a coal prospecting permit while the Secretary formulates a new leasing policy does not violate the Administrative Procedure Act, 5 U.S.C. § 555(b) (1976), nor does it constitute an abuse of discretion which would create any rights not authorized by law. No hearing is required when the facts of a case are not in dispute and the only issues are questions of law.

Sec. 9(b) of the Administrative Procedure Act, *as amended*, 5 U.S.C. § 558(c) (1976), does not apply to coal prospecting permit extension applications because the prospecting is not an "activity of a continuing nature" within the meaning of the statute. As the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 30 U.S.C. § 201 (1976), removed the Secretary of the Interior's discretion to grant extensions, applications for preference right leases filed after expiration of the initial 2-year permit term, and during pendency of extension applications, cannot be issued.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978)
85 I.D. 396

Where a court decree delineates specific criteria governing the issuance of Federal coal leases by the Department, the rejection of competitive coal lease applications failing to meet such criteria will be sustained on appeal.

W. E. and B. C. Somerville, 40 IBLA 9 (Mar. 9, 1979)

Where the case record contains no documentation supporting BLM's conclusion that an applicant for a coal lease does not meet emergency coal leasing criteria, and where the applicant asserts on appeal that it can produce evidence establishing that it does meet these criteria, BLM's decision rejecting the application will be vacated, and the matter will be remanded to

COAL LEASES AND PERMITS--Continued

APPLICATIONS--Continued

allow the applicant a reasonable time to provide this evidence.

Mid-Continent Coal and Coke Co., 41 IBLA 139 (June 14, 1979)

Where BLM has rejected a coal lease application because it does not meet court-ordered emergency coal leasing criteria and the record indicates that the applicant should have been given the opportunity to submit additional evidence in support of its application, the rejection will be vacated and the matter remanded to BLM to allow the applicant a reasonable time to provide this evidence. However, where as in this case, the emergency criteria are no longer in effect and regulations governing a new coal management program have been issued, BLM on remand should determine whether it should issue a coal lease to the applicant under the new program, giving the applicant an opportunity to provide additional information if necessary.

Coal Fuels-Wilde, 43 IBLA 170 (Sept. 28, 1979)

The BLM should presume the validity of mining claims or the development of mineral leases disclosed by abstracts submitted by the preference right lease applicant, and allow the applicant to pursue the remedy of private contests or, failing that, issue a notice of intent to reject the lease application where claims or development are shown, and allow the preference right lease applicant the opportunity to show, on the record, the invalidity of the claims, or lack of development, or both.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979) 86 I.D. 627

Where BLM has rejected coal lease applications because they do not meet court ordered emergency coal leasing criteria, but the emergency criteria are no longer in effect and regulations governing a new coal management program have been issued, BLM on remand should determine whether issuance of the leases is appropriate under the new program, giving applicant an opportunity to provide additional information if necessary.

Glenn H. Johnson (On Reconsideration), 44 IBLA 247 (Dec. 19, 1979)

CANCELLATION

Where an applicant for a preference right coal lease fails to respond to a request for further information needed to process his application within a prescribed period of not less than 60 days, under 43 CFR 3521.1(g)(3), BLM properly rejected the lease application.

The failure of an applicant for a preference right coal lease to respond to a request for further information needed to process his application is not excused because he relied on a third party who failed to recognize that such action was required.

A prospecting permit for coal is properly canceled under 43 CFR 3511.4-2(a)(1) for failure to pay annual rental on or before the anniversary date, as extended. An application for a preference right coal lease is properly rejected if it is based on prospecting permits which have been canceled for failure to pay rental timely.

Corielle Coal Corp., 35 IBLA 172 (May 23, 1978)

COAL LEASES AND PERMITS--Continued

LEASES

Under 43 CFR 3524.2-1, an application to modify a coal lease without competitive bidding, to include contiguous coal deposits, will be denied if the additional lands requested can be developed as part of an independent operation or there is a competitive interest in them.

Concho Petroleum Co. and J. C. Barcher, 22 IBLA 139 (Sept. 26, 1975)

The grant of the privilege to mine and dispose of all coal includes in situ methods of development.

In Situ Gasification of Coal, M-36890 (May 24, 1977) 84 I.D. 244

An application for modification of an existing coal lease to include an entire section is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Estate of Malcolm B. McKinnon, 31 IBLA 298 (July 22, 1977)

An application for modification of an existing coal lease to include an additional 361.92 acres is properly rejected under sec. 3 of the Mineral Leasing Act, since it seeks to add more than the 160-acre maximum allowed thereunder, notwithstanding the fact that the application was filed prior to the enactment of this acreage limitation.

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Gulf Oil Corp., 32 IBLA 13 (Aug. 29, 1977)

Where an application to amend a coal lease describes 480 acres, a permissible acreage when the application was filed, but the pertinent statute and the regulations in 43 CFR 3524.2-1(a) are amended to provide for modifications of existing coal leases including contiguous coal lands if the total area of such modifications does not exceed 160 acres or the same number of acres as that in the original lease, whichever is less, the application for 480 acres cannot be allowed, but the applicant will be given an opportunity to amend his application so as to cover no more than 160 acres.

Intermountain Exploration Co., 32 IBLA 170 (Sept. 13, 1977)

An application for modification of a coal lease which exceeds the acreage limitation provided by the Federal Coal Leasing Amendments Act of 1975 is properly rejected notwithstanding the fact that the application was filed prior to enactment of the amendment.

The filing of an application for modification of an existing coal lease does not give rise to a vested property right. Thus, such an application qualifies as neither a valid existing right excepted from application of the acreage limit on lease modifications set

COAL LEASES AND PERMITS--Continued

LEASES--Continued

by the Federal Coal Leasing Amendments Act of 1975 nor a right protected by the Fifth Amendment from application of subsequently amended statutes or regulations.

Nevada Electric Investment Co., 33 IBLA 3 (Nov. 18, 1977)

Under 43 CFR 3522.2-1(a), a proposed readjustment of a coal lease should not be appealed directly to the Board of Land Appeals under 43 CFR 4.410, but, rather, a lessee's objections thereto should first be referred to and acted upon by the State Office, Bureau of Land Management.

California Portland Cement Co., 33 IBLA 223 (Dec. 28, 1977)

The Secretary of the Interior has authority to reject a request to modify a coal lease by adding 160 acres to it where the record discloses a rational basis for the conclusion that the acreage sought is capable of being developed as part of an independent operation.

The Geological Survey is the Secretary's technical expert in matters concerning coal permits and leases and the Secretary is entitled to rely on its reasoned analysis.

Where a request to modify a coal lease by adding acreage to it is rejected by the BLM solely on the basis of conclusory statement of the Geological Survey that the area applied for is capable of being developed as part of an independent operation and the factual basis for that conclusion does not appear in the record, the decision will be set aside and the case remanded for the compilation of a more complete record and readjudication of the request.

Intermountain Exploration Co., 35 IBLA 15 (May 4, 1978)

"Valid Existing Right." An application for modification of a coal lease filed prior to enactment of the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C.A. § 203 (Supp. 1977), is insufficient to establish a "valid existing right" excepted from the acreage limit on lease modifications imposed by the amendment.

A decision rejecting an application for modification of a coal lease will be affirmed where the additional acreage requested exceeds the limit imposed by the Federal Coal Leasing Amendments Act of 1975 notwithstanding the fact that the application was filed prior to enactment of the amendment.

Nevada Power Co., 36 IBLA 62 (June 30, 1978)

Where a coal prospecting permittee demonstrates that lands described in its permit contain coal in commercial quantities, the permittee is entitled to consideration of a lease to such lands and its request that its coal preference right lease application be restored to its status as a pending preference right lease application may be honored.

Thermal Energy Co. et al., 36 IBLA 334 (Aug. 28, 1978)

COAL LEASES AND PERMITS--Continued

LEASES--Continued

The Secretary may, in computing the fair market value of coal to be leased competitively under privately owned surface, assume a limited surface owner consent cost, based on losses and costs to the surface estate and operation and similar evaluations, regardless of the actual price paid or the amount which a surface owner could otherwise demand for consent.

Assumption of a limited surface owner consent cost to be used in place of actual cost in the computation of fair market value of coal to be leased competitively is necessary to ensure receipt of fair market value by the public as required by 30 U.S.C. § 201(a) (1976).

In the exercise of his discretion to lease under the Mineral Leasing Act, the Secretary has authority to decline to issue a coal lease where surface owner consent costs prevent the public from realizing a fair return on the value of the coal.

Coal Leasing Program -- Relationship of the Cost of Surface Owner Consent to Receipt of Fair Market Value for Federally Owned Coal, M-36909 (Jan. 15, 1979)
86 I.D. 28

Where a court decree delineates specific criteria governing the issuance of Federal coal leases by the Department, the rejection of competitive coal lease applications failing to meet such criteria will be sustained on appeal.

W. E. and B. L. Somerville, 40 IBLA 9 (Mar. 9, 1979)

BLM may properly readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), within a reasonable time after expiration of its 20-year period with or without notice by BLM to the lessee prior to expiration of the 20-year period.

The failure of BLM to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), prior to or immediately after expiration of its 20-year period does not constitute a waiver of BLM's right to readjust said lease.

BLM is not estopped to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), by its failure to readjust said lease prior to or immediately after expiration of its 20-year period.

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year lease term does not violate a lessee's rights under the fifth amendment of the United States Constitution.

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year term does not violate the Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21(a) (1976), national policy in favor of coal development, and a certain cooperative agreement between the State of Wyoming and the Department of the Interior.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Where BLM has rejected a coal lease application because it does not meet court-ordered emergency coal leasing criteria and the record indicates that the applicant should have been given the opportunity to submit additional evidence in support of its application, the rejection will be vacated and the matter remanded to BLM to allow the applicant a reasonable time to provide this evidence. However, where as in this case, the

COAL LEASES AND PERMITS--Continued

LEASES--Continued

emergency criteria are no longer in effect and regulations governing a new coal management program have been issued, BLM on remand should determine whether it should issue a coal lease to the applicant under the new program, giving the applicant an opportunity to provide additional information if necessary.

Coal Fuels-Wilds, 43 IBLA 170 (Sept. 28, 1979)

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979)   87 I.D. 69 (1980)

Where BLM has rejected coal lease applications because they do not meet court ordered emergency coal leasing criteria, but the emergency criteria are no longer in effect and regulations governing a new coal management program have been issued, BLM on remand should determine whether issuance of the leases is appropriate under the new program, giving applicant an opportunity to provide additional information if necessary.

Glenn H. Johnson (On Reconsideration), 44 IBLA 247 (Dec. 19, 1979)

PERMITS

Generally

The Federal Coal Leasing Amendments Act of 1975, which amended sec. 2(b) of the Mineral Leasing Act, subject to "valid existing rights" terminated the Secretary's authority to extend previously granted prospecting permits.

Authority to Extend Coal Prospecting Permits: Effect of Sec. 4 of the Federal Coal Leasing Amendments Act of 1975, M-36894 (July 21, 1977)   84 I.D. 415

A prospecting permit for coal cannot be issued for land subject to a claim. If a prospecting permit for coal purports to cover land subject to a mining claim, it is invalid as to that land. Consequently, in demonstrating a discovery of coal in commercial quantities in land subject to a prospecting permit, the permittee must exclude coal in land covered by a mining claim.

The Effect of Mining Claims on Secretarial Authority to Issue Prospecting Permits for Coal and Phosphate, M-36893 (Aug. 2, 1977)   84 I.D. 442

A prospecting permit for coal is properly canceled under 43 CFR 3511.4-2(a)(1) for failure to pay annual rental on or before the anniversary date, as extended. An application for a preference right coal lease is properly rejected if it is based on prospecting permits which have been canceled for failure to pay rental timely.

85 I

COAL LEASES AND PERMITS--Continued

PERMITS--Continued

Generally--Continued

A prospecting permit which embraces land which is not "unclaimed" and "undeveloped" is a nullity and void as a conveyance of any interest in that land. Land in a mining claim remains "unclaimed" land for the purposes of M-36893 so long as the claim is not validated by discovery of a valuable locatable mineral deposit at the date of permit issuance. Surface disturbing mineral activities, associated with delineation of a mineral ore body which could reasonably be expected to disclose knowledge of an area's coal potential constitute development. The bona fide purchaser provisions of sec. 27(h)(2) of the Mineral Leasing Act do not apply to permits which embrace land that is claimed or developed.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979)
86 I.D. 627

ROYALTIES

In determining the amount of royalty due to the United States under a Federal coal lease, it is proper for Geological Survey to include as part of the value basis for the purposes of computing such royalty the amount of any reimbursed State severance tax.

Knife River Coal Mining Co., 29 IBLA 26 (Feb. 8, 1977)

Royalty provisions, which do not specifically mention in situ development, are applicable to such development. The Secretary, through the Geological Survey, is empowered to promulgate by regulation a conversion ratio of in situ extraction to coal expended in order to determine the royalty due.

In Situ Gasification of Coal, M-36890 (May 24, 1977)
84 I.D. 244

In determining the amount of royalty due to the United States under a Federal coal lease, it is proper for U.S. Geological Survey to include the amount of the reclamation fee imposed by the Surface Mining Control and Reclamation Act of 1977 as part of the gross value of production where the selling price received at the point of shipment to market is increased by that amount.

Knife River Coal Mining Co., 43 IBLA 104 (Sept. 24, 1979)
86 I.D. 472

The Federal Coal Leasing Amendments Act of 1975 left in effect the Secretary's authority under sec. 39 of the Mineral Leasing Act to reduce production royalties on coal leases below the statutory minimum rate.

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

COAL RESEARCH AND DEVELOPMENT

A mining plan submitted to the U.S. Geological Survey is properly classified a "new operation" as defined by 30 CFR 211.1(d)(1)(iii) where as of the date of its submission to the Department, the Department has not completed its environmental impact analysis involving the area in which the mining plan is located, nor has it, as of that date, commenced and expended substantial resources in the preparation or completion of that analysis.

Scott County Development, Ltd., 33 IBLA 130 (Dec. 19, 1977)

COLOR OR CLAIM OF TITLE

GENERALLY

The Color of Title Act, 43 U.S.C. § 1068 (1970), applies only to public land, i.e., vacant, unappropriated, unreserved Federal real property subject to the public land laws. An application under the Act which is based upon color of title initiated when the subject land was withdrawn from the operation of the public land laws and reserved as national forest land must be rejected.

Ben J. Boschetto, 21 IBLA 193 (July 28, 1975)

The Department must reject a color of title application for land which is not described in the deed or other instrument on which the application is based, even though the applicants and their predecessors in occupancy believed that the public land was covered by the instrument.

Mere possession and improvement of public land by the applicant in the mistaken belief that he owns it is insufficient basis to qualify for a conveyance under 43 U.S.C. § 1068 (1970). A claim or color of title must be based upon a document, from a source other than the United States, which on its face purports to convey to the applicant the land applied for.

Cloyd and Velma Mitchell, 22 IBLA 299 (Nov. 4, 1975)

The Department of the Interior cannot grant a color of title application for land that was patented and is no longer public land; nor can a color of title application be granted where the title or claim is not derived from a source other than the Government.

A class 1 color of title application for lands classified upon dependent resurvey as omitted swamp and overflowed lands must be rejected when the applicants' 20-year period of peaceful adverse possession under color of title had not been established at the date title vested in the State under the provisions of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970).

Paul H. and Fay L. Sleeper, 22 IBLA 318 (Nov. 10, 1975)

A color of title application for land which has been withdrawn for a stock-driveway prior to any conveyance in a color of title applicant's chain of title is properly rejected as to such land.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976)
83 I.D. 23

COLOR OR CLAIM OF TITLE--Continued

GENERALLY--Continued

A quitclaim deed in which the grantor grants all of his real property which he held of record in the county at the time of the deed constitutes color of title to a tract of Federal land in the county which the grantor held of record at the time of the deed, despite the lack of specific description of the land in the deed.

Ivie G. Berry, 25 IBLA 213 (June 16, 1976)

A color of title claim cannot be initiated on Federal land which has not been opened to the operation of the public land laws.

Where land has been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

A State statute which conclusively presumes that in certain circumstances taxes have been paid does not satisfy the Class 2 Color of Title Act requirement that taxes levied on the land have been paid on the land for a period commencing not later than Jan. 1, 1901, to the date of the application. A tax deed cannot be tacked on to the earlier claim of title. Such a deed commences a new title.

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

The possession and improvement of public land by a color of title applicant in the mistaken belief that he owns it is not a sufficient basis for conveying the land under that act. Color or claim of title must be based upon a document from a source other than the United States, which on its face purports to convey the land applied for to the applicant.

Estate of James J. Lee (Deceased), 26 IBLA 102 (July 20, 1976)

Possession of Federal land for the period of a State's statute of limitations, which may create title rights in an adverse possessor to non-Federal land, cannot affect the title of land belonging to the United States. Where there is no other acceptable basis for a belief that a claimant has title other than mere adverse possession under such a State law, there is no claim or color of title recognizable under the Color of Title Act, 43 U.S.C. § 1068 (1970).

A claim under the the Color of Title Act, 43 U.S.C. § 1068 (1970), must be based upon a deed or other document which on its face purports to convey the applicant the land applied for.

Manley Rustin and Betty Rustin, 28 IBLA 205 (Dec. 6, 1976)
83 I.D. 617

The granting of a class 2 color of title application is committed by statute to the discretion of the Secretary of the Interior. Where the public interest in retaining land embraced in such a claim in public ownership for recreational purposes outweighs any equities that the applicant has in the land, rejection of the application in the exercise of that discretion will be affirmed on appeal.

Gladys Losey, 29 IBLA 146 (Mar. 4, 1977)

COLOR OR CLAIM OF TITLE--Continued

GENERALLY--Continued

A claim or color of title must be based on a doc
or documents, from a source other than the Unite
States, which on their face purport to convey ti
to the land applied for, but which is not good t
The mere mistaken belief that the land applied f
included in the description set forth in the cla
deed is insufficient to establish a claim or colo
title.

The obligation for proving a valid color of titl
is upon the claimant. Where a claimant has alleg
facts which, if proved, may establish her color o
title, the Board of Land Appeals may order a fact
finding hearing pursuant to 43 CFR 4.415.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.

Since land which falls within an exception to a p
mation withdrawing land for Federal purposes, is
then withdrawn, the withdrawal does not preclude
initiation and perfection of a claim under the Co
of Title Act on land excepted from the withdrawal
43 U.S.C. § 1068 (1970).

Benton C. Cavin, 31 IBLA 145 (June 30, 1977)

A color of title claim stemming from a tax sale b
State in 1900 to a color of title applicant's pred
sor in interest on which taxes have since been pa
an adverse claim sufficient to warrant the Depart
in not setting aside an 1853 decision erroneously

the State itself sold the land at a tax sale to th
predecessor in interest of a color of title applic
and an adverse right, i.e., a class 2 color of tit
application, has intervened.

White Castle Lumber and Shingle Co., Ltd., 32 IBLA
(Sept. 12, 1977)

Where an applicant under the Color of Title Act app
for a grazing lease for the lands he now seeks to a
quire via color of title prior to the time of his a
sition of putative title, he has not demonstrated g
faith and his application is properly rejected.

An applicant who believes or has reason to believe
title to land is in the United States at the time w
he acquires it from his predecessor in interest doe
not hold color or title in good faith.

The possession of ancestors of the grantors may be
tacked on to satisfy the statutory period; however,
the ancestors' possession is not in good faith, the
chain of title has been broken, the holding period

COLOR OR CLAIM OF TITLE--Continued

GENERALLY--Continued

the ancestors may not be tacked on and the statutory period begins to run anew.

The obligation to establish a valid color of title claim is upon the claimant. Where a claimant has alleged facts which, if proved, may establish his color of title, the Board of Land Appeals may order a fact-finding hearing pursuant to 43 CFR 4.415.

Joe I. and Celina V. Sanchez, et al., 32 IBLA 228 (Sept. 20, 1977)

In order to establish the adverse possession required for a class 1 color of title claim, a claimant must establish that he and his predecessors in title were in actual, exclusive, continuous, open, and notorious possession of the land for 20 years.

The obligation to establish a valid color of title claim is upon the claimant. Where a claimant has alleged facts which, if proved, may establish his color of title, the Board of Land Appeals may order a fact-finding hearing pursuant to 43 CFR 4.415.

Lawrence E. Willmorth, 32 IBLA 378 (Nov. 1, 1977)

Color or claim of title to Federal land requires an instrument which, on its face, purports to convey the tract in question.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

A claim is not held in peaceful adverse possession where occupancy under color of title was initiated after land has been withdrawn or reserved for Federal purposes.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

The Color of Title Act, 43 U.S.C. § 1068 (1976), applies only to public land, i.e., vacant, unappropriated, unreserved Federal real property subject to the public land laws. An application under the Act which is based upon color of title initiated when the subject land was withdrawn from the operation of the public land laws and reserved as national forest land must be rejected.

The possession and improvement of public land by a color of title applicant in the mistaken belief that he owns it is not a sufficient basis for conveying the land under that Act. Color or claim of title must be based upon a document from a source other than the United States, which on its face purports to convey the land applied for to the applicant.

The obligation for proving a valid color of title claim is upon the claimant.

Frank W. Sharp, 35 IBLA 257 (May 31, 1978)

A claim or color of title must be based upon a document which on its face purports to convey the land applied for to the applicant or her predecessors.

A class 1 color of title claim requires good faith, peaceful possession by a claimant his ancestors or grantors, under claim or color of title for more than 20 years.

A color of title application for land which is not described in deeds in the chain of title must be rejected even though the applicant and her predecessors believed

COLOR OR CLAIM OF TITLE--Continued

GENERALLY--Continued

the land was covered by the deeds. The burden of proving a valid color of title claim is on the claimant.

A color of title application for land which has been withdrawn prior to any conveyance in applicant's chain of title is properly rejected.

Mario Lombardo, 37 IBLA 247 (Oct. 18, 1978)

Where record does not show any instrument purporting on its face to convey the disputed land not later than Jan. 1, 1901, appellant has not made out a meritorious class 2 color of title claim.

A grantor's quitclaim deed may be, if other requirements are met, sufficient to invest a grantee with color of title to the lands purportedly conveyed.

Instrument of conveyance upon which claimant relies is sufficient to provide color of title only if it describes land conveyed with such certainty that boundaries and identity of land may be ascertained.

Extrinsic evidence may be introduced in color of title proceeding to make definite a description in a deed which is latently ambiguous as to what lands were conveyed.

Mary C. Pemberton, 38 IBLA 118 (Nov. 22, 1978)

To satisfy the requirements of a class 1 claim under the Color of Title Act, "valuable improvements" must exist on the land at the time the application is filed, or it must be shown that the land has been reduced to cultivation. If land was once cultivated, but is not cultivated at the time the application was filed and has not been cultivated for 10 years previously, the cultivation requirement of the Act has not been satisfied.

The burden of proving a valid color of title claim is on the claimant. Where it cannot be said from the evidence presented that the grantors and grantees in the claimant's chain of title acquired a parcel of land with the bona fide belief that the parcel included all the land claimed, the color of title application must be denied.

Mable M. Farlow (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

Use of a formula, based solely on the longevity of an applicant's acquisition of title or possession, in determining the purchase price of a parcel of land under the Color of Title Act does not fulfill the Congressional mandate to consider and give full effect to the equities of the applicant. Each applicant's application and equities must be considered on its own merits.

Where an Act of Congress prescribed a purchase price for land to a certain group of claimants of land omitted from the original surveys, that Congressional determination of equities should be considered by the Bureau of Land Management in assessing the deduction for equities from the appraised value of land to be sold under the Color of Title Act.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

COLOR OR CLAIM OF TITLE--Continued

GENERALLY--Continued

Where title to public land is claimed pursuant to the provisions of the Color of Title Act, 43 U.S.C. § 1068 (1976), instruments of conveyance used to establish chain of title need only provide in some legally recognized manner for conveyance of the land such that the claimant is invested with color of title. A residuary clause in a judicial decree distributing property of an estate is sufficient to constitute chain of title.

The provisions of the Color of Title Act, 43 U.S.C. § 1068 (1976), apply only where a tract of "public land" is held in peaceful adverse possession and the other statutory requirements are satisfied. Where a homestead entry of record, valid on its face, has been made on public land and accepted by the proper land authorities, an equitable interest in favor of the entrant will be deemed to arise but the land will not be divested of its status as "public land."

Benton C. Cavin, 41 IBLA 268 (June 28, 1979)

The burden of establishing a valid color of title claim is on the claimant.

An applicant who believes or has reason to believe that title to land is in the United States at the time when he acquires it does not hold color of title in good faith.

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

ADVERSE POSSESSION

In order to establish the adverse possession required for a class 1 color of title claim, a claimant must establish that he and his predecessors in title were in actual, exclusive, continuous, open, and notorious possession of the land for 20 years.

Lawrence E. Willmorth, 32 IBLA 378 (Nov. 1, 1977)

A person who applies for title to public lands under the homestead laws effectively admits that he believes title to the lands is held by the United States, and this admission negates any possibility of good faith possession under color-of-title.

Earl Hummel, 44 IBLA 110 (Nov. 27, 1979)

APPLICATIONS

An appeal from a decision rejecting a color of title application will stay the running of the 60-day period, provided by the decision appealed from, for filing affidavits and evidence in support of arguments that the dependent resurvey of the land applied for erroneously classified the land as swamp and overflowed in character.

Paul H. and Fay L. Sleeper, 22 IBLA 318 (Nov. 10, 1975)

An applicant under the Color of Title Act, 43 U.S.C. § 1068 (1970), has the burden to establish to the Secretary of the Interior's satisfaction that the statutory conditions for purchase under the Act have been met.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976)
83 I.D. 23

COLOR OR CLAIM OF TITLE--Continued

APPLICATIONS--Continued

The failure or refusal of an applicant to submit relevant tax and title data in proper form in support of his application, as required by regulation, is an adequate basis for rejection of the application. However, where the requested documents are tendered on appeal, the case may be remanded to the Bureau of Land Management for adjudication on its merits.

Iris G. Berry, 25 IBLA 213 (June 16, 1976)

A color of title claim cannot be initiated on Federal land which has not been opened to the operation of the public land laws.

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

A color of title claim must be based upon a document from a source other than the United States which purports to convey the land applied for.

An application to purchase public land under the Color of Title Act is properly rejected where the applicant shows that she has held the land for less than 20 years under a conveyance from a grantor who occupied the land for a period which, if added to her possession, would total more than 20 years, but fails to show that the grantor had any reason to believe that he had title to the land other than merely by alleged adverse possession, since mere possession of public land alone cannot be considered as constituting a holding of land under a claim or color of title in good faith as contemplated and required by the Color of Title Act.

Mildred A. Powers, 27 IBLA 213 (Oct. 6, 1976)

Where an applicant under the Color of Title Act applied for a grazing lease for the lands he now seeks to acquire via color of title prior to the time of his acquisition of putative title, he has not demonstrated good faith and his application is properly rejected.

An applicant who believes or has reason to believe that title to land is in the United States at the time when he acquires it from his predecessor in interest does not hold color or title in good faith.

The possession of ancestors of the grantors may be tacked on to satisfy the statutory period; however, if the ancestors' possession is not in good faith, the chain of title has been broken, the holding period of the ancestors may not be tacked on and the statutory period begins to run anew.

Joe I. and Celina V. Sanchez, et al., 32 IBLA 226 (Sept. 20, 1977)

A color of title application for land which is not described in deeds in the chain of title must be rejected even though the applicant and her predecessors believed the land was covered by the deeds. The burden of proving a valid color of title claim is on the claimant.

Marie Lombardo, 37 IBLA 247 (Oct. 18, 1978)

An applicant who believes or has reason to believe that title to land is in the United States at the time when he acquires it does not hold color of title in good faith.

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

COLOR OR CLAIM OF TITLE--Continued

APPRAISED VALUE

Use of a formula, based solely on the longevity of an applicant's acquisition of title or possession, in determining the purchase price of a parcel of land under the Color of Title Act does not fulfill the Congressional mandate to consider and give full effect to the equities of the applicant. Each applicant's application and equities must be considered on its own merits.

Where an Act of Congress prescribed a purchase price for land to a certain group of claimants of land omitted from the original surveys, that Congressional determination of equities should be considered by the Bureau of Land Management in assessing the deduction for equities from the appraised value of land to be sold under the Color of Title Act.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

Where the purchase price for a tract of land applied for under the Color of Title Act is based upon a Bureau of Land Management appraisal of the fair market value of the land at the date of appraisal, and no allowance is made for equitable factors which appear on the record in favor of the applicant, the case will be remanded to the Bureau of Land Management for consideration of such equities.

Gerald Baehler, 42 IBLA 36 (July 31, 1979)

CULTIVATION

To satisfy the requirements of a class 1 claim under the Color of Title Act, "valuable improvements" must exist on the land at the time the application is filed, or it must be shown that the land has been reduced to cultivation. If land was once cultivated, but is not cultivated at the time the application was filed and has not been cultivated for 10 years previously, the cultivation requirement of the Act has not been satisfied.

Mable M. Farlow (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

DESCRIPTION OF LAND

A color of title application is properly rejected where the applicant has failed to establish how conveyances in her chain of title describing lands different from that described in her application, and different from each other, give color of title to the applied for land for the requisite period of time.

Generally, conveyance which describe only a "possessory interest" in a parcel of land do not constitute a claim or color of title within the contemplation of the Color of Title Act.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976) 83 I.D. 23

Extrinsic evidence may be used to make definite the description in a private deed which contains a latent ambiguity, either to determine actual or color of title. Therefore, a color of title claimant may introduce extrinsic evidence to establish whether the deeds in her chain of title were based upon plats, records and other documents which can be read together with the deeds as creating a color of title beyond the actual title shown on an official Federal survey plat.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

COLOR OR CLAIM OF TITLE--Continued

DESCRIPTION OF LAND--Continued

Instrument of conveyance upon which claimant relies is sufficient to provide color of title only if it describes land conveyed with such certainty that boundaries and identity of land may be ascertained.

Extrinsic evidence may be introduced in color of title proceeding to make definite a description in a deed which is latently ambiguous as to what lands were conveyed.

Mary C. Pemberton, 38 IBLA 110 (Nov. 22, 1978)

While the general rule is that a color of title claim must be based on a deed or other written instrument which on its face purports to convey the land sought, extrinsic evidence may be used to make definite the description in a deed which contains a latent ambiguity.

Where extrinsic evidence does not adequately show that predecessors in a color of title claimant's chain of title, whose holdings must be tacked on to establish the requisite 20 years holding for a class 1 claim, could have a bona fide basis for believing that land described as lot 5, shown on the official Government plat on one side of a river, included land on the opposite side of the river, there could not be a good faith holding under color of title.

Mable M. Farlow (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

Where title to public land is claimed pursuant to the provisions of the Color of Title Act, 43 U.S.C. § 1068 (1976), instruments of conveyance used to establish chain of title need only provide in some legally recognized manner for conveyance of the land such that the claimant is invested with color of title. A residuary clause in a judicial decree distributing property of an estate is sufficient to constitute chain of title.

Benton C. Cavin, 41 IBLA 268 (June 28, 1979)

GOOD FAITH

A color of title application is properly rejected where the applicant has failed to establish how conveyances in her chain of title describing lands different from that described in her application, and different from each other, give color of title to the applied for land for the requisite period of time.

Generally, conveyance which describe only a "possessory interest" in a parcel of land do not constitute a claim or color of title within the contemplation of the Color of Title Act.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976) 83 I.D. 23

A quiet title decree of a State court does not constitute color of title to a tract of Federal land when it was rendered several months after the plaintiff in the quiet title action learned that he did not own the land, although it may serve to demonstrate that the plaintiff is the sole qualified applicant under the other indicia of title upon which the applicant relies.

Ivie G. Berry, 25 IBLA 213 (June 16, 1976)

An application to purchase public land under the Color of Title Act is properly rejected where the applicant shows that she has held the land for less than 20 years under a conveyance from a grantor who occupied the land for a period which, if added to her possession, would total more than 20 years, but fails to show that the grantor had any reason to believe that he had title to the land other than merely by alleged adverse possession, since mere possession of public land alone cannot be considered as constituting a holding of land under a claim or color of title in good faith as contemplated and required by the Color of Title Act.

Mildred A. Powers, 27 IBLA 213 (Oct. 6, 1976)

The requirement of good faith contained in the Color of Title Act necessitates establishing the 20-year period of possession under claim or color of title prior to the time the claimant learned of the defect in her purported title. If this requires counting years during which the claimant's predecessors in interest held the land, their good faith must also be established.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

Where an applicant under the Color of Title Act applied for a grazing lease for the lands he now seeks to acquire via color of title prior to the time of his acquisition of putative title, he has not demonstrated good faith and his application is properly rejected.

An applicant who believes or has reason to believe that title to land is in the United States at the time when he acquires it from his predecessor in interest does not hold color or title in good faith.

The possession of ancestors of the grantors may be tacked on to satisfy the statutory period; however, if the ancestors' possession is not in good faith, the chain of title has been broken, the holding period of the ancestors may not be tacked on and the statutory period begins to run anew.

Joe I. and Celina V. Sanchez, et al., 32 IBLA 228 (Sept. 20, 1977)

A 20-year period of good faith adverse possession immediately prior to the time claimant learned of the defect in his purported title is a requirement of a class 1 color of title claim. Good faith requires an honest belief by claimant that the land was owned by him and the Department may consider whether such belief was unreasonable in the light of the facts then actually known to claimant. Although a period of possession by claimant's predecessors in title may be tacked on to claimant's possession, their good faith must also be established.

Lawrence E. Willmorth, 32 IBLA 378 (Nov. 1, 1977)

Good faith possession under color or claim of title requires that the claimant possess the land without knowing or having reason to know that title to the land was vested in the United States. Where the claimant holds a right-of-way granted by the United States covering the land in question and has received periodic notifications of trespass from Federal officers, there is no good faith possession.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

A color of title applicant lacks the required good faith if he knew when he acquired the land that title was in the United States. If the title defect was not known at the time of acquisition, the good faith must be established for the 20-year period prior to its discovery. If the applicant has not held the land for 20 years, he may tack on the possession of his predecessors in interest, provided they possessed the land in good faith. If any predecessor knew of the title defect, the 20-year period must be established after he divested his interest to someone in the chain of title who did not know of the defect and thus possessed the land in good faith.

George E. Merrick, Alice J. Merrick, 35 IBLA 208 (May 26, 1978)

A grantor's quitclaim deed may be, if other requirements are met, sufficient to invest a grantee with color of title to the lands purportedly conveyed.

Instrument of conveyance upon which claimant relies is sufficient to provide color of title only if it describes land conveyed with such certainty that boundaries and identity of land may be ascertained.

Extrinsic evidence may be introduced in color of title proceeding to make definite a description in a deed which is latently ambiguous as to what lands were conveyed.

Mary C. Pemberton, 38 IBLA 118 (Nov. 22, 1978)

Where extrinsic evidence does not adequately show that predecessors in a color of title claimant's chain of title, whose holdings must be tacked on to establish the requisite 20 years holding for a class 1 claim, could have a bona fide basis for believing that land described as lot 5, shown on the official Government plat on one side of a river, included land on the opposite side of the river, there could not be a good faith holding under color of title.

Mable M. Farlow (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

An applicant wh[illegible]lieves or has reason to believe that title to land is in the United States at the time when he acquires it does not hold color of title in good faith.

Joe I. Sanchez and Celina V. Sanchez, et al., 42 IBLA 176 (Aug. 22, 1979)

A person who applies for title to public lands under the homestead laws effectively admits that he believes title to the lands is held by the United States, and this admission negates any possibility of good faith possession under color-of-title.

Earl Hummel, 44 IBLA 110 (Nov. 27, 1979)

IMPROVEMENTS

Improvements relied upon to establish a class 1 color of title claim must be present on the land at the time the application is filed and must enhance the value of the land.

Lawrence E. Willmorth, 32 IBLA 378 (Nov. 1, 1977)

COLOR OR CLAIM OF TITLE--Continued

IMPROVEMENTS--Continued

To satisfy the requirements of a class 1 claim under the Color of Title Act, "valuable improvements" must exist on the land at the time the application is filed, or it must be shown that the land has been reduced to cultivation. If land was once cultivated, but is not cultivated at the time the application was filed and has not been cultivated for 10 years previously, the cultivation requirement of the Act has not been satisfied.

Mable M. Farlow (On Reconsideration after Hearing), 39 IBLA 15 (Jan. 11, 1979) 86 I.D. 22

COMMUNICATION SITES

Under 43 CFR 2802.1-7(e), which provides that charges for use and occupancy of a communication site on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Following a hearing under 43 CFR 2802.1-7, a decision increasing the charges for use and occupancy of a communication site is in error to the extent that the decision is based upon unspecified evidence not in the record and not made known to the user, and the decision must be set aside.

Under 602 DM 1.3, standards for evaluating easements granted by the Department are set forth in Interagency Land Acquisition Conference, Uniform Appraisal Standards for Federal Land Acquisitions.

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is a proper method of determining the fair market value of such site where there is sufficient comparable data available.

Under 43 CFR 2802.1-7(e), a revision of charges for use and occupancy of a microwave communication site should be based upon the physical condition of the right-of-way at the time the user properly commenced occupancy of the site or at the time of grant thereof, whichever was earlier, with value adjusted to present value in that condition.

"Highest and best use." As to the improver of a communication site during the term of his grant, a determination that the highest and best use of property is for communications purposes must be based on evidence showing it is so reasonably likely the site would be chosen for use as a communication site in the absence of improvements made by the improver that the suitability of the land for communications purposes would affect its general market value.

"Before and after rule." In reappraisal of a communication site, the before and after rule is applied by determining the market value of the Government tract including the site at the time of reappraisal, excluding any enhancement to or diminution from the site project, and subtracting therefrom the market value of the remaining Government property interest, including enhancement or diminution from the project.

COMMUNICATION SITES--Continued

In the absence of better evidence of comparable leases, the "before and after" method should be employed in appraisals of communication sites under 43 CFR 2802.1-7.

In a case where a substantial increase is proposed in charges for a communication site under 43 CFR 2802.1-7(e), the required hearing should be conducted in accordance with the accepted concepts of due process.

American Telephone and Telegraph Co., et al., 25 IBLA 341 (June 30, 1976)

Under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7(e), an applicant has no right to a hearing in connection with original charges for use and occupancy of a communication site, and a hearing pursuant to a request under 43 CFR 4.415 will not be granted where applicant fails to make specific allegations or offer specific proof to show in what factors a Departmental appraisal is in error.

Without convincing evidence that charges prescribed under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7 for use and occupancy of a communication site are excessive, charges properly prescribed by an authorized officer will be sustained on appeal.

Departmental regulation 43 CFR 2802.1-7 contemplates that a charge will be initially established for the entire term of the grant of a communication site right-of-way.

Mountain States Telephone and Telegraph Co., 26 IBLA 393 (Sept. 16, 1976) 83 I.D. 372

An application for a communication site under 43 U.S.C. § 961 (1970) should be denied where utilization of an existing right-of-way is practical under 43 U.S.C. § 1763 (19__) and where the proposed site would have an adverse impact on the environment.

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

A right-of-way for a communication site for which application was made under the Act of Mar. 4, 1911, shall conform to the provisions of the Federal Land Policy and Management Act of 1976, sec. 510, 90 Stat. 2743, 2782, when application for grant was pending on Oct. 21, 1976.

Where the current fair rental value of a right-of-way has been determined in accordance with accepted appraisal procedures, and the permittee contends that the rental is excessive, the burden is upon the lessee to prove by positive, substantial evidence that the appraisal is in error. Where the lessee fails to do so, the appraisal will stand.

Four States Television, Inc., 32 IBLA 205 (Sept. 15, 1977)

An applicant has no right to a hearing in connection with original Federal charges for use and occupancy of a communication site, and in the absence of any specific assertion showing error in the appraisal, the appraisal will be sustained on appeal if it is properly formulated.

When a parcel of land is properly determined to have a highest and best use for communication site purposes, an annual use charge based on the fair market value of the right-of-way grant may be determined by comparison with value of the right of use for similar sites and by making whatever adjustments may be necessary because of differences in factors influencing value.

Under sec. 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1977), charges for rights-of-way on public lands are in general to be paid annually rather than in advance for a longer period pursuant to 43 CFR 2802.1-7(a).

XYZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

A communication site right-of-way granted on Sept. 2, 1959, pursuant to the Act of Mar. 4, 1911, 43 U.S.C. § 961 (1970), is subject to the periodic reappraisal under the terms of the specific grant and applicable regulations then in effect, 43 CFR 244.21(b) and (f) (1954).

Second party utilization of a communication site right-of-way granted on Sept. 2, 1959, pursuant to the Act of Mar. 4, 1911, 43 U.S.C. § 961 (1970), is subject to BLM authorization under the governing regulation, 43 CFR 244.18(a) (1954).

James W. Smith, 34 IBLA 146 (Mar. 10, 1978)

"Fair market value." As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but are only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Under sec. 504(g) of the Federal Land Policy and Management Act of 1976, payments for use of right-of-way sites should be on an annual basis at the fair market value unless the annual payment would be less than $100. Therefore, although lands may be appraised for a longer future period of time, lump-sum payments for future years may not be demanded for amounts exceeding

the statutory amount; instead charges for such amounts should be made on an annual basis.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

Where there are multiple users on the same communications site each user is individually responsible for the fair market rental value computed as of the time of the initiation of use, and such rental value determined for the site may not be prorated among different users.

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

As used in 43 CFR 2802.1-7, "fair market value" of a communication site right-of-way is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the right to use the site would be granted by a knowledgeable owner willing but not obligated to grant to a knowledgeable user who desired but is not obligated to so use.

The comparable lease method of appraisal of microwave communication sites, which involves the comparison of comparable rental data from other leased sites with data from the subject site, is the preferred method of determining the fair market rental value of the right-of-way where there is sufficient comparable data available.

Appraisals of rights-of-way for communication sites will be upheld if no error is shown in the appraisal methods used by the Bureau of Land Management and the appellant fails to show by convincing evidence that the charges are excessive. Where an appellant has raised sufficient doubt that the Bureau properly considered the highest and best use of a right-of-way in determining comparability of other sites as a basis for the use charges, the case may be remanded for the Bureau to reconsider whether a further appraisal or adjustments in the appraised values should be made.

Where a grantee seeks renewal of a right-of-way for a communication site, the Bureau of Land Management should require an advance annual payment at the rate formerly charged until a new fair market value rate may be established by appraisal. In the absence of contrary directives, the guideline in 43 CFR 2802.1-7(e) should be applied to renewals of existing rights-of-way. Increased charges may not be imposed retroactively, but may be only imposed by the authorized officer, after reasonable notice and opportunity for hearing, beginning with the next charge year after the officer's decision.

Under sec. 504(g) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1978), payments for use of right-of-way sites should be on an annual basis at the fair market value unless the annual payment would be less than $100. Therefore, although lands may be appraised for a longer future period of time, lump-sum payments for future years may not be demanded for amounts exceeding the statutory amount; instead charges for such amounts should be made on an annual basis.

COMMUNICATION SITES--Continued

Where there are multiple users on the same communication site each user is individually responsible for the fair market rental value of his authorized use.

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Donald R. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

Where, in connection with a communication site right-of-way, BLM requests an applicant to submit copies of FCC licenses and such applicant indicates a willingness to comply, the case is properly remanded for further processing.

Donald R. Clark, 44 IBLA 130 (Nov. 27, 1979)

COMMUNITY PROPERTY

Rights under an executory contract to acquire property entered into by the husband alone are presumed to be community property under California law, and a conveyance as community property to husband and wife in settlement of litigation regarding the contract corroborates the presumption; both spouses stand on equal footing with respect to charges, based on the executory contract, of violating the acreage limitations in sec. 7 of the Desert Land Act, 43 U.S.C. § 329 (1970).

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

CONFLICT OF INTEREST

One of the functions of the Department of Justice is to construe the laws under which other Government Departments act, 28 U.S.C. § 512 (1970), and when the Department of Justice has advised the Department of the Interior that it has construed a conflict of interest statute affecting Members of Congress and has determined that it is permissible for the spouse of a Member of Congress to hold a grazing lease for national resource lands under certain circumstances, that opinion is binding on this Department, and a grazing lease is properly issued when the applicant has satisfied the criteria set forth by the Department of Justice.

Joseph T. Kurkowski, 24 IBLA 58 (Feb. 23, 1976)

CONSTITUTIONAL LAW

GENERALLY

Pursuant to the Property Clause of the U.S. Const. art. IV, § 3, cl. 2, Congress has enacted the Taylor Grazing Act, 43 U.S.C. § 315 *et seq*. (1970), and other statutory authority which empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and to determine whether or not an individual has committed a trespass.

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Under the Supremacy Clause, U.S. Const., art. VI, cl. Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

H. P. Webb, 34 IBLA 362 (May 1, 1978)

The seventh amendment right to a jury trial does not extend to administrative proceedings, such as mining claim contests, where statutory rights adjudicated therein were unknown at common law.

United States v. Paul P. Fisher and Euel E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

The Property Clause of the United States Constitution art. IV, § 3, cl. 2, gives Congress the power over the public lands "to control their occupancy and use, to protect them from trespass and injury and to prescribe the conditions upon which others may obtain rights in them." When Congress so acts, the Federal legislation necessarily overrides conflicting State laws under the Supremacy Clause. U.S. Constitution art. IV, cl. 2.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not statute enacted by Congress is constitutional.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

Under the United States Constitution, States have no power over disposition of Federal property.

Ralph and Ruth Dickinson, 39 IBLA 258 (Feb. 15, 1979)

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year lease

CONSTITUTIONAL LAW--Continued

GENERALLY--Continued

term does not violate a lessee's rights under the fifth amendment of the United States Constitution.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

Under the Property Clause, Congress has the power to control the disposition and use of water on, under, or appurtenant to original public domain lands, and it is not lightly inferred that this power has been exercised.

Federal control over the disposition and use of water in, on, under or appurtenant to Federal land ultimately rests on the Supremacy Clause, which permits the Federal Government to exercise its constitutional prerogatives without regard to State law.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

A provision of State law, relating to assessment work on mining claims, which is more liberal than the requirements of Federal law, cannot override such Federal law. Article IV, § 3, cl. 2, of the Federal Constitution vests in the Congress authority to promulgate appropriate laws governing the public lands and other property of the United States.

Bruce Parke, 42 IBLA 18 (July 25, 1979)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not as to mining claims the recordation provisions of the Federal Land Policy and Management Act of 1976 are constitutional.

Charlie Carnal, Walter Peck, and Edward Porzansky, 43 IBLA 10 (Sept. 11, 1979)

DUE PROCESS

Although a respondent in a grazing license trespass hearing brought by the Bureau of Land Management has the right to be represented and aided by legal counsel, the Department has no duty or responsibility under the Constitution or the Administrative Procedure Act to provide such counsel for him.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

The filing of an application for modification of an existing coal lease is a hope or expectancy rather than a vested property right, and, as such, does not fall within a "valid existing rights" exception and is not protected by the Fifth Amendment.

Estate of Malcolm N. McKinnon, 31 IBLA 290 (July 22, 1977)

Gulf Oil Corp., 32 IBLA 13 (Aug. 29, 1977)

CONSTITUTIONAL LAW--Continued

DUE PROCESS--Continued

The filing of an application for modification of an existing coal lease does not give rise to a vested property right. Thus, such an application qualifies as neither a valid existing right excepted from application of the acreage limit on lease modifications set by the Federal Coal Leasing Amendments Act of 1976 nor a right protected by the Fifth Amendment from application of subsequently amended statutes or regulations.

Nevada Electric Investment Co., 33 IBLA 3 (Nov. 14, 1977)

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

R. E. Webb, 34 IBLA 362 (May 1, 1978)

In an administrative hearing to determine the validity of a mining claim, the requirements of due process are satisfied when notice and opportunity for an impartial hearing are provided in accordance with the Administrative Procedure Act. 5 U.S.C. § 551 *et seq.* (1976).

United States v. Paul P. Fisher and Buel E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(2) do not violate due process.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year lease term does not violate a lessee's rights under the fifth amendment of the United States Constitution.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

"Person." Regulation 43 CFR 4.450-1 specifically gives persons with an adverse interest in land a right to contest the adverse claim. It does not depend on the applicability of the due process clause of the Constitution to either claimant. A State is a "person" within the meaning of this private contest regulation.

State of Alaska, 42 IBLA 1 (July 25, 1979)

The procedures of the Department of the Interior in mining contests where a mining claimant is afforded notice and an opportunity to be heard comport with the requirements of due process under the United States Constitution.

United States v. J. C. Wilson, 44 IBLA 1 (Nov. 6, 1979)

CONSTITUTIONAL LAW--Continued

DUE PROCESS--Continued

Due process does not require notice and a prior hearing in every case that an individual is deprived of property so long as the individual is given notice and an opportunity to be heard before the deprivation becomes final.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

CONTESTS AND PROTESTS
(*See also* Rules of Practice--if included in this Index.)

GENERALLY

While a mining contest is within the jurisdiction of an administrative law judge, he may reopen the hearing for the production of further evidence before he makes his decision.

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant. However, if the Government in a mining contest fails to present a prima facie case and the contestees move to dismiss the case and rest, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other essential issues to determine whether the application may be allowed.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

Where an unamended senior offer for a noncompetitive fractional oil and gas lease on acquired lands is not in compliance with 43 CFR 3130.4-4, a junior offer obtains priority to extent of conflicts between competing filings, and the junior offeror's protest must be sustained.

Frederick L. Smith et al., 19 IBLA 162 (Mar. 14, 1975)

A mining claim is a claim to property which may not be declared invalid except in accordance with due process of law. Due process consists of proper notice and opportunity for an agency hearing in accordance with the Administrative Procedure Act, and it suffices if the claimant is properly notified and afforded the opportunity to be heard. But there is no requirement that a hearing be held where the contestee fails to avail himself of the opportunity for a hearing within the time provided.

United States v. James R. and Sammy B. Ragsdale, 20 IBLA 348 (June 11, 1975)

A protestant against the filing of a survey plat bears the burden of proof, *i.e.*, the risk of nonpersuasion, to show why the plat should not be accepted, and the applicant State has the burden of demonstrating that land is swamp and overflowed in character. The protestant against the filing of a survey plat who claims that title to the land passed to the State under the

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), is properly assessed with the burden of proof, *i.e.*, the risk of nonpersuasion, in the proceeding.

In a hearing held to determine whether lands were swamp and overflowed at the time of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), the parties asserting the State's title fail to meet their burden of proof when the evidence submitted indicates that the mangrove area claimed as swampland is in fact below the line of mean high tide, and was properly delineated from the upland by the meander line.

Demonstration that the field notes accompanying the plat of survey inaccurately or incompletely recite the history of the lands surveyed does not require rejection of the survey or field notes, when it is not disputed that the field notes accurately describe the evidence of the history of settlement and use visible during examination and survey, and when it is concluded that the survey itself was properly executed.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

Where the answer to a mining contest complaint denying the charges is timely filed by one contestee, but is untimely filed by all other contestees, the charges as to those contestees filing untimely answers will be taken as admitted and their interests in the mining claims will be declared null and void. The contestee who filed a timely answer is entitled to a hearing as to the validity of the claims.

United States v. Albert S. Hunter et al., 22 IBLA 28 (Sept. 10, 1975)

Where a contestee makes a timely response to a Government complaint in a mining contest, which can reasonably be construed as a general denial of the allegations contained in the complaint, the response will be considered a sufficient answer within the contemplation of the regulations. The allegations then cannot be taken as admitted and the mining claim declared null and void without a hearing.

United States v. Cliff Libby, 24 IBLA 39 (Feb. 19, 1976)

A mining claim is a claim to property which may not be declared invalid without proper notice and an adequate opportunity for an agency hearing in accordance with due process of law. That due process consists of notice and opportunity for hearing, and it suffices if the claimant is afforded the opportunity to be present and heard. The fact that the claimant, after filing a timely answer to the contest complaint, refused to attend that hearing and produce evidence does not vitiate the due process he has received.

United States v. Carl Bellamy, 25 IBLA 50 (May 14, 1976)

"Final entry." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970) refers to the submission, to the proper officials, of the amended final proof and required fees.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970) which requires issuance of a patent 2 years after receipt upon final proof for a homestead entry, a contest against an entry should not be dismissed where the complaint was filed within 2 years following the submission of additional affidavits amending the entryman's deficient final proof, despite the fact that the receipt in connection

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

with the deficient proof had been issued more than 2 years before filing of the complaint and the receipt had never been canceled or a new receipt issued.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

A Federal district court jury verdict in a suit to cancel desert land patents, that the entrymen and their purchaser under an illegal executory contract did not commit fraud against the United States, does not collaterally estop this Department from adjudicating a contest grounded on the illegal executory contract against the purchaser's own entry, because the legal standard applicable in the subsequent contest is different than that in the fraud action--a desert land entry can be subject to cancellation for acts that do not constitute fraud.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq*. Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to schedule a hearing at which the applicant may produce evidence to establish entitlement to his allotment.

Donald Peters, 26 IBLA 235 (Aug. 17, 1976) 83 I.D. 308

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

Although, in a mining claim contest, the Government may make a prima facie case of no discovery by the testimony of a mineral examiner that he has been on the land in issue and saw nothing of mineral value, a prima facie case is ordinarily not made where it is established that the examiner was not on the land in issue.

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

Service of a document upon a person's attorney of record constitutes effective service upon such person.

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

Where a mineral examiner testifies on the basis of his examination of mining claims that the mineral values on the claims are insufficient to support a finding of discovery, a prima facie case against the validity of the claims has been established, and where the contestees walked out of the hearing and did not submit evidence to rebut the prima facie case, the claims must be declared invalid.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where, at the hearing of a mining claim contest, the transcript of a previous hearing in another related contest is received in evidence, those portions of the transcript which are relevant and material to the case at hand may form, or contribute to, the basis for the decision in the case, regardless of which party introduced the transcript in evidence.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

Where the State of Alaska has applied to select certain land and has been given tentative approval of that selection, and thereafter a conflicting Native allotment application is filed which is supported only by meager evidence of use and occupancy, it is error to allow the allotment application and to cancel the State's tentative approval and reject the selection application without notice and an opportunity for a hearing in which the State may participate.

State of Alaska, John Nusunginya, 28 IBLA 83 (Nov. 12, 1976)

In a mining contest, a matter not charged in the complaint may only be considered by the Administrative law judge if it was raised at the hearing without objection and the contestee was fully aware that the issue was raised.

United States v. Glenn C. Bolinder and L. C. Turner, et al., 28 IBLA 187 (Dec. 6, 1976)   83 I.D. 609

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. A mining claim may be declared null and void where there was a charge in the complaint of insufficient minerals to constitute a valid discovery.

United States v. William C. Smith, a/k/a Bill Smith, 29 IBLA 7 (Feb. 8, 1977)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. However, under the rules an answer may be accepted if it is received within 10 days after the due date and it is determined that the answer was probably transmitted before the end of the period in which it was required to be filed.

United States v. Jesse Smith, 29 IBLA 10 (Feb. 8, 1977)

Where the answer to a mining contest complaint denying the charges is not timely filed, the charges will be deemed admitted and the contest will be decided without a hearing. 43 CFR 4.450-7(a).

United States v. Edison T. Schaefer, 29 IBLA 84 (Feb. 23, 1977)

A field examination report of a trade and manufacturing site claim is not evidence on which the final action of cancellation may be taken, until such time as the pertinent facts are admitted by the applicant or the report is admitted into evidence at a hearing initiated by a contest complaint.

John B. Coghill, 29 IBLA 177 (Mar. 18, 1977)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant, but if the Government in a contest fails to present a prima facie case and the contestee moves to dismiss the case and rests, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by contestee shows there has not been a discovery, it may be used in reaching a decision that the claim is invalid regardless of any defects in the prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, and a mining claimant fails to show discovery by a preponderance of the evidence, he has not satisfied his burden of proof and the claim must be declared invalid.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

Since a Government contest is not insufficient and subject to dismissal for failure to name all parties in interest, a contest is properly brought against persons who are heirs of a director of a corporation whose charter has expired under State law, even though the State law provides that the property of such a corporation passes to a public trustee for distribution by him. Any interest of those not named or served in a manner provided by the pertinent regulation is not affected.

United States v. Erma Elizabeth Conner, and Walter T. Nolte, as the Heirs of B. W. Speer, a Last Known Director of the Arlington Gold Mining Co. (Contestee), 31 IBLA 173 (July 5, 1977)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a proceeding to determine the validity of an unpatented mining claim the claimants must prevail, if at all, upon the strength of their own case, rather than upon any weakness in that of the Government.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

A Bureau of Land Management decision, dismissing an answer to contest complaints filed in behalf of individual contestees and a company, and holding mining claims null and void because it appeared the company did not own the claims and because the answer was filed in behalf of the individual contestees by someone not authorized to practice in their behalf, will be vacated where on appeal it is shown that within the time for filing the answer the claims had been transferred to the company. There is no need to dismiss the contest and initiate a new contest against the company since a timely answer has been filed in its behalf; instead, the complaints should be amended to substitute the company as the contestee and party in interest and the contest proceeding should go forward against it.

Sharon K. Milazzo et al., 33 IBLA 57 (Dec. 5, 1977)

In a Government contest, regular service of the complaint must be presumed, where no question is raised as to the validity of certified mail return receipts

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

included in the record, regular on their face and indicating proper service.

United States v. Bonda Niece and Leslie Niece, 33 IBLA 290 (Jan. 10, 1978)

In a mining contest a contestee may rest at the close of the Government's case and move for a dismissal based on the Government's failure to make out a prima facie case of a claim's invalidity. If, however, the contestee goes forward and presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

A private contest complaint which does not set out in clear and concise language a statement of the facts constituting the grounds of contest is properly dismissed.

Eugene A. Whitmill, 34 IBLA 123 (Mar. 2, 1978)

When BLM adjudicates issue and offeror does not appeal, doctrine of administrative finality, which is administrative counterpart of res judicata, generally bars consideration of new appeal arising from later proceeding involving same lease and same issue. Accordingly, BLM acted properly in dismissing appellant's protest, filed Nov. 18, 1977, against oil and gas lease annual rental adjudicated on July 27, 1977.

Wilfred Plomis, 35 IBLA 1 (May 3, 1978)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Unsubstantiated allegations of temporary incapacity due to a nervous breakdown cannot serve as a basis for waiving this mandatory requirement.

United States v. Brent J. Brunker, 36 IBLA 36 (June 27, 1978)

Where, in a quasi-judicial Departmental proceeding, an individual entered an appearance as attorney for a party to the action, and it was subsequently revealed that he was not qualified to practice before the Department under any of the provisions of 43 CFR 1.3, the presiding administrative law judge properly refused to continue to recognize his appearance or to permit him to continue to conduct the case in a representative capacity.

The Department of the Interior is lawfully empowered to initiate a contest pursuant to the Administrative Procedure Act to determine the validity of unpatented mining claims. This procedure makes no provision for 1) trial by jury, 2) advice to the contestant concerning his constitutional rights, 3) compensation to the contestant for the value of the claim if it is found to be invalid, or 4) appointment by the Department of qualified counsel to represent the contestant; and this procedure does not violate constitutional guarantees of due process, the General Mining Law, or the Administrative Procedure Act. Presentation of the contestant's case by counsel employed by the Forest Service in appropriate cases is permissible, and Federal employees may testify as witnesses, and may conduct examinations and secure mineral samples on unpatented mining claims without a search warrant.

United States v. John Gavanich, 36 IBLA 111 (July 14, 1978)

Where, in a mining contest, a contestee presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

Where the only properly corroborated fact alleged by private contestant related to situs of contestee's residence in 1975 and thereafter, but precomplaint record included assertion by contestee that he lived on homestead in 1972, 1973, and 1974, the contestant has not thereby alleged facts which, if proved, would require cancellation of entry, and contest must be dismissed under 43 CFR 4.450-5(a).

Although in his summary dismissal of private contest against homestead entry administrative law judge discussed issues upon which contestant had failed to submit corroborated allegations of fact along with his complaint, such action by judge did not relieve contestant of his burden of filing corroboration, despite provisions of 43 CFR 4.450-4(b) allowing judge to "raise issues in connection with deciding a contest."

Administrative law judge properly dismissed without a hearing a private homestead entry contest in which complaint failed to allege corroborated facts which, if proved, would provide sufficient basis for cancellation of entry.

Where contestant in private homestead entry contest appeals to Board of Land Appeals and makes certain assignments of error by administrative law judge, but allegations of fact upon which those assignments are based were not corroborated at filing of contest complaint, and issues raised by those assignments were not raised in complaint, such assignments are not material for purposes of appeal to the Board.

Ernest C. Lamb v. Richard R. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

The seventh amendment right to a jury trial does not extend to administrative proceedings, such as mining claim contests, where statutory rights adjudicated therein were unknown at common law.

United States v. Paul E. Fisher and Opal E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Where contestees deny the allegations in the complaint only as to 4 claims but not as to 15 other claims addressed in the complaint, the complaint will be taken as admitted as to the 15 claims not addressed in the answer to the complaint.

Where contestees in a mining claim contest file a timely answer to the contest complaint, this answer is efficacious as to any other contestees who are members of his family if it appears on the face of the answer that they wish to retain their interests, if any, in the claims, as the contestees who answered may be regarded as having done so on their family members' behalf. In these circumstances, these other contestees are properly regarded

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

as having answered the complaint, absent any manifestation of a contrary intent.

Where a contestee makes a timely response to a Government complaint in a mining contest which is sufficient to raise a justiciable controversy, the allegations then cannot be taken as admitted and the mining claim(s) cannot be declared null and void without a hearing.

United States v. Jerry Prock et al., 39 IBLA 148 (Jan. 29, 1979)

Regulation 43 CFR 4.450-1 gives a person with an adverse interest in land a right to contest an adverse claim. The Department of the Interior has consistently recognized States as included within the term "person" within the meaning of the regulation, allowing them to initiate private contests.

Where the State of Alaska has shown an interest in land in its existing airport, it may bring a private contest to challenge Native allotment applications for land in conflict with the airport.

State of Alaska, 40 IBLA 79 (Mar. 22, 1979)

The State of Alaska will be afforded time within which to bring private contests against Native allotment applications conflicting with an existing airport runway built by the State and to show it has standing to contest. If it does so timely, the Bureau of Land Management will adjudicate its standing as a contestant and the contests will proceed if it finds affirmatively. If not, the State's timely objections will be taken as a protest and a factfinding hearing will be held. If the State fails to take timely action, a decision rejecting its application to reinstate a conflicting airport lease application will stand.

State of Alaska, 40 IBLA 118 (Mar. 27, 1979)

Where an applicant for an Alaska Native allotment was a minor at the time she alleges the initial use and occupancy of the land, but not so young as to preclude any possibility that she was then capable of doing so as an independent citizen in her own right to the potential exclusion of others, prior to rejection of her application on the basis of her youth BLM should provide notice and an opportunity for hearing.

Nellie Boswell Beecroft, 41 IBLA 70 (May 31, 1979)

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

Where the Bureau of Land Management (BLM) determines that an Alaska Native allotment application should be rejected in part because the Native did not use all of the land applied for, the BLM shall initiate a contest proceeding pursuant to 43 CFR 4.451 *et seq*.

Frank Bulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing.

United States v. James Hawkeswood et al., 41 IBLA 245 (June 27, 1979)

United States v. Edna Horstmeier, 42 IBLA 33 (July 26, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from the "Notice," which is interlocutory, but it may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the subsequent decision of BLM to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

State of Alaska, 41 IBLA 309 (July 5, 1979)

"Person." Regulation 43 CFR 4.450-1 specifically gives persons with an adverse interest in land a right to contest the adverse claim. It does not depend on the applicability of the due process clause of the Constitution to either claimant. A State is a "person" within the meaning of this private contest regulation.

State of Alaska, 42 IBLA 1 (July 25, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Statehood Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to BLM that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may not appeal from an interlocutory decision which authorizes the State to initiate private contest proceedings to prove lack of qualification on the part of the Native. Rather, it may initiate the private contest within the time period prescribed, or it may appeal the decision of BLM, after it becomes final, to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient it will order the institution of Government contest proceedings, but if it finds the allotment application acceptable, it will order the patent issued, if all else be regular.

Where it appears that a party did not realize that an election of remedies was mandated by Departmental procedures, a decision requiring the initiation of a private contest will be set aside, and the party will be permitted a period of time in which to initiate a private contest, or alternatively, waive such private contest and pursue a direct appeal on the question of whether a Government contest should issue.

State of Alaska et al., 42 IBLA 94 (Aug. 16, 1979)

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

Where an applicant for a Native allotment alleges for the first time on appeal his use and occupancy of lands prior to their withdrawal, a decision rejecting the Native's application shall be vacated and the case remanded to BLM for its consideration of appellant's new evidence.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

Where there is a conflict between an application by the State of Alaska to select land under the Alaska Mental Health Enabling Act and an application by an Alaska Native for allotment under the Act of May 17, 1906, and it appears to the Bureau of Land Management that the Native applicant has met the requirements for patent, upon notice of this determination the State, if dissatisfied, has an election of remedies. It may initiate private contest proceedings to prove lack of qualification on the part of the Native, or it may appeal the determination to the Board of Land Appeals. If, on appeal, the Board concludes that the Native's application is deficient, it will order the institution of Government contest proceedings. If, however, the Board affirms the finding that the requirements of patent have been met, the State will have no further administrative recourse. Where the State had not, prior to its appeal, been afforded notice of the election, it should be afforded an opportunity to make such election.

State of Alaska v. Mattie E. Bartos, 42 IBLA 269 (Aug. 27, 1979)

State of Alaska v. Daniel Johnson, 42 IBLA 370 (Sept. 11, 1979)
86 I.D. 441

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

A sufficient prima facie case by the Government does not require positive proof that there has been no discovery made or that the mining claim is nonmineral in character. Upon the Government's presentation of a prima facie case, the burden shifts to the claimant to prove by a preponderance of the evidence that he indeed has a discovery of a valuable mineral deposit within the limits of the claim.

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

Generally where BLM determines that an Alaska Native allotment application should be rejected because the use of the land by a minor child was not sufficiently established as an independent citizen in his own right, at least potentially exclusive of others, BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq.*, and the guidelines set forth in *Donald Peters*, 26 IBLA 235, 83 I.D. 308 (1976).

Sarah A. Pence et al., 43 IBLA 266 (Oct. 15, 1979)

CONTESTS AND PROTESTS--Continued

GENERALLY--Continued

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukapigak, 44 IBLA 313 (Dec. 31, 1979)

CONTRACTS

(*See also* Delegation of Authority, Labor, Rules of Practice--if included in this Index.)

GENERALLY

The signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is the act that constitutes issuance of the lease and creates a binding contract; such a lease contract is not subject to cancellation by reason of inclusion of leased land in a known geologic structure as of a date subsequent to lease issuance.

Barbara C. Lisco, 26 IBLA 340 (Sept. 7, 1976)

A lessee of the water from a well owned by the Federal Government, who agrees that his use of the water will not be used as a basis for obtaining a permanent water right and who nevertheless proceeds to try to obtain a water right in State court based on that use, will be estopped from asserting any resulting decree of the State court for any purpose.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

In the construction or interpretation of contracts, the primary purpose and guideline is the intention of the parties. A contract must be construed as a whole and the intention of the parties is to be collected from the entire instrument. Individual words and phrases must be considered in connection with the rest of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and grants appellant a rental-free revocable permit to enter the "service location," for any purpose under the contract including use of the sites for installation, operation, and maintenance of the facilities, the contract can be interpreted as granting appellant a rental-free revocable permit for a right-of-way for a gas pipeline.

In construing an ambiguous contract, the conduct of the parties in relation to such contract is to be considered in determining the meaning of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and the appellant constructs a pipeline pursuant to the contract, it is reasonable to interpret the contract as providing a revocable permit for a right-of-way for such pipeline.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

"Interest in an oil and gas lease or offer." If an oil and gas lease offeror in an oral agreement gives another person "a claim or any prospective or future claim to an advantage or benefit from a lease," there would be an interest in the lease or lease offer which must be disclosed under 43 CFR 3102.7. That an offeror might raise a technical legal defense against enforcement of such an agreement in a court does not militate

CONTRACTS--Continued

GENERALLY--Continued

against there being a claim or avoid the consequence of the disclosure regulation or 43 CFR 3112.5-2 prohibiting multiple filing in drawing procedures.

"Interest in an oil and gas lease or offer." Where affidavits submitted on appeal by an oil and gas lease offeror disclose that prior to the filing of an oil and gas lease offer the offeror orally agreed to give the person filing the offer for him either the opportunity to refuse to purchase the lease under terms and conditions that a third party would make (right of first refusal), or the opportunity to make the first offer before any other offer would be accepted (first right to buy), the offeror has given the person an interest in the offer as defined in the regulations to include a prospective claim to an advantage or benefit from a lease.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

CONSTRUCTION AND OPERATION

Generally

In interpreting provisions of State leases which have been validated under sec. 6 of the Outer Continental Shelf Lands Act, 43 U.S.C. § 1335 (1970), the Department will give great weight to judicial and administrative interpretations rendered by officials of that State. Where, however, there is a conflict of opinion between State officials as to the proper interpretation of a provision of a State lease, the Department of the Interior will independently interpret that section, applying the general rules of contract construction.

Ocean Drilling & Exploration Co., Chevron Oil Co., 21 IBLA 137 (July 15, 1975)

The royalty provisions of a State lease validated under sec. 6 of the Outer Continental Shelf Lands Act will govern the determination of the royalty due to the United States.

Superior Oil Co., 31 IBLA 127 (June 30, 1977)

A short-term or temporary contract will not rescind a long-term contract under the doctrine of superseding contracts unless the parties clearly intended that to be the effect of the new agreement and the terms of the new agreement are flatly inconsistent with the former agreement.

Laws in existence at the time a contract is entered into become a part of the contract whether or not expressly referred to in the contract or incorporated in its terms.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978)
85 I.D. 297

When the Government could not require delivery of a refrigerated storage unit within the original delivery schedule because the building in which the unit was to be installed was not finished and the Government thereafter continued to negotiate changes in specifications and delivery dates with the contractor, the Board held that the Government had waived the original delivery schedule and that the Government did not regain the right to terminate the contract for default since there was no mutual agreement on a new delivery date and the Government's unilateral attempt to reestablish a specific contractual delivery date was unreasonable as

not being within the performance capabilities of the contractor at the time the notice was given.

Appeal of Kenney Refrigeration, IBCA-1230-12-78 (Sept. 28, 1979)
86 I.D. 503

Actions of Parties

Where the practice of a construction contractor was to separate claims for an equitable adjustment for increased costs due to a change from its claims for delays to the work caused by the change and the evidence established that the contractor's delay claim resulting from a change was pending before the contracting officer at the time the contractor agreed to and executed a modification settling the equitable adjustment for direct costs attributable to the change, the Government's contention that the delay claim was barred by accord and satisfaction was rejected since it is well settled that an agreement does not operate as an accord as to matters not contemplated by the agreement.

Where the contractor's offer to perform certain changed work for a lump sum was accepted and the agreement and the price were incorporated into a modification which the contractor executed without reservation or exception and the lump sum was subsequently paid, the contractor's subsequent claim for delays to the work attributable to the change was barred by accord and satisfaction.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 6, 1975)
82 I.D. 199

Where the action of the Government clearly contributed to the delay for which liquidated damages were assessed and there was no basis for determining the portion of the delay for which each party was responsible, the Board found that no liquidated damages could properly be charged.

Appeal of David M. Cox, Inc., IBCA-1092-12-75 (July 22, 1976)

Insertion of the words "no exceptions" in a release executed by the contractor was held not to bar further consideration of the contractor's pending request for an extension of time where the Government's instructions for executing the release dealt only with claims in stated dollar amounts and directed the contractor to insert "no exceptions" if no such claims were to be filed and where in their conduct the parties did not treat the release as final.

Appeal of Addison Construction Co., IBCA-1064-3-75 (Sept. 29, 1976)
83 I.D. 353

A second category differing site conditions claim based upon rock encountered in excavation under a construction contract is denied where the Board finds that an adequate site investigation would have revealed the presence of rock in the area where it was encountered.

Appeal of William Lagnion (Contractor), IBCA-1083-10-75 (Jan. 5, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Actions of Parties--Continued

A default termination is found to be proper where no special circumstances were shown to exist justifying a contractor's refusal to proceed with performance in accordance with the contracting officer's decision pending the resolution of the dispute.

Appeals of Willie H. Petterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Feb. 28, 1977)

Interpretation of the parties prior to dispute has great weight and compels conclusion that force account work included placing red dirt fill but not drying and replacing. Drying or replacement of wet borrow was not force account work and was not covered by the changes clause or changed conditions clause.

The Government failed to show that a rejected wall did not conform to the plans and specifications.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977)
84 I.D. 829

When the project supervisor for the Government takes over the direction and supervision of the contractor's work as to concrete curbing and gunite application, the Government cannot complain of defective work and require contractor to replace the work at contractor's expense.

Appeal of Murdock Construction Co., IBCA-1050-12-74 (Aug. 29, 1977)

A first category differing site condition claim based upon excessive rock encountered in excavation under a construction contract is sustained where the Board finds there was an adequate pre-bid site investigation and that the contract indications of subsurface conditions did not reveal the excessive quantities of rock in the areas where it was encountered.

A first category differing site condition claim based upon mitigating subsurface water and rock excavation encountered is sustained where the Board found that the Government knew of the subsurface mitigating water but failed to disclose such information to bidders and that both the rock and the subsurface mitigating water encountered differed materially from the contract indications.

Appeals of JBSC Co., IBCA-1020-2-74 and IBCA-1033-4-74 (Sept. 28, 1977)
84 I.D. 495

A second category differing site condition based on excessive rock drilling and inaccessability of the work site for construction of a fence is denied where the Board finds that there was an inadequate pre-bid site investigation and that an adequate investigation would have disclosed the actual conditions encountered.

Appeal of Arizona Fence Co., Inc., IBCA-1144-3-77 (Feb. 9, 1978)

In construing an ambiguous contract, the conduct of the parties in relation to such contract is to be considered in determining the meaning of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and the appellant constructs a pipeline pursuant to the contract, it is reasonable to

CONSTRUCTION AND OPERATION--Continued

Allowable Costs

A contractor who submitted a claim for an equitable adjustment based on rental rates for equipment idled by Government action, but failed to prove ownership of the equipment or whether a rental had taken place, was entitled only to ownership costs of the equipment reduced by one-half to allow for the lack of wear and tear on the idle equipment.

Appeal of Thorson, Inc., IBCA-993-4-73 (June 30, 1975)

Claims of constructive change under a cost-plus-fixed-fee contract first presented in the notice of appeal are outside the jurisdiction of the Board and are remanded to the contracting officer for the issuance of new or supplemental findings.

Appeal of VTN Colorado, Inc., IBCA-1073-8-75 (Oct. 29, 1975) 82 I.D. 527

Upon reconsideration, the Board finds that where the Government issues an "Extra Work Order" under a "force account" provision for minor extra work not provided for in other pay items, at agreed on rates, the contractor is entitled to be paid for inefficiency, rework costs and delay costs when moisture causes borrow material placed under the extra work order, to become muddy. However, the appellant's failure to give prompt notice of the claim under the force account provision caused the Government to order added pay item work, thus the claim must be reduced by the amount of added pay item payment.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Nov. 4, 1977) 84 I.D. 898

When the contract provides payment for the rental of specific equipment and contractor fails to rent this equipment, the Government's failure to pay for this item is not a constructive change.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

Where the Government contracts with a small corporation to obtain the services of a recognized expert in fish biology and where the sum of an approximate yearly salary of $44,000 plus approximately $4,000 of fringe benefits and approximately $8,000 of life insurance premiums are compensation to the expert for a total approximate yearly compensation or corporate cost of $56,000 and where the specific contract is for approximately $1 million said compensation and costs are reasonable allowable costs under the contract.

"Fringe costs," leave, life insurance premiums, retirement plan costs, life raft for safety, are all allowable costs in the circumstances in this appeal.

Fees and expenses in the preparation and conduct of an appeal are disallowed costs of prosecution of claims against the Government.

Appeal of W. F. Sigler & Associates, IBCA-1159-7-77 (Feb. 16, 1978) 85 I.D. 41

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Allowable Costs--Continued

Where a cost-plus-fixed-fee contract contains specified ceilings on reimbursement for general and administrative expenses and rates for certain consultants, such ceilings are found to apply to the entire contract, including a second phase initiated by the timely exercise of an option in the contract.

Costs reimbursable to a contractor under a cost-plus-fixed-fee contractor are found to exclude those portions of an executive's salary properly chargeable to work outside the scope of the contract, but the costs of low-cost cameras and recorders necessary to performance are allowed as materials and supplies because the conditions under which they were used made them expendable material.

Appeal of Environmental Associates, Inc., IBCA-1128-10-76 (Aug. 15, 1978) 85 I.D. 349

Where a finding is made by the Board on the extent of the Government's liability to the contractor, any moneys previously allowed and paid pursuant to a contracting officer's decision on the same claims shall be deducted from the gross amount allowed in order to determine the net amount payable to the contractor.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

Under a CPFF contract requiring the completion of a report with on-going monthly Government review of completed portions by a small number of reviewers, the withholding of such review until a postcontract period and a significant expansion of the number of reviewers is found to constitute a change not subject to the specified cost ceiling. In the circumstances presented, the knowledge that the project office had greatly expanded the work of incorporating reviewers' comments into the contract report was imputed to the contracting officer.

Appeal of Recon Systems, Inc., IBCA-1214-9-78 (Sept. 25, 1979) 86 I.D. 478

Assignment of Claims

An assignee under an assignment of the proceeds of a contractor's claim before the Board which had been executed subsequent to completion of performance and the filing of the appeal by the contractor, is not permitted to participate in the appeal, since the Board's jurisdiction, pursuant to the Disputes clause, extends only to the parties to the contract or to their duly qualified successors.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (Jan. 14, 1975)

A permit for use of land in the Lower Colorado River Area is properly terminated where construction, unauthorized by the terms of the permit, is undertaken by individuals occupying the premises, whose earlier application for an assignment of rights of the permittee has been rejected by BLM.

Changed Conditions (Differing Site Conditions)

Interpretation of the parties prior to dispute has great weight and compels conclusion that force account work included placing red dirt fill but not drying and replacing. Drying or replacement of wet borrow was not force account work and was not covered by the changes clause or changed conditions clause.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

While the wind at the work site was severe, the Board found that no changed condition had been shown.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978) 85 I.D. 107

Where a clearing contractor claims entitlement to an equitable adjustment based on the standard Differing Site Conditions clause of the contract, and the evidence shows that the principal causes of any increased costs which may have been incurred were heavy rains and failure of the contractor to make a reasonable prebid investigation of the site or examination of specifications, and no evidence of fault on the part of the Government is presented, the Board holds that the contractor has not sustained its burden of proof for entitlement to an equitable adjustment, and the appeal will be denied.

Appeal of M & P Equipment Co., IBCA-1088-11-75 (Sept. 26, 1979) 86 I.D. 527

Changes and Extras

A multi-item appeal under a contract for construction of a fish barrier is sustained for those items where Government changes in the contract resulted in extra expense and where such expense could be determined from the record.

Appeal of Robert P. Jones (Contractor), IBCA-1002-8-73 (May 6, 1975)

Where a contract for the construction of a bridge substructure contained a provision requiring that employees erecting bridges and structures be protected by safety nets where the use of safety belts and lifelines or other conventional type of protection was impractical and the evidence failed to demonstrate that the use of safety belts and lifelines or other conventional type of protection was practical for workers on concrete piers, the Board denies the contractor's claim for a change based on the fact that it was required to use safety nets to protect workmen from possible falls.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 199

A rise in the cost of materials after a fixed price construction contract is executed is not a change within the Changes clause of the contract.

Appeal of The Minnesota Chippewa Tribe, IBCA-1025-3-74 (May 19, 1975) 82 I.D. 238

Appeal of The Minnesota Chippewa Tribe Construction Co., IBCA-1063-3-75 (July 23, 1975)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Changes and Extras--Continued

A construction contractor's claim for an equitable adjustment based on alleged defective specifications and for corrective work ordered by the Government as a condition to final acceptance of the project was denied, where the specification errors relied upon were obvious, there was no evidence that the contractor had been thereby misled to its detriment and the record did not establish that the corrective work ordered and performed was beyond the requirements of the contract. A claim for costs incurred in replacing door locks was allowed where the evidence established that locks ordered installed by the contracting officer were not a requirement of the contract.

Appeal of J. D. Piercey, IBCA-1035-6-74 (July 18, 1975)

The Government failed to sustain its burden of proving entitlement to a reduction of the contract price as an equitable adjustment for quantities of asphalt concrete for road repair in excess of the Government estimate. The evidence showed that neither party relied on the estimate, that the Government left the selection and manner of using equipment to the contractor and that the Government issued a change order when it observed the contractor's more efficient operation. The work described in the change order was the same work described in the contract and the reduction in unit cost of performance was not the result of the change order but was the result of the contractor's efficiency.

Appeal of Quintana Construction Co., Inc., IBCA-1028-4-74 (July 24, 1975) 82 I.D. 343

Under a construction contract for a beach nourishment project at Cape Hatteras involving a contractor's claim for equitable adjustment based upon the Government directing the beach fill to be placed in a manner differing from the typical cross section shown on the contract drawing, the Board finds that the 20-day notice provision of the Changes clause should not preclude consideration of the claim on the merits where there is no one action of the Government which can be pointed to as the identifiable event upon which the claim is grounded and from which the contractor's delay in presenting the claim can be measured, particularly where the evidence of record indicates that the Government's actions contributed to and may even have been the principal cause of the delay in giving notice of the claim.

A special provision authorizing the contracting officer to adjust or revise the limits of the work during performance to reflect the conditions encountered and thereby provide for maximum use of material available with the funds allotted is found to vest the contracting officer with no plenary authority to direct the placement of the beach fill where the authorization to adjust or revise the limits of the work is circumscribed by the use of the word "approximate."

In a case involving the question of the importance to be ascribed to the typical cross section shown on the contract drawings, the Board finds that the drawings contained positive representations on which the contractor was entitled to rely and did rely in submitting its bid, noting, in connection therewith, that the interpretation advanced by the Government with respect to certain provisions on the drawings, in the contract and in a change order would render inoperative or superfluous other requirements clearly imposed by the drawings or contract terms. Previously the Board had found that the contractor's site visit was adequate and in any event could not have revealed conditions created by

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Changes and Extras--Continued

storms which took place several months after the scheduled site visit concluded.

An estimated quantities provision under which the Government was authorized to obtain additional quantities of beach fill at the unit price specified in the contract so long as the additional quantities did not exceed 25 percent of the original total contract price is found not to preclude an adjustment under the Changes clause for clearly unforeseeable costs to the extent the contractor shows (i) the basis upon which its bid was calculated and (ii) the causal connection between the increased costs and the inability or the failure of the Government to adhere to the typical cross section shown on the contract drawings in directing the placement of the fill.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Claims of constructive change under a cost-plus-fixed-fee contract first presented in the notice of appeal are outside the jurisdiction of the Board and are remanded to the contracting officer for the issuance of new or supplemental findings.

Appeal of VTN Colorado, Inc., IBCA-1073-8-75 (Oct. 29, 1975) 82 I.D. 527

A claim for acceleration under a contract for the construction of footings for a transmission line is denied where one of appellant's principal contentions was that in a telephone conversation following record snow in late September the project engineer had directed that men and equipment be added to the job in order to finish the work by the contract completion date of Nov. 1, but in correspondence conducted with the Government for almost 6 months after such telephone conversation the contractor failed to refer to the directions purportedly received from the project engineer and even failed to reference the particular telephone conversation. Actions taken by the Government's principal inspector were also found not to constitute acceleration orders when the evidence clearly showed that both parties viewed the inspector's action as involving suggestions rather than directions and that whether the suggestions were accepted by the contractor's job superintendent depended upon the exercise of his business judgment.

Appeal of Iversen Construction Co. (a/k/a Iconco), IBCA-981-1-73 (Dec. 30, 1975) 82 I.D. 646

Appellant's claim for an equitable adjustment under the changes clause for costs alleged to have been incurred when funds available for earnings became exhausted and work on the contract was suspended for 160 days is denied where construction was suspended more than 3 months ahead of the date on which appellant's earnings were scheduled to reach the amount of the fund reservation and where subsequent fund reservations kept the total amount of funds reserved for earnings above the scheduled earnings shown in appellant's own construction program which the Government had approved.

Appeal of S. A. Healy Co., IBCA-944-12-71 (Mar. 31, 1976) 83 I.D. 118

Cross motions for summary judgment are denied where the Board finds the stipulated record furnishes an insufficient basis for an informed judgment and that a hearing will be required for determining the merits of the entitlement question presented for decision.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976) 83 I.D. 148

Where in moving for reconsideration of a decision denying its claim for constructive acceleration, the contractor contended that the Bureau's failure to promptly investigate its claim of delay due to unusually severe weather amounted to a denial of a request for a time extension and that the denial plus other actions of Bureau inspectors constituted an order to complete the work by the specified completion date irrespective of excusable delay and thus was an acceleration order, the Board ruled that a denial of a request for a time extension was insufficient in and of itself to constitute constructive acceleration and reviewing the evidence, affirmed the denial of the claim, holding that the actions of the inspectors were regarded as suggestions by the contractor and accepted or rejected depending on whether the suggestions were practical or economical.

Appeal of Iversen Construction Co. (a/k/a ICONCO), IBCA-981-1-73 (Apr. 19, 1976) 83 I.D. 179

A claim for extra work is denied where the appellant does not even undertake to show why the work was considered to be beyond the requirements of the contract.

Appeals of Willie H. Patterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Feb. 28, 1977)

When contractor unilaterally performs work not required by the contract nor at the direction of the Government, it is not entitled to an equitable adjustment.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1059-2-75 (Mar. 3, 1977)

The Government's motion to dismiss an appeal because of the failure of the contractor to give the 20-day written notice required by the Changes clause is denied, where the Board finds that there was timely notice with respect to some of the costs on which the claim is based and that the hearing to be held may show that some or all of the remaining costs fall within other recognized exceptions to the strict application of the 20-day cost-limitation provision.

Appeal of Hartford Accident and Indemnity Co., IBCA-1139-1-77 (June 23, 1977) 84 I.D. 296

An allegation by the contractor that it was "required" to accept an amount smaller than its invoice for a change in order to avoid assessment of liquidated damages was not sustained where the contractor failed to prove (1) that it involuntarily accepted the Government's terms, (2) that the circumstances permitted no alternative and (3) that the circumstances were the result of coercive acts of the Government.

Appeal of Great Eastern Enterprises Corp., IBCA-1113-7-76 (July 15, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Changes and Extras--Continued

Interpretation of the parties prior to dispute has great weight and compels conclusion that force account work included placing red dirt fill but not drying and replacing. Drying or replacement of wet borrow was not force account work and was not covered by the changes clause or changed conditions clause.

An order to build a curved wall was a constructive change outside change order #1 which was for a straight wall. Thus, the claim for extra costs for curved construction and for stand-by time caused by the Government delay in staking wall is compensable.

Claimant has the burden of proof of extra work and failed to establish that in placing utility lines the actual work performed differed from contractually required work.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

When the project supervisor for the Government takes over the direction and supervision of the contractor's work as to concrete curbing and gunite application, the Government cannot complain of defective work and require contractor to replace the work at contractor's expense.

When the specifications are defective as to the grout mixture and the Government changes the mixture but the specifications are still defective, the contractor cannot be held liable for defective results in its work.

Contractor has a right to rely upon the accuracy of land profiles in the drawings to prepare its bid and if the land profile is not accurate, necessitating additional excavation, contractor is entitled to recover its additional cost.

Appeal of Murdock Construction Co., IBCA-1050-12-74 (Aug. 29, 1977)

Where the contract required separated excavation and stockpiling of topsoil and the restoration of rights-of-way as near as practicable to pre-existing conditions, claims for complying with the Government's directions to strip 12 feet in width on one side of the trench to store unsuitable material other than topsoil and to handpick rocks from the covered trench are sustained because the directed work was beyond what was necessary to satisfy the contract requirements and constituted a constructive change.

Appeals of JB&C Co., IBCA-1020-2-74 and IBCA-1033-4-74 (Sept. 28, 1977) 84 I.D. 495

When the contract requires the pipe to be laid in a trench 18 inches in depth measured from the center line of the pipe to the top of the ground line or on top of the ground with 18 inches of cover if rock strata is encountered, the contractor cannot sustain an allegation of a constructive change when the Government insists the requirements be followed and objects to contractor laying the pipe in a trench less than 18 inches in depth.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Changes and Extras--Continued

Where the contract required the construction of a fence on the boundary of a national monument and the appellant disregarded NPS instructions to visit the monument headquarters for information pertinent to bidding and disregarded other specific requirements of the specifications regarding the permissible methods of transporting materials to the work site, claims for increased costs of performance are denied because the costs resulted from appellant's failure to make an adequate pre-bid site investigation and to plan to perform in accordance with the specification requirements.

Appeal of Arizona Fence Co., Inc., IBCA-1144-3-77 (Feb. 9, 1978)

When the Government erroneously places stakes to locate the worksite--a road--it is liable for extra costs caused thereby.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978) 85 I.D. 107

Where the Government contracts for the surfacing of a road on an existing subgrade without knowledge of the actual condition of the subgrade and without disclosing that the subgrade was constructed of unknown soils without regard to any specification or testing standard and such subgrade breaks up under the normal traffic of the surfacing contractor's construction equipment, the omission of the Government to specify the actual condition of the subgrade is held to constitute a defect in the specifications, entitling the contractor to an equitable adjustment for the extra work occasioned by the defective specifications.

Buck Brown Contracting Co., Inc., IBCA-1119-7-76 (Aug. 1, 1978)

The contractor's claim that the Government's use of the word "subgrade" in the earthwork specifications created an ambiguity which should be construed against the drafter was denied. The "contra proferentem" rule is not applicable in this instance because the definition propounded by the contractor was not reasonable, use of the word in the specified context did not create an ambiguity, the contractor did not register an objection when informed of the Government's interpretation, and no evidence was presented to show that the contractor relied on its alleged interpretation at the time of bidding.

Where the Government's engineer recorded in his daily diary a verbal protest made by the contractor about embankment compaction difficulties and the inaccuracy of the proctor information furnished by the Government, this satisfied the 20-day notice requirement of the changes clause with respect to some of the claims. It was unnecessary to finally decide the scope of such notice, however, where the Board found the claims to be without merit in any event.

Burn Construction Co., IBCA-1042-9-74 (Aug. 30, 1978) 85 I.D. 353

Where a contract does not specify the exact method to be used by the contractor in performing manhole renovations, the contractor may proceed according to the industry standard. The Board finds that sandblasting

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Changes and Extras--Continued

was an acceptable and adequate method to renovate manholes and that the Government's requirement to use a more costly method was unwarranted.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76
(Nov. 22, 1978)

The state of the weather at any given time cannot be predicted with absolute certainty. Absent an express contractual assumption of the risk by the Government, the contractor must bear the risk of increases in the cost of the work caused by a flood.

Appeal of Brown & Root Western, Inc., IBCA-1220-10-78
(Apr. 13, 1979)

Where the Board finds that the Contracting Officer's Representative required the contractor to expend more effort in field surveys and data collection than required by the contract documents, a constructive change will be found to have occurred.

Appeal of Environmental Consultants, Inc., IBCA-1192-5-78
(June 29, 1979) 86 I.D. 349

Under a CPFF contract requiring the completion of a report with on-going monthly Government review of completed portions by a small number of reviewers, the withholding of such review until a postcontract period and a significant expansion of the number of reviewers is found to constitute a change not subject to the specified cost ceiling. In the circumstances presented, the knowledge that the project office had greatly expanded the work of incorporating reviewers' comments into the contract report was imputed to the contracting officer.

Appeal of Recon Systems, Inc., IBCA-1214-9-78 (Sept. 25, 1979) 86 I.D. 478

Where the preponderance of the evidence shows that substantial increased costs were incurred by a highway construction contractor, primarily because Government inspection personnel either failed to calibrate or improperly calibrated the density testing machine used to determine compaction compliance, and it is determined that the contractor is entitled to an equitable adjustment, the Board will adopt the amount for quantum reached by the parties at a negotiated settlement, when dissatisfied with both the Government audit and the quantum computation of the contractor, but satisfied that the negotiations were made in good faith, at arm's length, and by individuals thoroughly familiar with the details of the contract and its performance.

Appeal of Nielsons, Inc., IBCA-1173-11-77 (Sept. 27, 1979) 86 I.D. 493

Where the Government does not issue a written change order and does not give a verbal order which is interpreted by the contractor as a change, no contract change has occurred and the contractor may submit materials conforming to the original specifications. The Government's mere exercise of its option to accept nonconforming goods does not in and of itself constitute a contract change.

Appeal of Wasatka & Sons, Inc., IBCA-1157-6-77
(Sept. 28, 1979) 86 I.D. 513

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Conflicting Clauses

In a case involving the question of the importance to be ascribed to the typical cross section shown on the contract drawings, the Board finds that the drawings contained positive representations on which the contractor was entitled to rely and did rely in submitting its bid, noting, in connection therewith, that the interpretation advanced by the Government with respect to certain provisions on the drawings, in the contract and in a change order would render inoperative or superfluous other requirements clearly imposed by the drawings or contract terms. Previously the Board had found that the contractor's site visit was adequate and in any event could not have revealed conditions created by storms which took place several months after the scheduled site visit concluded.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73
(Sept. 29, 1975) 82 I.D. 459

Appellant's claim for an equitable adjustment under the changes clause for costs alleged to have been incurred when funds available for earnings became exhausted and work on the contract was suspended for 160 days is denied where construction was suspended more than 3 months ahead of the date on which appellant's earnings were scheduled to reach the amount of the fund reservation and where subsequent fund reservations kept the total amount of funds reserved for earnings above the scheduled earnings shown in appellant's own construction program which the Government had approved.

Appeal of S. A. Healy Co., IBCA-944-12-71 (Mar. 31, 1976) 83 I.D. 118

Construction Against Drafter

The Board denies a construction contractor's claim for additional pay quantities where the evidence did not establish a basis for application of the rule of *contra proferentem*, the contractor's interpretation of the specifications was not shown to be reasonable and the record did not establish error in the Bureau's computation of pay quantities.

Appeal of Wm. V. Montin d/b/a Montin Construction Co., IBCA-1051-12-74 (May 29, 1975)

The Board sustains the contractor's claim that it be paid for gravel representing the area of the pipe within the pay lines, holding that in the particular circumstances the contractor's interpretation that the pay line quantity was merely nominal or hypothetical was reasonable and rejecting the Government's contention that the difference between the estimated quantity and the pay quantity under appellant's interpretation should have prompted appellant to inquire of the contracting officer.

Appeal of Whalen & Co., IBCA-1034-5-74 (July 18, 1975)
82 I.D. 335

Where the contract required hand planing of the top surface of the flooring to remove machine marks and the contractor hand planed only those areas where machine marks were present, the Government was not entitled to require hand planing of areas where machine marks were not present since, as drafter of the specification, the Government could have required hand planing of the entire surface but did not.

Appeal of Great Eastern Enterprises Corp., IBCA-1113-7-76 (July 15, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Construction Against Drafter--Continued

When the contractor's interpretation of the contractual clauses is reasonable the Government cannot impose its own interpretation, since the Government, as the drafter, could have been explicit in conveying its intent but failed to do so.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (July 15, 1977) 84 I.D. 407

The contractor's claim that the Government's use of the word "subgrade" in the earthwork specifications created an ambiguity which should be construed against the drafter was denied. The "contra proferentem" rule is not applicable in this instance because the definition propounded by the contractor was not reasonable, use of the word in the specified context did not create an ambiguity, the contractor did not register an objection when informed of the Government's interpretation, and no evidence was presented to show that the contractor relied on its alleged interpretation at the time of bidding.

Burn Construction Co., IBCA-1042-9-74 (Aug. 30, 1978) 85 I.D. 353

Where a prospective contractor does not spot hidden or subtle ambiguities in the bid documents, it is protected if it innocently and reasonably construes an ambiguity in its own favor.

Appeal of BHC Construction, Inc., IBCA-1207-9-78 (June 26, 1979)

Contract Clauses

Where a contract for furnishing and erecting a steel building was terminated for default and the contractor appealed the termination contending that the specifications were written around the product of a particular manufacturer and that under the material and workmanship clause of the General Provisions (Standard Form 23-A, Oct. 1969 Edition) it was entitled to furnish an "equal" product, the Board holds that the restrictive nature of the specifications is no defense to the termination where the evidence fails to establish that the building offered was, in fact, equal to the building described in the specifications.

Appeal of J. D. Piercey, IBCA-1013-12-73 (Oct. 17, 1975)

Under a contract requiring the use of grout the Board denies a contractor's claim where it finds the terms of the specifications dispositive of the question presented.

Appeal of Whalen & Co., IBCA-1066-3-75 (May 26, 1976)

When contractor unilaterally performs work not required by the contract nor at the direction of the Government, it is not entitled to an equitable adjustment.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1059-2-75 (Mar. 3, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Contract Clauses--Continued

Where a transformer failed shortly after being placed in service and the contractor acted promptly after notice to return the transformer to the factory for repairs at no cost to the Government, the Board held that the Government could not invoke provisions of the inspection clause of the contract relating solely to correction of defects at the point of installation to charge the contractor with the costs of removing and reinstalling the transformer.

Appeal of Traver Engineering Corp., IBCA-1100-3-76 (Mar. 31, 1977) 84 I.D. 168

Upon reconsideration, the Board finds that where the Government issues an "Extra Work Order" under a "force account" provision for minor extra work not provided for in other pay items, at agreed on rates, the contractor is entitled to be paid for inefficiency, rework costs and delay costs when moisture causes borrow material placed under the extra work order, to become muddy. However, the appellant's failure to give prompt notice of the claim under the force account provision caused the Government to order added pay item work, thus the claim must be reduced by the amount of added pay item payment.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Nov. 4, 1977) 84 I.D. 858

When the contract requires the pipe to be laid in a trench 18 inches in depth measured from the center line of the pipe to the top of the ground line or on top of the ground with 18 inches of cover if rock strata is encountered, the contractor cannot sustain an allegation of a constructive change when the Government insists the requirements be followed and objects to contractor laying the pipe in a trench less than 18 inches in depth.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

Payment was not allowed under a general erosion control clause when there was no order by the CCAB citing that clause to replace roadbed blown away by severe winds.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978) 85 I.D. 107

Where a contractor accepted a contract containing a clause limiting an equitable adjustment for profit to 15 percent of the cost of changed work, he is bound by the limitation even though his contract price of $1.31 per cubic yard of sand exceeded his estimated contract costs of 75 cents per cubic yard by more than 15 percent.

Where the Board finds an interest clause to be incorporated into a contract by operation of law and the clause requires the contracting officer to make certain findings thereunder but the contractor's claim for interest has been presented only to the Board and not to the contracting officer, the Board remands the claim for interest to the contracting officer for a determination of the interest due in accordance with the clause.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (July 6, 1978) 85 I.D. 242

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Contract Clauses--Continued

The contractor's claim that the Government's use of the word "subgrade" in the earthwork specifications created an ambiguity which should be construed against the drafter was denied. The "contra proferentem" rule is not applicable in this instance because the definition propounded by the contractor was not reasonable, use of the word in the specified context did not create an ambiguity, the contractor did not register an objection when informed of the Government's interpretation, and no evidence was presented to show that the contractor relied on its alleged interpretation at the time of bidding.

Where the contracting officer by contract was given discretion in setting the moisture requirement for high volume change soils, the contractor's claim of extra compaction work due to rigid moisture requirements was denied because the contractor failed to show that the contracting officer abused his discretion or that the discretion exercised caused the contractor extra contract costs.

Burn Construction Co., IBCA-1042-9-74 (Aug. 30, 1978)
85 I.D. 353

Contracting Officer

A special provision authorizing the contracting officer to adjust or revise the limits of the work during performance to reflect the conditions encountered and thereby provide for maximum use of material available with the funds allotted is found to vest the contracting officer with no plenary authority to direct the placement of the beach fill where the authorization to adjust or revise the limits of the work is circumscribed by the use of the word "approximate."

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73
(Sept. 29, 1975) 82 I.D. 459

Motions to add four claims were granted in part and denied in part on the basis of the Board's findings that the contracting officer had or had not had a reasonable time within which to decide the specific claim.

Appeal of W. F. Sigler & Associates, IBCA-1159-7-77
(Sept. 27, 1977) 84 I.D. 483

Where the Board finds an interest clause to be incorporated into a contract by operation of law and the clause requires the contracting officer to make certain findings thereunder but the contractor's claim for interest has been presented only to the Board and not to the contracting officer, the Board remands the claim for interest to the contracting officer for a determination of the interest due in accordance with the clause.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (July 6,
1978) 85 I.D. 242

Where the contracting officer by contract was given discretion in setting the moisture requirement for high volume change soils, the contractor's claim of extra compaction work due to rigid moisture requirements was denied because the contractor failed to show that the contracting officer abused his discretion or that the discretion exercised caused the contractor extra contract costs.

Burn Construction Co., IBCA-1042-9-74 (Aug. 30, 1978)
85 I.D. 353

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Contractor

Contractor must have adequate equipment and personnel to perform the work required by the contract.

Appeal of Kent Nicoll, IBCA-1040-8-74 (July 31, 1975)

When the contract requires contractor to furnish all labor and equipment to perform all necessary operations, contractor has a duty to provide appropriate equipment to accomplish the work.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

Differing Site Conditions (Changed Conditions)

A second category differing site conditions claim based upon rock encountered in excavation under a construction contract is denied where the Board finds that an adequate site investigation would have revealed the presence of rock in the area where it was encountered.

A first category differing site conditions claim based on the encountering of subsurface waterlines not shown on the contract drawings in the vicinity of a fish hatchery building is denied, where the Board finds that except for the unsupported allegations of the contractor there is nothing in the record to indicate that the experienced subcontractor who performed required excavation in the area where the buried waterlines were located failed to anticipate the conditions he actually encountered.

Although a first category differing site conditions claim is established by the presence of a septic tank in an area where the plans indicate a sewage treatment plant was slated to go, a contractor's claim based thereon is denied where the evidence shows that the location of the sewage treatment plant was changed before any significant amount of work was done in the area where the septic tank was located.

Appeal of William Lagnion (Contractor), IBCA-1063-10-75
(Jan. 5, 1977)

Encountering substantial numbers of granite slabs at a construction site in downtown Philadelphia (when the contract documents and site report indicated the area consisted of buildings razed and covered during a prior period) did not constitute a differing site condition.

Appeal of J. J. White, Inc., IBCA-1131-11-76 (Aug. 25,
1977)

A first category differing site condition claim based upon excessive rock encountered in excavation under a construction contract is sustained where the Board finds there was an adequate pre-bid site investigation and that the contract indications of subsurface conditions did not reveal the excessive quantities of rock in the areas where it was encountered.

A first category differing site condition claim based upon mitigating subsurface water and rock excavation encountered is sustained where the Board found that the Government knew of the subsurface mitigating water but failed to disclose such information to bidders and that both the rock and the subsurface mitigating water encountered differed materially from the contract indications.

Appeals of JBEC Co., IBCA-1020-2-74 and IBCA-1033-4-74
(Sept. 28, 1977) 84 I.D. 495

CONSTRUCTION AND OPERATION--Continued

Differing Site Conditions (Changed Conditions) --Continued

A second category differing site condition based on excessive rock drilling and inaccessability of the work site for construction of a fence is denied where the Board finds that there was an inadequate pre-bid site investigation and that an adequate investigation would have disclosed the actual conditions encountered.

Appeal of Arizona Fence Co., Inc., IBCA-1144-3-77 (Feb. 9, 1978)

A first category differing site condition under a well drilling contract is found where the contract indications of subsurface conditions did not reveal an extensive alluvial deposit strewn with boulders, and the subsurface conditions could not be determined by a prebid site investigation.

Pennsylvania Drilling Co., IBCA-1187-4-78 (Sept. 26, 1978) 85 I.D. 384

Where the prime contractor claims damages against the Government stemming from differing site conditions encountered by its subcontractor, and the prime contractor and subcontractor have settled these same claims in an independent proceeding, the Government's liability to the prime contractor is limited to the amount of the settlement.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

Drawings and Specifications

Where a contract for the construction of a bridge substructure contained a provision requiring that employees erecting bridges and structures be protected by safety nets where the use of safety belts and lifelines or other conventional type of protection was impractical and the evidence failed to demonstrate that the use of safety belts and lifelines or other conventional type of protection was practical for workers on concrete piers, the Board denies the contractor's claim for a change based on the fact that it was required to use safety nets to protect workmen from possible falls.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 199

The Board denies a construction contractor's claim for additional pay quantities where the evidence did not establish a basis for application of the rule of contra proferentem, the contractor's interpretation of the specifications was not shown to be reasonable and the record did not establish error in the Bureau's computation of pay quantities.

Appeal of Wm. V. Montin d/b/a Montin Construction Co., IBCA-1051-12-74 (May 29, 1975)

The Board sustains the contractor's claim that it be paid for gravel representing the area of the pipe within the pay lines, holding that in the particular circumstances the contractor's interpretation that the pay line quantity was merely nominal or hypothetical was reasonable and rejecting the Government's contention that the difference between the estimated quantity and the pay quantity under appellant's interpretation should have prompted appellant to inquire of the contracting officer.

Appeal of Whalen & Co., IBCA-1034-5-74 (July 16, 1975) 82 I.D. 335

Under a construction contract for a beach nourishment project at Cape Hatteras involving a contractor's claim for equitable adjustment based upon the Government directing the beach fill to be placed in a manner differing from the typical cross section shown on the contract drawing, the Board finds that the 20-day notice provision of the Changes clause should not preclude consideration of the claim on the merits where there is no one action of the Government which can be pointed to as the identifiable event upon which the claim is grounded and from which the contractor's delay in presenting the claim can be measured, particularly where the evidence of record indicates that the Government's actions contributed to and may even have been the principal cause of the delay in giving notice of the claim.

In a case involving the question of the importance to be ascribed to the typical cross section shown on the contract drawings, the Board finds that the drawings contained positive representations on which the contractor was entitled to rely and did rely in submitting its bid, noting, in connection therewith, that the interpretation advanced by the Government with respect to certain provisions on the drawings, in the contract and in a change order would render inoperative or superfluous other requirements clearly imposed by the drawings or contract terms. Previously the Board had found that the contractor's site visit was adequate and in any event could not have revealed conditions created by storms which took place several months after the scheduled site visit concluded.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Where the action of the Government clearly contributed to the delay for which liquidated damages were assessed and there was no basis for determining the portion of the delay for which each party was responsible, the Board found that no liquidated damages could properly be charged.

Appeal of David M. Cox, Inc., IBCA-1092-12-75 (July 22, 1976)

The Government failed to show that a rejected wall did not conform to the plans and specifications.

Claimant has the burden of proof of extra work and failed to establish that in placing utility lines the actual work performed differed from contractually required work.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

When the specifications are defective as to the grout mixture and the Government changes the mixture but the specifications are still defective, the contractor cannot be held liable for defective results in its work.

Contractor has a right to rely upon the accuracy of land profiles in the drawings to prepare its bid and

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Drawings and Specifications--Continued

if the land profile is not accurate, necessitating additional excavation, contractor is entitled to recover its additional cost.

Appeal of Murdock Construction Co., IBCA-1050-12-74 (Aug. 29, 1977)

When the contract requires the pipe to be laid in a trench 18 inches in depth measured from the center line of the pipe to the top of the ground line or on top of the ground with 18 inches of cover if rock strata is encountered, the contractor cannot sustain an allegation of a constructive change when the Government insists the requirements be followed and objects to contractor laying the pipe in a trench less than 18 inches in depth.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

When the specifications state that either of two types of cement mixers may be used and the use of one results in unexpected and unusual movement of the subbase which weakens the specified cement base, the Board finds that the specifications and design are defective.

A drawing in the bid package, which showed the concrete road base extending right to the edge of the underlying corner of the builtup supporting subbase, was found to be defective and misleading when during construction it was found that the upper corners of the sandy subbase would not support the road grading equipment needed and used to grade the concrete shoulders of the road, with the result that the subbase shoulders gave way and the road grading equipment slipped off the embankment. The appellant was entitled to the reasonable added costs of building wider subbase shoulders to remedy the omission from the drawing.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978) 85 I.D. 107

Where evidence established that cause of failure of cantilever lintel and collapse of masonry wall was improper original shoring, as well as noncompliance with appropriate directions in reshoring process, on part of construction contractor's employees, and where evidence further showed that drawings and specifications were followed in construction of similar lintels on same project with successful result, the Board finds such drawings and specifications to be neither defective nor inadequate.

Appeal of CSH Contractors, Inc., IBCA-1107-4-76 (May 25, 1978) 85 I.D. 146

The Board finds contract specifications to be defective where an elevation shown on the drawings fails to coincide with the actual elevation at the site causing extra work and additional costs with respect to the installation of riprap.

G.T.S. Co., Inc., IBCA-1077-9-75 (Sept. 15, 1978) 85 I.D. 373

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Drawings and Specifications--Continued

When the Government issues a contract which, unknown to the contractor, is defective because insufficient borrow is available from the designated borrow sites, and thereafter the Government issues three de facto change orders, at three different times, to make sufficient borrow available, and where the record discloses that the Government failed to reveal preaward knowledge that haul or overhaul would be required and that it had decided to substantially alter a borrow depth limit on the drawings, the Government is liable under the changes clause for the additional costs shown to be attributable to the Government's actions.

A dispute as to pay quantities under a construction contract is resolved in favor of the contractor where his interpretation of the specification paragraph in issue gives effect to all the language of the particular provision and is consistent with the construction placed upon the specifications and drawings by the Government employees responsible for their preparation. A Government's counterclaim involving a portion of the disputed pay quantities is denied.

Where under a standard construction contract the liability of the Government for defective plans and specifications is clearly established but as a consequence of the contractor having failed to segregate the costs applicable to the constructive change it is not possible to determine precisely the extent to which the Government's actions increased the cost of performance, the amount of the equitable adjustment to which the contractor is entitled is determined by the Board finding whether particular costs are allowable where that is possible and drawing inferences from the entire record where it is not possible to otherwise determine the proper allowances to be made for various aspects of the claimed amount.

Claims for extra costs incurred in the concrete lining of a canal attributed to heat encountered during delayed performance allegedly caused by defective plans and specifications is denied, where the Board finds that the delays experienced were the result of actions or inactions for which the contractor was responsible including (i) the failure to have necessary equipment operational weeks after concrete placement was to commence according to the contractor's plan; (ii) the hiring of incompetent carpenters; and (iii) the manner in which the contractor chose to place outlet structures.

A&J Construction Co., Inc., IBCA-1142-2-77 (Dec. 26, 1978) 85 I.D. 466

Where the evidence clearly establishes that the Government specifications were defective in a number of respects but fails to show that many of the costs claimed are attributable to actions of the Government, the Board--noting that it is impossible to determine the amount to which the contractor is entitled with mathematical exactness--finds that the "jury verdict" method of determining the amount of the equitable adjustment is the most appropriate method in the circumstances presented by the instant appeal.

Appeal of William F. Bergan, Inc., IBCA-1130-11-76 (Feb. 2, 1979) 86 I.D. 65

Duty to Inquire

Where a request for proposals for the construction of a pipeline provided that certain pipe and fittings for the pipeline would be furnished by the Government and appellant's proposal, reasonably interpreted, excepted to material the request for proposals provided was to be furnished by the contractor, the Board sustains the contractor's claim for material it furnished, holding that the Bureau, in failing to seek confirmation of its

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Duty to Inquire--Continued

interpretation of appellant's proposal, accepted the risk of the accuracy of its interpretation.

Appeal of Wm. V. Montin d/b/a Montin Construction Co., IBCA-1051-12-74 (May 29, 1975)

The Board sustains the contractor's claim that it be paid for gravel representing the area of the pipe within the pay lines, holding that in the particular circumstances the contractor's interpretation that the pay line quantity was merely nominal or hypothetical was reasonable and rejecting the Government's contention that the difference between the estimated quantity and the pay quantity under appellant's interpretation should have prompted appellant to inquire of the contracting officer.

Appeal of Whalen & Co., IBCA-1034-5-74 (July 18, 1975)
82 I.D. 335

Where a clearing contractor claims entitlement to an equitable adjustment based on the standard Differing Site Conditions clause of the contract, and the evidence shows that the principal causes of any increased costs which may have been incurred were heavy rains and failure of the contractor to make a reasonable prebid investigation of the site or examination of specifications, and no evidence of fault on the part of the Government is presented, the Board holds that the contractor has not sustained its burden of proof for entitlement to an equitable adjustment, and the appeal will be denied.

Appeal of M & P Equipment Co., IBCA-1088-11-75 (Sept. 28, 1979)
86 I.D. 527

Estimated Quantities

The Government failed to sustain its burden of proving entitlement to a reduction of the contract price as an equitable adjustment for quantities of asphalt concrete for road repair in excess of the Government estimate. The evidence showed that neither party relied on the estimate, that the Government left the selection and manner of using equipment to the contractor and that the Government issued a change order when it observed the contractor's more efficient operation. The work described in the change order was the same work described in the contract and the reduction in unit cost of performance was not the result of the change order but was the result of the contractor's efficiency.

Appeal of Quintana Construction Co., Inc., IBCA-1028-4-74 (July 24, 1975)
82 I.D. 343

An estimated quantities provision under which the Government was authorized to obtain additional quantities of beach fill at the unit price specified in the contract so long as the additional quantities did not exceed 25 percent of the original total contract price is found not to preclude an adjustment under the Changes clause for clearly unforeseeable costs to the extent the contractor shows (i) the basis upon which its bid was calculated and (ii) the causal connection between the increased costs and the inability or the failure of the Government to adhere to the typical cross section shown on the contract drawings in directing the placement of the fill.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975)
82 I.D. 459

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Estimated Quantities--Continued

A summary of estimated quantities is a guide as to amounts of work to be increased or decreased.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1055-2-75 (Mar. 3, 1977)

Where the bid package drawings listed estimated quantities and the general and special conditions indicated payment would be made for actual quantities used but the pay item was "per station," the contractor was entitled to payment in actual quantities placed at the unit price per cubic yard established in a unilateral change order issued to recompense the contractor for amounts placed in excess of those shown in the bid package.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978)
85 I.D. 107

General Rules of Construction

A Federal contract is governed by Federal contract law, rather than the law of the state in which the contract is executed.

Article 2 of the Uniform Commerical Code is applicable to transactions in goods, not to construction contracts.

Appeal of The Minnesota Chippewa Tribe, IBCA-1025-3-74 (May 19, 1975)
82 I.D. 238

Government mineral leases are subject to the same rules of construction as those applied in interpreting a contract between two private parties.

While a general rule of contract construction provides that when two provisions of a lease conflict, and one is a printed form while the other is a typed or written addendum, the latter provision will be given force and effect over the former, this rule is only relevant where the two provisions cannot be reconciled.

The addition to a standard lease clause, reserving to the Secretary the right to establish reasonable minimum values for minerals mined, of an insertion which spells out how the gross value is to be set does not deprive the Secretary of the reserved right where the application of the added provisions would deprive the United States of any payment for a recoverable associated mineral.

St. Joe Minerals Corp., 20 IBLA 272 (May 19, 1975)

Government permits are subject to the same rules of construction as those applied in interpreting a contract between private parties, although contracts and permits have different legal import.

Where the Government has the absolute right under the terms of a permit to cancel such permit, notice to cancel the permits, properly given, cannot be considered arbitrary or capricious if made in the regular course of conducting Government business in the public interest.

L. C. Power et al., 22 IBLA 15 (Sept. 5, 1975)

In a case involving the question of the importance to be ascribed to the typical cross section shown on the contract drawings, the Board finds that the drawings contained positive representations on which the contractor was entitled to rely and did rely in submitting its bid, noting, in connection therewith, that the interpretation advanced by the Government with respect to certain provisions on the drawings, in the contract and in a change order would render inoperative or superfluous other requirements clearly imposed by the drawings or contract terms. Previously the Board had found that the contractor's site visit was adequate and in any event could not have revealed conditions created by storms which took place several months after the scheduled site visit concluded.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73
(Sept. 29, 1975) 82 I.D. 459

An appeal before the Board on remand from the Court of Claims with instructions to admit evidence, previously excluded under the parol evidence rule, for the purpose of showing a pre-award agreement or an express or implied concession as to the rate of use of helicopter services, is denied where the record, augmented as the Court directed, shows that the Government did not change its method of contracting at appellant's request but rejected the proposal to include a guaranteed minimum daily rate of use and where an internal memorandum from appellant's president shows that he understood at the time of award that the contract could be flown at the rate of 5 hours per day rather than the rate of 7 hours per day alleged later when the contract proved unprofitable.

Appeal of Inter*Helo, Inc., IBCA-713-5-68 (Ct. Cl. No. 54-70) (Dec. 1, 1975) 82 I.D. 591

Cross motions for summary judgment are denied where the Board finds the stipulated record furnishes an insufficient basis for an informed judgment and that a hearing will be required for determining the merits of the entitlement question presented for decision.

Appeals of Armstrong & Armstrong, Inc., IBCA-1061-3-75 and IBCA-1072-7-75 (Apr. 7, 1976) 83 I.D. 148

The rules of construction applicable to Government contracts are the same rules applied to contracts between private parties.

Tomco, Inc., 29 IBLA 298 (Mar. 30, 1977)

When the contractor's interpretation of the contractual clauses is reasonable the Government cannot impose its own interpretation, since the Government, as the drafter, could have been explicit in conveying its intent but failed to do so.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (July 15, 1977) 84 I.D. 407

An allegation by the contractor that it was "required" to accept an amount smaller than its invoice for a change in order to avoid assessment of liquidated damages was not sustained where the contractor failed to prove (1) that it involuntarily accepted the Government's terms, (2) that the circumstances permitted no alternative and (3) that the circumstances were the result of coercive acts of the Government.

Where the contract required hand planing of the top surface of the flooring to remove machine marks and the contractor hand planed only those areas where machine marks were present, the Government was not entitled to require hand planing of areas where machine marks were not present since, as drafter of the specification, the Government could have required hand planing of the entire surface but did not.

Appeal of Great Eastern Enterprises Corp., IBCA-1113-7-76 (July 15, 1977)

Where the contract required separated excavation and stockpiling of topsoil and the restoration of rights-of-way as near as practicable to pre-existing conditions, claims for complying with the Government's directions to strip 12 feet in width on one side of the trench to store unsuitable material other than topsoil and to handpick rocks from the covered trench are sustained because the directed work was beyond what was necessary to satisfy the contract requirements and constituted a constructive change.

Appeals of JEGC Co., IBCA-1020-2-74 and IBCA-1033-4-74 (Sept. 28, 1977) 84 I.D. 455

Where the contract required the construction of a fence on the boundary of a national monument and the appellant disregarded IFB instructions to visit the monument headquarters for information pertinent to bidding and disregarded other specific requirements of the specifications regarding the permissible methods of transporting materials to the work site, claims for increased costs of performance are denied because the costs resulted from appellant's failure to make an adequate pre-bid site investigation and to plan to perform in accordance with the specification requirements.

Appeal of Arizona Fence Co., Inc., IBCA-1144-3-77 (Feb. 9, 1978)

Where a contract does not specify the exact method to be used by the contractor in performing manhole renovations, the contractor may proceed according to the industry standard. The Board finds that sandblasting was an acceptable and adequate method to renovate manholes and that the Government's requirement to use a more costly method was unwarranted.

Appeal of Paul R. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

A dispute as to pay quantities under a construction contract is resolved in favor of the contractor where his interpretation of the specification paragraph in issue gives effect to all the language of the particular provision and is consistent with the construction placed upon the specifications and drawings by the Government employees responsible for their preparation. A Government's counterclaim involving a portion of the disputed pay quantities is denied.

B&J Construction Co., Inc., IBCA-1142-2-77 (Dec. 28, 1978) 85 I.D. 468

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

General Rules of Construction--Continued

When the contractor offers materials which the contracting officer discovers are not in total compliance with the specifications, the contracting officer may accept the material if he finds it to be in the best interests of the Government. That acceptance, however, is not final and conclusive if based on, or induced by, a misrepresentation of a material fact.

Appeal of Nasatka & Sons, Inc., IBCA-1157-6-77 (Sept. 28, 1979) 86 I.D. 513

Government-furnished Property

Where a request for proposals for the construction of a pipeline provided that certain pipe and fittings for the pipeline would be furnished by the Government and appellant's proposal, reasonably interpreted, excepted to material the request for proposals provided was to be furnished by the contractor, the Board sustains the contractor's claim for material it furnished, holding that the Bureau, in failing to seek confirmation of its interpretation of appellant's proposal, accepted the risk of the accuracy of its interpretation.

Appeal of Wm. V. Bontin d/b/a Bontin Construction Co., IBCA-1051-12-74 (May 29, 1975)

A cost-plus-fixed-fee contractor's claim for costs in excess of the estimated cost of the contract, incurred in correcting deficiencies in Government-furnished property, was denied where the contractor knew or should have known that costs being incurred would exceed the estimated cost, but failed to give the notice required by the Limitation of Cost clause and the evidence failed to furnish any basis for excusing the contractor's failure to give the required notice. The contractor's claim for additional fee on the extra work was sustained since the Limitation of Cost clause is not applicable to such claim.

Appeal of Booz, Allen & Hamilton, Inc., IBCA-1027-3-74 (Mar. 24, 1976) 83 I.D. 95

Intent of Parties

Usage and custom in the trade may be proved to aid in interpretation of the contract between parties, and can add words the parties have not expressed. However, the purpose of such proof is to give effect to the intention of the parties.

Tosco, Inc., 29 IBLA 298 (Mar. 30, 1977)

In the construction or interpretation of contracts, the primary purpose and guideline is the intention of the parties. A contract must be construed as a whole and the intention of the parties is to be collected from the entire instrument. Individual words and phrases must be considered in connection with the rest of the contract. Where the Army contracts with appellant to provide natural gas to certain areas and grants appellant a rental-free revocable permit to enter the "service location," for any purpose under the contract including use of the sites for installation, operation, and maintenance of the facilities, the contract can be interpreted as granting appellant a rental-free revocable permit for a right-of-way for a gas pipeline.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Labor Laws

When a contractor failed to furnish the number of laborers required under a service contract and failed to cure such deficiency after a notice to show cause why the contract should not be terminated for default, the Board held that termination for default was proper and further held that the Government should continue to withhold earnings under the contract to satisfy first the wage claims by unpaid employees of the contractor as determined by the Department of Labor pursuant to the Service Contract Act of 1965 and secondly to satisfy any claim for excess costs by the contracting agency.

Appeal of Andy's Excavating, IBCA-1236-12-78 (Sept. 19, 1979) 86 I.D. 469

Modification of Contracts

Generally

Where the practice of a construction contractor was to separate claims for an equitable adjustment for increased costs due to a change from its claims for delays to the work caused by the change and the evidence established that the contractor's delay claim resulting from a change was pending before the contracting officer at the time the contractor agreed to and executed a modification settling the equitable adjustment for direct costs attributable to the change, the Government's contention that the delay claim was barred by accord and satisfaction was rejected since it is well settled that an agreement does not operate as an accord as to matters not contemplated by the agreement.

Where the contractor's offer to perform certain changed work for a lump sum was accepted and the agreement and the price was incorporated into a modification which the contractor executed without reservation or exception and the lump sum was subsequently paid, the contractor's subsequent claim for delays to the work attributable to the change was barred by accord and satisfaction.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 199

A contractor's acceptance of a change order is found to be no bar to consideration of a claim under the Changes clause where the evidence shows that the claim involved had neither arisen nor been discussed prior to the time the change order in question was executed.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Notices

Under a construction contract for a beach nourishment project at Cape Hatteras involving a contractor's claim for equitable adjustment based upon the Government directing the beach fill to be placed in a manner differing from the typical cross section shown on the contract drawing, the Board finds that the 30-day notice provision of the Changes clause should not preclude consideration of the claim on the merits where there is no one action of the Government which can be pointed to as the identifiable event upon which the claim is grounded and from which the contractor's delay in presenting the claim can be measured, particularly where the evidence of record indicates that the Government's actions contributed to and may even have

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Notices--Continued

been the principal cause of the delay in giving notice of the claim.

A claim under the Suspension of Work clause is denied where the Board finds (i) that the contracting officer acted within his discretion in issuing an order directing the suspension of all work in the wake of a devastating storm at Cape Hatteras with a view to determining whether and, if so, how the work under a beach nourishment contract should proceed or, alternatively, whether the contract should be terminated for the convenience of the Government; (ii) that the contractor had failed to show that its costs would have been any less if the stop work order had been issued at an earlier time; (iii) that suspending the contract work for the 5 working days covered by the stop order did not involve delaying the work for an unreasonable period of time; and (iv) that showing the contract work to have been suspended or delayed for an unreasonable period of time is a prerequisite to recovery under the Suspension of Work clause in all cases including those in which a written order to suspend work has been given as contemplated by paragraph (a) of the clause.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73
(Sept. 29, 1975) 82 I.D. 459

When appellant can show that failure to give timely written notice was not prejudicial to Government's interest, appellant is not estopped from prosecuting an appeal.

Appeal of Halvorson-Lents (A Joint Venture), IBCA-1059-2-75 (Mar. 3, 1977)

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

Appeal of Divide Constructors, Inc., Subcontractor to Granite Construction Co., IBCA-1134-12-76 (Mar. 29, 1977) 84 I.D. 119

Where a transformer failed shortly after being placed in service and the contractor acted promptly after notice to return the transformer to the factory for repairs at no cost to the Government, the Board held that the Government could not invoke provisions of the inspection clause of the contract relating solely to correction of defects at the point of installation to charge the contractor with the costs of removing and reinstalling the transformer.

Appeal of Traver Engineering Corp., IBCA-1100-3-76
(Mar. 31, 1977) 84 I.D. 166

The 20-day notice provision of the changes clause is found inapplicable when the Board finds numerous survey errors were the principal cause of most of the costs claimed and that such errors came within the defective specification exception to the notice requirement of the changes clause.

Appeal of H. B. Byars Construction Co., and Nevada Paving, Inc. (Joint Venture), IBCA-1098-2-76 (June 7, 1977) 84 I.D. 260

The Government's motion to dismiss an appeal because of the failure of the contractor to give the 20-day written notice required by the Changes clause is denied, where the Board finds that there was timely notice with respect to some of the costs on which the claim is based and that the hearing to be held may show that some or all of the remaining costs fall within other recognized exceptions to the strict application of the 20-day cost-limitation provision.

Appeal of Hartford Accident and Indemnity Co., IBCA-1139-1-77 (June 23, 1977) 84 I.D. 296

Under a cost-plus-fixed-fee contract, a cost overrun is allowed where the Government's refusal to fund the overrun was based on appellant's failure to give timely notice under the Limitation of Cost clause and a subsequent audit report finds that the appellant was not aware of a 22 percent increase in the actual overhead rate until a post-performance audit was completed in accordance with the appellant's approved accounting practices.

Appeal of California Earth Sciences Corp., IBCA-1136-12-76 (Mar. 3, 1978) 85 I.D. 75

Where the Government's engineer recorded in his daily diary a verbal protest made by the contractor about embankment compaction difficulties and the inaccuracy of the proctor information furnished by the Government, this satisfied the 20-day notice requirement of the changes clause with respect to some of the claims. It was unnecessary to finally decide the scope of such notice, however, where the Board found the claims to be without merit in any event.

Burr Construction Co., IBCA-1042-9-74 (Aug. 30, 1978)
85 I.D. 353

Payments

Failure to pay subcontractors, suppliers and employees on time and thereby causing delays does not constitute an excusable cause of delay justifying an extension of time.

Appeal of Scope, Inc., IBCA-1090-1-76 (May 6, 1977)

When contractor fails to prove sufficient work was performed in an acceptable manner to entitle it to progress payments, failure to make such payments by the Government does not constitute a constructive change.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Payments--Continued

Where imponderables make it difficult to arrive at an accurate measurement of the amount of concrete placed under water, the Board finds that the amount represented by "paid for" concrete minus the amount of concrete admittedly wasted is the preferred method for determining the amount to which the contractor is entitled for the concrete so placed.

Appeal of William P. Bergan, Inc., IBCA-1130-11-76 (Feb. 2, 1979) 86 I.D. 65

Privity of Contract

An appeal taken by a subcontractor in its own name is dismissed where the Board finds the subcontractor has no standing to invoke the provisions of the Disputes Clause as a means of securing an adjudication by the Board of the rights and obligations of the contesting parties.

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

Appeal of Divide Constructors, Inc., Subcontractor to Granite Construction Co., IBCA-1134-12-76 (Mar. 29, 1977) 84 I.D. 119

An insurance company is refused permission to participate directly in prosecution of an appeal proceeding with a view to recovering the amount paid to the contractor under a builder's risk insurance policy as part of the contractor's differing site conditions claim, where the grounds assigned for the participation are that the interests of the contractor and the insurance company may well prove to be adverse and that the insurance company has the right to participate directly by reason of its status as a partial subrogee, the Board finding (i) that the privity of contract rule rather than the real party in interest rule is controlling in appeal proceedings and (ii) that it has no authority under the Disputes clause to adjudicate the rights of the contractor and the insurance company should they prove to be adverse, irrespective of whether such rights are asserted by the insurance company under a release and assignment of interest executed by the contractor or as a partial subrogee and without regard to the fact that the appellant had authorized the insurance company to file a separate complaint and to prosecute its claim through its own attorneys in the appellant's name.

Appeal of Zurn Engineers, IBCA-1176-12-77 (July 20, 1978) 85 I.D. 279

The prime contractor may appeal in its own name a claim asserted by its subcontractor. The subcontractor's rights to an equitable adjustment under the contract are no greater, however, than those of the prime contractor in whose name the appeal is taken.

Appeal of Brown & Root Western, Inc., IBCA-1220-10-78 (Apr. 13, 1979)

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Protests

Where a construction contractor contended that the contracting officer's enforcement of a contract requirement for roll-over protective structures on all equipment regardless of age constituted a change because the requirement was contrary to standards issued by the Secretary of Labor under the Occupational Health and Safety Act (29 U.S.C. § 651 et seq. (1970)) and therefore void, the Board examined the contention in the light of OSHA and also under the Contract Work Hours and Safety Standards Act (40 U.S.C. § 327 et seq. (1970)) and concluded that, while it was unlikely that either statute was intended to preclude a Federal agency from contractually imposing more stringent safety requirements than prescribed by the Secretary of Labor, it was not necessary to decide the question since appellant's remedy for an alleged illegal clause was a protest in other forums prior to bidding and award.

Appeal of Paul E. McCollum, Sr., IBCA-1080-10-75 (Feb. 24, 1976) 83 I.D. 43

Subcontractors and Suppliers

Appellant cannot justify a request for a time extension by alleging its subcontractor breached its subcontract with appellant. Nor can appellant justify a request for a time extension due to unavailability of certain supplies when there is a failure to establish the supplies were timely ordered.

Appeal of David M. Cox, Inc., IBCA-1079-10-75 (Apr. 7, 1976)

A first category differing site conditions claim based on the encountering of subsurface waterlines not shown on the contract drawings in the vicinity of a fish hatchery building is denied, where the Board finds that except for the unsupported allegations of the contractor there is nothing in the record to indicate that the experienced subcontractor who performed required excavation in the area where the buried waterlines were located failed to anticipate the conditions he actually encountered.

Appeal of William Lagnion (Contractor), IBCA-1083-10-75 (Jan. 5, 1977)

An appeal taken by a subcontractor in its own name is dismissed where the Board finds the subcontractor has no standing to invoke the provisions of the Disputes Clause as a means of securing an adjudication by the Board of the rights and obligations of the contesting parties.

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Subcontractors and Suppliers--Continued

Failure to pay subcontractors, suppliers and employees on time and thereby causing delays does not constitute an excusable cause of delay justifying an extension of time.

Appeal of Scona, Inc., IBCA-1096-1-76 (May 6, 1977)

Third Persons

An insurance company is refused permission to participate directly in prosecution of an appeal proceeding with a view to recovering the amount paid to the contractor under a builder's risk insurance policy as part of the contractor's differing site conditions claim, where the grounds assigned for the participation are that the interests of the contractor and the insurance company may well prove to be adverse and that the insurance company has the right to participate directly by reason of its status as a partial subrogee, the Board finding (i) that the privity of contract rule rather than the real party in interest rule is controlling in appeal proceedings and (ii) that it has no authority under the Disputes clause to adjudicate the rights of the contractor and the insurance company should they prove to be adverse, irrespective of whether such rights are asserted by the insurance company under a release and assignment of interest executed by the contractor or as a partial subrogee and without regard to the fact that the appellant had authorized the insurance company to file a separate complaint and to prosecute its claim through its own attorneys in the appellant's name.

Appeal of Zurn Engineers, IBCA-1176-12-77 (July 20, 1978) 85 I.D. 279

Waiver and Estoppel

When appellant can show that failure to give timely written notice was not prejudicial to Government's interest, appellant is not estopped from prosecuting an appeal.

Appeal of Halvorson-Lentz (A Joint Venture), IBCA-1059-2-75 (Mar. 3, 1977)

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

The United States is not bound or estopped by the acts of its agents who may enter into a contract or an agreement to do or cause to be done what the law does not sanction or permit.

The burden is on the individual or entity contracting with the Government to ascertain whether the Government agent with whom he is dealing is acting within the scope of his authority.

Estoppel has been imposed against the Government by the Ninth Circuit Court of Appeals only if it can be shown that there was "affirmative misconduct" by the Government.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

CONTRACTS--Continued

CONSTRUCTION AND OPERATION--Continued

Waiver and Estoppel--Continued

When the Government could not require delivery of a refrigerated storage unit within the original delivery schedule because the building in which the unit was to be installed was not finished and the Government thereafter continued to negotiate changes in specifications and delivery dates with the contractor, the Board held that the Government had waived the original delivery schedule and that the Government did not regain the right to terminate the contract for default since there was no mutual agreement on a new delivery date and the Government's unilateral attempt to reestablish a specific contractual delivery date was unreasonable as not being within the performance capabilities of the contractor at the time the notice was given.

Appeal of Kenney Refrigeration, IBCA-1230-12-78 (Sept. 28, 1979) 86 I.D. 503

CONTRACT DISPUTES ACT OF 1978

Interest

Where a contractor's claim is not pending before the contracting officer on the effective date, Mar. 1, 1979, of the Contract Disputes Act of 1978, the contractor is ineligible, under sec. 16 thereof, to elect to proceed under the Act. Therefore, an appeal to the Board, involving a claim upon which the final decision of the contracting officer was issued prior to Mar. 1, 1979, and seeking relief pursuant to sec. 12 of the Act, will be dismissed for lack of jurisdiction.

Appeal of L. E. Johnson, Inc., IBCA-1268-5-79 (Sept. 28, 1979) 86 I.D. 508

Jurisdiction

Where a contractor's claim is not pending before the contracting officer on the effective date, Mar. 1, 1979, of the Contract Disputes Act of 1978, the contractor is ineligible, under sec. 16 thereof, to elect to proceed under the Act. Therefore, an appeal to the Board, involving a claim upon which the final decision of the contracting officer was issued prior to Mar. 1, 1979, and seeking relief pursuant to sec. 12 of the Act, will be dismissed for lack of jurisdiction.

Appeal of L. E. Johnson, Inc., IBCA-1268-5-79 (Sept. 28, 1979) 86 I.D. 508

A contractor may not proceed under the provisions of the Contract Disputes Act of 1978 where the appeal is from a final decision of the contracting officer rendered and received by the appellant prior to the effective date of the Act.

Appeals of Gregory Lumber Co., Inc., IBCA-1237-12-78, 1238-12-78, 1239-12-78, 1240-12-78 (Sept. 28, 1979) 86 I.D. 520

DISPUTES AND REMEDIES

Generally

Where a construction contractor contended that the contracting officer's enforcement of a contract requirement for roll-over protective structures on all equipment regardless of age constituted a change because the requirement was contrary to standards issued by the Secretary of Labor under the Occupational Health and Safety Act (29 U.S.C. § 651 *et seq.* (1970)) and therefore void, the Board examined the contention

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Generally--Continued

in the light of OSHA and also under the Contract Work Hours and Safety Standards Act (40 U.S.C. § 327 *et seq.* (1970)) and concluded that, while it was unlikely that either statute was intended to preclude a Federal agency from contractually imposing more stringent safety requirements than prescribed by the Secretary of Labor, it was not necessary to decide the question since appellant's remedy for an alleged illegal clause was a protest in other forums prior to bidding and award.

Appeal of Paul F. McCollum, Sr., IBCA-1080-10-75 (Feb. 24, 1976) 83 I.D. 43

Appeals

Where a contractor has filed an appeal and has failed to file a complaint when often requested to do so over a 2-year period, the appeal is dismissed for want of prosecution.

Appeal of Evergreen Engineering, Inc., IBCA-998-5-73 (Sept. 2, 1975) 82 I.D. 427

Notice of appeal of all issues in a contracting officer's decision puts all the issues contained therein "at issue" before the IBCA until the parties state the issues then in dispute in the Complaint and Answer.

The findings and determinations of the contracting officer which have been appealed become some evidence to be considered and weighed by the Board together with all the other evidence in the record when the appeal is decided by the Board.

Appeal of Scona, Inc., IBCA-1090-1-76 (Dec. 20, 1977) 84 I.D. 1019

One element of an appeal was denied as the sanction for the appellant's failure to answer certain interrogatories relating to that element.

Appeal of Evergreen Engineering, Inc., IBCA-998-5-73 (May 17, 1978) 85 I.D. 107

Burden of Proof

Where a contract for the construction of a bridge substructure contained a provision requiring that employees erecting bridges and structures be protected by safety nets where the use of safety belts and lifelines or other conventional type of protection was impractical and the evidence failed to demonstrate that the use of safety belts and lifelines or other conventional type of protection was practical for workers on concrete piers, the Board denies the contractor's claim for a change based on the fact that it was required to use safety nets to protect workmen from possible falls.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 6, 1975) 82 I.D. 199

The Board denies a construction contractor's claim for additional pay quantities where the evidence did not establish a basis for application of the rule of *contra proferentem*, the contractor's interpretation of the specifications was not shown to be reasonable and the

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Burden of Proof--Continued

record did not establish error in the Bureau's computation of pay quantities.

Appeal of Wm. T. Bostic d/b/a Bostic Construction Co., IBCA-1053-12-74 (May 29, 1975)

A construction contractor's claim for an equitable adjustment based on alleged defective specifications and for corrective work ordered by the Government as a condition to final acceptance of the project was denied, where the specification errors relied upon were obvious, there was no evidence that the contractor had been thereby misled to its detriment and the record did not establish that the corrective work ordered and performed was beyond the requirements of the contract. A claim for costs incurred in replacing door locks was allowed where the evidence established that locks ordered installed by the contracting officer were not a requirement of the contract.

Appeal of J. D. Pierce, IBCA-1035-6-74 (July 18, 1975)

The Government failed to sustain its burden of proving entitlement to a reduction of the contract price as an equitable adjustment for quantities of asphalt concrete for road repair in excess of the Government estimate. The evidence showed that neither party relied on the estimate, that the Government left the selection and manner of using equipment to the contractor and that the Government issued a change order when it observed the contractor's more efficient operation. The work described in the change order was the same work described in the contract and the reduction in unit cost of performance was not the result of the change order but was the result of the contractor's efficiency.

Appeal of Coistona Construction Co., Inc., IBCA-1028-8-74 (July 29, 1975) 82 I.D. 383

A claim under the Suspension of Work clause is denied where the Board finds (i) that the contracting officer acted within his discretion in issuing an order directing the suspension of all work in the wake of a devastating storm at Cape Hatteras with a view to determining whether and, if so, how the work under a beach nourishment contract should proceed or, alternatively, whether the contract should be terminated for the convenience of the Government; (ii) that the contractor had failed to show that its costs would have been any less if the stop work order had been issued at an earlier time; (iii) that suspending the contract work for the 5 working days covered by the stop order did not involve delaying the work for an unreasonable period of time; and (iv) that showing the contract work to have been suspended or delayed for an unreasonable period of time is a prerequisite to recovery under the Suspension of Work clause in all cases including those in which a written order to suspend work has been given as contemplated by paragraph (a) of the clause.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

To be able to support a claim for excess reprocurement costs, the Government must establish that work under a reprocurement contract has been performed and that payment has been made.

Appeal of [illegible] Cleaning Service, IBCA-1073-1-75 (Oct. 2, 1975)

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Burden of Proof--Continued

A claim for acceleration under a contract for the construction of footings for a transmission line is denied where one of appellant's principal contentions was that in a telephone conversation following record snow in late September the project engineer had directed that men and equipment be added to the job in order to finish the work by the contract completion date of Nov. 1, but in correspondence conducted with the Government for almost 6 months after such telephone conversation the contractor failed to refer to the directions purportedly received from the project engineer and even failed to reference the particular telephone conversation. Actions taken by the Government's principal inspector were also found not to constitute acceleration orders when the evidence clearly showed that both parties viewed the inspector's action as involving suggestions rather than directions and that whether the suggestions were accepted by the contractor's job superintendent depended upon the exercise of his business judgment.

Appeal of Iversen Construction Co. (d/b/a Iconco), IBCA-981-1-73 (Dec. 30, 1975) 82 I.D. 646

A claim for a longer time extension under a construction contract due to unusually severe weather is denied where the contracting officer obtained the local climatological data and after reviewing the data granted a time extension when appellant failed to dispute the data or offer any evidence to support its claim for a longer period.

Appeal of David H. Cox, Inc., IBCA-1079-10-75 (Apr. 7, 1976)

Where in moving for reconsideration of a decision denying its claim for constructive acceleration, the contractor contended that the Bureau's failure to promptly investigate its claim of delay due to unusually severe weather amounted to a denial of a request for a time extension and that the denial plus other actions of Bureau inspectors constituted an order to complete the work by the specified completion date irrespective of excusable delay and thus was an acceleration order, the Board ruled that a denial of a request for a time extension was insufficient in and of itself to constitute constructive acceleration and reviewing the evidence, affirmed the denial of the claim, holding that the actions of the inspectors were regarded as suggestions by the contractor and accepted or rejected depending on whether the suggestions were practical or economical.

Appeal of Iversen Construction Co. (d/b/a ICONCO), IBCA-981-1-73 (Apr. 19, 1976) 83 I.D. 179

Under a contract requiring the use of grout the Board denies a contractor's claim where it finds the terms of the specifications dispositive of the question presented.

Appeal of Whalen & Co., IBCA-1066-3-75 (May 26, 1976)

When the contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default and assessing excess reprocurement costs and liquidated damages.

Appeal of Timothy Mason, IBCA-1076-9-75 (July 29, 1976) 83 I.D. 297

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Burden of Proof--Continued

Where the Government failed to explain the presence of water which entered a 230 KV reactor while the reactor was under Government control and protected by Government security measures and where the water caused more extensive repairs to the reactor than would otherwise have been necessary, the Board found no basis for determining the portion of the delay for which each party was responsible and held that liquidated damages could not be charged for any of the delay.

Appeal of Addison Construction Co., IBCA-1064-3-75 (Sept. 29, 1976) 83 I.D. 353

A claim for extra work is denied where the appellant does not even undertake to show why the work was considered to be beyond the requirements of the contract.

Appeals of Willie H. Patterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Feb. 28, 1977)

In prosecuting an appeal the burden of proof is upon appellant to establish by credible evidence that it is entitled to an equitable adjustment.

Appeal of Balycrace-Lents (A Joint Venture), IBCA-1055-2-75 (Mar. 3, 1977)

Under a contract requiring contractor to provide all necessary material, equipment and labor, the contractor's admission that it did not have adequate equipment or an efficient work force, as well as a lack of experience in the work required to be performed does not meet the burden of proof to justify an extension of time.

Appeal of Secoa, Inc., IBCA-1094-1-76 (May 6, 1977)

The Government has the burden of proof that the contractor failed to deliver the goods. The contractor has the burden of proof that its failure was excusable. Where the only evidence of excusability was a letter from the contractor saying that it was delayed by delays in procurement of components and unexpectedly slower rates of system checkout and software debugging, the contractor has not carried its burden of proof of excusability and the appeal is denied.

Appeal of CSP, Inc., IBCA-1137-12-76 (Nov. 10, 1977) 84 I.D. 517

When the contract requires the pipe to be laid in a trench 18 inches in depth measured from the center line of the pipe to the top of the ground line or on top of the ground with 18 inches of cover if rock strata is encountered, the contractor cannot sustain an allegation of a constructive change when the Government insists the requirements be followed and objects to contractor laying the pipe in a trench less than 18 inches in depth.

Appeal of Underground Utility Services, IBCA-1067-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Burden of Proof--Continued

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

When the Government says that a claim is barred by a supplemental agreement it has the burden of proof as to the terms and conditions of that agreement.

Appeal of Sierra Construction Co., IBCA-1145-3-77 (June 7, 1978) 85 I.D. 192

Where the contract specifies a particular test procedure to be used by the Government for compliance testing, and the contractor alleges improper test procedures by the Government, contractor has the burden of proving that the test procedures actually used by the Government were contrary to those specified, and that it incurred extra costs as a result thereof. Contractor failed to sustain its burden of proof, except with respect to the superspan claim.

Contractor's claims for extra costs allegedly incurred as a result of constructive changes under the earthwork requirements of the contract were denied because the contractor failed to sustain its burden of proof on the merits.

Burn Construction Co., IBCA-1062-9-74 (Aug. 30, 1978) 85 I.D. 353

In claiming extra costs due to a Government-caused delay, the burden is on the contractor to show that a delay occurred, that the delay was caused by the Government, and that damages incurred as a result of the delay. Absent this proof, the Board found appellant's delay claim to be totally without merit.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

An appellant will be held to have failed to sustain its burden of proof and the appeal will be denied where appellant's case is submitted on the record without a hearing and the record consists only of claim letters and pleadings alleging that the contracting officer's findings of fact and decision are erroneous in certain respects. Disputed allegations do not constitute evidence and cannot be accepted as proof of facts.

Appeal of C.I.C. Construction Co., Inc., IBCA-1190-4-78 (Sept. 25, 1979) 86 I.D. 475

Where a clearing contractor claims entitlement to an equitable adjustment based on the standard Differing Site Conditions clause of the contract, and the evidence shows that the principal causes of any increased costs which may have been incurred were heavy rains and failure of the contractor to make a reasonable prebid investigation of the site or examination of specifications, and no evidence of fault on the part of the Government is presented, the Board holds that the contractor has not sustained its burden of proof for entitlement to an equitable adjustment, and the appeal will be denied.

Appeal of M & E Equipment Co., IBCA-1088-11-75 (Sept. 28, 1979) 86 I.D. 527

Damages

Generally

An Oil and Gas Supervisor of the Geological Survey has authority to demand prejudgment interest based upon the failure of an oil and gas lessee to pay timely royalties owed to the Government, despite the fact that the Supervisor is an employee of the Executive Branch.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975) 82 I.D. 316

In an instance where a party to a contract claims substantial but not complete performance of the contract to satisfy his obligation he must either complete the job according to specifications or pay the cost of completion.

Tomco, Inc., 29 IBLA 298 (Mar. 30, 1977)

Actual Damages

To be able to support a claim for excess reprocurement costs, the Government must establish that work under a reprocurement contract has been performed and that payment has been made.

Appeal of Hallweberg Cleaning Service, IBCA-1057-1-75 (Oct. 2, 1975)

Liquidated Damages

Where the action of the Government clearly contributed to the delay for which liquidated damages were assessed and there was no basis for determining the portion of the delay for which each party was responsible, the Board found that no liquidated damages could properly be charged.

Appeal of David M. Cox, Inc., IBCA-1095-12-75 (July 22, 1976)

Where the Government failed to explain the presence of water which entered a 230 KV reactor while the reactor was under Government control and protected by Government security measures and where the water caused more extensive repairs to the reactor than would otherwise have been necessary, the Board found no basis for determining the portion of the delay for which each party was responsible and held that liquidated damages could not be charged for any of the delay.

Appeal of Addison Construction Co., IBCA-1044-3-75 (Sept. 29, 1976) 83 I.D. 393

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Damages--Continued

Liquidated Damages--Continued

When the Government did not offer any evidence to explain its failure for almost a month to arrange for the relocation of a powerline which was within the right-of-way for construction and the other evidence of record furnished an insufficient basis for determining the portion of the delay for which each party was responsible, liquidated damages could not properly be assessed for delayed performance.

Appeal of Scona, Inc., IBCA-1094-1-76 (May 6, 1977)

When the Government assesses liquidated damages for late performance of a contract and the contractor asserts that the delay was excusable because of unusually severe weather, the contractor must show not only that the weather was bad (and delayed the work), but that the weather was worse than normal for that time and place.

Appeal of Sierra Construction Co., IBCA-1145-3-77 (June 7, 1978) 85 I.D. 192

Where the evidence shows no meeting of the minds between a completing surety and the Government on the matter of the surety's liability for liquidated damages, the Government does not waive the right to assess liquidated damages under a novation theory merely by allowing the surety, otherwise liable for liquidated damages under the contract, to complete performance of the contract terminated for default.

Appeal of General Construction Corp. of America by Financial Indemnity Co. (Its Surety), IBCA-1178-2-78 (Mar. 29, 1979) 86 I.D. 206

Measurement

Even where statute, regulation, and the oil and gas lease itself do not specifically provide for the payment of prejudgment interest on royalties owed to the United States, such interest may be imposed by the United States; equity principles may authorize such imposition. A charge for such interest may be imposed despite delays in processing the debtor's appeals, where the debtor assertedly relied upon an earlier Departmental decision which, only when taken out of context, would tend to support the debtor's posture.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975) 82 I.D. 316

Where the prime contractor claims damages against the Government stemming from differing site conditions encountered by its subcontractor, and the prime contractor and subcontractor have settled these same claims in an independent proceeding, the Government's liability to the prime contractor is limited to the amount of the settlement.

Where a finding is made by the Board on the extent of the Government's liability to the contractor, any moneys previously allowed and paid pursuant to a contracting officer's decision on the same claims shall be deducted from the gross amount allowed in order to determine the net amount payable to the contractor.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Damages--Continued

Measurement--Continued

Where imponderables make it difficult to arrive at an accurate measurement of the amount of concrete placed under water, the Board finds that the amount represented by "paid for" concrete minus the amount of concrete admittedly wasted is the preferred method for determining the amount to which the contractor is entitled for the concrete so placed.

Appeal of William E. Bozman, Inc., IBCA-1130-11-76 (Feb. 2, 1979) 86 I.D. 65

Equitable Adjustments

In a case where the Government (i) rejected certain conditions attached to the contractor's offer to perform at the contract unit price additional excavation due to a directed change, (ii) determined that the contractor was entitled to an extension of 82 days as the time required to perform the additional excavation which was accepted by the contractor, (iii) recognized that the contractor might be entitled to an additional extension due to certain operations being extended into the inclement winter weather, and (iv) subsequently granted the contractor a 20-day time extension due to unusually severe weather, the Board finds the contractor to be entitled to an equitable adjustment for increased costs of working in winter weather which were the direct and inevitable consequence of the directed change, rejecting Government contentions that the contractor's claim was barred by accord and satisfaction or that it represented costs for working in inclement weather for which the contract made no provision.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 6, 1975) 82 I.D. 199

A road-building contractor was entitled to an equitable adjustment under the Suspension of Work clause for idle equipment expense where the Government stopped the contractor from hauling gravel base as a result of failing density tests on a nuclear-electronic gauge not authorized by the contract for testing compaction and where, after the contractor protested the use of such gauge and requested tests in accordance with the contract, the Government further delayed conducting the sand-cone tests required by the contract, causing contractor's gravel hauling equipment to be idle for 2 days and further causing the paving operations to be delayed by 2 days.

Appeal of Thorson, Inc., IBCA-993-4-73 (June 30, 1975)

The Government failed to sustain its burden of proving entitlement to a reduction of the contract price as an equitable adjustment for quantities of asphalt concrete for road repair in excess of the Government estimate. The evidence showed that neither party relied on the estimate, that the Government left the selection and manner of using equipment to the contractor and that the Government issued a change order when it observed the contractor's more efficient operation. The work described in the change order was the same work described in the contract and the reduction in unit cost of performance was not the result of the change order but was the result of the contractor's efficiency.

DISPUTES AND REMEDIES--Continued

Equitable Adjustments--Continued

Under a construction contract for a beach nourishment project at Cape Hatteras involving a contractor's claim for equitable adjustment based upon the Government directing the beach fill to be placed in a manner differing from the typical cross section shown on the contract drawing, the Board finds that the 20-day notice provision of the Changes clause should not preclude consideration of the claim on the merits where there is no one action of the Government which can be pointed to as the identifiable event upon which the claim is grounded and from which the contractor's delay in presenting the claim can be measured, particularly where the evidence of record indicates that the Government's actions contributed to and may even have been the principal cause of the delay in giving notice of the claim.

A contractor's acceptance of a change order is found to be no bar to consideration of a claim under the Changes clause where the evidence shows that the claim involved had neither arisen nor been discussed prior to the time the change order in question was executed.

A special provision authorizing the contracting officer to adjust or revise the limits of the work during performance to reflect the conditions encountered and thereby provide for maximum use of material available with the funds allotted is found to vest the contracting officer with no plenary authority to direct the placement of the beach fill where the authorization to adjust or revise the limits of the work is circumscribed by the use of the word "approximate."

An estimated quantities provision under which the Government was authorized to obtain additional quantities of beach fill at the unit price specified in the contract so long as the additional quantities did not exceed 25 percent of the original total contract price is found not to preclude an adjustment under the Changes clause for clearly unforeseeable costs to the extent the contractor shows (i) the basis upon which its bid was calculated and (ii) the causal connection between the increased costs and the inability or the failure of the Government to adhere to the typical cross section shown on the contract drawings in directing the placement of the fill.

Appeal of J. A. LaPorte, Inc., IBCA-1016-12-73 (Sept. 29, 1975) 82 I.D. 459

A second category differing site conditions claim based upon rock encountered in excavation under a construction contract is denied where the Board finds that an adequate site investigation would have revealed the presence of rock in the area where it was encountered.

A first category differing site conditions claim based on the encountering of subsurface waterlines not shown on the contract drawings in the vicinity of a fish hatchery building is denied, where the Board finds that except for the unsupported allegations of the contractor there is nothing in the record to indicate that the experienced subcontractor who performed required excavation in the area where the buried waterlines were located failed to anticipate the conditions he actually encountered.

Although a first category differing site conditions claim is established by the presence of a septic tank in an area where the plans indicate a sewage treatment plant was slated to go, a contractor's claim based thereon is denied where the evidence shows that the location of the sewage treatment plant was changed before any significant amount of work was done in the area where the septic tank was located.

Appeal of William Lasnick (Contractor), IBCA-1003-10-73 (Jan. 5, 1977)

An order to build a curved wall was a constructive change outside change order #1 which was for a straight wall. Thus, the claim for extra costs for curved construction and for stand-by time caused by the Government delay in staking wall is compensable.

Appeal of Rocky Mountain Construction Co., IBCA-1051-12-75 (Aug. 17, 1977) 84 I.D. 629

A first category differing site condition claim based upon excessive rock encountered in excavation under a construction contract is sustained where the Board finds there was an adequate pre-bid site investigation and that the contract indications of subsurface conditions did not reveal the excessive quantities of rock in the areas where it was encountered.

A first category differing site condition claim based upon mitigating subsurface water and rock excavation encountered is sustained where the Board found that the Government knew of the subsurface mitigating water but failed to disclose such information to bidders and that both the rock and the subsurface mitigating water encountered differed materially from the contract indications.

Appeals of JBKC Co., IBCA-1020-2-74 and IBCA-1033-4-74 (Sept. 30, 1977) 84 I.D. 459

Upon reconsideration, the Board finds that where the Government issues an "Extra Work Order" under a "force account" provision for minor extra work not provided for in other pay items, at agreed on rates, the contractor is entitled to be paid for inefficiency, rework costs and delay costs when moisture causes borrow material placed under the extra work order, to become muddy. However, the appellant's failure to give prompt notice of the claim under the force account provision caused the Government to order added pay item work, thus the claim must be reduced by the amount of added pay item payment.

Appeal of Rocky Mountain Construction Co., IBCA-1051-12-75 (Nov. 4, 1977) 84 I.D. 858

Where evidence established that faulty construction of original shoring and noncompliance with appropriate directives in reshoring process on the part of construction contractor's own employees caused failure of cantilever lintel and collapse of masonry wall, the Board denies claim of entitlement to an equitable adjustment by the contractor for additional costs incurred in reconstruction of masonry wall as well as claim for 30-day time extension, since the contractor failed to prove allegations of defective or inadequate Government drawings and specifications.

Appeal of CWB Contractors, Inc., IBCA-1107-4-76 (May 25, 1978) 85 I.D. 148

In a contract for placement of sand on a beach at Cape Hatteras where the contracting officer's formula for computing an equitable adjustment for changed work did not consider the increased pumping time and increased maintenance caused by the change and did not allow for profit on the increased costs, the Board found that the contractor was entitled to an equitable adjustment based on those factors.

Where a contractor accepted a contract containing a clause limiting an equitable adjustment for profit to 15 percent of the cost of changed work, he is bound by the limitation even though his contract price of $1.31

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Equitable Adjustments--Continued

per cubic yard of sand exceeded his estimated contract costs of 75 cents per cubic yard by more than 15 percent.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (July 6, 1978) 85 I.D. 262

Under a contract for surfacing a road over an existing subgrade which proves to require extensive rebuilding because of the failure of the contract to specify the actual conditions, the equitable adjustment to which the contractor is entitled is found to be the amount by which the actual costs and profit rate bid exceeds the final contract value, rather than the speculative costs attributed to interruptions and delays, because the contractor's performance period was not significantly extended.

Buck Brown Contracting Co., Inc., IBCA-1119-7-76 (Aug. 1, 1978)

Appellant is entitled to an equitable adjustment of the contract price for costs incurred as a result of the changes under the superspan specifications. Since the contractor was unable to establish the amount of its damages by reliable evidence, the total cost approach of pricing the contract adjustment was rejected. The total cost approach is disfavored as a measure of compensation because it assumes that the original bid was accurate, that the change was the sole cause of cost increases, and that the cost incurred was reasonable. The jury verdict approach was used since mathematical exactness is not necessary and there existed some evidence which was deemed sufficient for that purpose. The Board also found the contractor had been excusably delayed by actions attributable to the Government.

Duke Construction Co., IBCA-1062-9-74 (Aug. 30, 1978) 85 I.D. 353

Where the contractor alleged extra costs but failed to establish that all such costs were due to the defective specifications, and where a Government audit shows that a substantial portion of such costs were in fact incurred but could not attribute such costs to that portion of the project relating to the defective specification, the Board will determine the amount of the equitable adjustment by utilizing the jury verdict approach.

G.T.S. Co., Inc., IBCA-1077-9-75 (Sept. 15, 1978) 85 I.D. 373

Where a finding is made by the Board on the extent of the Government's liability to the contractor, any moneys previously allowed and paid pursuant to a contracting officer's decision on the same claims shall be deducted from the gross amount allowed in order to determine the net amount payable to the contractor.

Appeal of Paul E. McCollum, Sr., IBCA-1123-8-76 (Nov. 22, 1978)

Where under a standard construction contract the liability of the Government for defective plans and specifications is clearly established but as a consequence of the contractor having failed to segregate the costs applicable to the constructive change it is not possible to determine precisely the extent to which the Government's actions increased the cost of performance, the amount of the equitable adjustment to which the contractor is entitled is determined by the Board finding whether particular costs are allocable where that is possible and drawing inferences from the entire record where it is not possible to otherwise determine the proper allowances to be made for various aspects of the claimed amount.

Claims for extra costs incurred in the concrete lining of a canal attributed to heat encountered during delayed performance allegedly caused by defective plans and specifications is denied, where the Board finds that the delays experienced were the result of actions or inactions for which the contractor was responsible including (i) the failure to have necessary equipment operational weeks after concrete placement was to commence according to the contractor's plan; (ii) the hiring of incompetent carpenters; and (iii) the manner in which the contractor chose to place outlet structures.

A&J Construction Co., Inc., IBCA-1142-2-77 (Dec. 28, 1978) 85 I.D. 468

Where imponderables make it difficult to arrive at an accurate measurement of the amount of concrete placed under water, the Board finds that the amount represented by "paid for" concrete minus the amount of concrete admittedly wasted is the preferred method for determining the amount to which the contractor is entitled for the concrete so placed.

Where the evidence clearly establishes that the Government specifications were defective in a number of respects but fails to show that many of the costs claimed are attributable to actions of the Government, the Board--noting that it is impossible to determine the amount to which the contractor is entitled with mathematical exactness--finds that the "jury verdict" method of determining the amount of the equitable adjustment is the most appropriate method in the circumstances presented by the instant appeal.

Appeal of William F. [illegible], Inc., IBCA-1130-11-76 (Feb. 2, 1979) 86 I.D. 67

When arguments advanced in a motion for reconsideration convince the Board that the formula used in determining an equitable adjustment was not the most accurate method but where neither party submits a better method, the Board will vacate its original finding regarding the equitable adjustment and make a recomputation based on the evidence of record.

Appeal of J. A. LaPorte, Inc., IBCA-1146-3-77 (Feb. 14, 1979) 86 I.D. 125

Where there is evidence that some of the additional expenses claimed were due to contractor's own negligence and inefficiency, such factors must be considered in determining the amount of the equitable adjustment.

Appeal of DBC Construction, Inc., IBCA-1207-9-78 (June 28, 1979)

Where the evidence supports entitlement of a contractor to an equitable adjustment resulting from a constructive change, but fails to establish that all the claimed extra costs were incurred as a direct result of the constructive change, the Board will employ the

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Equitable Adjustments--Continued

jury verdict approach in order to determine the appropriate amount to be awarded to the contractor.

Appeal of Environment Consultants, Inc., IBCA-1192-5-78 (June 29, 1979) 86 I.D. 349

Where the preponderance of the evidence shows that substantial increased costs were incurred by a highway construction contractor, primarily because Government inspection personnel either failed to calibrate or improperly calibrated the density testing machine used to determine compaction compliance, and it is determined that the contractor is entitled to an equitable adjustment, the Board will adopt the amount for quantum reached by the parties at a negotiated settlement, when dissatisfied with both the Government audit and the quantum computation of the contractor, but satisfied that the negotiations were made in good faith, at arm's length, and by individuals thoroughly familiar with the details of the contract and its performance.

Appeal of Nielsons, Inc., IBCA-1173-11-77 (Sept. 27, 1979) 86 I.D. 493

Where a clearing contractor claims entitlement to an equitable adjustment based on the standard Differing Site Conditions clause of the contract, and the evidence shows that the principal causes of any increased costs which may have been incurred were heavy rains and failure of the contractor to make a reasonable prebid investigation of the site or examination of specifications, and no evidence of fault on the part of the Government is presented, the Board holds that the contractor has not sustained its burden of proof for entitlement to an equitable adjustment, and the appeal will be denied.

Appeal of R & P Equipment Co., IBCA-1088-11-75 (Sept. 28, 1979) 86 I.D. 527

Jurisdiction

An assignee under an assignment of the proceeds of a contractor's claim before the Board which had been executed subsequent to completion of performance and the filing of the appeal by the contractor, is not permitted to participate in the appeal, since the Board's jurisdiction, pursuant to the Disputes clause, extends only to the parties to the contract or to their duly qualified successors.

Appeal of Evergreen Engineering, Inc., IBCA-990-5-73 (Jan. 14, 1975)

An appeal by a concessionaire at a wildlife refuge who alleges that Government harassment of the public, failure to repair roads and other actions resulted in a decrease of business and who seeks therefor to be relieved of payment of a semi-annual franchise fee of 3 percent of gross receipts required under the concession agreement and given the right to sell beer, inter alia, is dismissed for lack of jurisdiction, since the agreement contains no adjustment provisions and the relief requested entails reformation of the agreement, but is remanded to the contracting officer, who has wide discretion under the agreement to provide relief, for further consideration in the light of the Board's opinion.

Appeal of Pirate's Cove Marina, IBCA-1018-2-74 (Feb. 25, 1975) 83 I.D. 445

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Jurisdiction--Continued

An appeal will be dismissed where the claim on which it is based arose from a mistake in connection with the contractor's bid, resulting from the failure of his timely dispatched telegraphic bid modification to be received prior to bid opening and where it is clear that he intended to file his appeal in the General Accounting Office.

Appeal of E. L. Larsen Co., IBCA-1054-1-75 (Mar. 25, 1975)

An Oil and Gas Supervisor of the Geological Survey has authority to demand prejudgment interest based upon the failure of an oil and gas lessee to pay timely royalties owed to the Government, despite the fact that the Supervisor is an employee of the Executive Branch.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975) 82 I.D. 316

Where a construction contractor's bid for furnishing and erecting a steel building was slightly in excess of 53 percent of the next low bid and the record indicates that the contractor's bid may have been occasioned by a misunderstanding as to the specification requirements, but fails to show that the contractor was requested to or did verify its bid price to award, the Board finds that it is without jurisdiction to grant relief based upon a mistake in bid, noting, however, that the appellant may be entitled to relief in another forum.

Appeal of J. E. Piercey, IBCA-1013-12-73 (Oct. 17, 1975)

Where an appeal is timely the absence from a contracting officer's letter of a terminal paragraph advising the contractor of his right of appeal under the Disputes clause is not a basis for remand to the contracting officer.

Claims of constructive change under a cost-plus-fixed-fee contract first presented in the notice of appeal are outside the jurisdiction of the Board and are remanded to the contracting officer for the issuance of new or supplemental findings.

Appeal of VTN Colorado, Inc., IBCA-1073-8-75 (Oct. 29, 1975) 82 I.D. 527

A contractor's claim for additional costs attributed to the Government's delay in requesting contemplated installation services under a contract calling for the furnishing of governors for hydraulic turbines is dismissed for want of jurisdiction where the Board finds that the claim asserted is not redressable under the Changes clause of Standard Form 32 (Supply Contract) or under the special Suspension of Deliveries (or Services) clause which reserves to the Government the right to suspend services and preserves the contractor's right to make claim therefor but fails to provide that any costs attributable to such suspension shall be recoverable by way of an adjustment to the contract price.

Appeal of Cheston Co., IBCA-1093-1-76 (Nov. 19, 1976) 84 I.D. 924

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Jurisdiction--Continued

An appeal taken by a subcontractor in its own name is dismissed where the Board finds the subcontractor has no standing to invoke the provisions of the Disputes Clause as a means of securing an adjudication by the Board of the rights and obligations of the contesting parties.

An appeal is dismissed where the prime contractor has stated that nothing will be done to further an appeal taken by a subcontractor in its own name and the Board finds that the action of the prime contractor in giving the Government written notice of a potential claim of changed conditions by the subcontractor and any statements made by the prime contractor endorsing the potential claim at the time such notice was given are not a sufficient basis upon which to ground jurisdiction over the appeal.

Appeal of Divide Constructors, Inc., Subcontractor to Granite Construction Co., IBCA-1134-12-76 (Mar. 29, 1977) 84 I.D. 119

An insurance company is refused permission to participate directly in prosecution of an appeal proceeding with a view to recovering the amount paid to the contractor under a builder's risk insurance policy as part of the contractor's differing site conditions claim, where the grounds assigned for the participation are that the interests of the contractor and the insurance company may well prove to be adverse and that the insurance company has the right to participate directly by reason of its status as a partial subrogee, the Board finding (i) that the privity of contract rule rather than the real party in interest rule is controlling in appeal proceedings and (ii) that it has no authority under the Disputes clause to adjudicate the rights of the contractor and the insurance company should they prove to be adverse, irrespective of whether such rights are asserted by the insurance company under a release and assignment of interest executed by the contractor or as a partial subrogee and without regard to the fact that the appellant had authorized the insurance company to file a separate complaint and to prosecute its claim through its own attorneys in the appellant's name.

Appeal of Zurn Engineers, IBCA-1176-12-77 (July 20, 1978) 85 I.D. 279

A claim by a concessioner under a National Park Service Contract is dismissed as beyond the purview of the Board's jurisdiction where the contract contains no disputes clause and by its express terms the Contract Disputes Act of 1978 is not applicable to the claim asserted.

Appeal of Yosemite Park and Curry Co., IBCA-1232-12-78 (Mar. 16, 1979) 86 I.D. 197

The award of a contract to a statutorily debarred bidder was properly canceled upon discovery of the debarred status and there being no valid contract between the parties, the Board is without jurisdiction to consider an appeal.

Appeal of City Window Cleaners, IBCA-1218-10-78 (June 12, 1979) 86 I.D. 329

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Jurisdiction--Continued

A contractor may not proceed under the provisions of the Contract Disputes Act of 1978 where the appeal is from a final decision of the contracting officer rendered and received by the appellant prior to the effective date of the Act.

Appeals of Gregory Lumber Co., Inc., IBCA-1237-12-78, 1238-12-78, 1239-12-78, 1240-12-78 (Sept. 28, 1979) 86 I.D. 520

Substantial Evidence

A multi-item appeal under a contract for construction of a fish barrier is sustained for those items where Government changes in the contract resulted in extra expense and where such expense could be determined from the record.

Appeal of Robert P. Jones (Contractor), IBCA-1002-8-73 (May 6, 1975)

Termination for Default

Generally

Where a contractor has given notice that it had no intention of performing the contract unless the contract price was increased to cover the rise in material costs and had made no effort to order required supplies, the Government could terminate the contract for default in advance of the time specified for delivery.

An economic rise in costs of materials after a fixed price supply contract is executed does not excuse a contractor from performing the contract.

Appeal of SBM Manufacturing Co., IBCA-1032-4-74 (May 29, 1975)

When contractor fails to perform pursuant to specifications in a janitorial service contract and is given notice to correct the deficiencies but fails to do so and offers no excusable cause justifying the failure the contract can properly be terminated for default.

Appeal of Ballwebers Cleaning Service, IBCA-1057-1-75 (Oct. 2, 1975)

Where a construction contractor's bid for furnishing and erecting a steel building was slightly in excess of 53 percent of the next low bid and the record indicates that the contractor's bid may have been occasioned by a misunderstanding as to the specification requirements, but fails to show that the contractor was requested to or did verify its bid prior to award, the Board finds that it is without jurisdiction to grant relief based upon a mistake in bid, noting, however, that the appellant may be entitled to relief in another forum.

Where a contract for furnishing and erecting a steel building was terminated for default and the contractor appealed the termination contending that the specifications were written around the product of a particular manufacturer and that under the material and workmanship clause of the General Provisions (Standard Form 23-A, Oct. 1969 Edition) it was entitled to furnish an "equal" product, the Board holds that the restrictive nature of the specifications is no defense to the termination where the evidence fails to establish that the

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Termination for Default--Continued

Generally--Continued

building offered was, in fact, equal to the building described in the specifications.

Appeal of J. D. Piercey, IBCA-1013-12-73 (Oct. 17, 1975)

Where a construction contractor failed to appeal from a notice of termination for default which included findings that the contractor's delay in performing the work was not due to excusable causes, but did file a timely appeal from a damage assessment for, *inter alia*, the increased cost of completing the work, the Board denied the Government's motion to strike paragraphs of the complaint alleging that the contractor's delay was due to excusable causes and that the termination for default was improper since under the so-called *Fulford* doctrine, which has been held equally applicable to construction contracts, an appeal from a damage or excess cost assessment following a termination for default allows the contractor to contest the propriety of the termination.

Where certain paragraphs of a complaint filed by a construction contractor in an appeal from a damage assessment following a termination for default raised issues as to the propriety of the termination, the Board denied a Government motion to strike those paragraphs based on contentions that the contractor had agreed that delay in completion of the work was not excusable and that the contractor's agreement to a revised date for completion of the work precluded it from raising issues as to the excusability of delays occurring prior to the agreement, since it is well settled that accord and satisfaction is an affirmative defense which must be pleaded and proved and that allegations of accord and satisfaction raise factual issues as to the intent of the parties of the time of the alleged accord.

Appeal of Airco, Inc., IBCA-1074-8-75 (Apr. 6, 1976)
83 I.D. 137

A default termination is found to be proper where no special circumstances were shown to exist justifying a contractor's refusal to proceed with performance in accordance with the contracting officer's decision pending the resolution of the dispute.

Appeals of Willie H. Petterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Feb. 28, 1977)

Under a contract requiring contractor to provide all necessary material, equipment and labor, the contractor's admission that it did not have adequate equipment or an efficient work force, as well as a lack of experience in the work required to be performed does not meet the burden of proof to justify an extension of time.

Appeal of Scona, Inc., IBCA-1094-1-76 (May 6, 1977)

When contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

CONTRACTS--Continued

DISPUTES AND REMEDIES--Continued

Termination for Default--Continued

Generally--Continued

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978)
85 I.D. 12

Where the evidence shows no meeting of the minds between a completing surety and the Government on the matter of the surety's liability for liquidated damages, the Government does not waive the right to assess liquidated damages under a novation theory merely by allowing the surety, otherwise liable for liquidated damages under the contract, to complete performance of the contract terminated for default.

Appeal of General Construction Corp. of America by Financial Indemnity Co. (Its Surety), IBCA-1178-2-78 (Mar. 29, 1979)
86 I.D. 206

When a contractor failed to furnish the number of laborers required under a service contract and failed to cure such deficiency after a notice to show cause why the contract should not be terminated for default, the Board held that termination for default was proper and further held that the Government should continue to withhold earnings under the contract to satisfy first the wage claims by unpaid employees of the contractor as determined by the Department of Labor pursuant to the Service Contract Act of 1965 and secondly to satisfy any claim for excess costs by the contracting agency.

Appeal of Andy's Excavating, IBCA-1236-12-78 (Sept. 19, 1979)
86 I.D. 469

When the Government could not require delivery of a refrigerated storage unit within the original delivery schedule because the building in which the unit was to be installed was not finished and the Government thereafter continued to negotiate changes in specifications and delivery dates with the contractor, the Board held that the Government had waived the original delivery schedule and that the Government did not regain the right to terminate the contract for default since there was no mutual agreement on a new delivery date and the Government's unilateral attempt to reestablish a specific contractual delivery date was unreasonable as not being within the performance capabilities of the contractor at the time the notice was given.

Appeal of Kenney Refrigeration, IBCA-1230-12-78 (Sept. 28, 1979)
86 I.D. 503

Excess Costs

When the contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default and assessing excess reprocurement costs and liquidated damages.

Appeal of Timothy Mason, IBCA-1076-9-75 (July 25, 1976)
83 I.D. 297

CONTRACTS--Continued

FORMATION AND VALIDITY

Generally

In a case where the Government (i) rejected certain conditions attached to the contractor's offer to perform at the contract unit price additional excavation due to a directed change, (ii) determined that the contractor was entitled to an extension of 82 days as the time required to perform the additional excavation which was accepted by the contractor, (iii) recognized that the contractor might be entitled to an additional extension due to certain operations being extended into the inclement winter weather, and (iv) subsequently granted the contractor a 20-day time extension due to unusually severe weather, the Board finds the contractor to be entitled to an equitable adjustment for increased costs of working in winter weather which were the direct and inevitable consequence of the directed change, rejecting Government contentions that the contractor's claim was barred by accord and satisfaction or that it represented costs for working in inclement weather for which the contract made no provision.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 199

An internal decision memorandum signed by the Secretary of the Interior which recommends a contract negotiating position cannot ripen into a binding contract with an entity who has relied and acted upon some position recommended in the memorandum.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

Authority to Make

Where a construction contractor contended that the contracting officer's enforcement of a contract requirement for roll-over protective structures on all equipment regardless of age constituted a change because the requirement was contrary to standards issued by the Secretary of Labor under the Occupational Health and Safety Act (29 U.S.C. § 651 *et seq.* (1970)) and therefore void, the Board examined the contention in the light of OSHA and also under the Contract Work Hours and Safety Standards Act (40 U.S.C. § 327 *et seq.* (1970)) and concluded that, while it was unlikely that either statute was intended to preclude a Federal agency from contractually imposing more stringent safety requirements than prescribed by the Secretary of Labor, it was not necessary to decide the question since appellant's remedy for an alleged illegal clause was a protest in other forums prior to bidding and award.

Appeal of Paul E. McCollum, Sr., IBCA-1080-10-75 (Feb. 24, 1976) 83 I.D. 43

Where an award is made to a firm while one of the partners is under debarment for violation of a labor statute due to administrative oversight, the contracting officer is without authority to make a valid award, and the purported contract is void ab initio.

Appeal of City Window Cleaners, IBCA-1218-10-78 (June 12, 1979) 86 I.D. 329

Bid Award

A rejected bid in an outer continental shelf oil and gas lease sale may be reconsidered and accepted when it is in the public interest to do so. The essential elements in allowing such a reconsideration are the fairness and impartiality of the sale toward all bidders. In a situation where a bid was initially rejected as too low for the tract identified in the bid and the bidder immediately requests reconsideration because he intended to bid for a different tract, where the tract number stated in the bid corresponds to the block number of the intended tract, where all other relevant data in the bid corresponds to the intended tract and only to the intended tract, and where no other person submitted a bid for the intended tract, it is proper to reconsider the bid to determine if it is in the public interest to accept the bid for the intended tract.

Alaska Oil and Minerals Corp., 29 IBLA 224 (Mar. 23, 1977) 84 I.D. 114

The Bureau of Land Management may not accept a bid in a competitive lease sale where the bid proposes a royalty different from that set out in the lease sale notice.

Lee E. Loeffler, 33 IBLA 18 (Nov. 22, 1977)

In a competitive materials sale, submission of the required 10 percent deposit in cash with the sealed bid is permissible under the regulations and not a ground for rejection of the highest bid. Therefore, a protest against acceptance of the bid for that reason is properly denied.

Roy Blake, 38 IBLA 151 (Dec. 5, 1978)

Where the contractor's bid is accepted during an extension of the bid acceptance period conditioned upon the contractor not being prejudiced by changes resulting from energy related shortages, the Board finds that the contractor's conditional acceptance of a change order increasing prices for asphaltic materials to a certain date continued the bid qualification in effect and does not preclude recovery of asphaltic price increases thereafter.

Nielsons, Inc., IBCA-1126-9-76 (Mar. 8, 1979) 86 I.D. 182

Under 43 CFR 3120.3-1, rejection of a high bid tendered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the rejection has a reasonable basis in fact.

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

Cost-type Contracts

A cost-plus-fixed-fee contractor's claim for costs in excess of the estimated cost of the contract, incurred in correcting deficiencies in Government-furnished property, was denied where the contractor knew or should have known that costs being incurred would exceed the estimated cost, but failed to give the notice required by the Limitation of Cost clause and evidence failed to furnish any basis for excusing the contractor's failure to give the required notice. The contractor's claim for additional fee on the extra work was sustained since the Limitation of Cost clause is not applicable to such claims.

Appeal of Booz, Allen & Hamilton, Inc., IBCA-1027-3-74 (Mar. 24, 1976) 83 I.D. 95

CONTRACTS--Continued

FORMATION AND VALIDITY--Continued

Cost-type Contracts--Continued

Under a cost-plus-fixed-fee contract, a cost overrun is allowed where the Government's refusal to fund the overrun was based on appellant's failure to give timely notice under the Limitation of Cost clause and a subsequent audit report finds that the appellant was not aware of a 22 percent increase in the actual overhead rate until a post-performance audit was completed in accordance with the appellant's approved accounting practices.

Appeal of California Earth Sciences Corp., IBCA-1138-12-76 (Mar. 3, 1978) 85 I.D. 75

A Government motion for reconsideration is denied where the Board finds that a cost estimate (cost and pricing data) was not a firm offer to perform the work within the hours and at the prices or rates specified, but was rather simply the initial basis for negotiating a cost-plus-fixed-fee contract.

Appeal of W. F. Sigler & Associates, IBCA-1159-7-77 (Apr. 14, 1978) 85 I.D. 167

Formalities

When a Federal procurement regulation makes an interest clause mandatory and the contract omits the clause, it is incorporated under the Christian doctrine.

Appeal of Commonwealth Electric Co., IBCA-1048-11-74 (July 15, 1977) 84 I.D. 407

Legality

Where an award is made to a firm while one of the partners is under debarment for violation of a labor statute due to administrative oversight, the contracting officer is without authority to make a valid award, and the purported contract is void ab initio.

Appeal of City Window Cleaners, IBCA-1218-10-78 (June 12, 1979) 86 I.D. 329

Mistakes

Where a construction contractor's bid for furnishing and erecting a steel building was slightly in excess of 53 percent of the next low bid and the record indicates that the contractor's bid may have been occasioned by a misunderstanding as to the specification requirements, but fails to show that the contractor was requested to or did verify its bid prior to award, the Board finds that it is without jurisdiction to grant relief based upon a mistake in bid, noting, however, that the appellant may be entitled to relief in another forum.

Appeal of J. D. Piercey, IBCA-1013-12-73 (Oct. 17, 1975)

Negotiated Contracts

Where a request for proposals for the construction of a pipeline provided that certain pipe and fittings for the pipeline would be furnished by the Government and appellant's proposal, reasonably interpreted, excepted to material the request for proposals provided was to be furnished by the contractor, the Board sustains the contractor's claim for material it furnished, holding that the Bureau, in failing to seek confirmation of its interpretation of appellant's proposal, accepted the risk of the accuracy of its interpretation.

Appeal of Wm. T. Montin d/b/a Montin Construction Co., IBCA-1051-12-74 (May 29, 1975)

When the Government issues a RFP to a sole source and the sole source submits three different proposals at different times and the Government issues a second and somewhat different solicitation and finally the Government and the sole source sign another document which is somewhat different from all prior solicitations and proposals and is complete in itself, that document is the contract and supersedes all prior solicitations and proposals.

Mere negotiations for a new contract do not imply rescission of an existing contract.

Westlands Water District -- Legal Questions, M-36901 (July 31, 1978) 85 I.D. 297

PERFORMANCE OR DEFAULT

Acceleration

Where in moving for reconsideration of a decision denying its claim for constructive acceleration, the contractor contended that the bureau's failure to promptly investigate its claim of delay due to unusually severe weather amounted to a denial of a request for a time extension and that the denial plus other actions of Bureau inspectors constituted an order to complete the work by the specified completion date irrespective of excusable delay and thus was an acceleration order, the Board ruled that a denial of a request for a time extension was insufficient in and of itself to constitute constructive acceleration and reviewing the evidence, affirmed the denial of the claim, holding that the actions of the inspectors were regarded as suggestions by the Contractor and accepted or rejected depending on whether the suggestions were practical or economical.

Appeal of Iversen Construction Co. (a/k/a ICCBCC), IBCA-981-1-73 (Apr. 19, 1976) 83 I.D. 175

Acceptance of Performance

A construction contractor's claim for an equitable adjustment based on alleged defective specifications and for corrective work ordered by the Government as a condition to final acceptance of the project was denied, where the specification errors relied upon were obvious, there was no evidence that the contractor had been thereby misled to its detriment and the record did not establish that the corrective work ordered and performed was beyond the requirements of the contract. A claim for costs incurred in replacing door locks was allowed where the evidence established that locks ordered installed by the contracting officer were not a requirement of the contract.

Appeal of J. D. Piercey, IBCA-1035-6-74 (July 16, 1975)

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Acceptance of Performance--Continued

When contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

When the contractor offers materials which the contracting officer discovers are not in total compliance with the specifications, the contracting officer may accept the material if he finds it to be in the best interests of the Government. That acceptance, however, is not final and conclusive if based on, or induced by, a misrepresentation of a material fact.

Where the Government does not issue a written change order and does not give a verbal order which is interpreted by the contractor as a change, no contract change has occurred and the contractor may submit materials conforming to the original specifications. The Government's mere exercise of its option to accept nonconforming goods does not in and of itself constitute a contract change.

Appeal of Nasatka & Sons, Inc., IBCA-1157-6-77 (Sept. 28, 1979) 86 I.D. 513

Breach

Where a contract for furnishing and erecting a steel building was terminated for default and the contractor appealed the termination contending that the specifications were written around the product of a particular manufacturer and that under the material and workmanship clause of the General Provisions (Standard Form 23-A, Oct. 1969 Edition) it was entitled to furnish an "equal" product, the Board holds that the restrictive nature of the specifications is no defense to the termination where the evidence fails to establish that the building offered was, in fact, equal to the building described in the specifications.

Appeal of J. D. Piercey, IBCA-1013-12-73 (Oct. 17, 1975)

Where the Government obligates substantial funds to buy equipment and services but allows an option to extend the lease for computers that are essential for full performance of the contract to lapse and then fails to obligate funds to buy or lease these computers, the Government has prevented performance of the critical part of the contract and the contractor is justified in stopping work.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

A permit for use of land in the Lower Colorado River Area is properly terminated where construction, unauthorized by the terms of the permit, is undertaken by individuals occupying the premises, whose earlier application for an assignment of rights of the permittee has been rejected by BLM.

Robert D. Wall, D-79-7 (Aug. 23, 1979)

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Compensable Delays

In a case where the Government (i) rejected certain conditions attached to the contractor's offer to perform at the contract unit price additional excavation due to a directed change, (ii) determined that the contractor was entitled to an extension of 82 days as the time required to perform the additional excavation which was accepted by the contractor, (iii) recognized that the contractor might be entitled to an additional extension due to certain operations being extended into the inclement weather, and (iv) subsequently granted the contractor a 20-day time extension due to unusually severe weather, the Board finds the contractor to be entitled to an equitable adjustment for increased costs of working in winter weather which were the direct and inevitable consequence of the directed change, rejecting Government contentions that the contractor's claim was barred by accord and satisfaction or that it represented costs for working in inclement weather for which the contract made no provision.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 155

The Government did not cause any compensable delay in the commencement of the work when the Government issued the notice to proceed as soon as the performance and payment bonds required by the contract were received.

Appeal of The Minnesota Chippewa Tribe, IBCA-1025-3-74 (May 19, 1975) 82 I.D. 238

When the Government is obligated to provide the requisite surveying and staking services on a project the contractor is entitled to compensation for delays caused directly by the Government's failure to have sufficient surveying and staking performed or caused directly by erroneous surveying and staking.

Appeal of H. M. Byars Construction Co., and Nevada Paving Inc. (Joint Venture), IBCA-1098-2-76 (June 7, 1977) 84 I.D. 260

An order to build a curved wall was a constructive change outside change order #1 which was for a straight wall. Thus, the claim for extra costs for curved construction and for stand-by time caused by the Government delay in staking wall is compensable.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 629

Excusable Delays

Where a contractor has given notice that it had no intention of performing the contract unless the contract price was increased to cover the rise in material costs and had made no effort to order required supplies, the Government could terminate the contract for default in advance of the time specified for delivery.

An economic rise in costs of materials after a fixed price supply contract is executed does not excuse a contractor from performing the contract.

Appeal of SBM Manufacturing Co., IBCA-1032-4-74 (May 29, 1975)

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Excusable Delays--Continued

Delay caused by failure to have sufficient equipment and personnel available is not a valid reason to allow an extension of time to perform the work required by the contract.

Appeal of Kent Nicoll, IBCA-1040-8-74 (July 31, 1975)

When contractor fails to perform pursuant to specifications in a janitorial service contract and is given notice to correct the deficiencies but fails to do so and offers no excusable cause justifying the failure the contract can properly be terminated for default.

Appeal of Ballwebers Cleaning Service, IBCA-1057-1-75 (Oct. 2, 1975)

A claim for a longer time extension under a construction contract due to unusually severe weather is denied where the contracting officer obtained the local climatological data and after reviewing the data granted a time extension when appellant failed to dispute the data or offer any evidence to support its claim for a longer period.

Appeal of David M. Cox, Inc., IBCA-1079-10-75 (Apr. 7, 1976)

When the contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default and assessing excess reprocurement costs and liquidated damages.

Appeal of Timothy Mason, IBCA-1076-9-75 (July 29, 1976) 83 I.D. 297

Where the Government failed to explain the presence of water which entered a 230 KV reactor while the reactor was under Government control and protected by Government security measures and where the water caused more extensive repairs to the reactor than would otherwise have been necessary, the Board found no basis for determining the portion of the delay for which each party was responsible and held that liquidated damages could not be charged for any of the delay.

Appeal of Addison Construction Co., IBCA-1064-3-75 (Sept. 29, 1976) 83 I.D. 353

While the burden of showing an excusable cause of delay to exist is on the construction contractor, the invoking of this rule presupposes that the Government will leave this responsibility with the contractor, or, if it undertakes to correspond directly with the subcontractors or suppliers concerning delays experienced, it will inform them of the criteria set forth in the contract for establishing an excusable cause of delay.

Appeal of The J. C. Hester Co., Inc., IBCA-1114-7-76 (Jan. 14, 1977)

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Excusable Delays--Continued

Failure to pay subcontractors, suppliers and employees on time and thereby causing delays does not constitute an excusable cause of delay justifying an extension of time.

Appeal of Scona, Inc., IBCA-1094-1-76 (May 6, 1977)

Where the Government obligates substantial funds to buy equipment and services but allows an option to extend the lease for computers that are essential for full performance of the contract to lapse and then fails to obligate funds to buy or lease these computers, the Government has prevented performance of the critical part of the contract and the contractor is justified in stopping work.

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

The Government's opposition to appellant's request for a hearing and its motion for partial summary judgment in a default termination case are both denied where the contractor contends and the Government denies that the delays experienced by the contractor in attempting to perform the contract were excusable and the Board finds that determining whether delays are excusable in such circumstances involves resolving a fact question which should only be done after the parties have had an opportunity to present their evidence at a hearing where one has been requested.

Appeal of Briles Wing & Helicopter, Inc., IBCA-1156-7-77 (Apr. 14, 1978) 85 I.D. 77

The Government's use of records of the preceding 10 years of seasonal rainfall was proper in determining the days of delay which should have been anticipated by the contractor during the winter months in question.

A contractor, who encounters unusually severe weather as it pertains to one phase of contract work but works on other phases of work within that same period, is not entitled to a contract time extension, since the contract work as the whole was not delayed.

Holidays falling within a contract period should have been anticipated by the contractor as nonworking days and thus cannot be adjudged as unforeseeable days of delay.

Appeal of Wunschel & Small, Inc., IBCA-1263-5-79 (Sept. 28, 1979)

Impossibility of Performance

Where the Government obligates substantial funds to buy equipment and services but allows an option to extend the lease for computers that are essential for full performance of the contract to lapse and then fails to obligate funds to buy or lease these computers, the Government has prevented performance of the critical part of the contract and the contractor is justified in stopping work.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Impossibility of Performance--Continued

A claim that performance of a well drilling contract is impossible is denied where the evidence shows only that the contractor has been unable to penetrate beyond 38 feet using two different drilling rigs and there is no evidence to show that no known drilling methods or equipment could enable the construction of a vertically aligned well at the required depth.

Pennsylvania Drilling Co., IBCA-1187-4-78 (Sept. 26, 1978) 85 I.D. 384

When the Government issues a contract which, unknown to the contractor, is defective because insufficient borrow is available from the designated borrow sites, and thereafter the Government issues three de facto change orders, at three different times, to make sufficient borrow available, and where the record discloses that the Government failed to reveal preaward knowledge that haul or overhaul would be required and that it had decided to substantially alter a borrow depth limit on the drawings, the Government is liable under the changes clause for the additional costs shown to be attributable to the Government's actions.

A&J Construction Co., Inc., IBCA-1142-2-77 (Dec. 28, 1978) 85 I.D. 468

Inspection

A special provision authorizing the contracting officer to adjust or revise the limits of the work during performance to reflect the conditions encountered and thereby provide for maximum use of material available with the funds allotted is found to vest the contracting officer with no plenary authority to direct the placement of the beach fill where the authorization to adjust or revise the limits of the work is circumscribed by the use of the word "approximate."

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Where a transformer failed shortly after being placed in service and the contractor acted promptly after notice to return the transformer to the factory for repairs at no cost to the Government, the Board held that the Government could not invoke provisions of the inspection clause of the contract relating solely to correction of defects at the point of installation to charge the contractor with the costs of removing and reinstalling the transformer.

Appeal of Traver Engineering Corp., IBCA-1100-3-76 (Mar. 31, 1977) 84 I.D. 164

The Government failed to show that a rejected wall did not conform to the plans and specifications.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Aug. 17, 1977) 84 I.D. 829

When contractor is at fault for failure to perform the contract within the contract period and cannot establish any cause for an excusable delay, the Government is justified in terminating the contract for default.

Appeal of Underground Utility Services, IBCA-1047-11-74, IBCA-1089-11-75 (Dec. 28, 1977)

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Inspection--Continued

Where the contract specifies a particular test procedure to be used by the Government for compliance testing, and the contractor alleges improper test procedures by the Government, contractor has the burden of proving that the test procedures actually used by the Government were contrary to those specified, and that it incurred extra costs as a result thereof. Contractor failed to sustain its burden of proof, except with respect to the superspan claim.

Euro Construction Co., IBCA-1042-9-74 (Aug. 30, 1978) 85 I.D. 353

When the contractor offers materials which the contracting officer discovers are not in total compliance with the specifications, the contracting officer may accept the material if he finds it to be in the best interests of the Government. That acceptance, however, is not final and conclusive if based on, or induced by, a misrepresentation of a material fact.

Appeal of Nasatka & Sons, Inc., IBCA-1157-6-77 (Sept. 28, 1979) 86 I.D. 513

Release and Settlement

Where the practice of a construction contractor was to separate claims for an equitable adjustment for increased costs due to a change from its claims for delays to the work caused by the change and the evidence established that the contractor's delay claim resulting from a change was pending before the contracting officer at the time the contractor agreed to and executed a modification settling the equitable adjustment for direct costs attributable to the change, the Government's contention that the delay claim was barred by accord and satisfaction was rejected since it is well settled that an agreement does not operate as an accord as to matters not contemplated by the agreement.

Where the contractor's offer to perform certain changed work for a lump sum was accepted and the agreement and the price were incorporated into a modification which the contractor executed without reservation or exception and the lump sum was subsequently paid, the contractor's subsequent claim for delays to the work attributable to the change was barred by accord and satisfaction.

Appeal of Hensel Phelps Construction Co., IBCA-1010-11-73 (May 8, 1975) 82 I.D. 199

A contractor's acceptance of a change order is found to be no bar to consideration of a claim under the Changes clause where the evidence shows that the claim involved had neither arisen nor been discussed prior to the time the change order in question was executed.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Where certain paragraphs of a complaint filed by a construction contractor in an appeal from a damage assessment following a termination for default raised issues as to the propriety of the termination, the Board denied a Government motion to strike those paragraphs based on contentions that the contractor had agreed that delay in completion of the work was not excusable and that the contractor's agreement to a revised date for completion of the work precluded it from raising issues as to the excusability of delays occurring prior to the agreement, since it is well settled that accord and satisfaction is an affirmative defense which must be pleaded and proved and that allegations

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Release and Settlement--Continued

of accord and satisfaction raise factual issues as to the intent of the parties at the time of the alleged accord.

Appeal of Airco, Inc., IBCA-1074-8-75 (Apr. 6, 1976) 83 I.D. 137

Insertion of the words "no exceptions" in a release executed by the contractor was held not to bar further consideration of the contractor's pending request for an extension of time where the Government's instructions for executing the release dealt only with claims in stated dollar amounts and directed the contractor to insert "no exceptions" if no such claims were to be filed and where in their conduct the parties did not treat the release as final.

Appeal of Addison Construction Co., IBCA-1064-3-75 (Sept. 29, 1976) 83 I.D. 353

Where cattle are admitted to an allotment at the beginning of the usual grazing season but prior to the issuance of a license for that season, and payment is later made by a check which recites that it is "payment in full for 1975 grazing fee," the Bureau of Land Management may properly deposit the check, allotting part of the proceeds for the grazing license for the rest of the season, and deposit the remainder of the proceeds in a suspense account pending resolution of the trespass. Such action indicates that the check was not accepted in settlement of the trespass damages, and cashing the check does not constitute an accord and satisfaction of the trespass damages.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

Where a contractor voluntarily signs directives specifying the payments to be made for the additional work ordered without taking any exception thereto, the unqualified acceptance of the directives involved is found to be binding upon the contractor to the extent of the direct costs entailed in performance of the additional work.

Appeal of William P. Bergan, Inc., IBCA-1130-11-76 (Feb. 2, 1979) 86 I.D. 65

Where the Government has accepted a bid conditioned upon the contractor not being prejudiced by changes resulting from energy related shortages and the parties agree in a change order to an increase in price for asphaltic materials, the Board finds the agreement does not constitute an accord and satisfaction precluding further price increases where the evidence shows there was no meeting of the minds and this was evident to the contracting officer prior to execution of the change order.

Nielsons, Inc., IBCA-1126-9-76 (Mar. 8, 1979) 86 I.D. 182

Substantial Performance

To support a claim of substantial completion of a construction contract, appellant must establish that the project was capable of adequately serving its intended purpose.

Appeal of David M. Cox, Inc., IBCA-1079-10-75 (Apr. 7, 1976)

A default termination is found to be proper where no special circumstances were shown to exist justifying a contractor's refusal to proceed with performance in accordance with the contracting officer's decision pending the resolution of the dispute.

Appeals of Willie H. Patterson, IBCA-1115-7-76, IBCA-1116-7-76, IBCA-1117-7-76 and IBCA-1118-7-76 (Feb. 28, 1977)

Where one of the parties was to receive money and a rocked timber road according to specifications as consideration for a contract, and the road is not completed according to specification, nor is it suitable for the intended purpose, the doctrine of substantial performance will not apply as one of the parties is not compelled to accept a measure of performance fundamentally less than that bargained for.

Tomco, Inc., 29 IBLA 298 (Mar. 30, 1977)

Suspension of Work

A claim under the Suspension of Work clause is denied where the Board finds (i) that the contracting officer acted within his discretion in issuing an order directing the suspension of all work in the wake of a devastating storm at Cape Hatteras with a view to determining whether and, if so, how the work under a beach nourishment contract should proceed or, alternatively, whether the contract should be terminated for the convenience of the Government; (ii) that the contractor had failed to show that its costs would have been any less if the stop work order had been issued at an earlier time; (iii) that suspending the contract work for the 5 working days covered by the stop order did not involve delaying the work for an unreasonable period of time; and (iv) that showing the contract work to have been suspended or delayed for an unreasonable period of time is a prerequisite to recovery under the Suspension of Work clause in all cases including those in which a written order to suspend work has been given as contemplated by paragraph (a) of the clause.

Appeal of J. A. LaPorte, Inc., IBCA-1014-12-73 (Sept. 29, 1975) 82 I.D. 459

Appellant's claim for an equitable adjustment under the changes clause for costs alleged to have been incurred when funds available for earnings became exhausted and work on the contract was suspended for 160 days is denied where construction was suspended more than 3 months ahead of the date on which appellant's earnings were scheduled to reach the amount of the fund reservation and where subsequent fund reservations kept the total amount of funds reserved for earnings above the scheduled earnings shown in appellant's own construction program which the Government had approved.

Appeal of S. A. Healy Co., IBCA-944-12-71 (Mar. 31, 1976) 83 I.D. 118

CONTRACTS--Continued

PERFORMANCE OR DEFAULT--Continued

Suspension of Work--Continued

A contractor's claim for additional costs attributed to the Government's delay in requesting contemplated installation services under a contract calling for the furnishing of governors for hydraulic turbines is dismissed for want of jurisdiction where the Board finds that the claim asserted is not redressable under the Changes clause of Standard Form 32 (Supply Contract) or under the special Suspension of Deliveries (or Services) clause which reserves to the Government the right to suspend services and preserves the contractor's right to make claim therefor but fails to provide that any costs attributable to such suspension shall be recoverable by way of an adjustment to the contract price.

Appeal of Cheston Co., IBCA-1093-1-76 (Nov. 19, 1976) 84 I.D. 924

Waiver and Estoppel

A cost-plus-fixed-fee contractor's claim for costs in excess of the estimated cost of the contract, incurred in correcting deficiencies in Government-furnished property, was denied where the contractor knew or should have known that costs being incurred would exceed the estimated cost, but failed to give the notice required by the Limitation of Cost clause and the evidence failed to furnish any basis for excusing the contractor's failure to give the required notice. The contractor's claim for additional fee on the extra work was sustained since the Limitation of Cost Clause is not applicable to such claims.

Appeal of Booz, Allen & Hamilton, Inc., IBCA-1027-3-74 (Mar. 24, 1976) 83 I.D. 95

Upon reconsideration, the Board finds that where the Government issues an "Extra Work Order" under a "force account" provision for minor extra work not provided for in other pay items, at agreed on rates, the contractor is entitled to be paid for inefficiency, rework costs and delay costs when moisture causes borrow material placed under the extra work order, to become muddy. However, the appellant's failure to give prompt notice of the claim under the force account provision caused the Government to order added pay item work, thus the claim must be reduced by the amount of added pay item payment.

Appeal of Rocky Mountain Construction Co., IBCA-1091-12-75 (Nov. 4, 1977) 84 I.D. 898

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

CONVEYANCES

GENERALLY

Where the purchaser from the railroad of unpatented land believed at the time of his purchase that the land was mineral, and there was physical evidence of its mineral character, or if conditions were such that the purchaser should have known then that the land was excepted from the grant to the railroad, he was not a purchaser in good faith within the "innocent purchaser" proviso of sec. 321(b) of the Transportation Act of 1940.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976) 83 I.D. 1

A color of title application is properly rejected where the applicant has failed to establish how conveyances in her chain of title describing lands different from that described in her application, and different from each other, give color of title to the applied for land for the requisite period of time.

Generally, conveyances which describe only a "possessory interest" in a parcel of land do not constitute a claim or color of title within the contemplation of the Color of Title Act.

Jeanne Pierresteguy, 23 IBLA 358 (Jan. 23, 1976) 83 I.D. 23

Extrinsic evidence may be used to make definite the description in a private deed which contains a latent ambiguity, either to determine actual or color of title. Therefore, a color of title claimant may introduce extrinsic evidence to establish whether the deeds in her chain of title were based upon plats, records and other documents which can be read together with the deeds as creating a color of title beyond the actual title shown on an official Federal survey plat.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

Where a corporation allegedly acquired a group of unpatented mining claims, but the instruments of conveyance and the abstract of title are subject to various objections by the Government's title examiner, which the corporation finds are difficult or impossible to cure, the corporation nonetheless may receive a patent to the claims pursuant to the Act of July 9, 1870 (R.S. § 2332; 30 U.S.C. § 38 (1970)), by demonstrating its qualifications under that Act.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977) 84 I.D. 550

Where a corporate patent applicant can trace its ownership of the claim back through a series of conveyances to a mesne owner who had title to the claim quieted in her by the decree of a court of competent jurisdiction, there is no need to look behind the quiet title decree to an earlier break in the chain of title unless there is reason to believe that the interest which is unaccounted for was not disposed of by the litigation. However, a court decree which merely distributes the assets of a decedent's estate is not a "quiet title decree" in this context, and does not ordinarily foreclose the interests of third parties who hold the record title to mining claims.

Frattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

INTEREST CONVEYED

In the absence of legislation by Congress, a patent from the United States does not convey an implied easement by way of necessity across public land.

Sun Studs, Inc., 27 IBLA 278 (Oct. 26, 1976) 83 I.D. 518

CONVEYANCES--Continued

REVERTERS

The Recreation and Public Purposes Act, and the regulations thereunder, do not authorize additional payment for the issuance of a supplemental patent (which voids an earlier patent's reversionary provision) as an alternative to forfeiture for noncompliance with the Act's provision that land patented under the Act only be used for an established or definitely proposed public project within a reasonable time following issuance of patent. The Department can alienate interests in public lands only within the limits authorized by law; therefore, issuance of a supplemental patent which eliminates the Act's mandatory reversionary provision is impermissible.

Okanogan County Public Utility, District No. 1, Washington, 22 IBLA 342 (Nov. 14, 1975)

COOPERATIVE AGREEMENTS

A communitization agreement involving an oil and gas lease for Cheyenne-Arapaho allotted lands may properly be approved by the Area Director, BIA, pursuant to 25 CFR 172.24 where that agreement incorporates all the terms and conditions of a State pooling order which joined the lessee with all other holders of mineral interests in the other tracts involved in the unit agreement.

Cotton Petroleum Corp. v. Samedan Oil Corp., 29 IBLA 13 (Feb. 8, 1977)

COURTS

A demand by the Geological Survey for prejudgment interest for delayed payment of additional royalties owed to the Government is not necessarily unenforceable in the courts because it was not asserted as a counterclaim under Rule 13(a) of the Federal Rules of Civil Procedure.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

A consent decree obtained by the Securities and Exchange Commission establishes no precedent for cases involving different parties. Allegations of Federal securities law violations in connection with Federal oil and gas leasing should be directed to the Securities and Exchange Commission, the agency with jurisdiction over such matters. The jurisdiction of the Board of Land Appeals does not extend to matters exclusively under the jurisdiction of the SEC, but goes to matters involving compliance with oil and gas leasing statutes and regulations.

Marion Bacil, 35 IBLA 366 (June 23, 1978)

A consent decree obtained by the Securities and Exchange Commission (SEC) establishes no precedent for cases involving other parties. The Board of Land Appeals lacks jurisdiction over matters delegated to the SEC. Allegations of Federal Securities Law violations should be directed to the SEC rather than to the Board of Land Appeals.

William Miller, 36 IBLA 349 (Aug. 28, 1978)

COURTS--Continued

Where a corporate patent applicant can trace its ownership of the claim back through a series of conveyances to a mesne owner who had title to the claim quieted in her by the decree of a court of competent jurisdiction, there is no need to look behind the quiet title decree to an earlier break in the chain of title unless there is reason to believe that the interest which is unaccounted for was not disposed of by the litigation. However, a court decree which merely distributes the assets of a decedent's estate is not a "quiet title decree" in this context, and does not ordinarily foreclose the interests of third parties who hold the record title to mining claims.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

DELEGATION OF AUTHORITY

GENERALLY

The Bureau of Land Management has been delegated authority over the adjudication of reclamation homestead applications.

Richard F. Crill et al., 18 IBLA 426 (Feb. 14, 1975)

A stipulation requiring an oil and gas lessee to provide a certified statement by an archaeologist concerning the existence of archaeological values on lands to be disturbed by the lessee does not constitute an unlawful delegation of authority because the purpose of the statement is to notify an authorized officer of the Department who retains the authority to determine whether the archaeological data are significant and whether such data are being or may be irrevocably lost or destroyed.

Cecil A. Walker, Alan C. F. Dillet, 26 IBLA 71 (July 5, 1976)

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Ross et al., 27 IBLA 4 (Sept. 17, 1976)

Where the Secretary has declined to exercise his jurisdiction, a decision rendered by this Board is final for the Department. Hence, statements by BLM and arguments of the Solicitor, while valuable to the Board, are not binding upon the Board.

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 7, 1979)

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

DELEGATION OF AUTHORITY--Continued

EXTENT OF

Since the Bureau of Land Management has no authority to issue a public land order withdrawing land, such authority existing only in the Secretary, the Under Secretary, and the Assistant Secretaries of the Department of the Interior, recommendations by officers of the Bureau of Land Management relating to withdrawals are not subject to review under the provisions of 43 CFR 4.450-2 or 43 CFR 4.410.

City of Kotzebue, 26 IBLA 264 (Aug. 20, 1976) 83 I.D. 313

DESERT LAND ENTRY

GENERALLY

An arrangement by which an entity obtains mortgages on desert land entries and also obtains leases of a possible 12-year duration on the desert land entries, the result of which is the vesting of effective control of the entries in such entity, constitutes a holding within the purview of sec. 7 of the Act of Mar. 3, 1877, *as amended*.

"Hold." Any person or entity which has acquired actual possession and the right thereof to more than 320 acres of desert lands "holds" such acreage within the meaning of the prohibition of sec. 7 of the Act of Mar. 3, 1877, *as amended*.

"Otherwise." As used in sec. 7 of the Act of Mar. 3, 1877, *as amended*, "no person or association of persons shall hold by assignment or otherwise," "otherwise" is not limited to other means equivalent to assignment but rather embraces all mechanisms whereby control of and benefit from an entry or entries are accumulated and transferred.

Violation of the prohibition against holding an excess of 320 acres constitutes a failure to comply with the requirements of law and such entries are properly canceled.

Estoppel will not lie against the Government where there is no showing that the parties to illegal agreements relied in any way on the statements or acts of Government officials.

United States v. G. Patrick Morris et al., 19 IBLA 350 (Apr. 7, 1975) 82 I.D. 146

Sec. 7 of the Act of Mar. 3, 1891, provides that no person or association of persons shall hold by assignment or otherwise, prior to the issue of patent, more than 320 acres of arid or desert lands; the terms "hold," "assignment" and "otherwise" are words of broad significance and will be defined in such manner to effectuate the purposes of the Act, to wit, to prevent anyone from holding more than 320 acres of desert lands to the exclusion of bona fide settlers or the entrymen of record.

Any person or association of persons who controls, possesses and receives substantial benefits from desert lands will be regarded as "holding" such lands within the meaning of the Act of Mar. 3, 1891.

United States v. Golden Grigg et al., 19 IBLA 379 (Apr. 7, 1975) 82 I.D. 123

DESERT LAND ENTRY--Continued

GENERALLY--Continued

Excepting in the State of Nevada, no person shall be entitled to make entry of desert lands unless he be a resident citizen of the State in which the land sought to be entered is located. An applicant's conditional, future-oriented intention to reside in the State is insufficient to qualify.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975) 82 I.D. 377

Alton and Velcie Hadlock, 32 IBLA 372 (Oct. 31, 1977)

A Federal district court jury verdict in a suit to cancel desert land patents, that the entrymen and their purchaser under an illegal executory contract did not commit fraud against the United States, does not collaterally estop this Department from adjudicating a contest grounded on the illegal executory contract against the purchaser's own entry, because the legal standard applicable in the subsequent contest is different than that in the fraud action--a desert land entry can be subject to cancellation for acts that do not constitute fraud.

"Hold by assignment or otherwise." The purchaser of desert land under an illegal executory contract to convey the land subsequent to patent "holds" that land within the meaning of the acreage limitation of sec. 7 of the Desert Land Act, *as amended*, 43 U.S.C. § 329 (1970).

Rights under an executory contract to acquire property entered into by the husband alone are presumed to be community property under California law, and a conveyance as community property to husband and wife in settlement of litigation regarding the contract corroborates the presumption; both spouses stand on equal footing with respect to charges, based on the executory contract, of violating the acreage limitations in sec. 7 of the Desert Land Act, 43 U.S.C. § 329 (1970).

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

It is proper to reject applications for desert land entries filed for lands which have been classified by the Secretary, pursuant to the petition classification procedure set forth in 43 CFR Subpart 2450, as unsuitable for desert land entry and, therefore, are not open for disposition under the desert land laws. The decision of the Secretary is the final Departmental action and the applicants cannot have a review on the merits of an appeal from the subsequent decision rejecting their applications.

Guy A. Martin, Ada E. Martin, 26 IBLA 254 (Aug. 18, 1976)

Rejection of a desert land entry application because the applicant has failed to supply satisfactory evidence of a right to the permanent use of sufficient water to irrigate and reclaim the irrigable portion of the entry will be set aside and the applicant's request for a hearing granted where there is conflicting evidence in the record concerning the sufficiency of the water supply and where the applicant has alleged facts which, if proved, would result in a different conclusion.

Dixie L. Bjornestad et al., 27 IBLA 201 (Oct. 6, 1976)

DESERT LAND ENTRY--Continued

GENERALLY--Continued

Rejection of an application for desert land entry on account of a failure to include therein post office addresses of witnesses making witness statements is without prejudice to refiling of a corrected application where there is no competing interest for the same land.

William J. Hart, Lucile E. Hart, 30 IBLA 138 (May 12, 1977)

A desert land entry petition-application is properly rejected where the lands applied for therein have been withdrawn by a public land order to protect recreational, historical, and geological values in public lands along the North Platte River.

Objections raised on appeal to the Interior Board of Land Appeals to the merits of withdrawal of public lands in order to protect recreational, historical, and geological values in public lands along the North Platte River, will not vitiate its effect as a bar to the availability of the lands under the desert land laws, as it is not within the Board's function or authority to take the steps necessary to revoke the withdrawal, restore the lands to the operation of the public land laws, and classify it as suitable for disposition as a desert land entry.

Cecilia J. Cuin, 36 IBLA 250 (Aug. 15, 1978)

APPLICANTS

Excepting in the State of Nevada, no person shall be entitled to make entry of desert lands unless he be a resident citizen of the State in which the land sought to be entered is located. An applicant's conditional, future-oriented intention to reside in the State is insufficient to qualify.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975)
82 I.D. 377

Alton and Valois Hadlock, 32 IBLA 372 (Oct. 31, 1977)

APPLICATIONS

Where a desert land applicant, whose application is prior in time, appeals from a decision of the Bureau of Land Management, dismissing his protest against affording priority to a later-filed desert land application on the basis that the earlier-filed application was incomplete, the cases are properly remanded to the Bureau of Land Management for action on the respective applications, so as to avoid piecemeal adjudication.

George M. Crapo, Richard L. Crapo, 19 IBLA 208 (Mar. 21, 1975)

Where a desert land applicant appeals from a decision of the Bureau of Land Management holding his application incomplete and, therefore, without priority of filing as against subsequent applications which were allegedly perfected before the earlier application was corrected and refiled, the case will be remanded for final action on the respective applications so as to avoid premature, piecemeal adjudication.

Michael E. Heaney, 21 IBLA 339 (Aug. 18, 1975)

Nelda E. McAndrew, 24 IBLA 205 (Mar. 22, 1976)

DESERT LAND ENTRY--Continued

APPLICATIONS--Continued

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia C. Ellis, 24 IBLA 387 (May 3, 1976)

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed therefor and any payment submitted therewith will be returned. Should there be a subsequent reclassification as suitable for disposal under the desert land laws, the land will be opened to entry on an equal opportunity basis.

One who submits a desert land entry petition-application for lands which have been classified as being unsuitable for disposal under the desert land laws gains no preference right to such lands should they be reclassified as disposable under the desert land laws. Lands which are reclassified as suitable for disposal will be opened to entry on an equal opportunity basis.

A desert land entry petition-application for land classified as being unsuitable for disposal under the desert land laws may not be held in suspense pending the possible future availability of the land.

Ralph G. Faulkner et al., 26 IBLA 110 (July 26, 1976)

Failure to answer completely a question on an application form for a desert land entry concerning citizenship of the applicant is not an adequate basis for rejecting the application when the requested information is readily apparent elsewhere on the application form.

Failure to include as required by 43 CFR 2521.2(b) the post office addresses of witnesses whose statements are part of an application for desert land entry is an adequate basis for rejecting the application.

Rejection of an application for desert land entry on account of a failure to include therein post office addresses of witnesses making witness statements is without prejudice to refiling of a corrected application where there is no competing interest for the same land.

William J. Hart, Lucile E. Hart, 30 IBLA 138 (May 12, 1977)

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed.

Dulce Van Tassel, 33 IBLA 221 (Dec. 22, 1977)

DESERT LAND ENTRY--Continued

APPLICATIONS--Continued

A desert land entry petition-application is properly rejected where the lands applied for therein have been withdrawn by a public land order to protect recreational, historical, and geological values in public lands along the North Platte River.

Cecilia J. Cain, 36 IBLA 250 (Aug. 15, 1978)

Where the Secretary by appropriate notice in the Federal Register has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in Federal Register of termination of classification, BLM properly denied petition-application for desert land entry.

Paul E. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

Melvin V. Frandsen, Mary C. Frandsen, 43 IBLA 130 (Sept. 26, 1979)

ASSIGNMENT

Where an allowed desert land entry was assigned to a qualified individual and the assignment was duly approved, a subsequent determination that the entry was illegal from its inception because the original entryman was not qualified will not afford a basis for cancellation of the entry where it is established that the assignee was unaware of his assignor's lack of qualifications and proceeded in good faith to develop the entry.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975)
82 I.D. 377

CANCELLATION

Violation of the prohibition against holding an excess of 320 acres constitutes a failure to comply with the requirements of law and such entries are properly canceled.

Estoppel will not lie against the Government where there is no showing that the parties to illegal agreements relied in any way on the statements or acts of Government officials.

United States v. G. Patrick Morris et al., 19 IBLA 350 (Apr. 7, 1975)
82 I.D. 146

Any desert land entry made for the use and benefit of others with intent to circumvent the provisions of the desert land laws must be regarded as fraudulent and will be canceled.

United States v. Golden Grigg et al., 19 IBLA 379 (Apr. 7, 1975)
82 I.D. 123

Where an allowed desert land entry was assigned to a qualified individual and the assignment was duly approved, a subsequent determination that the entry was illegal from its inception because the original entryman was not qualified will not afford a basis for cancellation of the entry where it is established that the assignee was unaware of his assignor's lack of qualifications and proceeded in good faith to develop the entry.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975)
82 I.D. 377

DESERT LAND ENTRY--Continued

CANCELLATION--Continued

In the case of a desert land entry contestee who violates the 320-acre limitation on holding desert land because he is the "purchaser" of two other 320-acre entries under an illegal executory contract to convey after patent, all entries held by the "purchaser" are subject to cancellation, and the Department may proceed by way of contest against the "purchaser's" own entry, which was not a subject of the illegal contract.

The doctrine of voluntary rescission--which allows an entryman, who was, although in good faith, party to a contract that violated the desert land law, to proceed to the merits of his proof upon repudiation of the contract--will not be applied when: (1) repudiation of the contract was not truly voluntary; (2) the rescission occurred long after the entries' lives expired; (3) the illegal contract involved a complex of four entries; and (4) no other mitigating circumstances are present.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

A desert land entry is properly canceled when the statutory life of the entry, including an extension that was granted, has expired without reclamation and cultivation of the entry, as required under the desert land law, and the entrywoman fails to show that she is entitled to a further extension of time to complete the requirements of the desert land law.

Pamela M. Brewer, 26 IBLA 366 (Sept. 8, 1976)

Rejection of an application for desert land entry on account of a failure to include therein post office addresses of witnesses making witness statements is without prejudice to refiling of a corrected application where there is no competing interest for the same land.

William J. Hart, Lucile E. Hart, 30 IBLA 138 (May 17, 1977)

Where the deadline for making final proof of compliance on a desert land entry passes without the entryman having made final proof, his entry is properly canceled, even though a request for an additional extension of time within which to file such final proof was pending on the deadline date, where the request for extension is subsequently denied.

Thomas C. Hickey, 34 IBLA 86 (Feb. 22, 1978)

CLASSIFICATION

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed.

Dulce Van Tassel, 33 IBLA 221 (Dec. 22, 1977)

Where the Secretary by appropriate notice in the Federal Register has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in Federal Register of termination of classification, BLM properly denied petition-application for desert land entry.

Paul E. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

Continued--

DESERT LAND ENTRY--Continued

CLASSIFICATION--Continued

Melvin V. Frandsen, Mary C. Frandsen, 43 IBLA 130 (Sept. 26, 1979)

DISTRIBUTION SYSTEM

Neither the law nor the regulations prohibit the use of a portable aluminum pipe irrigation system in the reclamation of lands in a desert entry, nor is there any affirmative requirement that the irrigation system or specific components thereof be permanently installed on the entry.

Wallace S. Bingham, 21 IBLA 266 (Aug. 11, 1975)
82 I.D. 377

EXTENSION OF TIME

An application for an extension of time for the submission of final proof of a desert land entry is properly rejected where the entrywoman is unable to show that her failure to reclaim the land in her entry within the statutory life of the entry is due, without fault on her part, to unavoidable delay in the construction of irrigation facilities intended to convey water to the entry, and where it appears, rather, that the failure was the result either of the lack of financing, lack of diligence in carrying out the development work, or lack of foresight in anticipating the burden of doing the work. A second extension of time to file final proof on the entry is properly denied to an entrywoman who fails to show that she utilized a first extension in a reasonable effort to accomplish the development work.

Pamela M. Brower, 26 IBLA 366 (Sept. 8, 1976)

Application for second extension of time for submission of final proof on desert land entry is properly rejected where entryman is unable to show that failure to reclaim land in entry within statutory life of entry is because of unavoidable delay, without fault on part of entryman, in cultivation and construction of irrigation works.

Ivan J. Brower, 32 IBLA 286 (Sept. 27, 1977)

Where a desert land entryman admits that there were alternate measures which might have been taken to achieve compliance by the deadline date therefor, as extended, but which he failed to employ, BLM's determination that resulting delays were not beyond his control, and that accordingly he is not entitled under 43 CFR 2522.5 to a third extension of time within which to make final proof, will not be disturbed. Inadequacy of financial resources to take available alternative steps does not excuse his failure to comply.

A third extension of time to file final proof of compliance on a desert land entry is properly denied to an entryman who acknowledges that he failed to make full use of previous extensions.

Where the deadline for making final proof of compliance on a desert land entry passes without the entryman having made final proof, his entry is properly canceled, even though a request for an additional extension of time within which to file such final proof was pending on the deadline date, where the request for extension is subsequently denied.

Where the entryman makes admissions and submits evidence which establish conclusively that his failure to "prove up" his desert land entry during its initial term and two extensions was not the result of unavoidable delay, and that the failure was not without fault on his part, no further administrative proceedings are required prior to rejecting his application for a third extension.

Thomas D. Hickey, 34 IBLA 86 (Feb. 22, 1978)

A third extension of time to file final proof of compliance on a desert land entry is properly denied to an entryman where there is no reasonable prospect that, if the extension is granted, he will be able to make final proof of reclamation, irrigation, and cultivation within the time required by law.

Howard D. Marshall, 43 IBLA 271 (Oct. 15, 1979)

FINAL PROOF

The doctrine of voluntary rescission--which allows an entryman, who was, although in good faith, party to a contract that violated the desert land law, to proceed to the merits of his proof upon repudiation of the contract--will not be applied when: (1) repudiation of the contract was not truly voluntary; (2) the rescission occurred long after the entries' lives expired; (3) the illegal contract involved a complex of four entries; and (4) no other mitigating circumstances are present.

United States v. Elodymae Zwang, United States v. Darrell Zwang, 26 IBLA 41 (July 9, 1976) 83 I.D. 280

LANDS SUBJECT TO

It is improper for the Bureau of Land Management to reject desert land applications on the basis of directives within a deleted regulation which required that such applications be rejected when the lands described therein were included within a previously filed State application for a temporary withdrawal under the Act of Mar. 15, 1910, which permits the Secretary to temporarily withdraw lands in furtherance of the purposes of the Carey Act. In the absence of a recodification of the directives in the deleted regulation, the Bureau should suspend action on all applications filed subsequent to the withdrawal application pending final action on the application for withdrawal.

Kevin D. Ellis, Sylvia C. Ellis, 24 IBLA 387 (May 3, 1976)

When lands have been classified under a final order of the Secretary of the Interior as being unsuitable for disposal under the desert land laws, a desert land entry petition-application will not be allowed.

Dulce Van Tassel, 33 IBLA 221 (Dec. 22, 1977)

Where the Secretary by appropriate notice in the Federal Register has classified certain lands for multiple use management and such lands are segregated from desert land entry, and the classification has not been terminated by either a reclassification or publication in Federal Register of termination of classification, BLM properly denied petition-application for desert land entry.

Paul M. Jenkins, 39 IBLA 141 (Jan. 29, 1979)

DESERT LAND ENTRY--Continued

WATER SUPPLY

Rejection of a desert land entry application because the applicant has failed to supply satisfactory evidence of a right to the permanent use of sufficient water to irrigate and reclaim the irrigable portion of the entry will be set aside and the applicant's request for a hearing granted where there is conflicting evidence in the record concerning the sufficiency of the water supply and where the applicant has alleged facts which, if proved, would result in a different conclusion.

Dixie L. Bjornestad et al., 27 IBLA 201 (Oct. 6, 1976)

ENDANGERED SPECIES ACT OF 1973

SECTION 7

Consultation

Sec. 7 of the Endangered Species Act and the Secretary's regulations require consideration of not only the impacts of the particular activity subject to consultation, but also the cumulative effects of other activities or programs which may have similar impacts on a listed species or its habitat.

In determining which projects or activities should be evaluated while reviewing cumulative impacts to endangered species or their habitat, a "rule of reason" should be applied which considers, *inter alia*, the sequence of those impacts, the degree of administrative discretion remaining to be exercised, and similar factors.

Cumulative Impacts - Sec. 7 of the Endangered Species Act (Dec. 28, 1973, 87 Stat. 884, 892), M-36905 (July 19, 1978) 85 I.D. 275

Critical Habitat

A Federal agency's responsibility to insure against critical habitat modification or destruction cannot be satisfied with the adoption of project modifications which ameliorate and reduce, but do not eliminate, the adverse impacts of the project upon critical habitat.

The Applicability of the Concept of Mitigation to Critical Habitat, M-36895 (July 14, 1977) 84 I.D. 403

Mitigation

A Federal agency's responsibility to insure against critical habitat modification or destruction cannot be satisfied with the adoption of project modifications which ameliorate and reduce, but do not eliminate, the adverse impacts of the project upon critical habitat.

The Applicability of the Concept of Mitigation to Critical Habitat, M-36895 (July 14, 1977) 84 I.D. 403

ENVIRONMENTAL POLICY ACT

(*See also* National Environmental Policy Act of 1969--if included in this Index.)

Where an administrative decision is made that a proposed action is not a major Federal action which will significantly affect the quality of the human environment, so that no environmental impact statement need be filed, that decision will be affirmed on review if it appears to have been made by an authorized officer, in good faith, based upon a proper and sufficient environmental analysis record compiled in accordance with established procedures, and is the reasonable result of his study of such record.

Citizens' Committee to Save Our Public Lands, 29 IBLA 48 (Feb. 16, 1977)

An application for a communication site under 43 U.S.C. § 961 (1970) should be denied where utilization of an existing right-of-way is practical under 43 U.S.C. § 1763 (19__) and where the proposed site would have an adverse impact on the environment.

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

When parties are to offer evidence as to costs, to a mining claimant, of measures required by statute or regulation to mitigate environmental impact from development of a mine, it would be helpful for a Government contestant to assist an intervening State government and the claimant in computation of such costs; however, under 42 U.S.C. § 4332 (1970), an environmental impact statement is not required prior to the nondiscretionary Federal action of issuance of a mineral patent.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

To secure the exemption under sec. 404(r) of the Federal Water Pollution Control Act for projects described in an environmental statement, compliance with seven specific conditions is required. The exemption does not apply to the maintenance of existing Federal projects, but only to new construction. While the exemption provides an alternative procedure to achieve compliance with sec. 404 of the Act for a limited category of Federal projects under very specific conditions, it does not lessen the substantive requirements that apply to the discharge of dredged or fill material.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979) 86 I.D. 400

ENVIRONMENTAL QUALITY

(*See also* Air Quality, Pollution, Water Pollution Control--if included in this Index.)

GENERALLY

As a condition precedent to the issuance of an oil and gas lease, the Department of the Interior may require an applicant to accept a reasonable surface management stipulation for the protection of wildlife and watershed values.

Richard P. Cullen, 18 IBLA 414 (Feb. 10, 1975)

The execution of special stipulations as a condition precedent to issuance of oil and gas leases for land located in a national forest may be required at the discretion of the Secretary of the Interior in order to protect environmental and other land use values. The need for the stipulation should be clear and the stipulation should be a reasonable means to the intended purpose. The Forest Service's recommended stipulations will be carefully considered by the Department, but the

ENVIRONMENTAL QUALITY--Continued

GENERALLY--Continued

final authority for oil and gas leasing on public domain land rests in this Department.

Earl R. Wilson, 21 IBLA 392 (Aug. 27, 1975)

The execution of special stipulations as a condition precedent to the issuance of oil and gas leases for land located in national forests may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational, and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

Bill J. Maddox, 22 IBLA 97 (Sept. 22, 1975)

Where the reason given for the partial rejection of a noncompetitive geothermal lease application is that the Environmental Analysis Record has recommended against leasing the lands because they lie within an area associated with historic trails, and the records indicate that the State Office has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether the lands should be leased with protective stipulations.

Richard C. Hoefle, 24 IBLA 181 (Mar. 16, 1976)

Kirk Greene, 24 IBLA 262 (Mar. 29, 1976)

The Secretary of the Interior may require an oil and gas lease applicant to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of a lease. Where a Bureau of Land Management district-wide environmental analysis record establishes the likelihood that significant archaeological values are prevalent in the district and may be found in the land embraced by leases in that district, a special protective stipulation is not unreasonable solely because no archaeological values have yet been discovered in the lands in the lease offer.

Oil and gas lessees must bear the expenses occasioned by compliance with stipulations for the protection of the environment and other land use values.

Cecil A. Walker, Alan C. F. Dille', 26 IBLA 71 (July 9, 1976)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern E. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

ENVIRONMENTAL QUALITY--Continued

GENERALLY--Continued

It is proper to include environmental protection stipulations in a phosphate lease even though the stipulations apply to privately owned surface lands overlying the federally reserved mineral estate under lease or to privately owned lands used in conjunction with the lease.

Cominco American, Inc., 26 IBLA 329 (Sept. 1, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to areas withdrawn for wildlife conservation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes, 27 IBLA 46 (Sept. 23, 1976)

An application for a communication site under 43 U.S.C. § 961 (1970) should be denied where utilization of an existing right-of-way is practical under 43 U.S.C. § 1763 (19__) and where the proposed site would have an adverse impact on the environment.

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, proposed special stipulations must be supported by valid reasons which will be weighed by this Department with due regard for the public interest. It is the Bureau's responsibility to impose stipulations which are necessary, appropriate and reasonably related to oil and gas activities, and a stipulation which would forbid the lessee to occupy the surface must be set aside on appeal where BLM fails to provide adequate justification for its imposition and fails to show that it has considered less stringent stipulations.

Neva H. Henderson, 31 IBLA 217 (July 6, 1977)

Where, rather than delay action on an oil and gas lease offer pending a wilderness review and management decision pursuant to sec. 603 of the Federal Land Policy and Management Act, the Bureau of Land Management proposes to issue the lease immediately subject to a "no surface occupancy" stipulation under the apparently mistaken impression that the applicant had so requested, the decision will be set aside and action on the lease offer will be deferred until a final decision can be made.

Dell K. Hatch and Amoco Production Co., 33 IBLA 138 (Dec. 19, 1977)

ENVIRONMENTAL QUALITY--Continued

GENERALLY--Continued

It is appropriate for the Bureau of Land Management to reject a right-of-way application for a pipeline to convey water from a spring on public lands to private lands where it has determined that the overall effect of granting similar applications in a given area would be adverse to the public interest and allowance of one application might establish a precedent contrary to the public interest.

Stanley S. Leach, Roxanna B. Leach, 35 IBLA 53 (May 9, 1978)

Where the primary reason for the State Office rejection of a millsite application appears to be that the Environment Protection Agency has recommended against the issuance of a patent because of possible adverse effects on the environment which the Federal Government will not be able to control if patent issues, the decision of the State Office will be reversed where the applicant shows that he has fulfilled the requirement of 30 U.S.C. § 42 (1970), and where the State having jurisdiction over the operation after patent issues has a strict environmental protection law with safeguards against possible adverse effects on the environment.

Utah International, Inc., 36 IBLA 219 (Aug. 8, 1978)

The Secretary of the Interior is obligated to support and implement the national policy expressed by Congress in the National Environmental Policy Act of 1969.

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, on appeal such special stipulations must be supported by valid reasons which will be weighed by the Department with due regard for the public interest, and where the stipulation and reason therefore does not appear in the record, the record must be augmented on remand.

James M. Chudnow, 43 IBLA 375 (Oct. 31, 1979)

The Bureau of Land Management, on behalf of the Secretary of the Interior, may condition issuance of a lease on the execution of a no surface occupancy stipulation where on appeal the record shows that the Bureau has adequately considered the factors involved and the stipulation is a reasonable means to accomplish proper Departmental purposes.

H. E. Shillander, 44 IBLA 216 (Dec. 11, 1979)

ENVIRONMENTAL STATEMENTS

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

ENVIRONMENTAL QUALITY--Continued

ENVIRONMENTAL STATEMENTS--Continued

The Secretary of the Interior may require an oil and gas lease applicant to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of a lease. Where a Bureau of Land Management districtwide environmental analysis record establishes the likelihood that significant archaeological values are prevalent in the district and may be found in the land embraced by leases in that district, a special protective stipulation is not unreasonable solely because no archaeological values have yet been discovered in the lands in the lease offer.

Cecil A. Walker, Alan C. E. Dille', 26 IBLA 71 (July 9, 1976)

Where an administrative decision is made that a proposed action is not a major Federal action which will significantly affect the quality of the human environment, so that no environmental impact statement need be filed, that decision will be affirmed on review if it appears to have been made by an authorized officer, in good faith, based upon a proper and sufficient environmental analysis record compiled in accordance with established procedures, and is the reasonable result of his study of such record.

Citizens' Committee to Save Our Public Lands, 29 IBLA 48 (Feb. 16, 1977)

To secure the exemption under sec. 404(r) of the Federal Water Pollution Control Act for projects described in an environmental statement, compliance with seven specific conditions is required. The exemption does not apply to the maintenance of existing Federal projects, but only to new construction. While the exemption provides an alternative procedure to achieve compliance with sec. 404 of the Act for a limited category of Federal projects under very specific conditions, it does not lessen the substantive requirements that apply to the discharge of dredged or fill material.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979)
86 I.D. 400

EQUITABLE ADJUDICATION

GENERALLY

Where the claimant of a trade and manufacturing site who has substantially complied with the requirements of law and regulation makes a legitimate contract for the conditional sale of the business to another before filing his application for patent, equitable adjudication will be invoked to prevent an intervening land classification action from operating to destroy the interest of both the claimant and his buyer and defeating the purpose of the Act.

Paul E. Jovick, 19 IBLA 283 (Apr. 7, 1975)

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimants concerning the validity of the claims with the intention that the claimants should act in reliance thereon, with the result that the claimants were thereby induced to do so, to their ultimate damage.

United States v. A. R. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

A request for equitable adjudication relief to permit purchase of a headquarters site claim is premature in the absence of an application to purchase the claim.

The equitable adjudication authority is not appropriate and may not be applied to permit the filing of a headquarters site notice of location after the land has been withdrawn.

Rene P. Lamoureux, 20 IBLA 243 (May 16, 1975)

Equitable adjudication authority is not appropriate and may not be applied to permit filing of a homesite notice of location after the land has been withdrawn.

Knute P. Lind, 21 IBLA 81 (June 27, 1975)

Equitable adjudication is not appropriate where a headquarters site applicant has not substantially complied with the law.

Ray W. Ferguson, 22 IBLA 160 (Sept. 30, 1975)

Where an applicant to purchase a trade and manufacturing site or a headquarters site states he was frustrated in completing his improvements and showing sufficient use of the land as required by the law because of more difficult or complex problems than anticipated, but has not shown that this operation could reasonably be expected to be successful, such problems will not afford any basis for equitable adjudication of his application to purchase.

United States v. Ronald P. Tippetts, 29 IBLA 348 (Mar. 31, 1977)

A factual error by the Government is not a basis for imposing the extraordinary relief of equitable estoppel where the person seeking the estoppel became aware of the true facts shortly thereafter, had not substantially complied with the public land laws, and continued knowingly and repeatedly trespassing on lands not open to settlement, where the Government makes prompt, reasonable, and consistent efforts to correct any misunderstanding caused by this error, and where the Government's actions did not result in the foreclosure of an opportunity to assert a legal right.

A homestead claimant who contracts for the planting of "enough acreage to satisfy the homestead law" in an essentially worthless hay crop in an area of Alaska where there are no livestock, and with no intention to harvest or utilize it even though it successfully matured, has performed only a token compliance which is, prima facie, demonstrative of bad faith. A good faith devotion of the land to productive and profitable agricultural use is essential to satisfy the purpose and intent of the agricultural land entry laws.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

When a first-drawn oil and gas lease offer is disqualified because it is unsigned or undated, the Department's equitable adjudication authority may not be invoked to divest the first-*qualified* drawee of his preference right to a lease.

David L. Hansen, John D. Hurdle, John F. and Inez R. Cramer, 32 IBLA 272 (Sept. 27, 1977)

Where a mining claimant alleges that forest rangers allowed him to build and occupy a cabin on the claim without informing him that it was illegal to do so, it is not appropriate to estop the Government from declaring the claim null and void, for several reasons: mere acquiescence in an action is not "affirmative misconduct" by a Government employee, as it was not false representation or concealment of material facts done with the intent that the claimant rely thereon; the impression created by the inaction of the forest rangers was not erroneous and, so, claimant was not misled, as he could rightfully move the cabin to the site and occupy it as long as so doing was incident to mineral development of a valid mining claim; and because the claimant should have known that he could not live on the premises indefinitely despite his failure to develop the claim, and that he would have to move the cabin or lose it, if the claim was declared null and void.

United States v. Joseph Larsen and Perrin Larsen, 36 IBLA 130 (July 25, 1978)

Where land within a trade and manufacturing site is withdrawn from appropriation prior to cognizable occupancy and use for purposes of trade or manufacture under 43 U.S.C. § 687a (1970) and 43 CFR Subpart 2562, an invalid claim cannot be perfected, and appellant has not shown wherein she is entitled to equitable adjudication under 43 CFR 1871.1.

Sandy Fondy, 37 IBLA 40 (Sept. 18, 1978)

Equitable adjudication of an application to purchase a headquarters site claim filed at least 8 years after the land has been withdrawn must be denied as substantial compliance with the law has not been made where neither occupancy of the site prior to the withdrawal nor after the withdrawal could validly be considered under the law.

Rene P. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

Equitable estoppel against the Government will not lie where there has been no affirmative misconduct by an authorized agent or officer resulting in a misrepresentation of fact upon which a party was led to rely to his ultimate detriment.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

The Government is not estopped from rejecting oil and gas lease offers because the offerors' leasing agent alleges that he relied on a representation by officers of BLM that his disclaimer of his interest in the offer was valid and therefore failed to amend his service agreement with his clients to remove the interest-creating provision, where it appears that BLM did not in fact so represent.

Frederick W. Lowey et al., 40 IBLA 381 (May 18, 1979)

EQUITABLE ADJUDICATION--Continued

GENERALLY--Continued

The Alaska Native Claims Settlement Act, 43 U.S.C. § 1617 (1976), repealed the Act of May 17, 1906, *as amended*, 43 U.S.C. §§ 270-1 to 270-3 (1970), with the exception of applications pending on Dec. 18, 1971. A State Office decision rejecting a Native allotment application for an additional parcel of land filed pursuant to the Act of May 17, 1906, after Dec. 18, 1971, will be affirmed. Equitable adjudication, which requires substantial compliance with the law, will not be invoked where there is no evidence that such an application was timely filed with BIA.

Nora L. Sanford, 43 IBLA 74 (Sept. 19, 1979)

SUBSTANTIAL COMPLIANCE

Where the claimant of a trade and manufacturing site who has substantially complied with the requirements of law and regulation makes a legitimate contract for the conditional sale of the business to another before filing his application for patent, equitable adjudication will be invoked to prevent an intervening land classification action from operating to destroy the interest of both the claimant and his buyer and defeating the purpose of the Act.

Paul M. Jovick, 19 IBLA 283 (Apr. 7, 1975)

Where a homestead entryman has cleared and broken ground and allowed a portion of the cleared, plowed acreage to grow up with a species of native wheat grass, such acreage is not "cultivated" within the meaning of 43 CFR 2567.5(b), and the entryman's final proof is properly rejected where it shows on its face that the native grass acreage constituted an indispensable portion of the entryman's attempt at meeting the cultivation requirements of the homestead laws. Since there was not substantial compliance with the cultivation requirements, equitable adjudication cannot be properly invoked.

Clarence Ray Mathis, 29 IBLA 150 (Mar. 4, 1977)

A factual error by the Government is not a basis for imposing the extraordinary relief of equitable estoppel where the person seeking the estoppel became aware of the true facts shortly thereafter, had not substantially complied with the public land laws, and continued knowingly and repeatedly trespassing on lands not open to settlement, where the Government makes prompt, reasonable, and consistent efforts to correct any misunderstanding caused by this error, and where the Government's actions did not result in the foreclosure of an opportunity to assert a legal right.

Where during the 5-year term of a homestead there is a failure to comply with the residence and cultivation requirements and the requirement of a habitable house, and where subsequent efforts meet only the requirement for a habitable house, there can be no equitable adjudication based on substantial compliance with the homestead law.

Wherein one year the homestead land is leveled and seed is hand broadcast on the ground in late October after the first frost in Alaska, and the following year seed is simply scattered on the snow by a claimant who asserts he is "not a farmer at all" and does not know whether this is accepted practice, the cultivation requirements of the law have not been substantially met.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

EQUITABLE ADJUDICATION--Continued

SUBSTANTIAL COMPLIANCE--Continued

Equitable adjudication of an application to purchase a headquarters site claim filed at least 8 years after the land has been withdrawn must be denied as substantial compliance with the law has not been made where neither occupancy of the site prior to the withdrawal nor after the withdrawal could validly be considered under the law.

Rene P. Lamoureux d/b/a Frenchy Lamoureux, 39 IBLA 36 (Jan. 15, 1979)

ESTOPPEL

The doctrine of collateral estoppel will not bar the administrative contest of the validity of five mining claims which, together with another claim, were the subject of previous condemnation actions for the taking of a temporary exclusive easement over the claims, where the issue of the validity of the individual claims was not actually litigated and it was wholly unnecessary for the Court to adjudicate that issue in rendering its judgment.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

A noncompetitive oil and gas lease applicant's failure to submit the statement of interest of the other parties in interest to the offer is not excused, nor is the Department estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease to the applicant on an offer which was deficient for the same reason.

Leon E. Flanagan et al., 25 IBLA 269 (June 28, 1976)

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy B. Cousins, 26 IBLA 223 (Aug. 17, 1976)

ESTOPPEL--Continued

An applicant for a private land exchange cannot benefit from the doctrine of equitable estoppel where no agent of the Government who was authorized to consummate the exchange falsely and materially misrepresented to or concealed material facts from appellant concerning the Government's position with respect to the proposed exchange.

Siesta Investments, Inc., 28 IBLA 118 (Nov. 15, 1976)

A lessee of the water from a well owned by the Federal Government, who agrees that his use of the water will not be used as a basis for obtaining a permanent water right and who nevertheless proceeds to try to obtain a water right in State court based on that use, will be estopped from asserting any resulting decree of the State court for any purpose.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

Where an applicant for grazing privileges does not show the type of misconduct which would be a basis for estoppel against the Government, the provisions of 43 CFR 4115.2-1(e)(9)(i) and (e)(13)(i) cannot be waived on the basis of such misconduct.

A. D. Findlay (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

Where tests performed by the BLM to determine whether rock placed on a timber road met specifications were not completed until the timber purchaser had finished his work on the road, there can be no basis for estoppel even if that doctrine were otherwise applicable.

Tomco, Inc., 29 IBLA 298 (Mar. 30, 1977)

An estoppel of the Government to refuse acceptance of late rental payments is not created where in the past the BLM accepted rental payments after the anniversary date pursuant to 43 CFR 3103.3-2(e)(1) providing if the office to receive payment is closed on the anniversary date, payment will be considered timely if received on the next official working day.

A prerequisite of the reinstatement process is the tender of payment within 20 days of the anniversary date which protects the right of the lessee to petition for reinstatement. The check is then deposited in an unearned account to create a record of it, and bring it under accounting control, however, depositing of the check does not create an estoppel against the Government.

Adolph F. Muratori, 31 IBLA 39 (June 21, 1977)

The Government is not estopped from applying new provisions enacted in an amendment to the Mineral Leasing Act to an application for modification of an existing coal lease on account of laches, administrative delay, or misrepresentation by Government employees of the fact of Federal ownership of the land sought in the application.

Estate of Malcolm N. McKinnon, 31 IBLA 290 (July 22, 1977)

ESTOPPEL--Continued

The fact that a mining claimant has held a claim for many years and performed work on the claim does not, by itself, create any rights against the Government which will estop the Government from determining the validity of the claim. It is incumbent upon the locator of a mining claim to exercise considerable care in ascertaining the status of the land embraced in the claim and the limitations of his rights as the holder of an unpatented mining claim. Failure of a Government employee to advise appellant that the land embraced in the mining claim was closed to mining location cannot give life to an invalid claim.

Arthur W. Boone, 32 IBLA 305 (Sept. 30, 1977)

Estoppel will not be applied against the Government when the sole basis for so doing is a statement by an applicant for a prospecting permit that a Geological Survey employee indicated that he could file the application in his own name, since this statement was not necessarily a misrepresentation, and since in any event the applicant had no right to rely on this statement because the Geological Survey is not the agency authorized to make representations as to the proper filing of prospecting applications.

Billadean Patton, Essex Minerals, Inc., National Bulk Carriers, Inc., 32 IBLA 350 (Oct. 21, 1977)

The failure of a noncompetitive oil and gas lease offeror to complete the date on the simultaneous oil and gas drawing entry card is not excused, and the Department is not estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease in acceptance of an offer which was deficient for the same reason.

Zina A. Dogan, 33 IBLA 213 (Dec. 21, 1977)

Where a BLM employee allegedly misinforms a mining claimant concerning the filing of a patent application, the Government is not estopped from requiring that the resulting error be corrected.

Charles Bones, Mrs. Leonard Shipper, 33 IBLA 206 (Jan. 10, 1978)

The general rule is that reliance on erroneous or incomplete information provided by Federal employees cannot create any rights not authorized by law.

Felton R. Hall, 33 IBLA 349 (Jan. 18, 1978)

NZL Investment Corp., 36 IBLA 359 (Aug. 31, 1978)

Forrest S. McClinchey, 38 IBLA 211 (Dec. 6, 1978)

There is no estoppel applicable to the Department of the Interior where it has changed a clearly erroneous regulation to comport with an amendment to the oil and gas leasing laws enacted some 15 years previously. The Department is not precluded from correcting that which is "clearly erroneous."

Yates Petroleum Corp., 34 IBLA 7 (Feb. 8, 1978)

ESTOPPEL--Continued

The Government is not estopped from collecting royalty payments which are owed, even if it has accepted improper payments in the past.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

Long-term belief by Federal officers that land was subject to a valid patent, when, in fact, the land could not legally have been conveyed because of withdrawal or reservation, does not serve as a basis for divesting the Government of title to the land by estoppel.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

Reliance upon erroneous advice or incomplete information provided by BLM employees cannot relieve the owner of a mining claim of an obligation imposed on him by statute or relieve him of the consequences imposed by a statute for his failure to comply with its requirements.

Paul S. Couper, 35 IBLA 112 'May 15, 1978)

Clair B. Caldwell et al., 42 IBLA 139 (Aug. 16, 1979)

Where BLM reduced grazier's privileges because of his loss of ownership of base property from which his qualifications had not in fact been transferred away for attachment to other property owned by grazier, equitable estoppel is not invoked against BLM since grazier by his own testimony at hearing showed that he was not ignorant of true facts as to lack of transfer back of grazing qualifications and that he did not in fact rely to his detriment on BLM official's representations on that transfer back.

Roger J. Rasmusson, 36 IBLA 98 (July 13, 1978)

Where a mining claimant alleges that forest rangers allowed him to build and occupy a cabin on the claim without informing him that it was illegal to do so, it is not appropriate to estop the Government from declaring the claim null and void, for several reasons: mere acquiescence in an action is not "affirmative misconduct" by a Government employee, as it was not false representation or concealment of material facts done with the intent that the claimant rely thereon; the impression created by the inaction of the forest rangers was not erroneous and, so, claimant was not misled, as he could rightfully move the cabin to the site and occupy it as long as so doing was incident to mineral development of a valid mining claim; and because the claimant should have known that he could not live on the premises indefinitely despite his failure to develop the claim, and that he would have to move the cabin or lose it, if the claim was declared null and void.

United States v. seph Larsen and Ferris Larsen, 36 IBLA 130 (July 25, 1978)

Where the bidder may have understood from BLM that a bank draft was an acceptable form of remittance but submitted a sight draft, there is no basis for estoppel.

Mesa Petroleum Co., 37 IBLA 103 (Sept. 28, 1978)

ESTOPPEL--Continued

Reliance upon erroneous advice provided by a non-Governmental filing service cannot relieve an oil and gas applicant of an obligation imposed on him by regulation.

John G. Evans, 37 IBLA 364 (Nov. 2, 1978)

Reliance upon erroneous or incomplete information provided by Government employees cannot create any rights not authorized by law. 43 CFR 1810.3(c).

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

The authority of the United States to enforce a public right or protect a public interest is not vitiated or lost by acquiescences of its officers or agents, or by their laches, neglect of duty, failure to act, or delays in the performance of their duties.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

Reliance on erroneous information provided by Federal employees cannot create any rights not authorized by law.

W. R. and Margaret B. Collier, 39 IBLA 81 (Jan. 24, 1979)

Estoppel to preclude a charge of trespass is not invoked against BLM where BLM's partially completed fences on Federal land do not restrain cattle and there is no evidence that BLM agreed to construct and/or maintain said fences for the benefit of the grazier, and such grazier was at all times aware of these facts.

The grazing regulations (43 CFR 4140.1(b)(1), *inter alia*) (formerly 43 CFR 4112.3-1(a) and (b)) place the responsibility of controlling cattle squarely on the grazier, and Government range management policies as implemented under acts of Congress cannot be asserted to bar sanctions where trespasses have been proved, or to estop BLM from alleging trespasses.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

Equitable estoppel against the Government will not lie where there has been no affirmative misconduct by an authorized agent or officer resulting in a misrepresentation of fact upon which a party was led to rely to his ultimate detriment.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

ESTOPPEL--Continued

BLM is not estopped to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), by its failure to readjust said lease prior to or immediately after expiration of its 20-year period.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

The Government is not estopped from rejecting oil and gas lease offers because the offerors' leasing agent alleges that he relied on a representation by officers of BLM that his disclaimer of his interest in the offer was valid and therefore failed to amend his service agreement with his clients to remove the interest-creating provision, where it appears that BLM did not in fact so represent.

Frederick W. Lowey et al., 40 IBLA 381 (May 14, 1979)

Reliance on incomplete information supplied by Bureau of Land Management employees cannot estop the United States or excuse compliance with a regulation.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

The elements of an estoppel are the following: (1) The party to be estopped must know the facts; (2) he must intend that his conduct shall be acted on or must so act that the party asserting the estoppel has a right to believe it is so intended; (3) the latter must be ignorant of the true facts; and (4) he must rely on the former's conduct to his injury.

Estoppel is available as a defense against the Government if the Government's wrongful conduct threatens to work a serious injustice and if the public's interest would not be unduly damaged by the imposition of estoppel.

Estoppel of the Government is an extraordinary remedy, especially as it relates to public lands, and is to be applied with the greatest care and circumspection.

Edward L. Ellis and Steve B. Ellis, 42 IBLA 66 (Aug. 8, 1979)

A delay in adjudication of an application by the Department cannot create rights contrary to law.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Estoppel of the Government is an extraordinary remedy, especially as it relates to public lands, and is to be applied with the greatest care and circumspection.

The elements of an estoppel are the following: (1) The party to be estopped must know the facts; (2) he must intend that his conduct shall be acted on or must so act that the party asserting the estoppel has a right to believe it is so intended; (3) the latter must be ignorant of the true facts; and (4) he must rely on the former's conduct to his injury.

Estoppel is not available against the Government when the Government agent making representations acts beyond the scope of his authority. Furthermore, reliance upon information or the opinion of any officer or employee of BLM cannot operate to vest any right not authorized by law.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

ESTOPPEL--Continued

An oil and gas lease on which there is no well capable of producing oil or gas in paying quantities will automatically terminate on the anniversary date of the lease upon failure of lessee to pay the minimum annual rental, despite a partial payment submitted on the basis of a partial relinquishment, which was ineffective because not filed by the record title holder pursuant to 43 CFR 3108.1, and despite issuance of a Bureau of Land Management decision subsequent to the anniversary date confirming a decreased annual rental.

R. J. Bradshaw, 44 IBLA 101 (Nov. 30, 1979)

A person filing a simultaneous offer for an oil and gas lease is presumed to understand the difference between a filing in the name of a trust and a filing in an individual capacity, and despite an allegation that the trust filing was instructed by unspecified Bureau of Land Management personnel, the principles of estoppel may not be invoked to change a defective trust filing into a filing by an individual.

Tony C. Nielsen, 44 IBLA 269 (Dec. 19, 1979)

EVIDENCE

GENERALLY

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by the contestees shows that there has not been a discovery, it may be used in reaching a decision that the claim is invalid because of a lack of discovery, regardless of any defects in the Government's prima facie case.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

Nonrepresentative mineral samples alone cannot prove the existence of valuable mineralization exposed within a vein. If, however, other evidence establishes such mineralization, the samples may be given some weight to support geological inferences of the value of a lode mining claim.

Where the preponderance of the evidence in a mining claim contest supports an administrative law judge's dismissal of a contest complaint, that decision will not be disturbed upon appeal.

United States v. Kingsley Ranch Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

An administrative law judge has a duty to conduct a hearing in such a manner that all available relevant facts in a mining contest will be adduced. He should take special care to do so where a party is without counsel and there is confusion concerning the status of purported tendered evidence.

Evidence submitted on appeal after an initial decision in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

Where, prior to the rejection of her application, an applicant for a Native allotment was advised of findings which, unless rebutted, would result in the rejection of the application, and was afforded an extended period of time in which to submit additional evidence, evidence which is thereafter submitted for the first time on appeal from the rejection decision, without explanation of why it was not submitted when due, will not be favorably considered in adjudicating the propriety of the decision appealed from.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Mary Ayojiak, 22 IBLA 384 (Nov. 21, 1975)

An appeal before the Board on remand from the Court of Claims with instructions to admit evidence, previously excluded under the parol evidence rule, for the purpose of showing a pre-award agreement or an express or implied concession as to the rate of use of helicopter services, is denied where the record, augmented as the Court directed, shows that the Government did not change its method of contracting at appellant's request but rejected the proposal to include a guaranteed minimum daily rate of use and where an internal memorandum from appellant's president shows that he understood at the time of award that the contract could be flown at the rate of 5 hours per day rather than the rate of 7 hours per day alleged later when the contract proved unprofitable.

Appeal of Inter*Helo, Inc., IBCA-713-5-68 (Ct. Cl. No. 54-74 (Dec. 1, 1975) 82 I.D. 591

The Board of Land Appeals will not give favorable consideration to new or additional evidence submitted with an appeal from a rejection of a Native allotment application in the absence of a satisfactory showing why the evidence was not submitted to Bureau of Land Management within the period afforded the applicant for the submission of such evidence.

Where the preponderance of credible evidence indicates that the land applied for was not substantially used and occupied by the applicant, to the potential exclusion of others, for at least 5 years, the application is properly rejected.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

Although, in a mining claim contest, the Government may make a prima facie case of no discovery by the testimony of a mineral examiner that he has been on the land in issue and saw nothing of mineral value, a prima facie case is ordinarily not made where it is established that the examiner was not on the land in issue.

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

In determining whether a profitable market existed for material from a particular mining claim from which no material has been sold, a hypothetical market must be created in which the new material plays its part. The new material from the claim at issue must be included with that from all other known potentially competitive sources in calculating the factor of supply. If the supply so calculated amounts to a superabundance and so overwhelms the existing demand as to reduce the value or profit increment to a level below that which would prove attractive to a prudent man, the material cannot be said to be marketable at a profit.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by contestee shows there has not been a discovery, it may be used in reaching a decision that the claim is invalid regardless of any defects in the prima facie case.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

Extrinsic evidence may be used to make definite the description in a private deed which contains a latent ambiguity, either to determine actual or color of title. Therefore, a color of title claimant may introduce extrinsic evidence to establish whether the deeds in her chain of title were based upon plats, records and other documents which can be read together with the deeds as creating a color of title beyond the actual title shown on an official Federal survey plat.

Mable M. Farlow, 30 IBLA 320 (June 7, 1977) 84 I.D. 276

The burden of the proponent is not simply to preponderate in the evidence produced; its burden is to produce a preponderance of credible evidence, and the trier of

EVIDENCE--Continued

GENERALLY--Continued

fact is not required to believe or give any weight to testimony which is inherently incredible.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a proceeding to determine the validity of an unpatented mining claim the claimants must prevail, if at all, upon the strength of their own case, rather than upon any weakness in that of the Government.

United States v. R. B. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

When a mineral examiner testifies for the United States that a discovery has not been made on a mining claim, his opinion must be based on a proper factual foundation. However, he is not required to perform discovery work, to explore or sample beyond a claimant's workings, or to excavate or rehabilitate any purportedly mineralized area which is concealed by overburden or is otherwise difficult of access. Under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

When 33 percent of the available forage in a grazing allotment is on Federal land and the remainder is on private land, it is appropriate to find that 33 percent of the forage consumed by cattle throughout the allotment was Federal forage, in the absence of evidence to the contrary.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

Proposed testimony of a witness as to the procedures that would be followed by a person in private industry in making a complete evaluation of a mining claim is properly excluded as irrelevant because it does not have a logical relation to the type of an examination made by a Government mineral examiner to establish the facts on which the validity or invalidity of a mining claim may be determined.

Where a contestee fails to follow up his initial suggestion at the hearing that a deposition of a possible witness be taken with a proper request, it is not error for the administrative law judge to decide the case on the record made at the hearing.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

EVIDENCE--Continued

GENERALLY--Continued

Where the official record of an oil and gas lease offer contains no indication either of when BLM received payment of first-year rental on the lease or of when BLM believes it received this payment, and where the only indication of when the payment was made is a photocopy, submitted on appeal, of a portion of an unidentified, undated receipt which does not bear either the offeror's name or the serial number of his offer or the control number of the document, and which is not included in the official record, BLM's decision rejecting the offer under 43 CFR 3112.4-1 for failure to make this payment within 15 days of the offeror's receipt of notice that the rental was due will be reversed.

Willis L. Lawton, 36 IBLA 178 (July 31, 1978)

In a mining claim contest, no weight will be given to claimant's allegation that the Government's mineral examiner failed to sample the discovery point or the best mineral showings, where the claimant was invited to indicate his discovery to the examiner and failed to do so, and where he also failed to introduce convincing evidence of his own that a discovery had been made.

United States v. Larry Joseph Sims, 36 IBLA 316 (Aug. 23, 1978)

Where a corporate patent applicant can trace its ownership of the claim back through a series of conveyances to a mesne owner who had title to the claim quieted in her by the decree of a court of competent jurisdiction, there is no need to look behind the quiet title decree to an earlier break in the chain of title unless there is reason to believe that the interest which is unaccounted for was not disposed of by the litigation. However, a court decree which merely distributes the assets of a decedent's estate is not a "quiet title decree" in this context, and does not ordinarily foreclose the interests of third parties who hold the record title to mining claims.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

Where the official record of an oil and gas lease contains nothing either showing that an oil and gas lease applicant's $10 filing fee was included in a check which was dishonored by the drawee bank, or rebutting the applicant's assertion that his filing fee was instead included in another check processed by BLM without incident, BLM's decision to cancel a lease issued pursuant to this offer because no filing fee was paid as required by 43 CFR 3103.2-1(a) will not be sustained for that reason.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

Where an oil and gas lease offeror fails to respond within a prescribed period of time to an order to submit specific information necessary to determine whether his offer is valid, it is appropriate to reject the offer.

Where a protestant against the issuance of an oil and gas lease supports his allegations that the lease offer is not qualified with sufficient evidence to warrant further inquiry or investigation by BLM, the protest should not be summarily dismissed for failure of the protestant to make positive proof of his allegations. Instead, the protest should be adjudicated on its merits after all available information has been developed.

Lee S. Bielski, 39 IBLA 211 (Feb. 8, 1979) 86 I.D. 80

EVIDENCE--Continued

GENERALLY--Continued

Where the evidence as to specific trespass indicates that of a number of cattle counted some were located on private intermingled land, but there were no barriers, either natural or artificial, which would have prevented the cattle on private land from going onto the public land, it is proper to find that all cattle counted would tend to consume forage at a rate proportional to the ratio of forage available on private and public lands.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

Where legal conclusions are reached in an appellate decision upon undisputed facts, and there has been no proffer of further facts which could compel different legal conclusions, no useful purpose would be served for a hearing, and a request therefor is properly denied.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979) 86 I.D. 345

Peter Panruk, 43 IBLA 69 (Sept. 19, 1979)

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

Where a protestant against the issuance of leases, for oil and gas presents evidence demonstrating the existence of a written partnership between joint offers, and the offerors have not complied with the regulations requiring certain showings of partnerships, the offers cannot be honored.

American Quasar Petroleum Co., 42 IBLA 243 (Aug. 22, 1979)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

EVIDENCE--Continued

GENERALLY--Continued

A Government mineral examiner in evaluating a mining claim is not required to perform discovery work, to explore or sample beyond a claimant's workings and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner. While it is true that under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim, in the case at bar we need not decide whether a prima facie case was made by contestant since the totality of the evidence establishes invalidity of the claims.

The Board properly adopts a decision of an administrative law judge holding mining claims null and void for lack of discovery of certain minerals, *i.e.*, gold, silver, iron, titanium, feldspar, mica, silica refractory clay, stoneware clay, refractory sand and glass, where nondiscovery is established by the totality of the evidence.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

Ordinarily, the postmark on a letter will be assumed to indicate the date and place of mailing in the absence of evidence to the contrary. Reasonable diligence is found where a rental payment, due in Billings, Montana, on June 1, 1979, was actually mailed from Wilmington, Delaware, on May 29, 1979, despite the fact that the envelope containing such payment bears only a Billings, Montana, postmark of June 2, 1979.

Phyllis Lane Zehr, Alice M. Conte, 44 IBLA 261 (Dec. 19, 1979)

The decision of an administrative law judge will not be disturbed on appeal where the preponderance of the evidence supports the result he reached.

United States v. Knox-Arizona Corp., 44 IBLA 297 (Dec. 31, 1979)

ADMISSIBILITY

Where, in an effort to negotiate a compromise settlement of an alleged grazing trespass, a rancher concedes that the trespass occurred to the extent of a specific number of animal unit months of forage, but the proposed settlement is not consummated and the case goes to a hearing on its merits, evidence of the purported admissions made by the party during such negotiations must be excluded as not competent to show either the fact or the extent of the trespass alleged.

Cesar and Robert Siard, 26 IBLA 29 (July 8, 1976)

Where the testimony and conclusions of an expert witness are based on careful examination of a mining claim by appropriate scientific methods, they will be accepted into evidence and given appropriate weight regardless of the fact that the witness may not be registered within that particular State as an expert in his field.

Cabot Sedgwick et al. v. C. E. Parker, 27 IBLA 256 (Oct. 20, 1976)

EVIDENCE--Continued

ADMISSIBILITY--Continued

The testimony of a qualified geologist and professional mining evaluation engineer concerning the marketability of a deposit of sand and gravel at a particular time may be accorded substantial evidentiary weight under the standard in Verrue v. United States, 457 F.2d 1202 (9th Cir. 1972), if it is established that he was in the area at the time, had studied the local sand and gravel market and the factors which affected it, as well as the nature of the material and the methods and costs of removing, processing and marketing it.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bakke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

Proposed testimony of a witness as to the procedures that would be followed by a person in private industry in making a complete evaluation of a mining claim is properly excluded as irrelevant because it does not have a logical relation to the type of an examination made by a Government mineral examiner to establish the facts on which the validity or invalidity of a mining claim may be determined.

Where a contestee fails to follow up his initial suggestion at the hearing that a deposition of a possible witness be taken with a proper request, it is not error for the administrative law judge to decide the case on the record made at the hearing.

United States (Contestant) v. Earl Prince and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

Evidence of the design and specifications in a subsequent contract over the same sand dunes involved in the instant appeal was not admissible and was properly excluded under Federal Rule of Evidence 407, when offered to prove design defects or feasibility of precautionary measures.

Appeal of Evergreen Engineering, Inc., IBCA-994-5-73 (May 17, 1978) 85 I.D. 107

It was proper to deny mining claimants' request to redrill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Levon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

EVIDENCE--Continued

ADMISSIBILITY--Continued

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John B. Hunt et al., 43 IBLA 363 (Oct. 29, 1979)

BURDEN OF PROOF

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant. However, if the Government in a mining contest fails to present a prima facie case and the contestees move to dismiss the case and rest, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

Where the Government has made a prima facie case of lack of discovery in a mining contest, any issue in doubt as to discovery raised by the evidence must be resolved against the party having the risk of nonpersuasion, the mining claimant. If a mining claimant fails to show by a preponderance of the evidence as to such issue that there has been a discovery of a valuable mineral deposit he has not satisfied his burden of proof and an administrative law judge must declare the claim invalid, rather than leave the question of the claim's validity unresolved.

In making a prima facie case in a mining contest involving a common variety of material, it is only essential for the Government to establish that the contestees had not prior to July 23, 1955, met the criteria used in determining marketability at a profit. It is not essential that the Government's evidence prove conclusively that the material could not, in fact, be marketed at a profit, but only that it was not sold or marketed. The Government is not required to do the discovery work upon a mining claim; it is only necessary that the exposed areas of a claim and the workings on a claim be examined to verify if a discovery has been made by the mining claimant.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

A determination by a district manager of the grazing capacity of lands offered for a sec. 15 grazing lease will not be overturned in the absence of a clear showing of error. The burden of proof is upon the party challenging such determination to show that the decision is erroneous or that he has not been dealt with fairly.

John T. Furtha, 19 IBLA 97 (Mar. 4, 1975)

Raney Brothers, 24 IBLA 265 (Mar. 25, 1976)

The fact that much of the evidence that supports a mining claimant's position in a mining claim contest is presented by the Government, rather than the claimant, does not mean that the claimant's burden of proof has not been met, because the entire evidentiary record must be considered in weighing the evidence and not simply the claimant's evidence alone.

United States v. Kinsley Beach Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

In a mining contest a mining claimant is the true proponent under the Administrative Procedure Act, 5 U.S.C. § 556(d) (1970), of a rule or order that he has complied with the mining laws, and he has the ultimate burden of proof -- the risk of nonpersuasion -- to show by a preponderance of the evidence that there is a valuable mineral deposit on the claim, when the Government has made a prima facie case of lack of such a discovery.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

A protestant against the filing of a survey plat bears the burden of proof, *i.e.*, the risk of nonpersuasion, to show why the plat should not be accepted, and the applicant state has the burden of demonstrating that land is swamp and overflowed in character. The protestant against the filing of a survey plat who claims that title to the land passed to the state under the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), is properly assessed with the burden of proof, *i.e.*, the risk of nonpersuasion, in the proceeding.

In a hearing held to determine whether lands were swamp and overflowed at the time of the Swamp Lands Act, 43 U.S.C. §§ 981-986 (1970), the parties asserting the state's title fail to meet their burden of proof when the evidence submitted indicates that the mangrove area claimed as swampland is in fact below the line of mean high tide, and was properly delineated from the upland by the meander line.

Virgil Lopez et al., 21 IBLA 33 (June 17, 1975)

The successful drawee in a drawing under the special simultaneous filing procedure for noncompetitive oil and gas lease offers is automatically disqualified if he fails to pay rental within 15 days from receipt of notice that such payment is due. A statement by such a drawee that he did not receive a notice and that his office records where his oil and gas records are contained lack any copy of the rental notice is insufficient to overcome the presumptive effect of evidence that Bureau of Land Management officials mail copies of the notice of rental, a notice of stipulations to be signed, and the stipulations in the same envelope, and it is clear the envelope containing the stipulations was received at the drawee's office.

A. G. Golden, 22 IBLA 261 (Oct. 24, 1975)

In a mining contest, the mining claimant is the proponent of a rule or order that he has complied with the mining laws entitling him to validation of the claim, and the claimant has the ultimate burden of proof. The Government has assumed the burden of going forward with sufficient evidence to establish a prima facie case of invalidity. When this has been done, the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

A lode mining claim for barite is properly declared null and void in the absence of a showing of a discovery on the claim of a deposit of barite which would warrant a prudent man in further expending his labor and means in the reasonable expectation of developing a valuable mine. Evidence of mineralization which may justify further exploration is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

Once the Government has established in a mining claim contest a prima facie case that the claims are not valid for lack of discovery, the burden shifts to the contestee to prove the discovery of a valuable mineral deposit by a preponderance of the evidence.

United States v. Howard S. McKenzie, 29 IBLA 270 (Mar. 28, 1977)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant, but if the Government in a contest fails to present a prima facie case and the contestee moves to dismiss the case and rests, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

Where the Government has made a prima facie case of lack of discovery in a mining contest, and a mining claimant fails to show discovery by a preponderance of the evidence, he has not satisfied his burden of proof and the claim must be declared invalid.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

United States v. Emma Elizabeth Conner, and Walter J. Nolte, as the Heirs of H. V. Sweet, a Last Known Director of the Arlington Gold Mining Co. (Consolidated), 31 IBLA 173 (July 5, 1977)

EVIDENCE--Continued

BURDEN OF PROOF--Continued

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

The Goverment has the burden of proof that the contractor failed to deliver the goods. The contractor has the burden of proof that its failure was excusable. Where the only evidence of excusability was a letter from the contractor saying that it was delayed by delays in procurement of components and unexpectedly slower rates of system checkout and software debugging, the contractor has not carried its burden of proof of excusability and the appeal is denied.

Appeal of CSP, Inc., IBCA-1137-12-76 (Nov. 10, 1977) 84 I.D. 917

A Bureau of Land Management appraisal from which the annual rental for a special use permit is calculated will be upheld unless the permittee shows by substantial and positive evidence, specific errors in the method or facts on which the appraisal is based.

Michael S. Deering, 33 IBLA 142 (Dec. 19, 1977)

The Government, after waiver of the original delivery schedule, has the burden of proof that the unilaterally established new schedule is reasonable under all the circumstances existing at the time of the reestablishment, which, however, it failed to show.

Appeal of Systems Technology Associates, Inc., IBCA-1108-4-76 (Jan. 19, 1978) 85 I.D. 12

In a mining contest a contestee may rest at the close of the Government's case and move for a dismissal based on the Government's failure to make out a prima facie case of a claim's invalidity. If, however, the contestee goes forward and presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

Sec. 503 of the Federal Land Policy and Management Act of 1976 gives the Secretary discretionary authority with respect to issuance of rights-of-way. It would not be in public interest to grant appellant right-of-way because of inadequate water flow in Shoshone River and because of potential interference with planning for a modification of Buffalo Bill Dam. A decision by BLM, made in exercise of its discretion, to reject a water pipeline right-of-way application will be affirmed when the record shows the decision to be a reasoned analysis of factors involved made in due regard for public interest, and no sufficient reason to disturb decision is shown.

Broken H Ranch Co., 34 IBLA 182 (Mar. 21, 1978)

EVIDENCE--Continued

BURDEN OF PROOF--Continued

Where, in a mining contest, a contestee presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

A mining claimant who is required by 43 CFR 3833.1-2(b), to file certificates of location with the Bureau of Land Management within 90 days of the date of location of his claims, has the burden of rebutting the presumption that Bureau officials properly discharged their official duties in receiving and date stamping all such certificates properly tendered to them. A mere assertion that Bureau officials did not properly discharge their duties fails to meet the claimant's burden of proof.

E. P. Morgan, 36 IBLA 379 (Aug. 31, 1978)

In mining claim contest, Government must only go forward with evidence to establish prima facie case of no discovery of valuable mineral deposits, and burden then shifts to mining claimant to prove by preponderance of evidence that his claim is valid.

Government has established prima facie case when its mineral examiner testifies that he has examined mining claims in issue and found mineral values insufficient to support finding of discovery of valuable deposits.

United States v. Michael D. Marica, 37 IBLA 68 (Sept. 18, 1978)

In a hearing held pursuant to the Administrative Procedure Act, evidence sufficient to support a decision must be reliable, probative, and substantial. 5 U.S.C. § 556(d) (1976).
